Bosch in every detail.
German Engineered.

Everyone knows Germans deliver world-class performance and quality craftmanship through making precise, powerful machines. Using the most advanced German technologies, we have created an Asian-inspired washing machine engineered to provide you an unsurpassed laundry experience.

Why choose Bosch?

Bosch quality

All Bosch products are manufactured to highest possible standards, using only premium quality materials. We undertake quality and endurance test for our products under continuous usage conditioning to further strengthen the customer's peace of mind.

Green Technology inside

This signet denotes products that focus on energy and water efficiency while achieving top performance based on Bosch technologies.

10 Year EcoSilence Drive® motor warranty

Bosch assures our customers with a 10 year motor warranty for our innovative EcoSilence Drive™.

Professional washing solutions.

Bosch HomeProfessional boasts the very latest technology, offering you maximum washing power, minimum consumption and lots of convenient functions and programmes.

The unique i-DOS® Intelligent Automatic Dosing System

Automatically measures the precise amount of detergent needed for each load.

VarioPerfect™
The ultimate in convenience

Do laundry quickly with the ultimate control over time and money using SpeedPerfect and EcoPerfect.

SelfCleaning Detergent Drawer

The SelfCleaning Detergent Drawer is automatically cleaned with a vigorous wash action. This saves you the annoying chore of removing leftover detergent after completing the wash cycle.

ActiveWater™

All Bosch washing machines feature an automatic load sensing function that adapts the water consumption to the relevant load size.

Reload function

The reload function allows additional items of laundry to be added on after the programme has started by pressing the start / reload button easily.

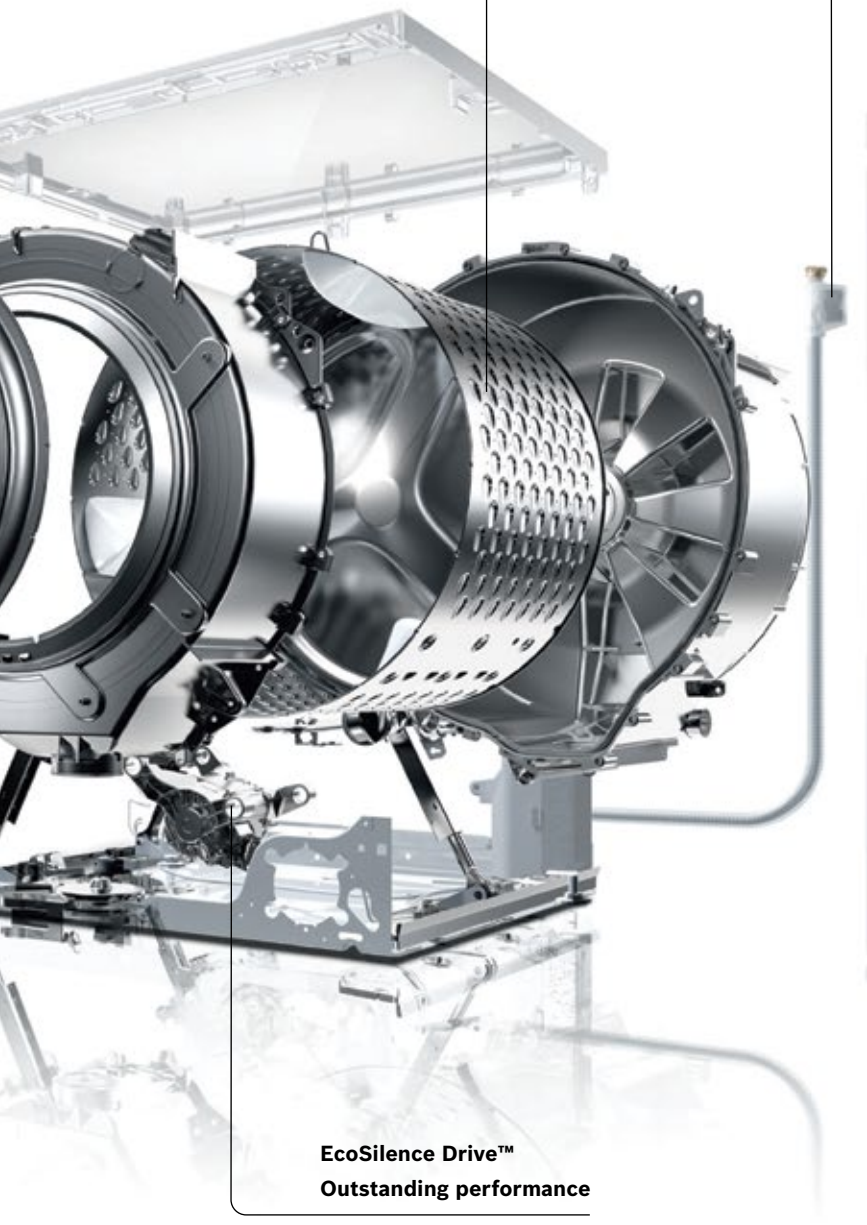
** Features applicable for specific washers only.*

VarioDrum™

The droplet-shaped drum* and asymmetrical paddles rotate your laundry to the centre from different directions for a powerful yet gentle wash.

