

Invented for life

BOSCH

24" Compact Laundry Brochure

Volume 4

Quality in every detail.

Bosch compact washers and dryers are thoughtfully designed to simplify laundry day, so you can get back to doing what you love. With flexible installation and sustainable solutions, including our Self-cleaning Condenser™ and ENERGY STAR® certified laundry line up, enjoy a more efficient way to wash and dry clothes.

Flexible configuration. Easy installation.

Combining simple installation with compact laundry solutions, Bosch gives you the flexibility to place the washer and dryer in an area that's most convenient for the home. The 500 and 800 Series dryers also offer the option for a reversible door. Bosch compact laundry units can be installed stacked, side-by-side, on pedestals, in a closet or under a counter. The Bosch laundry pair is ideal for small spaces such as urban lofts, guest suites, or secondary laundry and vacation homes.

Flexible accessories

Adapter

WTZPA20UC – 4 Prong
Power Adapter (included
with all Bosch Dryers)

Less is more.

All Bosch washers and dryers are ENERGY STAR® certified for less energy usage and more water savings. The 500 Series heat pump dryer is 60% more efficient* and is recognized as ENERGY STAR® Most Efficient of 2023 along with its matching washer.

Sustainable laundry solutions.

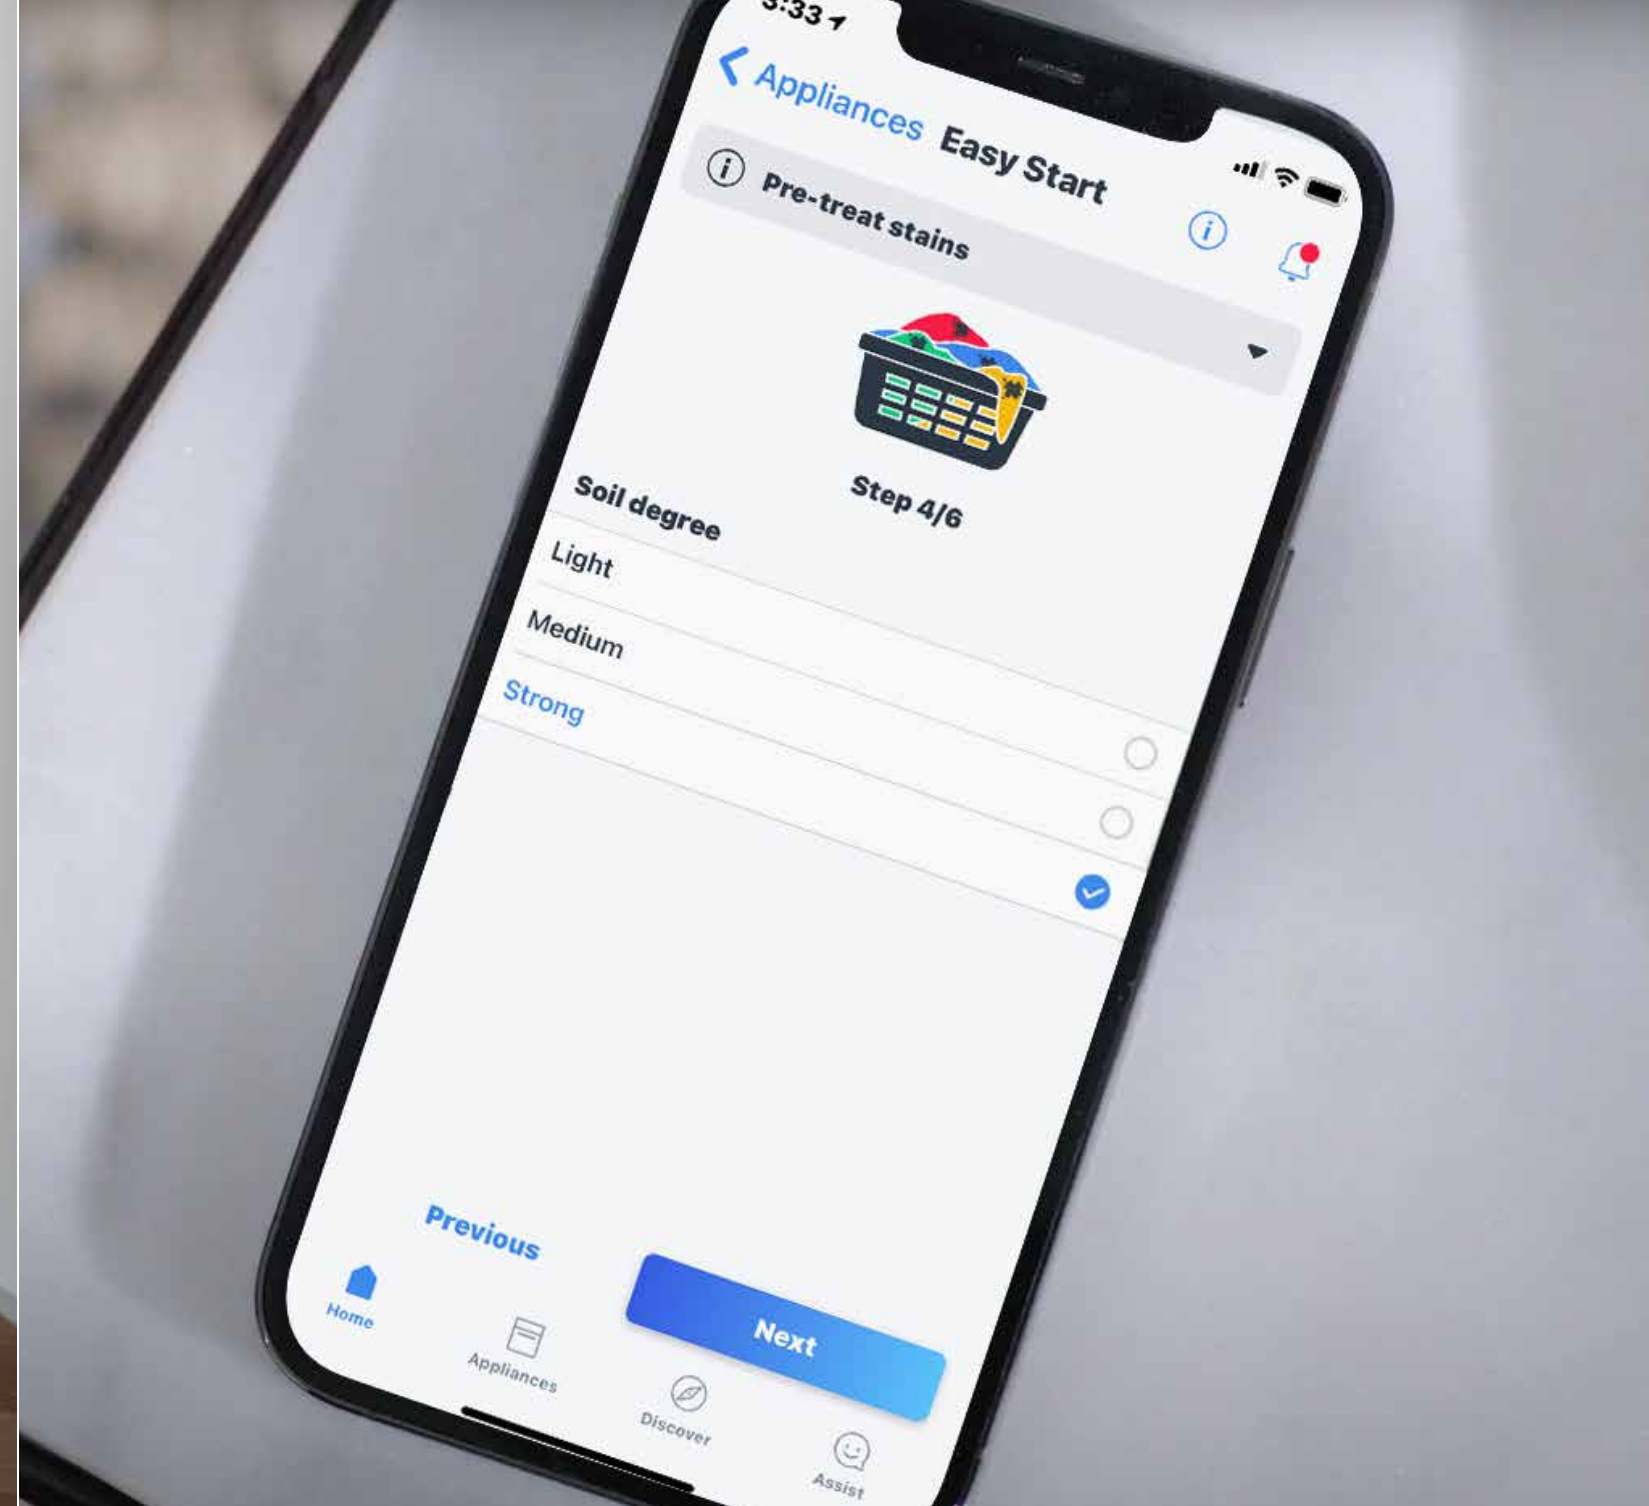

Featuring a Self-cleaning Condenser™, the Bosch 500 Series dryer removes the need to manually clean and maintain the condenser, providing you with consistent dry times and energy efficiency load after load.

Complete convenience with connectivity.

The Bosch 500 Series and 800 Series compact laundry pairs provide a new level of ease through Home Connect®. Control and monitor your appliance remotely and receive helpful notifications on your smart device, including when a cycle is complete.

Peace of mind.

