Bosch in every detail. German Engineered.

Everyone knows Germans deliver world-class performance and quality craftsmanship through making precise, powerful machines. Using the most advanced German technologies, we have created an Asian-inspired washing machine engineered to provide you an unsurpassed laundry experience.

Why choose Bosch?

Bosch quality

All Bosch products are manufactured to highest possible standards, using only premium quality materials. We undertake quality and endurance test for our products under continuous usage conditioning to further strengthen the customer's peace of mind.

Green Technology inside

This signet denotes products that focus on energy and water efficiency while achieving top performance based on Bosch technologies.

10 Year EcoSilence Drive® motor warranty

Bosch assures our customers with a 10 year motor warranty for our innovative EcoSilence Drive™.

What is ECARF?

The ECARF quality seal is designed to help allergic patients select appropriate goods and services. A number of Bosch models have received the ECARF quality tested seal.

Professional washing solutions.

Bosch HomeProfessional boasts the very latest technology, offering you maximum washing power, minimum consumption and lots of convenient functions and programmes.

VarioPerfect™
The ultimate in convenience

Do laundry quickly with the ultimate control over time and money using SpeedPerfect and EcoPerfect.

JetSystem™ SelfCleaning Detergent Drawer

The SelfCleaning Detergent Drawer is automatically cleaned with a vigorous wash action. This saves you the annoying chore of removing leftover detergent after completing the wash cycle.

ActiveWater™

All Bosch washing machines feature an automatic load sensing function that adapts the water consumption to the relevant load size.

The unique i-DOS® Intelligent Automatic Dosing System

Automatically dispenses liquid detergent with millilitre precision.

Reload function

The reload function allows additional items of laundry to be added on after the programme has started by pressing the start / reload button easily.

VarioDrum™

The unique waved surface of the drum, with its steep and flat structures is designed for both powerful and gentle treatment of laundry.

AquaStop™
Anti-flood protection

The AquaStop™ system includes a valve that is directly connected to the water tap. Should a leak be detected, the sensor activates and cuts off water supply at the tap connection, which prevents flooding.

AntiVibration™ design

Our AntiVibration™ design increases stability of the housing and reduces vibrations.

Automatic Load Sensing

Detects the load quantity and ensures only the amount of electricity and water required for that load is used.

EcoSilence Drive™
Outstanding performance

Powerful, durable, quiet and efficient. That is the brushless motor that provides better overall washing performance.

* Image for illustration purpose only.
* Features applicable for specific washers only.

Breakthrough innovation

Hygienically clean at very low temperatures.

Active Oxygen

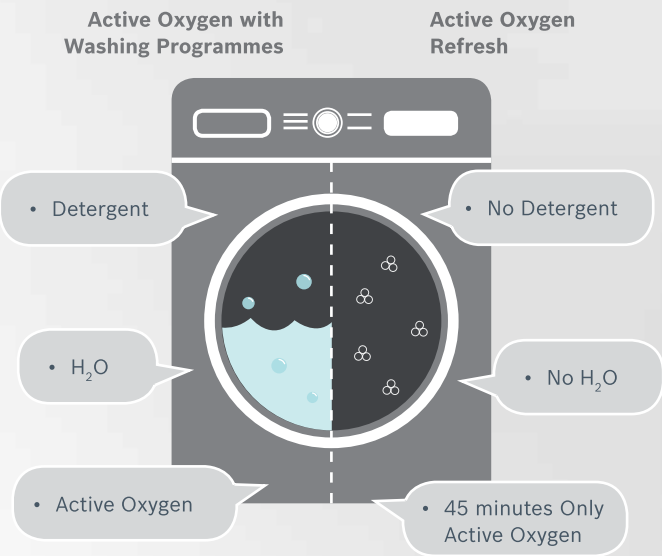

Thanks to our wfk-certified breakthrough ActiveOxygen™ technology, up to 99.99%* of bacteria and germs are effectively eliminated from even the most delicate fabrics.

Even if you choose to wash your clothes at low temperatures to preserve their colours, you can still be assured of optimum hygiene levels without the use of chemical additives. Experience the best possible cleaning result that ensures your favourite clothes are well taken care of.

DID YOU KNOW ?

Difference between Active Oxygen & Active Oxygen Refresh Programme

Refresh your laundry with the best hygiene and garment care in just 45 minutes.

Active Oxygen Refresh

Our new Active Oxygen™ Refresh programme uses breakthrough technology to clean and remove odours so you can freshen your laundry with a quick, hygienic wash.