AquaStop™
Anti-flood protection

The AquaStop™ system includes a valve that is directly connected to the water tap. Should a leak be detected, the sensor activates and cuts off water supply at the tap connection, which prevents flooding.



AntiVibration™ design

Our AntiVibration™ design increases stability of the housing and reduces vibrations.

Automatic Load Sensing

Automatically detects your load to dispense the right amount of water needed for washing.

EcoSilence Drive™
Outstanding performance

Powerful, durable, quiet and efficient. That is the brushless motor that provides better overall washing performance.

** Image for illustration purpose only.*

Breakthrough innovation

Hygienically clean at very low temperatures.

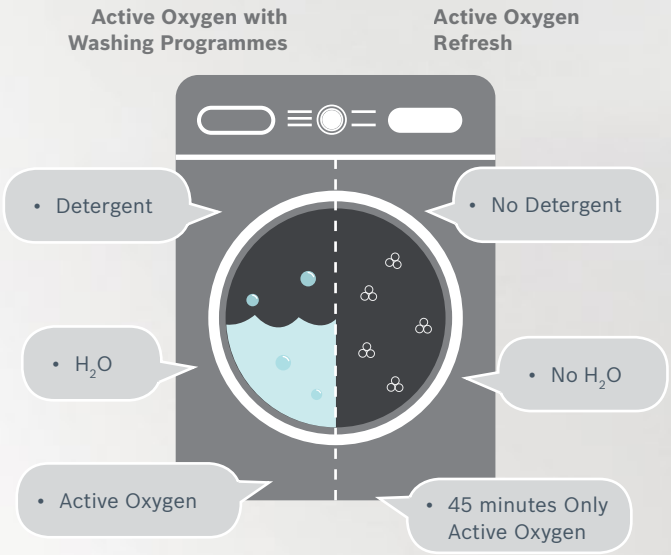
Active Oxygen

Thanks to our wfk-certified breakthrough ActiveOxygen™ technology, up to 99.99%* of bacteria and germs are effectively eliminated from even the most delicate fabrics.

Even if you choose to wash your clothes at low temperatures to preserve their colours, you can still be assured of optimum hygiene levels without the use of chemical additives. Experience the best possible cleaning result that ensures your favourite clothes are well taken care of.

DID YOU KNOW ?

Difference between Active Oxygen & Active Oxygen Refresh Programme



* *Up to 99.99% of E.coli, C. albicans, S. enterica, A. brasiliensis, S. aureus, Bacteriophage MS2 in the "Fast / mix cold" programme with regular liquid detergent in the recommended amount and a 4kg load – test MB 7623/15 of 29 July 2015 at the wfk – Institute for Applied Research GmbH for BSH Hausgeräte GmbH.*

Refresh your laundry with the best hygiene and garment care in just 45 minutes.

Active
Oxygen Refresh

Our new Active Oxygen™ Refresh programme uses breakthrough technology to clean and remove odours so you can freshen your laundry with a quick, hygienic wash.

Freshens in 45 minutes

A quick 45 minutes is all it takes to freshen up your clothes and also removes the BBQ odour from a smoky dinner out!

Garment Protection

Preserves delicate fabrics and colours as it cleans thoroughly even at low temperatures.

A whole new level of hygiene

Eliminates up to 99.99% of germs and bacteria with Active Oxygen™ that hygienically cleans without a need for chemical additives.

A quick guide to using ActiveOxygen™

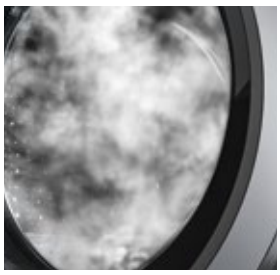
1

Select your preferred wash programme* and activate ActiveOxygen™. Temperature required will be max 40°C.

3

During the selected wash cycle, clothes and textiles are thoroughly washed and cleaned.

* *ActiveOxygen™ is only applicable for selected programmes.*



2

Before washing cycle begins, ActiveOxygen™ will pretreat garments. A fine mist of ActiveOxygen, which is produced by the system itself, is emitted from the drum. No other chemicals additives are needed.

