Safety precautions

Please read this instruction manual carefully. Please keep the instruction and installation manuals in a safe place. Please pass on these manuals to the new owner if you sell the appliance.

Before installation

Damage during transport

Check the appliance for damage after unpacking it. Do not connect the appliance if it has been damaged in transit.

Electrical connection

Only a licensed expert may connect the appliance. You will lose your warranty entitlement in the event of any damage caused by incorrect connection.

Safety notes

This appliance is intended for domestic use only. This appliance must only be used for food preparation.

Adults and children must not operate the appliance without supervision,

- if they are physically or mentally incapable of doing so or
- if they have insufficient knowledge or experience.

Never let children play with the appliance.

Hot cooking compartment

Risk of burns!

- Never touch the interior surfaces of the cooking compartment or the heating elements. Open the appliance door carefully. Hot steam may escape. Small children must be kept at a safe distance from the appliance.
- Never prepare food containing large quantities of drinks with a high alcohol content. Alcoholic vapours can catch fire in the cooking compartment. Only use small quantities of drinks with a high alcohol content and open the appliance door carefully.

Risk of fire!

- Never store combustible items in the cooking compartment. Never open the appliance door if there is smoke inside. Switch off the appliance. Pull out the mains plug or switch off the circuit breaker in the fuse box.
- Do not place greaseproof paper loosely over accessories during preheating. A draught is created when the appliance door is opened. The greaseproof paper may come into contact with the heating element and catch fire. Always weight down the greaseproof paper with a dish or a baking tin. Only cover the surface required with greaseproof paper. The greaseproof paper must not protrude over the accessories.

Risk of short circuit!

Never trap connecting cables of electrical appliances in the hot appliance door. The cable insulation could melt.

Risk of scalding!

Never pour water into the hot cooking compartment. This will produce hot steam.

Hot accessories and ovenware

Risk of burns!

Never remove ovenware or accessories from the cooking compartment without an oven cloth or oven gloves.

Improper repairs

Risk of electric shock!

Improper repairs are dangerous. Repairs may only be carried out by one of our trained after-sales engineers. If the appliance is defective, pull out the mains plug or switch off the appliance at the circuit breaker in the fuse box. Call the after-sales service.

Causes of damage

Caution!

- Accessories, foil, greaseproof paper or ovenware on the cooking compartment floor: do not place accessories on the cooking compartment floor. Do not cover the cooking compartment floor with any sort of foil or greaseproof paper. Do not place ovenware on the cooking compartment floor if a temperature of over 50 °C has been set. This will cause heat to accumulate. The baking and roasting times will no longer be correct and the enamel will be damaged.
- Water in a hot cooking compartment: do not pour water into the cooking compartment when it is hot. This will cause steam. The temperature change can cause damage to the enamel.
- Moist food: do not store moist food in the cooking compartment when it is closed for prolonged periods. This will damage the enamel.
- Fruit juice: when baking particularly juicy fruit pies, do not pack the baking tray too generously. Fruit juice dripping from the baking tray leaves stains that cannot be removed. If possible, use the deeper universal pan.
- Cooling with the appliance door open: only allow the cooking compartment to cool when it is closed. Even if the appliance door is only open a little, front panels of adjacent units could be damaged over time.
- Heavily soiled oven seal: if the oven seal is heavily soiled, the oven door will no longer close properly when the oven is in operation. The fronts of adjacent units could be damaged. Always keep the oven seal clean.
- Oven door as a bearing surface: do not stand or place objects on the oven door when it is open. Do not place ovenware or accessories on the oven door.
- Carrying the appliance: do not carry or hold the appliance by the door handle. The door handle cannot support the weight of the appliance and could break.

Your new oven

Here you will learn about your new oven. The control panel and the individual operating controls are explained. You will find information on the cooking compartment and the accessories.

Control panel

Here is an overview of the control panel. The display never shows all of the symbols at the same time. Details may vary, depending on the appliance model.

Control knobs

The control knobs can be popped out. Simply press the control knob when it is in the off position to pop it in or out.

Buttons

The sensors are located under the individual buttons. They must not be pressed too firmly. Only touch the corresponding symbol.

Buttons and display

You can use the buttons to set various additional functions. You can read the values that you have set in the display.

Button	Use
»»» Rapid heating	Heats up the oven particularly quickly.
⋮ Cleaning system	Cleaning system for the self-cleaning surfaces in the cooking compartment.
⌚ Time-setting options	Selects the timer ⌚, cooking time ⌚, end time ⌚ and clock ⌚.
🔒 Childproof lock	Locks and unlocks the control panel.
- Minus	Decreases the set values.
+ Plus	Increases the set values.

The time-setting option that is currently selected in the display is indicated by the brackets [] around the corresponding symbol. Exception: for the clock, the ⌚ symbol only lights up when you are making changes.

Function selector

Use the function selectors to set the type of heating.

Main oven

Setting	Use
○ Off position	The main oven is switched off.
 3D hot air*	For cakes and pastries on one or more levels. The fan distributes the heat from the heating ring in the back panel evenly around the cooking compartment.
 Top/bottom heating	For cakes, bakes and lean joints of meat, e.g. beef or game, on one level. The heat is emitted evenly from above and below.
 Pizza setting	Quick preparation of frozen products without preheating, e.g. pizza, chips or strudel. The lower heating element and the heating ring in the back panel provide the heating.
 Hot air grilling	Joints of meat, poultry and whole fish. The grill heating element and the fan switch on and off alternately. The fan causes the hot air to swirl around the dish.
 Grill, large area	For grilling steaks, sausages, toast and pieces of fish. The whole area below the grill heating element becomes hot.

* Type of heating used to determine the energy efficiency class according to EN50304.

Setting	Use
<input type="checkbox"/> Grill, small area	For grilling small quantities of steaks, sausages, toast and pieces of fish. The centre part of the grill heating element becomes hot.
<input type="checkbox"/> Bottom heating	For preserving and final baking or crisp browning. Heat is emitted from below.
<input checked="" type="checkbox"/> Defrosting	For defrosting, e.g. meat, poultry, bread and cakes. The fan causes the warm air to swirl around the dish.
<input checked="" type="checkbox"/> Oven light	Switches on the oven light.

* Type of heating used to determine the energy efficiency class according to EN50304.

Top oven

Setting	Use
<input type="radio"/> Off position	The top oven is switched off.
<input type="checkbox"/> Top/bottom heating*	For cakes, bakes and lean joints of meat, e.g. beef or game, on one level. The heat is emitted evenly from above and below.
<input type="checkbox"/> Grill, large area	For grilling steaks, sausages, toast and pieces of fish. The whole area below the grill heating element becomes hot.
<input type="checkbox"/> Grill, small area	For grilling small quantities of steaks, sausages, toast and pieces of fish. The centre part of the grill heating element becomes hot.
<input checked="" type="checkbox"/> Oven light	Switches on the oven light.

* Type of heating used to determine the energy efficiency class according to EN50304.

When you make settings, the oven light in the cooking compartment switches on.

Temperature selector

Set the temperature or grill setting using the temperature selector.