Freshens in 45 minutes

A quick 45 minutes is all it takes to freshen up your clothes and also removes the BBQ odour from a smoky dinner out!

Garment Protection

Preserves delicate fabrics and colours as it cleans thoroughly even at low temperatures.

A whole new level of hygiene

Eliminates up to 99.99% of germs and bacteria with Active Oxygen™ that hygienically cleans without a need for chemical additives.

* Up to 99.99% of E.coli, C. albicans, S. enterica, A. brasiliensis, S. aureus, Bacteriophage MS2 in the "Fast / mix cold" programme with regular liquid detergent in the recommended amount and a 4kg load – test MB 7623/15 of 29 July 2015 at the wfk – Institute for Applied Research GmbH for BSH Hausgeräte GmbH.

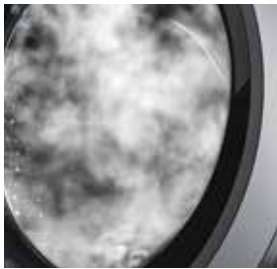

A quick guide to using ActiveOxygen™

1
Select your preferred wash programme* and activate ActiveOxygen™. Temperature required will be max 40°C.

3
During the selected wash cycle, clothes and textiles are thoroughly washed and cleaned.

2
Before washing cycle begins, ActiveOxygen™ will pretreat garments. A fine mist of ActiveOxygen™, which is produced by the system itself, is emitted from the drum. No other chemicals additives are needed.

4
Your laundry is treated with ActiveOxygen™ again before the final spin cycle.

Results

Up to 99.99% of germs and bacteria removed with ActiveOxygen™ technology even at very low temperature.

* ActiveOxygen™ is only applicable for selected programmes.

What could be more simple? Fill up once and wash 26 times[#].

You can rely on this convenience; fill up once and save every time you wash. Thanks to this unique intelligent automatic dosing, you can now not only save detergent but also the equivalent of around 58 bathtubs full of water per year.

i-DOS drawer 1

Add up to 1.3 litres of liquid detergent (eg. all-purpose or colour) to this drawer.

i-DOS drawer 2

Add 0.5 litres of liquid detergent or fabric conditioner to this drawer.

Manual dosing

If you prefer, you can continue to dose manually for all programmes, except the automatic ones. This is ideal, for instance, when you wish to use a special detergent, powder or stain remover.

Automatic programme*

All you have to do to obtain perfect washing results is press the start button: with the automatic programme, the necessary amount of detergent is dosed automatically and the wash process optimally adjusted to the demands of the particular wash load.

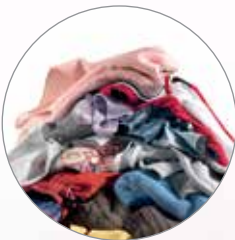

* Only available in WAW32640EU
* Based on OMO standard liquid detergent (non-concentrate) - average 50ml dose for a normal load.

You can overdose or underdose. Or you can get the dosing just right.

Overdosing	Underdosing	Correct Dosing
Too much detergent is not only harmful to your laundry and your skin; it also means increased consumption of water and energy.	Too little detergent is false economy since you'll have to wash clothes repeatedly in order to get them really clean.	i-DOS, the integrated automatic dosing system, dispenses the correct amount of liquid detergent to the very millilitre. That means a reduction of up to 30% in detergent requirements and a saving of up to 7.062* litres of water a year.

This is how i-DOS works:

Special sensors determine the laundry's weight, fabric type and in the automatic programmes, water hardness, and even the degree of soiling. Based on these factors, the optimum amount of detergent is dispensed.

Laundry weight

Fabric type

Soiling level

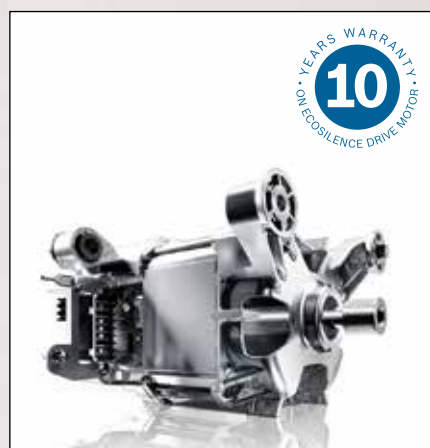

Water hardness

A quiet machine built to last, with perfect quality you can trust.

EcoSilence Drive™ combined with AntiVibration™ design makes Bosch washing machines among the quietest machines ever built.