Not sure which program to select for your mixed laundry load? The EasyStart* feature can recommend the perfect program based on the types of clothing you select in the Home connect app. Take the guesswork out of laundry day.

Engineered for efficiency.

Condensation Dryers

Bosch condensation dryers are engineered to efficiently reduce drying times. Warm, moist air from the drum is cooled in the heat exchanger, releasing moisture. This water is collected and pumped out to the drain. The air is then reheated with an electric element and put back into the drum. This eliminates the need for external ducting or venting. With no ducting required, installation is made easier, faster and more cost-effective.

Heat Pump Dryer

The 500 Series Bosch Heat Pump Dryer is ventless and has no heating element. Instead, the heat pump technology uses both a cooling phase and a heating phase to remove moisture from the drum air and heat it up again before it goes back into the drum.

Condensation dryers.

How does a Condensation Dryer work?

The Bosch Condensation Dryer uses a flexible installation solution to gently dry clothes at an optimal temperature without the need for external ducting. Bosch condensation dryers are engineered to efficiently reduce drying times.

- 1 Ambient (cool) air enters dryer.
- 2 Ambient air enters condenser.
- 3 Ambient air (warm and dry) exits condenser and exhausted.
- 4 Process air (dry) exits condenser. A fan blows it into heater.

- 5 Process air enters heater (heating element) and heated.
- 6 Process (heated) air enters drum to absorb moisture and dry laundry.
- 7 Process air (warm, wet) enters condenser and is cooled, releasing the moisture.
- Drain Condensed water is collected and pumped out to drain

Leak Protection

AquaShield®

The AquaShield® System, on the 500 and 800 Series, consists of a special double-walled inlet hose, which provides protection against water damage.