Setting	Meaning
<input type="radio"/> Off position	The oven does not heat up.
50-275 Temperature range	The temperature in the cooking compartment in °C.
I, II, III Grill settings	The grill settings for the <input type="checkbox"/> Grill, small area and <input type="checkbox"/> Grill, large area. I = level 1, low II = level 2, medium III = level 3, high
clean Cleaning setting	The setting for the cleaning system.

When the main oven is heating, the symbol lights up in the display. When the top oven is heating, the indicator lamp for the temperature lights up. It goes out during pauses in the heating. For the Defrost type of heating, the symbol does not light up.

Cooking compartment

The oven light is located in the cooking compartment. A cooling fan protects the oven from overheating.

Oven light

During operation, the oven light in the cooking compartment is on. The setting on the function selector can be used to switch on the light without heating the oven.

Cooling fan

The cooling fan switches on and off as required. The hot air escapes above the door. Caution: do not cover the ventilation slots. Otherwise the oven will overheat.

So that the cooking compartment cools down more quickly after operation, the cooling fan continues to run for a certain period afterwards.

Shelf positions

You can pull out the accessories two thirds of the way without them tipping. This allows meals to be removed easily.

The accessories may become deformed when they become hot. As soon as they have cooled down, the deformation disappears with no effect on the function.

Main oven

The accessories can be inserted into the oven at 5 different levels.

Top oven

The accessories can be inserted into the oven at 2 different levels.

Accessories

You can buy accessories from the after-sales service, from specialist retailers or online. Please specify the HEZ number.

Wire rack

For ovenware, cake tins, joints, grilled items and frozen meals.

Insert the wire rack with the curvature pointing downward .

Insert grid

For roasting.

Always place the insert grid in the universal pan. This ensures that dripping fat and meat juices are collected.

Universal pan

For moist cakes, pastries, frozen meals and large joints. It can also be used to catch dripping fat when grilling directly on the wire rack.

Slide the universal pan into the oven with the sloping edge facing the oven door.

Optional accessories

You can purchase optional accessories from the after-sales service or specialist retailers. You will find a comprehensive range of products for your oven in our brochures and online. The availability of optional accessories and the options for ordering these vary from region to region. Please check the sales brochures.

Not every optional accessory fits every appliance. When purchasing, please always quote the exact designation (E-no.) of your appliance.

Optional accessories	HEZ number	Use
Wire rack	HEZ334000	For cookware, cake tins, roasts, grilling and frozen meals.
Enamel baking tray	HEZ331000	For cakes and biscuits. Slide the baking tray into the oven with the sloping edge facing towards the oven door.
Universal pan	HEZ332000	For moist cakes, pastries, frozen meals and large roasts. It can also be used to catch dripping fat when you are grilling directly on the wire rack. Slide the universal pan into the oven with the sloping edge facing towards the oven door.
Wire insert	HEZ324000	For roasting. Always place the wire insert in the universal pan. This ensures that dripping fat and meat juices are collected.
Grill tray	HEZ325000	Use for grilling in place of the wire rack or as a splatter guard, so that the oven does not become very dirty. Only use the grill tray in the universal pan. Grill tray as splash guard: Slide the universal pan with the grill tray under the wire rack. Lower cooking compartment: Grilling on the grill tray: use only on levels 1, 2 and 3. Upper cooking compartment: Grilling on the grill tray: use only on level 1.
Glass pan	HEZ336000	A deep baking tray made of glass. Also ideal for use as a serving dish.
Pizza tray	HEZ317000	Ideal for pizza, frozen products or large, round cakes. You can use the pizza tray instead of the universal pan. Place the tray on the wire rack and look at the specifications in the tables.
Enamel baking tray with non-stick coating	HEZ331010	Cakes and biscuits can be removed from the baking tray more easily. Slide the baking tray into the oven with the sloping edge facing towards the oven door.
Universal pan with non-stick coating	HEZ332010	Moist cakes, pastries, frozen meals and large roasts can be removed more easily from the universal pan. Slide the universal pan into the oven with the sloping edge facing towards the oven door.
Profi extra-deep pan with wire rack insert	HEZ333000	Particularly suitable for preparing large quantities.
Lid for the Profi extra-deep pan	HEZ333001	The lid turns the Profi extra-deep pan into a Profi roaster.
Glass roasting dish	HEZ915001	The glass roasting dish is suitable for pot roasts and baked casseroles that are prepared in the oven. Particularly suitable for the automatic programmes and automatic roasting.

Optional accessories	HEZ number	Use
Metal roasting dish	HEZ6000	The roasting dish fits the extended cooking zone of the glass ceramic hob. It is suitable for the sensor cooking system, but also for the automatic programmes and automatic roasting. The roasting dish is enamel on the outside and has a non-stick coating on the inside.
2-level telescopic shelf	HEZ338250	The pull-out rails at levels 2 and 3 allow you to pull accessories out further without them tipping.
3-level telescopic shelf	HEZ338352	The pull-out rails at levels 1, 2 and 3 allow you to pull accessories out further without them tipping.
3-level telescopic rail set	HEZ338356	The pull-out rails at levels 1, 2 and 3 allow you to pull accessories out completely without them tipping.
After-sales service products		service, specialist retailers or (in some countries) online via the e-Shop. Please specify the relevant product number.
You can obtain suitable care and cleaning agents and other accessories for your domestic appliances from the after-sales		
Cleaning cloths for stainless-steel surfaces	Product no. 311134	Reduces the build-up of dirt. Impregnated with a special oil for perfect maintenance of your appliance's stainless-steel surfaces.
Oven and grill cleaning gel	Product no. 463582	For cleaning the cooking compartment. The gel is odourless.
Microfibre cloth with honeycomb structure	Product no. 460770	Especially suitable for cleaning delicate surfaces, such as glass, glass ceramic, stainless steel or aluminium. The microfibre cloth removes liquid and grease deposits in one go.
Door lock	Product no. 612594	To prevent children from opening the oven door. The locks on different types of appliance door are screwed in differently. See the information sheet supplied with the door lock.

Before using for the first time

Here, you will find out what you have to do before preparing food with your oven for the first time. Read the Safety information section beforehand.

Setting the clock

After the appliance has been connected, the  symbol and four zeros flash in the display. Set the clock.

- Press the  button.
The clock in the display shows 12:00. The time symbols light up and the brackets are around .
- Use the **+** or **-** button to set the clock.
After a few seconds, the time that has been set is adopted.

Heating up the oven

To get rid of the new cooker smell, heat up the oven when it is empty and closed. An hour of  Top/bottom heating at 240 °C is ideal. Make sure that there are no packaging remains in the cooking compartments.

- Use the function selectors to set  Top/bottom heating.
- Set 240 °C on the temperature selectors.
Turn the oven off after one hour. To do this, turn all function selectors to the off position.

Cleaning accessories

Before using the accessories for the first time, clean them thoroughly using hot, soapy water and a soft cloth.

Setting the oven

There are various ways in which you can set your oven. Here we will explain how you can select the desired type of heating and temperature or grill setting. You can select the oven cooking time and end time for your dish. Please refer to the section on *Setting the time-setting options*.

Switching on the oven

Example shown below: Setting the Top/bottom heating to 190° C in the  main oven.