4

Your laundry is treated with ActiveOxygen™ again before the final rinse cycle.

Results

Up to 99.99% of germs and bacteria removed with ActiveOxygen™ technology even at very low temperature.

What could be more simple? Fill up once and wash 18 cycles#.

You can rely on this convenience; fill up once and save every time you wash. Thanks to this unique intelligent automatic dosing, you can fill up once and save on detergent every time you wash.

i-DOS drawer 1

Add up to 0.99 litres of liquid detergent (eg. all-purpose or colour) to this drawer.

i-DOS drawer 2

Add 0.44 litres of liquid detergent or fabric conditioner to this drawer.

Manual dosing

If you prefer, you can continue to dose manually for all programmes, except the automatic ones. This is ideal, for instance, when you wish to use a special detergent, powder or stain remover.

Automatic programme*

All you have to do to obtain perfect washing results is press the start button: with the automatic programme, the necessary amount of detergent is dosed automatically and the wash process optimally adjusted to the demands of the particular wash load.

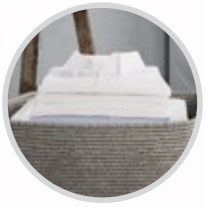
* *Only available in WGG244A0SG & WGG254A0SG*

\# *Based on OMO standard liquid detergent (non-concentrate) - average 50ml dose for a normal load.*

i-DOS gets your detergent dosing right for perfect laundry, every time.

Too little or too much detergent? Forget the guesswork. i-DOS prescribes precise dosing amounts to care for all your laundry needs.

Ideal for sensitive skin
Just the right amount of detergent is dispensed to ensure residue-free laundry that keeps you free from skin irritation.



Whites stay white
Automatic dosing ensures all your white or light-coloured clothes will stay brighter for longer.

Colours stay colourful
Precise dosing is prescribed to ensure your vibrant fabrics retain their original colour.

This is how i-DOS works:

- Each wash is intelligently weighed by the automatic load detection.
- Water hardness and detergent concentration is considered.
- Using the Automatic programme will detect the type of fabrics being washed.
- Automatic soil detection assesses how dirty the clothes are.
- i-DOS automatically doses the precise amount of detergent for each load.
- The amount of water is optimised for each load.

A quiet machine built to last, with perfect quality you can trust.

EcoSilence Drive™ combined with AntiVibration™ design makes Bosch washing machines among the quietest machines ever built.