AquaStop® Plus

The AquaStop® Plus System, on the 800 Series, consists of the AquaShield® double-walled inlet hose with a safety valve and a leak-detector switch in the bottom of the washer to provide extensive protection against water damage. A smitty pan may no longer be required to protect floors and walls from water damage. ▶

Installation Cost Savings

Bosch washers and dryers offer both space and cost savings.

- ▶ **No Additional Power Cord or Water Hoses Needed**
All power cords and the hot and cold water lines are included with Bosch washers and dryers.
- ▶ **No Additional Power Outlets or Wall Receptacles Needed**
With the washer plugging into the dryer adapter and only requiring one wall receptacle, the installation of a second wall receptacle is no longer needed.
- ▶ **No Ducting Needed**
Condensation drying requires no ducting. This saves you the cost of running ducting as well as the space behind the dryer needed for flexible duct connections.
- ▶ **No Leak Risk**
No smitty pan needed* with the AquaStop® Plus and AquaShield® water leak protection systems. Avoid costly floor and wall damage with these Bosch leak protection systems.**
- ▶ **ENERGY STAR® Certified**
Save on energy and water costs over the life of your project with Bosch ENERGY STAR® certified products. The 500 Series Pair has been recognized as ENERGY STAR® Most Efficient of 2023.

*Check local building codes for complete requirements. **Available only on 500 Series and 800 Series respectively

Fit and functional design.

Design Options

The Bosch compact laundry pairs feature matching washer and dryer designs across the three different series. Design accents unique to each series include white, silver or chrome control knobs and door ring.

Premium look and feel

The sleek design of the LED control panel and illuminated dial* offers easy cycle and option selection.