- Use the function selector to set the type of heating.

- Set the temperature or grill setting using the temperature selector.

The oven begins to heat up.

Changing the settings

The type of heating and temperature or grill setting can be changed at any time with their respective selector.

Switching off the oven

Turn the function and temperature selector to the off position.

Setting the time-setting options

The main oven has various time-setting options. You can use the button to access the menu and switch between the individual options. All the time symbols are lit during the time when you can make settings. The [] brackets show you which time-setting function you have currently selected. A time-setting option which has already been set can be changed directly using the + or - button, when its time symbol is in brackets.

Timer

You can use the timer as a kitchen timer. It runs independently of the oven. The timer has its own signal. In this way, you can tell whether it is the timer or a cooking time which has elapsed.

- Press the button once.

The time symbols light up in the display and the brackets are around .

- Use the + or - button to set the timer duration.

Default value for +button = 10 minutes

Default value for -button = 5 minutes

After a few seconds, the time setting is adopted. The timer starts. The [] symbol lights up in the display and the timer duration counts down. The other time symbols go out.

The timer duration has elapsed

A signal sounds. 00:00 is shown in the display. Use the button to switch off the timer.

Changing the timer duration

Use the + or - button to change the timer duration. After a few seconds, the change is adopted.

Cancelling the timer duration

Use the - button to reset the timer duration to 00:00. The change will be adopted after a few seconds. The timer is switched off.

Rapid heating

You can switch on rapid heating for the main oven. The main oven will then reach the set temperature particularly quickly.

Use rapid heating when temperatures above 100 °C are selected. The following heating types are suitable:

- 3D hot air
- Top/bottom heating

To ensure an even cooking result, do not place your dish in the cooking compartment until rapid heating is complete.

- Set the heating type and temperature for the main oven.

- Press the button.

The symbol lights up in the display. The main oven begins to heat up.

The rapid heating process is complete.

A signal sounds. The symbol in the display goes out. Place your dish in the main oven.

Cancelling rapid heating

Press the button. The symbol in the display goes out.

Checking the time settings

If several time-setting options are set, the relevant symbols are illuminated on the display. The symbol for the time-setting option that is visible in the display is shown in brackets.

To call up the timer, cooking time, end time or clock, press the button repeatedly until the brackets are around the relevant symbol. The display shows the value for a few seconds.

Cooking time

You can set a cooking time for your dish in the main oven. When the cooking time has elapsed, the oven switches itself off automatically. This means that you do not have to interrupt other work to switch off the oven. The cooking time cannot be accidentally exceeded.

Example shown below: Cooking time of 45 minutes.

- Use the function selector to adjust the type of heating for the main oven.
- Use the temperature selector to set the temperature or grill setting for the main oven.
- Press the button twice. The display shows 00:00. The time symbols light up, the brackets are around .

4. Use the **+** or **-** button to set the cooking time.

- Default value for the **+** button = 30 minutes
- Default value for the **-** button = 10 minutes

The main oven will start up after a few seconds. The cooking time counts down in the display and the [b] symbol lights up. The other time symbols go out.

The cooking time has elapsed

A signal sounds. The main oven stops heating. 00:00 is shown in the display. Press the [c] button. The **+** or **-** buttons can be used to set a new cooking time. Or press the [c] button twice and turn the function and temperature selector to the off position. The main oven is switched off.

Changing the cooking time

Use the **+** or **-** button to change the cooking time. After a few seconds, the change is adopted. If the timer has been set, press the [c] button beforehand.

Cancelling the cooking time

Use the **-** button to reset the cooking time to 00:00. After a few seconds, the change is adopted. The cooking time is cancelled. If the timer has been set, press the [c] button beforehand.

Checking the time settings

If several time-setting options are set, the relevant symbols are illuminated on the display. The symbol for the time-setting option that is visible in the display is shown in brackets.

To call up the [a] timer, [b] cooking time, [c] end time or [d] clock, press the [c] button repeatedly until the brackets are around the relevant symbol. The display shows the value for a few seconds.

End time

You can change the time at which you wish your dish to be ready. The [a] main oven starts automatically and finishes at the desired time. You can, for example, put your dish in the cooking compartment in the morning and set the cooking time so that it is ready at lunch time.

Ensure that food is not left in the cooking compartment for too long as it may spoil.

Example shown below: It is 10:30, the cooking time is 45 minutes and you want the oven to finish cooking at 12:30.

1. Set the function selector for the main oven.
2. Set the temperature selector for the main oven.
3. Press the [c] button twice.
4. Use the **+** or **-** button to set the cooking time.

5. Press the [c] button. The brackets are around [c]. The time when the dish will be ready is displayed.

6. Use the **+** or **-** button to delay the end time.

After a few seconds, the oven adopts the settings and switches to standby. The display shows the time at which the dish will be ready and the [c] symbol is in brackets. The symbols [a] and [d] go out. When the oven starts, the cooking time counts down in the display and the [b] symbol is shown in brackets. The [c] symbol goes out.

The cooking time has elapsed

A signal sounds. The main oven stops heating. 00:00 is shown in the display. Press the [c] button. The **+** or **-** buttons can be used to set a new cooking time. Or press the [c] button twice and turn the function and temperature selector to the off position. The main oven is switched off.

Changing the end time

Use the **+** or **-** button to change the end time. After a few seconds, the change is adopted. If the timer has been set, first press the [c] button twice. Do not change the end time if the cooking time has already started to elapse. The cooking result would no longer be correct.

Cancelling the end time

Use the **-** button to set the end time back to the current time. After a few seconds, the change is adopted. The main oven starts. If the timer has been set, first press the [c] button twice.

Checking the time settings

If several time-setting options are set, the relevant symbols are illuminated on the display. The symbol for the time-setting option that is visible in the display is shown in brackets.

To call up the [a] timer, [b] cooking time, [c] end time or [d] clock, press the [c] button repeatedly until the brackets are around the relevant symbol. The display shows the value for a few seconds.

Clock

After the appliance is connected or following a power cut, the ⌚ symbol and four zeros flash in the display. Set the clock.

1. Press the ⌚ button.

The clock in the display shows 12:00. The time symbols light up and the brackets are around ⌚.

2. Use the + or – button to set the clock.

After a few seconds, the time that has been set is adopted.

Changing the clock

No other time-setting option should have been set.

1. Press the ⌚ button four times.

The time symbols light up in the display and the brackets are around ⌚.

2. Use the + or – button to change the clock.

After a few seconds, the time that has been set is adopted.

Hiding the clock

You can hide the clock. For more information, please refer to the section *Changing the basic settings*.

Childproof lock

The □ main oven has a childproof lock to prevent children from switching it on by accident or changing a setting.

The main oven does not respond to any settings. You can still set the clock and the timer when the childproof lock is activated.

If the heating type and temperature or grill setting are set for the main oven, the childproof lock interrupts the heater element.

Switching on the childproof lock

No cooking time or end time may be set.

Press and hold the 🔒 button for approximately 4 seconds.

The 🔒 symbol appears in the display. The childproof lock is activated.

Switching off the childproof lock

Press and hold the 🔒 button for approximately 4 seconds.