Experience the power and energy efficiency of EcoSilence™ Drive

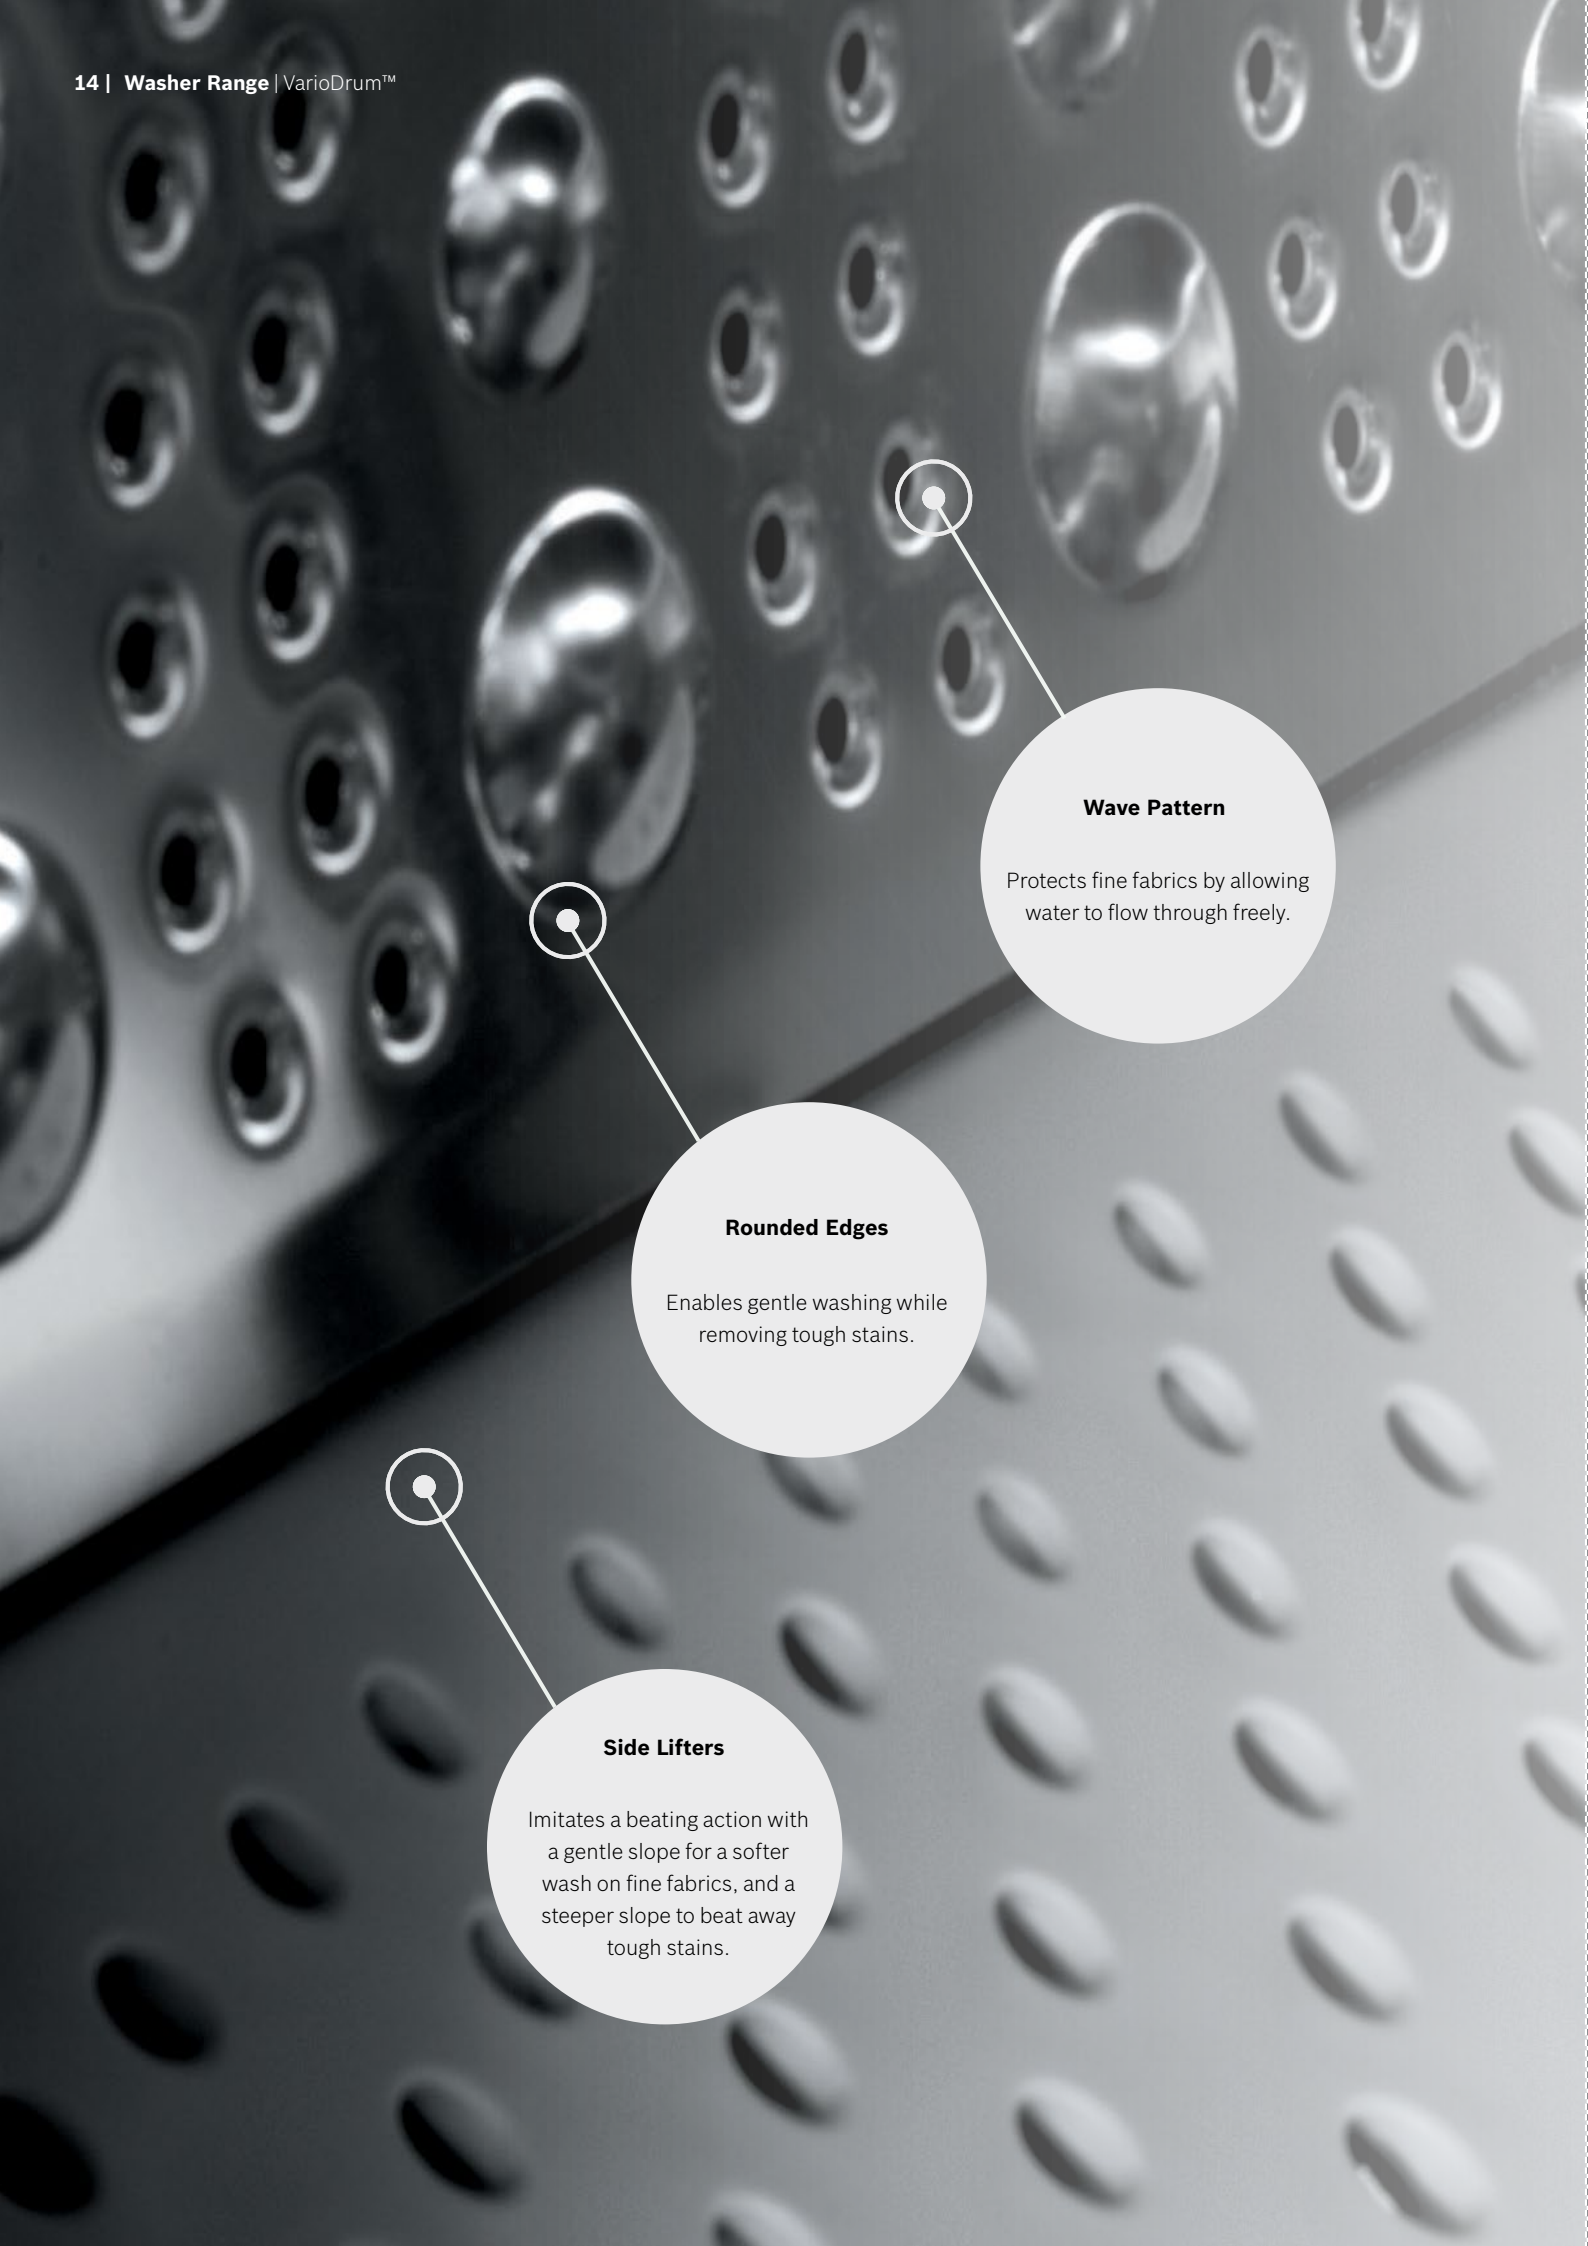
This revolutionary brushless motor is quieter, faster, more energy-efficient, durable and powerful than all others before it. Utilising the same advanced technology used in efficient machines such as wind turbines, the EcoSilence Drive™ achieves maximum power with minimum energy loss.