Purposeful design

The circular design of the side walls and wave-pattern of the drum minimizes vibration and noise for a peaceful clean.

*Available only on 500 Series and 800 Series models.

EcoSilence™ Motor

The EcoSilence™ Motor is a brushless motor which makes the SpeedPerfect® mode even quieter. Energy-efficient and quiet in operation, the EcoSilence™ Motor provides a more efficient performance cycle with an especially long life.

Quieter clean

Featuring an anti-vibration system, Bosch washers monitor the load weight and movement of the drum to reduce noise. The circular design of the sidewall further reinforces its structure and increases the stability of the overall appliance.

Quality and performance.

Dirty to dry in 30 minutes

The 800 Series laundry pair features a 15-minute wash and a 15-minute dry cycle. The cycle can be used on any small, lightly soiled load, such as five dress shirts.

SpeedPerfect® option

SpeedPerfect® provides up to 40% faster washing time.*

Large capacity

Even with a small footprint, our washer features a large capacity and holds a variety of loads. An expansive viewing window and lightweight door make loading and unloading a snap.

Powerful yet gentle wash

Depending on the cycle, the washer adjusts the direction of the drum rotation, using the steeper edges for heavy duty or shallow edges for delicate fabrics that require gentler care.

*As compared to Perm Press Heavy Soil cycle without SpeedPerfect®.

Bosch laundry lineup + Represents Step-up

Washers

300 Series WGA12400UC

- ▶ dBA - 52 spinning/72 washing
- ▶ AntiVibration system
- ▶ Quick 30 minute program
- ▶ SpeedPerfect®

Reach of Power cords + Adapter (Not to Scale)

- A: Dryer
 - B: Washer
 - C: Power Adapter
- All references to NEMA 14-30R Dryer receptacles in this document have the orientation with the ground pin up.

Use of two individual NEMA 6-15R or 6-20R receptacles may be used as alternative means to power Washer and Dryer.

Dimensions reflect use of stacking kits.

Accessories – Washers

*Matching Bosch Dryers are supplied with a Power Adapter to fit into a standard 4-Prong, 30A, Dryer receptacle (NEMA 14-30R) and power both Bosch Washers and Dryers. Note: – 3-Prong Adapter may be ordered directly from Bosch (not supplied with Washer or Dryer).
– Use of two individual NEMA 6-15R or 6-20R receptacles/circuits may be used as alternative means to power Washer and Dryer.

Accessories – Dryers

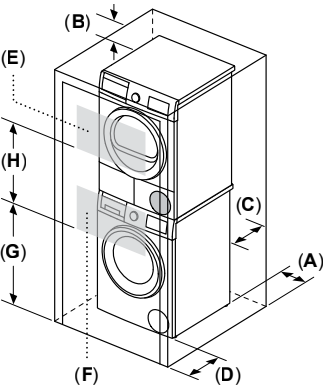

*Bosch Dryers are supplied with WTZPA20UC adapter to fit a standard 4-Prong, 30A, Dryer receptacle (NEMA 14-30R) to power both Bosch Washers and Dryers. Note: – 3-Prong Adapter may be ordered directly from Bosch (not supplied with Washer or Dryer).
– Use of two individual NEMA 6-15R or 6-20R receptacles/circuits may be used as alternative means to power Washer and Dryer.

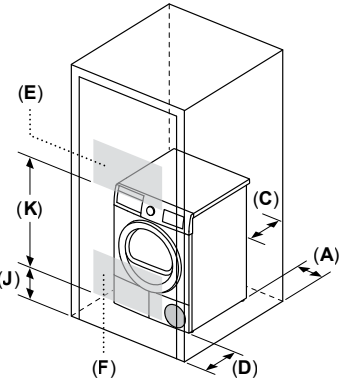

24" Washers and Dryers Installed in Enclosure

Enclosure Dimensions

Closet: Stacked Washer and Condensation Dryer

Closet: Stand Alone (shown) or Side by Side

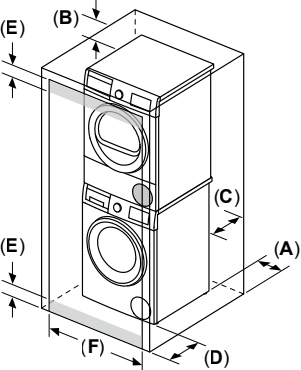

Minimum clearance requirements
(Stacked, Stand Alone or Side by Side):
A: Both sides (left and right) – 5/8"
B: Top – 6 1/4"
C: Rear – 2 1/2"
D: Front – 2 1/2"

Minimum louvered area and spacing:
E: Top louver area – 63 sq. in.
F: Bottom louver area – 63 sq. in.
G: Lower Height (stacked) – 37"
H: Upper Height (stacked) – 26"
J: Lower Height (stand alone) – 3"
K: Upper Height (stand alone) – 29"

For shortest drying times keep closet door open while dryer is operating. When closet doors are closed, open areas only allow minimal drying results (expect long drying times).