The 🔒 symbol in the display goes out. The childproof lock is deactivated.

Changing the basic settings

Your oven has various basic settings. These settings can be customised to suit your requirements.

Basic setting	Selection 1	Selection 2	Selection 3
c1 Clock display	always*	only with the ⌚ button	-
c2 Signal duration upon completion of a cooking time or timer period	approx. 10 seconds	approx. 2 minutes*	approx. 5 minutes
c3 Waiting time until a setting is applied	approx. 2 seconds	approx. 5 seconds*	approx. 10 seconds

* Factory setting

No other time-setting option should have been set.

1. Press and hold the ⌚ button for approx. 4 seconds.

The current basic setting for the clock display is shown in the display, e.g. c1 1 for selection 1.

2. Use the + or – button to change the basic setting.

3. Confirm by pressing the ⌚ button.

The next basic setting appears in the display. You can scroll through all levels with the ⌚ button and change the setting with the + or – button.

4. To finish, press and hold the ⌚ button for approx. 4 seconds.

All basic settings are applied.

You may change the basic settings at any time.

Cleaning system

The cleaning system regenerates the self-cleaning surfaces in the cooking compartment.

The back wall, ceiling and side walls of the cooking compartment are coated with a highly porous ceramic layer. This coating absorbs and disintegrates splashes from baking and roasting while the oven is in operation. If these self-cleaning surfaces no longer clean themselves adequately, they can be regenerated with the cleaning system.

Before cleaning

Remove accessories and cookware from the cooking compartment.

Cleaning the cooking compartment floor

Before you set the cleaning system, clean the surfaces in the cooking compartment that are not self-cleaning. Otherwise, stains will develop that it is not possible to remove.

Use a dish cloth and hot soapy water or a vinegar solution. If there are heavy deposits of dirt, use a stainless steel scouring pad or oven cleaner. Only use when the cooking compartment is cold. Never treat the self-cleaning surfaces with a scouring pad or oven cleaner.

Setting

☐ Main oven

1. Set the function selector for the main oven to  3D hot air.
2. Set the temperature selector to **clean**.
3. Press the  button.

Cleaning takes approximately one hour.

The  symbol lights up in the display. The time at which the cleaning will end appears and the  symbol is in brackets. Cleaning will start after a few seconds. You will see the time counting down and the  symbol is in brackets. The  symbol goes out.

Cleaning is finished

A signal sounds. The oven stops heating. 00:00 is shown in the display. Press the  button twice and turn the function selector to the off position. The oven switches off.

Cancelling cleaning

Press the  button and turn the function selector to the off position. The oven switches off.

Setting a later end time

You can postpone the time at which cleaning ends for the main oven. This allows the cleaning programme to run at night, for instance, so that you can use your oven during the day.

Make the settings as described in steps 1 to 3. Before cleaning starts, use the **+** or **-** button to set a later end time.

The main oven switches to standby. The display shows the time at which the cleaning will finish and the  symbol is in brackets. When cleaning starts, you can see the time counting down in the display and the  symbol is in brackets. The  symbol goes out.

☐ Top oven

1. Set the function selector for the top oven to  Top/bottom heating.
2. Set the temperature selector to **clean**.
3. After approximately one hour, turn the function selector to the off position. The oven is switched off.

After cleaning

When the cooking compartment has cooled down completely, wipe the salt residues off the self-cleaning surfaces with a damp cloth.

Care and cleaning

With good care and cleaning, your oven will remain clean and fully-functioning for a long time to come. Here we will explain how to maintain and clean your oven correctly.

Notes

- Slight differences in the colours on the front of the oven are caused by the use of different materials, such as glass, plastic and metal.
- Shadows on the door panel which look like streaks, are caused by reflections made by the oven light.
- Enamel is baked on at very high temperatures. This can cause some slight colour variations. This is normal and does not affect their function. The edges of thin trays cannot be completely enamelled. As a result, these edges can be rough. This will not impair the anti-corrosion protection.

Cleaning agents

To ensure that the different surfaces are not damaged by using the wrong cleaning agent, observe the information in the table. Do not use

- sharp or abrasive cleaning agents,
- cleaning agents with a high concentration of alcohol,
- hard scouring pads or sponges,
- high-pressure cleaners or steam cleaners.

Wash new sponge cloths thoroughly before use.

Area	Cleaning agents
Oven front	Hot soapy water: Clean with a dish cloth and dry with a soft cloth. Do not use glass cleaners or glass scrapers.
Stainless steel	Hot soapy water: Clean with a dish cloth and dry with a soft cloth. Remove flecks of limescale, grease, starch and albumin (e.g. egg white) immediately. Corrosion can form under such residues. Special stainless steel cleaning products suitable for warm surfaces are available from our after-sales service or from specialist retailers. Apply a thin layer of the cleaning product with a soft cloth.
Door panels	Glass cleaner: Clean with a soft cloth. Do not use a glass scraper.
Glass cover for the oven light	Hot soapy water: Clean with a dish cloth.
Seal Do not remove.	Hot soapy water: Clean with a dish cloth. Do not scour.
Shelves	Hot soapy water: Soak and clean with a dish cloth or brush.
Telescopic shelves	Hot soapy water: Clean with a dish cloth or a brush. Do not soak or clean in the dishwasher.
Accessories	Hot soapy water: Soak and clean with a dish cloth or brush.

Cleaning the self-cleaning surfaces in the cooking compartment

The back wall, ceiling and side walls of the cooking compartment are coated with a highly porous ceramic layer. This coating absorbs and disintegrates splashes from baking and roasting while the oven is in operation. The higher the temperature and the longer the oven is in operation, the better the result will be.

Never treat the self-cleaning surfaces with oven cleaner.

If the self-cleaning surfaces no longer clean sufficiently, they can be regenerated with the cleaning system. For more information, please see the *Cleaning system* section.

Light discolouration of the coating does not affect automatic self-cleaning.

Caution!

- Never use abrasive cleaning agents. You will scratch or destroy the highly porous coating.
- Never treat the ceramic coating with oven cleaner. If oven cleaner accidentally gets onto it, remove it immediately with a sponge and plenty of water.

Cleaning the cooking compartment floor

Use a dish cloth and hot soapy water or a vinegar solution.

If there are heavy deposits of dirt, use a stainless steel scouring pad or oven cleaner. Only use when the cooking compartment is cold. Never treat the self-cleaning surfaces with a scouring pad or oven cleaner.

Detaching and refitting the rails

The rails can be removed for cleaning. The oven must have cooled down.

Detaching the rails

1. Lift up the front of the rail
2. and unhook it (figure A).
3. Then pull the whole rail forward
4. and remove it (Fig. B).

Clean the rails with cleaning agent and a sponge. For stubborn deposits of dirt, use a brush.

Refitting the rails

1. First insert the rail into the rear socket, press it to the back slightly (figure A),
2. and then hook it into the front socket (figure B).

The rails fit both the left and right sides. Ensure that, as shown in figure B, levels 1 and 2 are below and levels 3, 4 and 5 are above.

Detaching and attaching the oven door

For cleaning purposes and to remove the door panels, you can detach the oven door.