Experience the power and energy efficiency of EcoSilence™ Drive

This revolutionary brushless motor is quieter, faster, more energy-efficient, durable and powerful than all others before it. Utilising the same advanced technology used in efficient machines such as wind turbines, the EcoSilence Drive™ achieves maximum power with minimum energy loss.

More efficiency – Thanks to its innovative design, the EcoSilence Drive™ is 35% more efficient than a standard motor.

More stability with AntiVibration™ design

The special AntiVibration™ design of the side walls increases stability and reduces vibrations. Improved sound insulation and low noise shock absorbers dampen noise further giving you a whisper-quiet machine.

Gentle & thorough wash with VarioDrum™

The VarioDrum™ caters to all fabrics, taking into consideration the varied Asian climate. In one direction, the flat side of the paddle is extremely soft on fine textiles. If the drum rotates in the opposite direction, the steep side of the paddle ensures intensive cleaning for heavily soiled garments.

Furthermore, the wave droplets improve cleaning performance by providing additional surface contact with soiled garments in both directions. The spacious drum, optimised for loads of up to 9kg, turns out a perfect wash result, everytime.

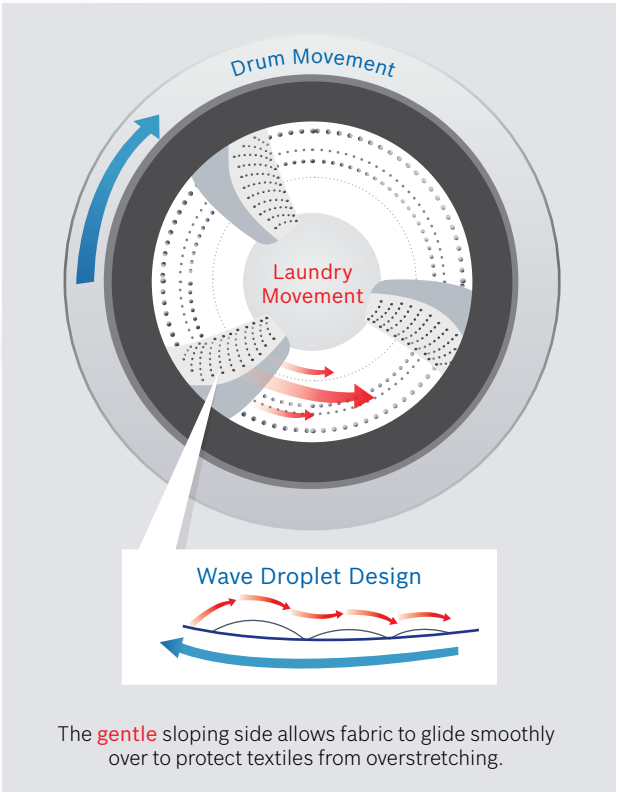

Wave Pattern
Protects fine fabrics by allowing water to flow through freely.

Rounded Edges
Enables gentle washing while removing tough stains.

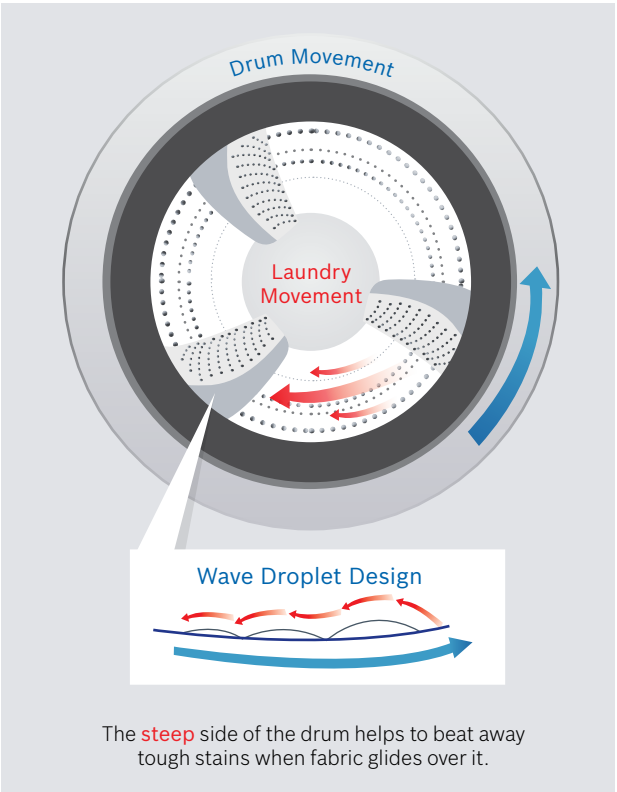

Side Lifters
Imitates a beating action with a gentle slope for a softer wash on fine fabrics, and a steeper slope to beat away tough stains.