More efficiency – Thanks to its innovative design, the EcoSilence Drive™ is 35% more efficient than a standard motor.

More stability with AntiVibration™ design

The special AntiVibration™ design of the side walls increases stability and reduces vibrations. Improved sound insulation and low noise shock absorbers dampen noise further giving you a whisper-quiet machine.

Silence perfects your mind
BOSCH
Serie | 6
VarioPerfect
1200 rpm
8 kg



Wave Pattern

Protects fine fabrics by allowing water to flow through freely.

Rounded Edges

Enables gentle washing while removing tough stains.

Side Lifters

Imitates a beating action with a gentle slope for a softer wash on fine fabrics, and a steeper slope to beat away tough stains.

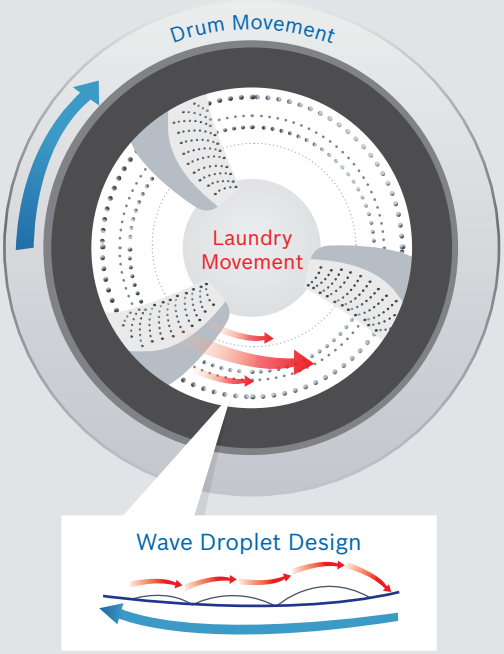
Gentle & thorough wash with VarioDrum™

The VarioDrum™ caters to all fabrics, taking into consideration the varied Asian climate. In one direction, the flat side of the paddle is extremely soft on fine textiles. If the drum rotates in the opposite direction, the steep side of the paddle ensures intensive cleaning for heavily soiled garments.

Furthermore, the wave droplets improve cleaning performance by providing additional surface contact with soiled garments in both directions. The spacious drum, optimised for loads of up to 9kg, turns out a perfect wash result, everytime.

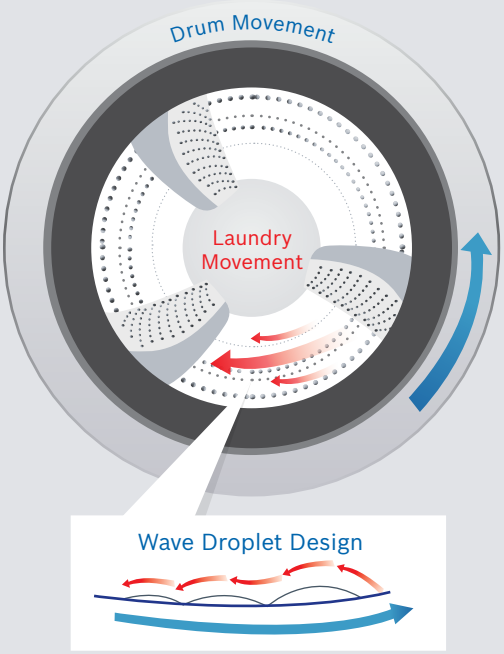
Illustration of VarioDrum™ during a wash cycle

Gentle on fabrics



The gentle sloping side allows fabric to glide smoothly over to protect textiles from overstretching.

Tough on stains



The steep side of the drum helps to beat away tough stains when fabric glides over it.

Just 60 minutes for laundry.

ExpressWash

We at Bosch know that quality time for you and your family is important. That is why we save every precious second of yours with our new range of washing machines with ExpressWash.

Designed to wash your clothes in less than 60 minutes^, we push the boundaries of how fast laundry can be done while keeping the results pristine perfect for you.