The oven door hinges each have a locking lever. When the locking levers are closed (figure A), the oven door is secured in place. It cannot be detached. When the locking levers are open in order to detach the oven door (Fig. B), the hinges are locked. They cannot snap shut.

⚠ Risk of injury!

Whenever the hinges are not locked, they snap shut with great force. Ensure that the locking levers are always fully closed or, when detaching the oven door, fully open.

Detaching the door

1. Open the oven door fully.
2. Fold up the two locking levers on the left and right (figure A).
3. Close the oven door as far as the limit stop. With both hands, grip the door on the left and right-hand sides. Close the door a little further and pull it out (figure B).

Attaching the door

Reattach the oven door in the reverse sequence to removal.

1. When attaching the oven door, ensure that both hinges are inserted straight into the opening (figure A).
2. The notch on the hinge must engage on both sides (figure B).

3. Fold back both locking levers (figure C). Close the oven door.

⚠ Risk of injury!

If the oven door falls out accidentally or a hinge snaps shut, do not reach into the hinge. Call the after-sales service.

Cleaning the door panels

To facilitate cleaning, you can remove the inner door panels from the appliance doors.

⚠ Risk of injury!

The components inside the appliance door may have sharp edges. Take care not to cut yourself. Wear protective gloves.

⚠ Risk of injury!

The appliance must not be used again until the door panels and appliance door have been correctly fitted.

Remove the door panels from the main oven and from the top oven

Note: Before removing, make a note of which way round the door panel is fitted, so that it is not refitted the wrong way round.

1. Unhook the appliance door and lay it on a soft, clean surface with the front side facing downwards (see section: Removing and fitting the oven door).
2. Unscrew the cover at the top left and right of the appliance door and detach it (Fig. A).
3. Lift the door panel and remove it (Fig. B).

Clean the intermediate panel on the main oven

1. Unscrew the retainers on the left and right (Fig. C).
2. Unfold the retainers on the left and right.

3. Gently lift the intermediate panel and pull it out forwards.
4. Clean the door panel and intermediate panel with glass cleaner and a soft cloth.

Caution!

Do not use any sharp or abrasive medium or a glass scraper. The glass could be damaged.

Refitting the intermediate panel:

1. Slide in the intermediate panel as far as it will go (Fig. D).

2. Close the retainers on the left and right and screw them tight.

Refitting the door panel:

1. Slide in the door panel all the way.
2. Put the cover back in place and screw it in.
3. Refit the appliance door.

Clean the intermediate panel on the top oven

1. Press the retainer on the intermediate panel on one side and unlatch it, using a spatula for instance (Fig. C).
2. Unlatch the other side in the same way and remove the intermediate panel.

3. Clean the door panel and intermediate panel with glass cleaner and a soft cloth.

Caution!

Do not use any sharp or abrasive medium or a glass scraper. The glass could be damaged.

Refitting the intermediate panel:

1. Place the intermediate panel in the supports on the left and right (Fig. D).
2. Push the intermediate panel downwards in the retainers.

Refitting the door panel:

1. Slide in the door panel all the way.
2. Put the cover back in place and screw it in.
3. Refit the appliance door.

Troubleshooting

Malfunctions often have simple explanations. Refer to the table before calling the after-sales service as you may be able to remedy the fault yourself.

Malfunction table

If a dish does not turn out as well as you had hoped, refer to the section *Tested for you in our cooking studio*, where you will find plenty of cooking tips and notes.

Problem	Possible cause	Remedy/information
The oven does not work.	The circuit breaker is defective.	Look in the fuse box and check that the circuit breaker is in working order.
	Power cut	Check whether the kitchen light or other kitchen appliances are working.
⌚ and zeros flash in the display.	Power cut	Reset the clock.
The oven does not heat up.	There is dust on the contacts.	Turn the control knobs back and forth several times.

Error messages

If an error message with **E** appears, press the ⌚ button. The message disappears. A time function that has been set is cleared. If the error message does not disappear, please contact the after-sales service.

You can take remedial action yourself if the following error message is displayed.

Error message	Possible cause	Remedy/information
E011	A button was depressed for too long or is covered up.	Press all buttons individually. Check whether any buttons are jammed, covered up or soiled.

⚠ Risk of electric shock!

Incorrect repairs are dangerous. Repairs may only be carried out by one of our trained after-sales engineers.

Replacing the oven light bulb

Replace faulty oven light bulbs.

Spare bulbs can be obtained from the after-sales service or specialist retailers. Only use these oven light bulbs.

- For the main oven: E14, 220 - 240 V, 40 W, heat-resistant to 300 °C.
- For the top oven: E14, 220 - 240 V, 25 W, heat-resistant to 300 °C.

⚠ Risk of electric shock !

Disconnect the appliance from the power supply. Switch off the circuit breaker or remove the fuse from the household fuse box.

1. Place a tea towel in the cold cooking compartment to prevent damage.
2. Turn the glass cover anticlockwise and remove it.

3. Replace the oven light bulb with a bulb of the same type.
4. Screw on the glass cover again.
5. Remove the tea towel and switch on the circuit breaker.

Note: Use rubber gloves if the glass cover cannot be unscrewed: Or order a special removal tool from the after-sales service:

- For the main oven: Order no. 613634
- For the top oven: Order no. 621743

Glass cover

You must replace a damaged glass cover. Suitable glass covers may be obtained from the after-sales service. Please specify the E number and FD number of your appliance.

After-sales service

Our after-sales service is there for you if your appliance needs to be repaired. We will always find the right solution in order to avoid unnecessary visits from a service technician.

E number and FD number

When calling us, please give the product number (E no.) and the production number (FD no.) so that we can provide you with the correct advice. The rating plate containing these numbers can be found on the right-hand side of the oven door. You can make a note of the numbers of your appliance and the telephone number of the after-sales service in the space below to save time should it be required.

E no.	FD no.
-------	--------

After-sales service

Please note that there will be a fee for a visit by a service technician in the event of a malfunction, even during the warranty period.

Please find the contact data of all countries in the enclosed customer service list.

To book an engineer visit and product advice

GB 0844 8928979

Calls from a BT landline will be charged at up to 3 pence per minute. A call set-up fee of up to 6 pence may apply.

IE 01450 2655

Trust the expertise of the manufacturer, and rest assured that the repair will be carried out by trained service technicians using original spare parts for your domestic appliance.

Energy and environment tips

Here you can find tips on how to save energy when baking and roasting and how to dispose of your appliance properly.

Saving energy

- Only preheat the oven if this is specified in the recipe or in the operating instruction tables.
- Use dark, black lacquered or enamelled baking tins. They absorb the heat particularly well.
- Open the oven door as infrequently as possible while you are cooking, baking or roasting.
- It is best to bake several cakes one after the other. The oven is still warm. This reduces the baking time for the second cake. You can also place two loaf tins next to each other.

- For longer cooking times, you can switch the oven off 10 minutes before the end of the cooking time and use the residual heat to finish cooking.

Environmentally-friendly disposal

Dispose of packaging in an environmentally-friendly manner.

This appliance complies with European Directive 2002/96/EC on Waste Electrical and Electronic Equipment (WEEE). The directive gives a framework for the collection and recycling of old appliances, which is valid across the EU.