Illustration of VarioDrum™ during a wash cycle

Gentle on fabrics

Tough on stains

Wash Programmes to suit every need.

Be it your new jeans, woollen garments, or favourite party dress, Bosch offers a number of special programmes to provide the ultimate in garment care and convenience.

SuperQuick 15' / 30'

Short wash programme of approximately 15 / 30 minutes for up to 2 / 3.5kg of lightly soiled washing. Packing in a wash, two rinse cycles and improved rinse spinning, this is one of the shortest complete wash programmes in the market.

AllergyPlus

Reduces exposure to allergens that irritate sensitive skin by prolonging the maximum wash temperature, increasing the water level and adding an extra rinse to the wash cycle.

Automatic Programmes

2 automatic programmes which offer the ultimate in convenience: just press the button to automatically adjust the wash programme and dosing to the type of washing, load size and degree of soiling for perfect washing and rinsing results.

Mix / Daily Wash

Designed to wash mixed loads of cottons and synthetic fabrics.

Wool Programme

Tailored to give the optimum treatment of wool garments. It offers a gentle wash action at a optimum temperature of 30°C. The gentle spin at the end of the cycle is short yet effective, extracting water gently from the woollen garments allowing them to retain their shape.

Delicate / Silk Programme

Suitable for silks, delicate viscose and synthetic items. The standard wash temperature is preselected at 30°C and depending on the fabric wash instructions, may be increased to 40°C or reduced to a cold wash to provide an accurate temperature controlled washing environment.

Kids

A thorough wash that removes unseen allergens, germs or dust mites that cling onto children's clothes, nappies and soft toys. An extra rinse follows to remove any traces of harmful detergent.