Closet: Stacked Washer with Heat Pump Dryer

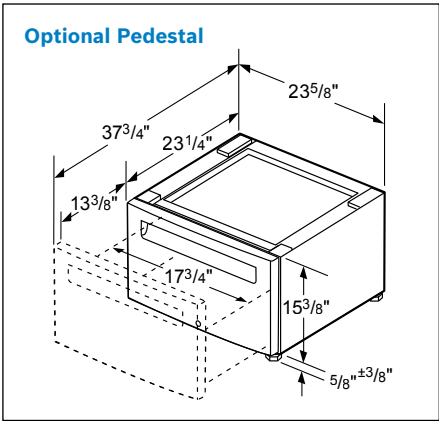

Minimum clearance requirements
(Stacked, Stand Alone or Side by Side):
A: Both sides (left and right) – 1/2"
B: Top – 6 1/4"
C: Rear – 3"
D: Front – 1/2"

Minimum door undercut (louvered area):
E: Undercut height (Top and Bottom) – 1 1/4"
Louvered areas of equal total sizes and split between upper and lower portions of door are permitted.

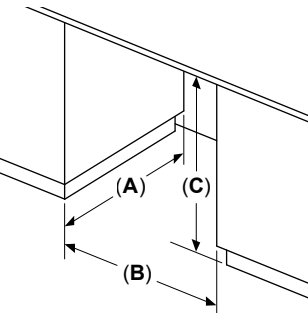

F: Undercut width (Top and Bottom):
– 24" minimum for Stacked and Stand Alone
– 48" minimum for Side by Side

For shortest drying times keep closet door open while dryer is operating. When closet doors are closed, open areas only allow minimal drying results (expect long drying times).

All 800-500-300 Series Washers & Dryers

Under Counter (Preferred)

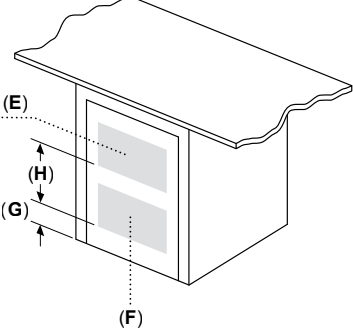

Minimum opening dimensions:
A: Depth – 28"
B: Width – 23 3/8"
C: Height – 34 1/2"

Front of appliance fully open.
No doors or coverings.

All 800-500-300 Series Washers & Condensate Dryers

Under Counter Enclosed (Less Preferred)

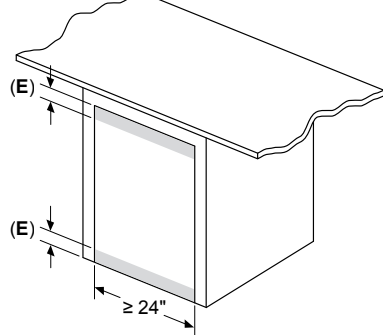

If the front of the appliance is covered, louvered openings must be installed as shown and front/rear clearances adhered to according to closet installations.

Minimum louvered area and spacing:
E: Top louver area – 63 sq. in.
F: Bottom louver area – 63 sq. in.
G: Lower Height – 3"
H: Upper Height – 14"

For shortest drying times keep cabinet door open while dryer is operating. When cabinet door is closed, open areas only allow minimal drying results (expect long drying times).

500 Series Heat Pump Dryer Under Counter Enclosed (Less Preferred)

Minimum door undercuts:
E: Undercut height (Top and Bottom) – 1 1/4"
Louvered areas of equal total sizes and split between upper and lower portions of door are permitted.

For shortest drying times keep cabinet door open while dryer is operating. When cabinet door is closed, open areas only allow minimal drying results (expect long drying times).