Tested for you in our cooking studio

Here you will find a selection of dishes and the ideal settings for them. We will show you which type of heating and which temperature are best suited for your dish. You can find information about suitable accessories and the height at which they should be inserted. There are also tips about cookware and preparation methods.

Notes

- The values in the table always apply to dishes placed into the cooking compartment when it is cold and empty.
Only preheat the appliance if the table specifies that you should do so. Do not line the accessories with greaseproof paper until after they have been preheated.
- The times specified in the tables are guidelines only. They will depend on the quality and composition of the food.
- Use the accessories supplied. Additional accessories may be obtained as special accessories from specialist retailers or from the after-sales service.
Before using the oven, remove any unnecessary accessories and ovenware from the cooking compartment.
- Always use oven gloves when taking hot accessories or ovenware out of the cooking compartment.

Cakes and pastries

Baking on one level

When baking cakes, the best results can be achieved using  Top/bottom heating.

When baking with  3D hot air, use the following shelf heights for the accessory:

- Cakes in tins: level 2
- Cakes on trays: level 3

Baking on two or more levels

Use  3D hot air.

Baking on 2 levels

- Wire rack or universal pan at shelf position 3
- Wire rack at shelf position 1.

Baking on 3 levels:

- Wire rack at shelf position 5
- Universal pan at shelf position 3
- Wire rack at shelf position 1.

Baking trays that are placed in the oven at the same time will not necessarily be ready at the same time.

The tables show numerous suggestions for your dishes.

If you have 2 small, round cake tins, place them on one level next to each other on the wire rack.

If you have 4 small, round cake tins, place 2 next to each other on each wire rack. Slide in the wire racks one above the other.

If you are baking with 3 loaf tins at the same time, place these on the wire racks as indicated in the picture.

Baking tins

It is best to use dark-coloured metal baking tins.

Baking times are increased when light-coloured baking tins made of thin metal or glass dishes are used, and cakes do not brown so evenly.

If you wish to use silicone baking tins, use the information and recipes provided by the manufacturer as a guide. Silicone baking tins are often smaller than normal tins. The amount of mixture and recipe instructions may differ.

Tables

The tables show the ideal type of heating for the various cakes and pastries. The temperature and baking time depend on the amount and composition of the mixture. This is why temperature ranges are given in the tables. You should try the lower temperature first, since a lower temperature results in more even browning. You can increase the temperature next time if necessary.

If you preheat the oven, the baking time is shortened by 5 to 10 minutes.

Additional information can be found in the *Baking tips* section following the tables.

Main oven

Food	Dish	Shelf position	Type of heating	Temperature in °C	Time in minutes
Victoria sandwich	Wire rack + 2 x Ø 20 cm tins	2		170-180	20-25

Baking tips

You wish to bake according to your own recipe. Use similar items in the baking tables as a guide.

How to establish whether sponge cake is baked through. Approximately 10 minutes before the end of the baking time specified in the recipe, stick a cocktail stick into the cake at the highest point. If the cocktail stick comes out clean, the cake is ready.

The cake collapses. Use less fluid next time or set the oven temperature 10 degrees lower. Observe the specified mixing times in the recipe.

The cake has risen in the middle but is lower around the edge. Do not grease the sides of the springform cake tin. After baking, loosen the cake carefully with a knife.

The cake goes too dark on top. Place it lower in the oven, select a lower temperature and bake the cake for a little longer.

The cake is too dry.	When it is done, make small holes in the cake using a cocktail stick. Then drizzle fruit juice or an alcoholic beverage over it. Next time, select a temperature 10 degrees higher and reduce the baking time.
The bread or cake (e.g. cheesecake) looks good, but is soggy on the inside (sticky, streaked with water).	Use slightly less fluid next time and bake for slightly longer at a lower temperature. For cakes with a moist topping, bake the base first. Sprinkle it with almonds or bread crumbs and then place the topping on top. Please follow the recipe and baking times.
The cake is unevenly browned.	Select a slightly lower temperature to ensure that the cake is baked more evenly. Bake delicate pastries on one level using  Top/bottom heating. Protruding greaseproof paper can affect the air circulation. For this reason, always cut greaseproof paper to fit the baking tray.
The bottom of a fruit cake is too light.	Place the cake one level lower the next time.
The fruit juice overflows.	Next time, use the deeper universal pan, if you have one.
Small baked items made out of yeast dough stick to one another when baking.	There should be a gap of approx. 2 cm around each item. This gives enough space for the baked items to expand well and turn brown on all sides.
You were baking on several levels. The items on the top baking tray are darker than that on the bottom baking tray.	Always use  3D hot air to bake on more than one level. Baking trays that are placed in the oven at the same time will not necessarily be ready at the same time.
Condensation forms when you bake moist cakes.	Baking may result in the formation of water vapour, which escapes above the door. The steam may settle and form water droplets on the control panel or on the fronts of adjacent units. This is a natural process.

Meat, poultry, fish

Ovenware

The universal pan with insert wire rack is suitable for large roasts. You may also use any heat-resistant ovenware.

Glass ovenware is the most suitable. Ensure that the lid of the roasting dish fits well and closes properly.

Add a little more liquid when using enamelled roasting dishes.

With roasting dishes made of stainless steel, browning is not so intense and the meat may be somewhat less well cooked. Increase the cooking times.

Always place the ovenware in the centre of the wire rack.

Place hot glass ovenware on a dry mat after cooking. The glass could crack if placed on a cold or wet surface.

Roasting

The information in the table applies to food placed in a cold oven and for meat taken directly from the refrigerator.

Main oven

Food	Dish	Shelf position	Type of heating	Temperature in °C	Time, min. per 500 g + add. time
Beef					
Slow roast joint	Universal pan with wire insert	1		130-140	40 + 40
Top side, top rump	Universal pan with wire insert	1		160-170	30 + 25
Lamb					
Leg	Universal pan with wire insert	1		160-170	30 + 25
Shoulder (bone in)	Universal pan with wire insert	1		160-170	25 + 20
Shoulder (boned and rolled)	Universal pan with wire insert	1		170-180	25 + 25
Rack of lamb	Universal pan with wire insert	1		180-190	25 + 25
Pork					
Roast joint	Universal pan with wire insert	1		180-190	35 + 35
Loin joint	Universal pan with wire insert	1		170-180	30 + 30
Belly	Universal pan with wire insert	1		160-170	30 + 25
Gammon joint	Universal pan with wire insert	1		160-170	30 + 30

The joints of meat should weigh between 500 g and 2 kg.

Ensure that you always use the lower temperature, if the weight of the joint you wish to roast is high.

If there are several pieces of meat, calculate the roasting time using the weight of the heaviest piece of meat. The individual pieces of meat should be approximately the same size.

Meat

When using the  Top/bottom heating and  Circulated air grilling types of heating, turn the pieces of meat halfway through the cooking time.

When the roast is ready, turn off the oven and allow it to rest for 10 minutes. This allows better distribution of the meat juices.

When roasting joints of pork with a rind, make cuts in the rind crossways and if it is to be turned, first place the joint with the rind side down in the dish.