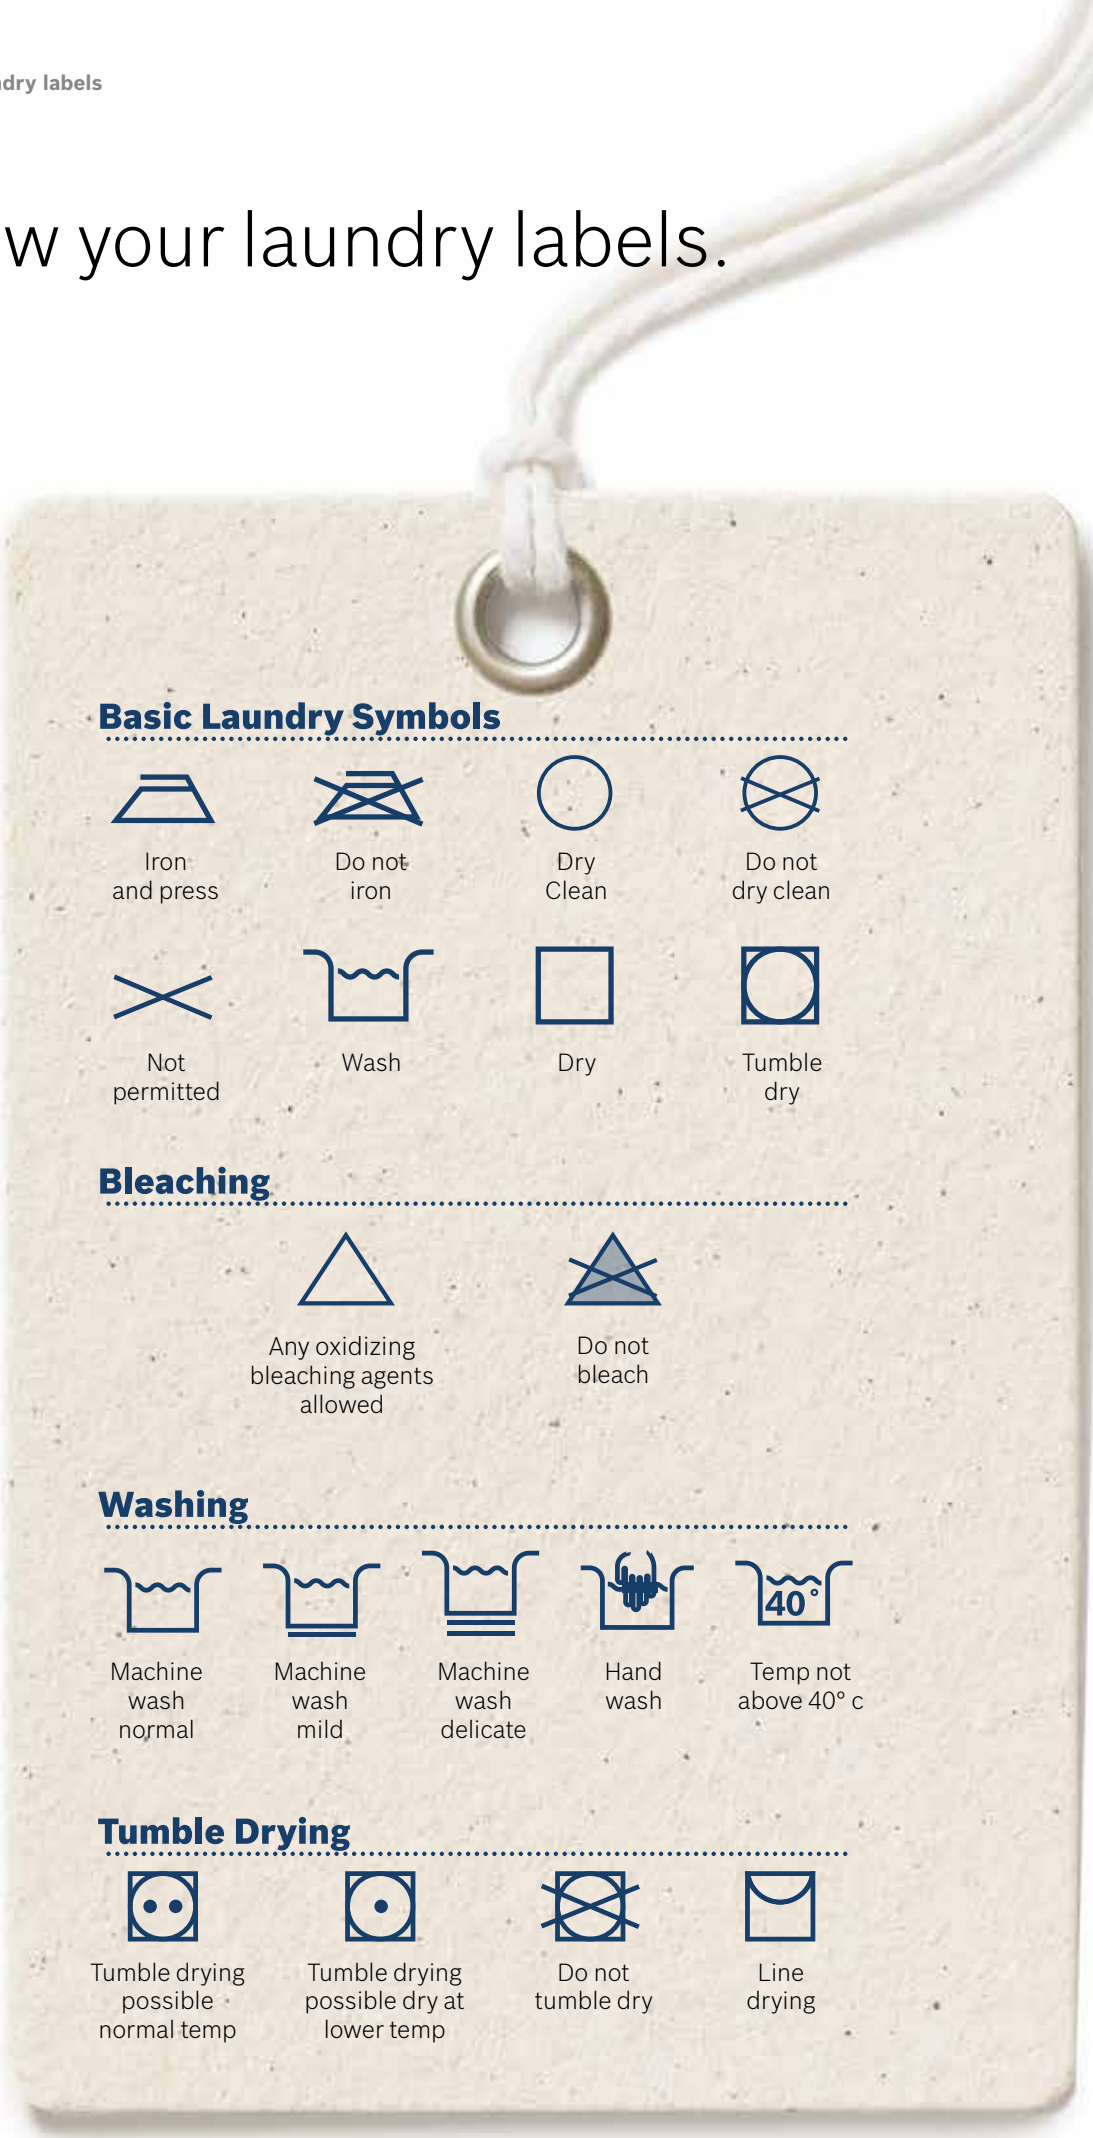

Duvet Programme

Machine-washable items stuffed with synthetic fibres, such as pillows, quilts and bedspreads; also suitable for items stuffed with down.

* Features vary depending on models.

Bosch Dryers perfects your drying solutions.

The Bosch heat pump, condenser and vented dryers bring you more benefits than you realise.

Save yourself from waiting for your clothes to dry under the sun. Unpredictable weather in the open may allow pollutants to contaminate them. Enjoy your clothing in softer and greater comfort state with Bosch dryers now.

Choosing a dryer.

	Heat pump dryers	Condenser dryers	Vented dryers
			
Air vent	-	-	✓
Energy Efficient	✓✓✓	✓✓	✓
Consider	Typically use less than half the energy per load compared to a non heat pump dryer	Your laundry area will be cooler as the dryer uses an internal heat exchanger to cool the air and condense the water vapour into either a drain pipe or a collection tank	These dryers simply expel warm moist air through a vent or a hose

We take the chore out of laundry.

As No.1 washing machine manufacturer, you can rest assured that when it comes to laundry, we’ve thought of everything to make sure you get the best drying results.

Stainless Steel Drum

Bosch dryers come with high quality stainless steel drum which is corrosion-resistant, ensuring long-term performance.

SelfCleaning Condenser™

The patented SelfCleaning Condenser™ means the water extracted during the drying cycle automatically cleans the condenser up to 4 times, removing the lint that would otherwise reduce its efficiency.

Sensitive Drying System

Gentle drying for every kind of fabric. With the Sensitive Drying System, your laundry is penetrated by a constant flow of gentle air from all sides. The unique SoftFlow® paddles rotate individual garments to take the rough out of the tumble. The result is soft and fluffy laundry without creases or wrinkling.

ActiveAir Technology

ActiveAir dryers are one of the most economical dryers on the market. The heat pump technology is designed to work without conventional heating. The air used for drying is heated by the heat pump and the existing heat is reused efficiently during the entire drying process.

