

645787, 646220, 646221

EN Using **645787** adapter hose with **AQUASTOP®** washer hoses

AQUASTOP® hoses may not fit in tight spaces like hot/cold faucet outlet boxes. For those installations, use **645787** adapter hose to connect each **AQUASTOP®** hose to a customer hot/cold faucet.

For many installations, (2) **645787** adapter hoses will be needed – (1) for the hot water hose and (1) for the cold water hose.

Only (1) **645787** adapter hose is needed (for the hot water hose) when a misting dryer is installed as well since the dryer comes with it (and a “Y” adapter) for the cold water hose.
