EN Using 651004 Nexxt washer hinge kit to replace 491646 hinges

491646 hinge for washers up through index /09 is no longer available and has been replaced by **651004** hinge kit, consisting of (2) two **610840** M5x16 T25 hinge screws and (1) one **644665** door hinge (used by WBB / WFMC / WFXD washers starting with index /10).

651004 M5x16 T25 hinge kit screws can be used with panels made for **491646** hinges. As they're driven in, screws will enlarge the holes in the older panels. If desired, hinge holes can be pre-drilled using a 5mm drill bit. Existing **422242** M4x16 screws cannot be used with **651004** kit hinges and must be discarded.

Since **651004** hinge kit screws can be used with panels made for **491646** hinges, panel kits **246603** white, **246604** silver and **246605** white (with door extender holes) aren't needed for hinge repairs. Use panel kits when replacing front panels only.