Food	Dish	Shelf position	Type of heating	Temperature in °C	Time, min. per 500 g + add. time
Poultry					
Chicken	Universal pan with wire insert	1		170-180	25 + 25
Chicken, portion (200-250 g each)	Universal pan with wire insert	1		190-200	20 + 25
Chicken, quarter (450 g each)	Universal pan with wire insert	1		180-190	20 + 25
Duck	Universal pan with wire insert	1		180-190	20 + 20
Turkey, crown	Universal pan with wire insert	1		160-170	15 + 15
Turkey, whole (up to 12 kg)	Universal pan with wire insert	1		160-170	12 + 12

Casserole					
Diced meat (beef, pork, lamb)	Wire rack + glass roasting dish with lid	2		140	120-150 (total time)
Braising steaks	Wire rack + glass roasting dish with lid	2		140	120-150 (total time)
Chicken	Wire rack + glass roasting dish with lid	2		140	60-90

Complete meal					
With beef	Wire rack + universal pan with wire insert	4+1		160, then 200 (yorkshire pudding)	weight of meat (see table above) + 15-25 for yorkshire pudding
With chicken	Wire rack + universal pan with wire insert	4+1		180	weight of chicken (see table above)

Food	Dish	Shelf position	Type of heating	Temperature in °C	Time, min. per 500 g + add. time
Beef					
Top side, top rump	Universal pan with wire insert	2		200-220	25 + 25
Lamb					
Leg	Universal pan with wire insert	1		150-170	30 + 35
Rack of lamb	Universal pan with wire insert	1		180-200	25 + 25
Pork					
Roast joint	Universal pan with wire insert	1		180-200	35 + 40
Loin joint	Universal pan with wire insert	2		190-210	25 + 50
Belly	Universal pan with wire insert	1		220-240	25 + 40
Poultry					
Chicken	Universal pan with wire insert	1		200-220	25 + 15
Chicken, portion (200-250 g each)	Universal pan with wire insert	3		210-230	25 + 25
Chicken, quarter (450 g each)	Universal pan with wire insert	2		220-240	20 + 25
Duck	Universal pan with wire insert	1		190-210	20 + 20

Grilling

When grilling, preheat the oven for approx. 3 minutes, before putting the food in.

Always grill with the oven door closed.

As far as possible, the pieces of food you are grilling should be of equal thickness. This will allow them to brown evenly and remain succulent and juicy.

Turn grilled items after the specified time.

Whole fish does not need to be turned. Place the whole fish in the oven in the swimming position with the dorsal fin pointing

upwards. Placing a scored potato or a small oven-proof container in the stomach cavity of the fish will provide stability.

Do not add salt to steaks until they have been grilled.

Place the food to be grilled directly on the wire rack. If you are grilling a single piece, the best results are achieved by placing it in the centre of the wire rack.

The universal pan should also be inserted underneath. To prevent a high degree of smoke from forming, do not insert the pan higher than level 3. The meat juices are collected in the pan and the oven is kept cleaner.

Do not insert the baking tray or universal pan at level 4 or 5. The high heat distorts it and the cooking compartment can be damaged when removing it.

The grill element switches on and off continually. This is normal. The grill setting determines how frequently this will happen.

☑ Main oven

Food	Dish	Shelf position	Type of heating	Grill setting	Time in minutes
Beef					
Steaks, height 2-3 cm	Wire rack + universal pan	5+3		3	1. side 4-5, 2. side 4-5
Burgers, height 1-2 cm	Wire rack + universal pan	5+3		3	1. side 6-8, 2. side 4-6
Lamb					
Steaks, height 2-3 cm	Wire rack + universal pan	5+3		3	1. side 6-7, 2. side 6-7
Chops, height 2-3 cm	Wire rack + universal pan	5+3		3	1. side 5-6, 2. side 5-6
Pork					
Steaks, height 1-2 cm	Wire rack + universal pan	5+3		3	1. side 6-7, 2. side 6-7
Chops, height 2-3 cm	Wire rack + universal pan	4+3		3	1. side 10-12, 2. side 9-10
Burgers, height 1-2 cm	Wire rack + universal pan	5+3		3	1. side 6-8, 2. side 4-6
Sausages, thickness 2-4 cm	Wire rack + universal pan	4+3		3	10-15, turn occasionally
Gammon					
Steaks, height 1-3 cm	Wire rack + universal pan	5+3		3	1. side 4-5, 2. side 3-4
Chicken					
Drumsticks, 150 g each	Wire rack + universal pan	3+2		3	1. side 17, 2. side 8
Breast (boneless), 150 g each	Wire rack + universal pan	3+2		3	1. side 20, 2. side 10
Fish					
Whole trout, 300 g each	Wire rack + universal pan	2+1		2	20-25
Fillets, 150 g each	Wire rack + universal pan	4+3		3	1. side 5-7, 2. side 5-7

☑ Top oven

Observe the notes in the table about preheating.

Food	Dish	Shelf position	Type of heating	Grill setting	Time in minutes
Beef					
Steaks 2-3 cm thick	Wire rack + universal pan	2+ 1	*	3	1st side 10-13, 2nd side 6-8
Burgers 1-2 cm thick	Wire rack + universal pan	2+ 1		3	1st side 10-12, 2nd side 6-8
Lamb					
Steaks 2-3 cm thick	Wire rack + universal pan	2+ 1	*	3	1st side 6-8, 2nd side 4-6
Chops 2-3 cm thick	Wire rack + universal pan	2+ 1	*	3	1st side 7-9, 2nd side 5-8

* Preheat for 3 minutes

** Turn frequently

Food	Dish	Shelf position	Type of heating	Grill setting	Time in minutes
Pork					
Steaks 1-2 cm thick	Wire rack + universal pan	2+ 1	*	3	1st side 9-12, 2nd side 6-8
Chops 2-3 cm thick	Wire rack + universal pan	2+ 1	*	3	1st side 10-13, 2nd side 8-12

Chicken					
Drumsticks 150 g each	Wire rack + universal pan	2+ 1		2	1st side 16-20, 2nd side 12-15
Breast (boneless) 150 g each	Wire rack + universal pan	2+ 1		2	1st side 13-15, 2nd side 8-10
Fish					
Whole trout 300 g each	Wire rack + universal pan	2+ 1		1	25-30
Fillets 150 g each	Wire rack + universal pan	2+ 1		1	15-20

* Preheat for 3 minutes

** Turn frequently

Tips for roasting and grilling

The table does not contain information for the weight of the joint.	Select the next lowest weight from the instructions and extend the time.
How to tell when the roast is ready.	Use a meat thermometer (available from specialist shops) or carry out a "spoon test". Press down on the roast with a spoon. If it feels firm, it is ready. If the spoon can be pressed in, it needs to be cooked for a little longer.
The roast is too dark and the crackling is partly burnt.	Check the shelf height and temperature.
The roast looks good but the juices are burnt.	Next time, use a smaller roasting dish or add more liquid.
The roast looks good but the juices are too clear and watery.	Next time, use a larger roasting dish and use less liquid.
Steam rises from the roast when basted.	This is normal and due to the laws of physics. The majority of the steam escapes through the steam outlet. It may settle and form condensation on the cooler switch panel or on the fronts of adjacent units.

