Take the Chore out of Laundry 完美衣物護理方案

ActiveAir Heat Pump Technology 熱泵技術

Bosch's ActiveAir Technology, an innovative advancement of the heat pump technology, is designed to work without conventional heating. The air used for drying is heated in a cost-effective way.

Bosch ActiveAir 技術是熱泵技術創新的昇華，操作並非以傳統的加熱模式來設計。利用高效的熱泵將乾燥的空氣注入筒內，極具成本效益，相當環保。

AutoDry 自動乾衣

Bosch dryers with AutoDry technology to dry your laundry exactly as you want it, including iron-dry, dry to be put away or extra dry.

Bosch 乾衣機配備自動乾衣技術，讓您達到理想的烘乾程度，如熨燙烘乾、烘乾或加強烘乾。

Sensitive Drying System 柔撥乾衣筒

With the Sensitive Drying System your laundry is penetrated by warm air currents flowing from all directions, carefully rotated by the SoftFlow paddles. The result is soft and fluffy laundry without creases or wrinkling.

柔撥乾衣筒是最佳的烘乾拍檔，它能保持熱氣流從四面八方流動，加上 SoftFlow 柔撥乾衣槳加快熱流滲透。烘乾後衣物蓬鬆、柔軟並減少摺痕或皺紋產生。

Heat Pump Condensation Dryer 熱泵冷凝式乾衣機

AutoClean system 自動清潔系統

Bosch SelfCleaning technology in Heat Pump dryer extended from condenser to a whole heat pump system. It utilizes the water extracted during the drying cycle and cleans the lint and fluff thoroughly out of the system that would reduce its efficiency and performance. It not only saves you the chore of manual cleaning the fluff filter every time, but also ensures the dryer performs economically with optimal energy efficiency.
