T&C Apply

Gentler handling of textiles compared to washing by hand. Tested on 6 common fabrics under the following conditions: 15 machine washes with delicate/silk wash program and 15 washes by hand, at 30° C. Certified by wfk - Institut für Angewandte Forschung GmbH (Investigation WL 8457A/16)

As per Cottons 40° C program without additional options selected. May vary according to the models.

Perfect solutions that simplify your life.

German engineering

Our founder Robert Bosch believed that all tasks are important, even the modest. It has served as our principle in trading for more than 75 years now. We have aspired to create products of the highest quality and perfection with honesty. We regularly notch up top marks in European customer tests.

We credit German engineering for the awards we achieve every year in renowned product design competitions. The term 'German Engineered' stands for high-class workmanship and innovative strength that comes from our German engineers.

Our only aim is to offer perfected solutions to our customers which are driven by their needs and improving the quality of their lives with maximum user benefits.

SpeedPlus and SpeedProfessional | Faster wash

WashForward

Now have the best of both worlds. Expert wash care for your new, expensive clothes and faster wash cycles under 60* minutes. Our latest **SpeedPlus** and **SpeedProfessional** range of washing machines cuts out excess time from the washing process, without compromising on wash quality. Now get the best wash performance. Only faster.

SpeedPlus

With up to 65%* savings in laundry time, washing need not take more of your time.

SpeedProfessional

When you have bigger wash loads, this machine gets it done efficiently and under 60# minutes.

TIME COMPARISON CHART

Program	Normal Wash Cycle	With Speed
Cottons	120 MIN	60 MIN
Synthetics	119 MIN	59 MIN
Daily Wash	63 MIN	45 MIN

Delicates/Silk, Gentle Wash and Refresh Programs are also under 60# minutes wash cycle.

*Internal benchmark against Bosch washing programs. As of April 2017.
As per Cottons 40° C program without additional options selected. May vary according to the models.

VarioDrum | Uniquely-designed drums

Protect your delicate clothes and fine fabrics

Bosch has engineered a washing machine with VarioDrum. It is a specially designed drum which features a dual-sided system that provides thorough wash while protecting even the most delicate fabrics. As the drum spins in one direction, the flat side of the paddle gently cleans fine textiles and when it spins in the opposite direction, the steep side of the paddle ensures a deep clean with its wave-droplet design. Now you can wash your new and expensive clothes over and over again without worrying about diminishing their quality.

VarioDrum: Wave Droplet Design

Big Paddle Design

Large Capacity Drum

AntiVibration™ & EcoSilence™ Drive | Silent operation

AntiVibration™ Design. More stability, less vibration.

The special AntiVibration™ Design of the side walls makes Bosch washing machines and dryers extremely quiet. It reduces vibrations and ensures greater stability so that you can do your washing without disturbing your loved ones.

EcoSilence™ Drive
Powerful, silent and built to last.

Without using carbon brushes like traditional motors, our innovative EcoSilence™ Drive friction-free motor minimizes any heat and wear-out. The result - a drive system that is not only powerful and long lasting, but also one of the most silent in operation.

Wash programs and options

Wash programs and options with you in mind.

We’ve designed special wash programs to cater to the unique laundry needs of Indian homes so you can do your laundry easier and faster.

Wash Programs

Gentle Wash

With Gentle Wash, you no longer have to hand-wash delicate fabrics. This program uses precise drum action designed to be super gentle yet thorough.

Refresh

Whether it’s freshening up wet or lightly soiled clothes or removing odours from damp clothes that remain after cold washing - our Refresh Program will get the job done quickly and easily. This wash program with a warm, final rinse cycle reduces moisture and shortens the drying process by 10% for quicker drying - perfect for the wet and humid monsoon season.

SuperQuick 15’/30’

Perfect for newly bought or lightly soiled clothes, this 15’/30’ minute program handles loads upto 2/3.5kg, and is among the shortest wash programs in the market.

Wash Options

Speed Mode

The mode for those in a hurry. This option reduces wash time by up to 65%* without compromising on wash results. Get more time to do the things you love.

Time Delay

Select the end time of your wash with this option. Enjoy greater flexibility with your daily schedule.

Reload

Forgot a sock or a shirt after starting the wash cycle or mixed a coloured item with the load of white laundry? The Reload option allows you to open the door early in the cycle to add or remove the items easily.

*Internal benchmark against Bosch washing program.
As of April 2017.

SpeedProfessional Range

Clean laundry in a flash.

Now a big laundry load need not drain away your precious time. Especially when you have WashForward with **Speed**Professional range of washing machines from Bosch. Its higher capacity can handle bigger wash loads comfortably and efficiently under 60* minutes. With the same expert care for your new expensive clothes, even after repeated washing.

Classic Range

Features and specifications

Intelligent features to enhance your laundry experience.

Every detail matters at Bosch. Beyond wash programs that deliver perfect results, our machines come with other features to ensure a laundry experience that meets your needs.