9 wash programmes **60** mins or less

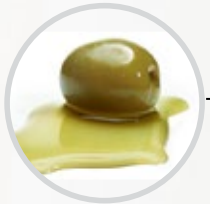
Programme	Normal wash cycle	With ExpressWash*
Cottons	175 MIN	60 MIN
Synthetics	119 MIN	59 MIN
Daily Wash	63 MIN	45 MIN
Shirts	65 MIN	60 MIN
Sports	47 MIN	42 MIN

* Programmes may differ from model to model. Please refer to the product specification list for details.
^ Please refer to specifications for details on the list of wash programmes that can be completed within 60 mins.

Our automatic AntiStain feature ensures a thorough, hassle-free wash.

Annoyed with stubborn stains? Fret not. Our AntiStain technology features programmes for easy and effective removal of common stains like blood, butter/oil, tea, grass/soil/clay and cosmetics*.

Temperature, drum movement and soaking times are adjusted according to types of stain for gentle yet reliable removal. You don't need to pre-treat or add chemicals to be rid of stubborn stains - get perfectly clean laundry with just the push of a button.



Butter/Oil

Grass/Soil/Clay

* *Types of stain removal vary in accordance with washer models.*

Cosmetics

Tea

Blood

Wash Programmes to suit every need.

Be it your new jeans, woollen garments, or favourite party dress, Bosch offers a number of special programmes to provide the ultimate in garment care and convenience.

SuperQuick 15’ / 30’

Short wash programme of approximately 15 / 30 minutes for up to 2 / 3.5kg of lightly soiled washing. Packing in a wash, two rinse cycles and improved rinse spinning, this is one of the shortest complete wash programmes in the market.

AllergyPlus

Reduces exposure to allergens that irritate sensitive skin by 99.99%†, through prolonging the maximum wash temperature, increasing the water level and adding an extra rinse to the wash cycle.

Automatic Programmes

2 automatic programmes which offer the ultimate in convenience: just press the button to automatically adjust the wash programme and dosing to the type of washing, load size and degree of soiling for perfect washing and rinsing results.

Mix / Daily Wash

Designed to wash mixed loads of cottons and synthetic fabrics.

* Features vary depending on models.

† 99.99% bacterial reduction as tested by TÜV SÜD PSB Singapore on 16 Oct 2019 on ‘AllergyPlus’ wash programme at 60°C for a recommended load of 4kg.

Wool Programme

Tailored to give the optimum treatment of wool garments. It offers a gentle wash action at a optimum temperature of 30°C. The gentle spin at the end of the cycle is short yet effective, extracting water gently from the woollen garments allowing them to retain their shape.

Delicate / Silk Programme

Suitable for silks, delicate viscose and synthetic items. The standard wash temperature is preselected at 30°C and depending on the fabric wash instructions, may be increased to 40°C or reduced to a cold wash to provide an accurate temperature controlled washing environment.

Kids

A thorough wash that removes unseen allergens, germs or dust mites that cling onto children's clothes, nappies and soft toys. An extra rinse follows to remove any traces of harmful detergent.

Duvet Programme

Machine-washable items stuffed with synthetic fibres, such as pillows, quilts and bedspreads; also suitable for items stuffed with down.

Top Load Washers

PowerWave Pro Wash System

Featuring a vario inverter with an innovatively-designed impeller and a dynamic waterflow system unique to top-loading washers, you can be assured of a thorough yet gentle wash for all your laundry.

How does it work?

Its powerful water displacement capabilities ensure spotless cleaning while the multi-directional water movement helps protect garments by gently gliding them against the drum surface.

PowerWave Pro

Innovative Impeller Design

+

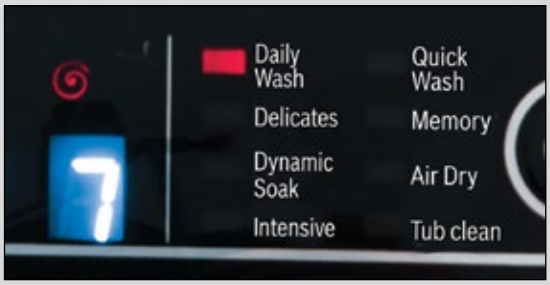
Multi-directional Waterflow

Top Load Washer Programmes

Performance

VarioInverter Motor
Make it last with an energy-efficient motor system that is powerful, silent and backed by a 10-year warranty.

SpeedPerfect
There's no rush with this time-saving feature that delivers the same perfect results 20% faster.



Variety of Wash Programmes
Clean any fabric easily with a variety of wash programmes: 'Normal' for everyday wear, 'Soft' for new and delicate clothes and 'Bedsheets / Towels' for heavy loads.

Convenience

Delay Start
You get to decide exactly when your clothes are cleaned. Go ahead and schedule the wash cycles for up to 24 hours—you're in charge.

One Touch Start
Skip the headache of not knowing which water level or wash options to select. Simply press the button and we'll decide for you.

