

Connect your fully automatic coffee machine – with the future.

Home Connect. One app for everything*.

Home Connect is the first app that can wash, rinse, bake, make coffee and look into your fridge for you. No matter how many different appliances – Home Connect can connect them all* and make them mobile.

For you, this means a vast range of new opportunities to make your life more agreeable. With just a smartphone or tablet you can easily use convenient services, discover clever information and look after your household. In short: Welcome to a new way of living.

* Functionality depending on the availability of the Home Connect Services in your country – further information: www.home-connect.com

| Your new way of living.

More convenient.

Home Connect lets you control your domestic appliances whenever you want, wherever you want. Simply and intuitively using a smartphone or tablet. This saves you bother and waiting around, and you have more time for the things that are truly important to you.

More simple.

Using the app's cleverly designed touchscreen, you can adjust operating settings such as signal tones or even individual programmes. It's even simpler and more precise than on the appliance itself. Plus you have direct access to operating manuals and even numerous instructional videos.

More connected.

Let yourself be inspired! Discover extras that have been tailor-made just for your appliances: recipe collections, tips on using your appliances and much more. Compatible accessories can be ordered at any time with just a few clicks.

With Home Connect your fully automatic coffee machine can do a whole lot more.

You can now control your fully automatic coffee machine when out and about so spend more time on the things that are truly important to you. On the following pages, you'll discover how to connect your fully automatic coffee machine to the innovative Home Connect app and take advantage of its numerous benefits. You can find everything you need to know about Home Connect at www.home-connect.com

What do you need to connect your fully automatic coffee machine to Home Connect?

- Your smartphone or tablet must be running the latest version of the operating system it uses.
- The home network (Wi-Fi) signal must be strong at the site where your fully automatic coffee machine stands.

Name and password for your home network (Wi-Fi):

Network name (SSID): _____

Password (Key): _____

- The home network must be connected to the Internet and the Wi-Fi function activated.
- You have unpacked and plugged in your fully automatic coffee machine.

Step 1: Installing the Home Connect app

A On your smartphone or tablet, go to the App Store (Apple devices) or to the Google Play Store (Android devices).

B Enter **“Home Connect”** in the store’s search field.

C Select the Home Connect app and install it on your smartphone or tablet.

D Start the app and create your Home Connect login details. The app will guide you through the registration process. Don’t forget to make a note of your e-mail address and password afterwards.

Home Connect login details:

E-mail: _____ Password: _____

Please check availability on www.home-connect.com

Step 2 (initial set-up): Connecting your fully automatic coffee machine to your home network (Wi-Fi)

A Plug in your fully automatic coffee machine and switch it on.

B Check whether your home network router has a WPS function.
You will find information about this in the manual for your router.

C Does your router have a WPS function (automatic connection)?

Your router has a WPS function?
**Then go on to Step 2.1 –
Automatic connection (WPS).**

or

Your router doesn't have a WPS function or
you don't know?
**Then go on to Step 2.2 –
Manual connection (Professional mode).**

Step 2.1: Automatic connection of your fully automatic coffee machine to your home network (Wi-Fi)

A On initial set-up of your fully automatic coffee machine select **“Home Connect”**.

B Switch on **“Wi-Fi”** on your fully automatic coffee machine.

C Then select **“Connect network”**.

D To start connecting automatically, press the button **“Connect automatically”**.

E Activate the WPS function on your home network router within the next 2 minutes. Some routers have for example a WPS/Wi-Fi button. You will find information about this in the manual for your router.

F After a few seconds the display of your fully automatic coffee machine shows **“Network connection successful”**. **Now go on to Step 3.**

The display shows the message: **“Network connection failed”**.

The connection could not be established within 2 minutes.

Check whether your fully automatic coffee machine is within range of your home network (Wi-Fi) and repeat the process if necessary or refer to Step 2.2 to connect manually.

Step 2.2: Manual connection of your fully automatic coffee machine to your home network (Wi-Fi)

During manual connection, your fully automatic coffee machine sets up its own Wi-Fi network (soft access point) which you can log into using your smartphone or tablet.

A On initial set-up of your fully automatic coffee machine select **“Home Connect”**.

B Switch on **“Wi-Fi”** on your fully automatic coffee machine.

C Then select **“Connect network”**.

D To start connecting manually, press the button **“Manually connect”**.

E The round display in the middle shows **“Network connection manual”**. Your fully automatic coffee machine has now set up its own Wi-Fi network (SSID) “HomeConnect”, which you can access using your smartphone or tablet.

F Switch to the general settings menu on your smartphone or tablet (mobile device) and call up the Wi-Fi settings.

G Connect your smartphone or tablet PC to the **“HomeConnect”** Wi-Fi network (SSID) (Wi-Fi password [Key] is “HomeConnect”). The connection process may take up to 60 seconds.

H Once successfully connected, open the Home Connect app on your smartphone or tablet.

I The app will now take a few seconds to search for your fully automatic coffee machine. Once the fully automatic coffee machine has been found, enter the network name (SSID) and password (Key) for your home network (Wi-Fi) in the relevant fields.

J Then press **“Transfer to household appliance”**.

K The display of your fully automatic coffee machine now shows **“Network connection successful”**.
Now go on to Step 3.

Step 3: Connect your fully automatic coffee machine to the Home Connect app

A On your fully automatic coffee machine now press the text field **“Connect to app”**.

B As soon as your fully automatic coffee machine is shown in the Home Connect app, you have 2 minutes to add it to your smartphone or tablet.

C If your fully automatic coffee machine is not automatically displayed in the app, press **“Connect an appliance”** or **“Household appliance search”**.

D Follow the final instructions in the app to confirm the connection and complete the process.

E Following successful login press the text field **“Remote start off”** on your fully automatic coffee machine. A warning now appears. As soon as you have acknowledged it, remote start will be activated.

F The text field **“Back to settings”** can be used to complete this process for Home Connect and return to initial set-up of your fully automatic coffee machine.

You have now successfully connected your fully automatic coffee machine.

You can now benefit from all the advantages of the Home Connect app!

Connection failed:

Check that your smartphone or tablet is within your home network (Wi-Fi). Repeat the entire process described in Step 3.

■ The future of your home has already started.

Your new fully automatic coffee machine with the Home Connect function belongs to the new generation of connected domestic appliances. Did you know that other appliances come with the Home Connect function too? This means that you will be able to remotely control and operate not only your fully automatic coffee machine but also dishwashers, fridges, ovens, washing machines and washer-dryers* from selected manufacturers.