Assured hygiene

Making sure the washing machine is thoroughly cleaned is a must for health conscious families but cleaning can be a chore for those leading a hectic lifestyle. Helping you with this, the self-cleaning Detergent Drawer is cleaned automatically after each wash cycle, to maintain cleanliness and increase protection against allergens. This ensures healthier living, especially for children and the elderly.

Protection from pests

Lizards and rats may be at home in the tropics but they don't belong anywhere near your laundry room. The unique design of our washers keeps pests out of the washing machine's hardware, ensuring smooth operation for every wash.

VoltCheck

Designed specially to deal with fluctuations and interruptions in your power supply, VoltCheck not only features an indicator that blinks whenever this happens but also automatically resumes the wash from the last cycle when stable power is available.

Wash & Dry Programs 60* min | 100% washing and drying results

Perfect wash meets perfect drying. All under 60# minutes.

Our engineers believe in turning something good into extraordinary. Which is why, our Washer Dryers give you a perfect wash and dry clothes just as efficiently. So in goes dirty laundry and out comes 100% clean, ready-to-wear dry clothes in under 60# minutes.

As per Cottons 40°C program without additional options selected.
May vary according to the models.

100% perfect wash with up to 100% perfect drying.

We’ve designed our machine with special washing and drying programs to cater to your unique laundry needs.

Thoughtful Features

EcoSilence™ Drive Motor

It is quiet, powerful and durable. It ensures low power consumption and high cleaning efficiency. It works without brushes and ensures top results. Not just that, its innovative technology works without friction for virtually wear-free operation.

AntiVibration™ Design

Now enjoy watching TV while your washer dryer works without much noise. The AntiVibration™ Design of Bosch washing machines comes with sidewalls that reduce vibrations during the spin cycle and are designed to ensure that they do not shake when in action.

Wash & Dry Program

Wash & Dry Program within 60* min

Get cupboard-dry clothes at the touch of a button. This feature washes and dries your clothes up to 100% within 60*min. Just load your machine, select this feature and go back to your daily chores. When you return you will have clean, dry and ready-to-wear clothes.

Wash Options

SpeedPerfect

It offers the shortest wash cycles across all programs, saving precious time by doing the laundry up to 65%* faster yet giving 100% wash performance. In short, it reduces washing time, without compromising on washing quality.

EcoPerfect

Our washer dryer reduces power consumption by up to 50%. It does this by sensing the fabric type and volume of load. Temperature sensors regulate and prolong the heating process according to the available time. This in turn makes detergent-use more effective and saves electricity.

Reload Function

We’ve all done it - left a sock in the shoe, then realized it’s too late because the wash cycle has started. Or perhaps you’ve put a red garment into a white-only load by mistake. Now there's a solution to this problem: the Reload Function. It allows you to open the door early in the cycle to add or remove the items.

DuoTronic Technology | Intelligent sensor

Crafted with all the time in the world. To dry clothes as quickly as possible.

You don't have to wait for the rains to stop before drying your favourite jeans. The drying power is in your hands. At the press of a button all your washed clothes will prepare for a dust-free, quick and warm spin. Our one-of-a-kind dryer is crafted to protect the colours of your clothes and save your time without compromising on the drying result. Its built-in DuoTronic Technology detects the moisture level and its controlled heat ensures that your clothes stay soft and wrinkle-free for long. In short, they dry quickly and impress longer.

It’s quick, smart and gentle with thoughtful features.

We’ve designed our machine with special drying programs so that you get Cupboard-Dry clothes at the press of a button.

Thoughtful Features

DuoTronic Technology

This dryer is clever. It detects the moisture and regulates the heat accordingly. When your clothes are perfectly dry, it senses and stops the drying process. It also selects the optimum temperature and drying cycle so as not to damage any of your fabrics.

AntiVibration™ Design

Besides being eye-catching, the sidewalls with AntiVibration Design don’t let the dryer shake and shift, giving you a quiet, vibration-free spin cycle. It’s so quiet, you may even sleep off while your clothes dry.

SensitiveDrying System

Our dryers have an airflow system that combines with the unique drum and paddle action, to create an exceptionally efficient and caring environment. The large drum with a unique textured surface ensures greater care of the most delicate fabrics, improving the airflow and keeping the laundry raised from the surface of the drum.

Low Heat Drying

Worried that your delicate fabrics will get spoilt due to overheating? Don’t worry, there is a solution. The machine senses the nature of the load. It reduces the drying temperature and increases the cycle time to make sure you get perfectly dry clothes without hurting the fabric.

Drying Programs and Options

Wool Finish Program

This program is perfect for your woolens. It treats your woolens with low force and cold water so that the fabric is not stretched. It also makes sure your woolens are dried well and fit you right, time after time.

Anti-Crease Cycle

This program is meant to reduce your ironing worries. Its gentle drum action automatically separates and smoothenes your garments for up to 60/90 minutes, giving your clothes a wrinkle-free and ready-to-go look.