Preprepared products

Observe the instructions on the packaging.

If you line the accessories with greaseproof paper, make sure that the paper is suitable for these temperatures. Make sure the paper is a suitable size for the dish to be cooked.

The cooking result greatly depends on the quality of the food. Pre-browning and unevenness can sometimes even be found on the raw product.

Leave a little space between bread rolls when crisping them up. Do not place too many bread rolls on the accessories.

Sprinkle grated cheese over the top of your lasagne to give it a beautiful and evenly browned finish.

Main oven

Food	Dish	Shelf position	Type of heating	Temperature in °C	Time in minutes
Pizza, frozen					
Pizza with a thin base	Universal pan	2	/	200-220	15-20

	Wire rack	2	*	180-190	40-50
Lasagne, chilled					
Lasagne, 400 g	Wire rack	2	*	170-180	25-30
Lasagne, 1200 g	Wire rack	2	*	170-180	30-35

* Preheat.

Special dishes

At low temperatures, 3D hot air is equally useful for producing creamy yoghurt as it is for proving light yeast dough.

First, remove accessories, hook-in racks or telescopic shelves from the cooking compartment.

Preparing yoghurt

1. Bring 1 litre of milk (3.5 % fat) to the boil and cool down to 40 °C.
2. Stir in 150 g of yoghurt (chilled).
3. Pour into cups or small screw-top jars and cover with cling film.

4. Preheat the cooking compartment as indicated.

5. Place the cups or jars on the cooking compartment floor and incubate as indicated.

Proving dough

1. Prepare the dough as usual, place it in a heat-resistant ceramic dish and cover.
2. Preheat the cooking compartment as indicated.
3. Switch off the oven and place the dough in the cooking compartment and leave it to prove.

Main oven

Meal	Cookware		Type of heating	Temperature	Cooking time
Yoghurt	Cups or screw-top jars	Place on the cooking compartment floor	☉	Preheat to 50 °C	5 mins
				50 °C	8 hrs
Proving dough	Heat-resistant dish	Place on the cooking compartment floor	☉	Preheat to 50 °C	5-10 mins
				Switch off the appliance and place the yeast dough in the cooking compartment	20-30 mins

Upper oven

Meal	Cookware	Level	Type of heating	Temperature	Cooking time
Yoghurt	Cups or screw-top jars	Place on the cooking compartment floor	☐	Preheat to 100 °C	15 mins
				Switch on the ☐ oven light	approx. 8 hrs

Defrost

The defrosting time will depend on the type and quantity of the food.

Observe the instructions on the packaging.

Take frozen food out of its packaging and place in a suitable dish on the wire rack.

Place poultry on a plate with the breast side facing down.

Frozen food	Accessories	Level	Type of heating	Temperature
e.g. cream cakes, buttercream cakes, gateaux with chocolate or sugar icing, fruit, chicken, sausage and meat, bread and bread rolls, cakes and other baked items	Wire rack	1	☒	The temperature selector remains switched off

Drying

With ☉ 3D hot air, you can dry foods brilliantly.

Use unblemished fruit and vegetables only and wash them thoroughly.

Drain off the excess water, then dry them.

Line the universal pan and the wire rack with greaseproof or parchment paper.

Turn very juicy fruit or vegetables several times.

Remove fruit and vegetables from the paper as soon as they have dried.

Fruit and herbs	Accessories	Level	Type of heating	Temperature	Cooking time
600 g apple rings	Universal pan + rack	3+1	☉	80 °C	5 hrs (approx.)
800 g pear slices	Universal pan + rack	3+1	☉	80 °C	8 hrs (approx.)
1.5 kg damsons or plums	Universal pan + rack	3+1	☉	80 °C	8-10 hrs (approx.)
200 g herbs, washed	Universal pan + rack	3+1	☉	80 °C	1½ hrs (approx.)

Acrylamide in foodstuffs

Acrylamide is mainly produced in grain and potato products prepared at high temperatures, such as potato crisps, chips,

toast, bread rolls, bread or fine baked goods (biscuits, gingerbread, cookies).

Tips for keeping acrylamide to a minimum when preparing food

General	<ul style="list-style-type: none"> ■ Keep cooking times to a minimum. ■ Cook meals until they are golden brown, but not too dark. ■ Large, thick pieces of food contain less acrylamide.
Baking	<p>With top/bottom heating max. 200 °C.</p> <p>With 3D hot air or hot air max. 180 °C.</p>
Biscuits	<p>With top/bottom heating max. 190 °C.</p> <p>With 3D hot air or hot air max. 170 °C.</p> <p>Egg or egg yolk reduces the production of acrylamide.</p>
Oven chips	<p>Spread evenly over the baking tray, in a single layer. Bake at least 400 g per baking tray so that the chips do not dry out</p>

Test dishes

These tables have been produced for test institutes to facilitate the inspection and testing of the various appliances.

In accordance with EN 50304/EN 60350 (2009) and IEC 60350.

Baking

When baking on 2 levels, always insert the universal pan above the baking tray. When baking on 3 levels, insert the universal pan in the centre of the oven.

Piped cookies: Food on baking trays that are placed in the oven at the same time will not necessarily all be ready at the same time.

German apple pie on 2 levels: Place dark springform cake tins one above the other. German apple pie on 1 level: Place dark springform cake tins diagonally next to each other.

Cakes in tinplate springform cake tins: Bake on 1 level with ☐ Top/bottom heating. Place the springform cake tins on the universal pan instead of on the wire rack.

Note: For baking, use the lower of the temperatures indicated first.

☐ Main oven

Meal	Accessories and tins	Level	Type of heating	Temperature in °C	Cooking time in minutes
Piped cookies	baking tray	3	☐	160-180	20-30
	baking tray	3	☑	160-180	20-30
	Universal pan + baking tray	3+1	☑	150-170	30-40
	Universal pan + 2 baking trays	5+3+1	☑	140-160	40-50
Small cakes preheat	baking tray	3	☐	160-180	20-25
	Universal pan + baking tray	3+1	☑	150-170	30-35
	Universal pan + 2 baking trays	5+3+1	☑	140-160	30-35
Small cakes	baking tray	3	☑	160-180	20-25
Hot water sponge cake preheat	Springform cake tin on the wire rack	2	☐	170-190	30-40
Hot water sponge cake	Springform cake tin on the wire rack	2	☑	160-180	30-40
German apple pie	Wire rack + 2 springform cake tins, dia. 20 cm	1	☐	190-210	70-80
	Wire rack + 2 springform cake tins, dia. 20 cm	3+1	☑	190-210	70-80

Grilling

☐ Main oven

If you are grilling food directly on the wire rack, the universal pan should also be inserted at level 1. The liquid is then collected, keeping the oven cleaner.

Meal	Accessories	Level	Type of heating	Grill setting	Cooking time in minutes
Toast Preheat for 10 minutes	wire rack	5	☐	3	1/2-2
Beefburgers, 12 pieces* do not preheat	Wire rack + Universal pan	4+ 1	☐	3	25-30

* turn over after 2/3 of the cooking time.