Soft Closing Lid With Toughened Glass
No more loud noises or injuries with this gradually closing lid. Made with smooth, toughened clear glass, it gives you an unhindered view of what's in your washing machine at all times.

Memory Wash
It memorises your selected options and programme steps, even after being powered off. The next time you turn it on, simply use your saved settings.

AirDry
A 1hr program that dries clothes with induced fresh air. No more unwanted smells from drying clothes indoors!

Bosch Dryers perfects your drying solutions.

The Bosch heat pump, condenser and vented dryers bring you more benefits than you realise.

Save yourself from waiting for your clothes to dry under the sun. Unpredictable weather in the open may allow pollutants to contaminate them. Enjoy your clothing in softer and greater comfort state with Bosch dryers now.

Choosing a dryer.

	Heat pump dryers	Condenser dryers	Vented dryers
			
Air vent	–	–	✓
Energy Efficient	✓✓✓	✓✓	✓
Consider	Typically use less than half the energy per load compared to a non heat pump dryer	Your laundry area will be cooler as the dryer uses an internal heat exchanger to cool the air and condense the water vapour into either a drain pipe or a collection tank	These dryers simply expel warm moist air through a vent or a hose

We take the chore out of laundry.

As No.1 washing machine manufacturer, you can rest assured that when it comes to laundry, we've thought of everything to make sure you get the best drying results.

Stainless Steel Drum

Bosch dryers come with high quality stainless steel drum which is corrosion-resistant, ensuring long-term performance.

SelfCleaning Condenser™

The patented SelfCleaning Condenser™ means the water extracted during the drying cycle automatically cleans the condenser up to 4 times, removing the lint that would otherwise reduce its efficiency.

Sensitive Drying System

Gentle drying for every kind of fabric. With the Sensitive Drying System, your laundry is penetrated by a constant flow of gentle air from all sides. The unique SoftFlow® paddles rotate individual garments to take the rough out of the tumble. The result is soft and fluffy laundry without creases or wrinkling.

ActiveAir Technology

ActiveAir dryers are one of the most economical dryers on the market. The heat pump technology is designed to work without conventional heating. The air used for drying is heated by the heat pump and the existing heat is reused efficiently during the entire drying process.

* *Image for illustration purpose only.*
* *Features applicable for specific dryers only.*

Super Quick 40'

A shorter programme of 40 minutes for lighter loads up to 2kg, with sensor control to ensure great drying results, specifically for synthetic fabrics, cotton and blended fabrics.

Anti-Crease Cycle

Bosch dryers feature an anti-crease programme to reduce the burden of ironing. A gentle drum action automatically separates and smoothens your garments for up to 60 minutes on standard dryers, or 120 minutes for models with the reduced ironing option, to keep them wrinkle-free and ready-to-go.

Duo-Tronic

Throughout the drying cycle, built-in electronic sensors monitor moisture levels and temperature differences to prevent overheating and stop automatically once your garments reach the desired level of dryness. This ensures your garments are treated with maximum care with no excess energy consumption.

Dryer Programmes to suit every need.

Timed Programme Cold

Suitable for all types of fabrics. For freshening up or airing items of laundry that have been worn for long.

Timed Programme Warm

Timed programme for all types of fabric except for wool and silk. Dry laundry that is still slightly damp or has already been pre-dried. It is also suitable for the subsequent drying of multi-layered, thick laundry that does not dry readily.

Shirt / Blouses

Suitable for non-iron shirts or blouses made of cotton, linen, synthetic fibres or blended fabrics.

Duvet

Suitable for fabrics, pillows, bedspreads filled with synthetic fibres. Dry large items individually. Observe the care label.

Down Wear

Suitable for fabrics, pillows, bedspreads or eiderdowns filled with down. Dry large items individually.

Sportswear

Suitable for weather proof and outdoor clothing with a membrane coating and water-repellent fabrics.

** Features vary depending on models.*

Wash up to 10kg, or wash and dry up to 6kg... one load in one go.

Thanks to the new 70 litre VarioDrum, you can now wash up to 10kg of laundry. Alternatively, you can wash and dry up to 6kg in one go.

6kg in one go =

30 shirts or 50 pairs of socks or 10 pairs of trousers

Wash & Dry 60 minutes
Now you can wash and dry a load thoroughly in just one hour. This programme is suitable for lightly soiled clothes and for washing and drying heat resistant textiles, such as cottons or linen. Maximum load 1kg.

MyTime
You can now define your washing and drying time depending on the specific needs of your load. You can adjust or prolong the washing and drying time from 20 minutes in 10 minute incremental steps up to 120 minutes.