Super Quick 40'

A shorter programme of 40 minutes for lighter loads up to 2kg, with sensor control to ensure great drying results, specifically for synthetic fabrics, cotton and blended fabrics.

Anti-Crease Cycle

Bosch dryers feature an anti-crease programme to reduce the burden of ironing. A gentle drum action automatically separates and smoothens your garments for up to 60 minutes on standard dryers, or 120 minutes for models with the reduced ironing option, to keep them wrinkle-free and ready-to-go.

Duo-Tronic

Throughout the drying cycle, built-in electronic sensors monitor moisture levels and temperature differences to prevent overheating and stop automatically once your garments reach the desired level of dryness. This ensures your garments are treated with maximum care with no excess energy consumption.

* Image for illustration purpose only.
* Features applicable for specific dryers only.

Dryer Programmes to suit every need.

Timed Programme Cold

Suitable for all types of fabrics. For freshening up or airing items of laundry that have been worn for long.

Timed Programme Warm

Timed programme for all types of fabric except for wool and silk. Dry laundry that is still slightly damp or has already been pre-dried. It is also suitable for the subsequent drying of multi-layered, thick laundry that does not dry readily.

Shirt / Blouses

Suitable for non-iron shirts or blouses made of cotton, linen, synthetic fibres or blended fabrics.

Duvet

Suitable for fabrics, pillows, bedspreads filled with synthetic fibres. Dry large items individually. Observe the care label.

Down Wear

Suitable for fabrics, pillows, bedspreads or eiderdowns filled with down. Dry large items individually.

Sportswear

Suitable for weather proof and outdoor clothing with a membrane coating and water-repellent fabrics.

Washer-Dryers

Not only have we rolled two appliances into one, we’ve also made sure the new Wash+Dry is a top performer. At the touch of a button, you can easily wash up to 8kg of laundry and dry 5kg of laundry at one go.

Air Condensation Technology

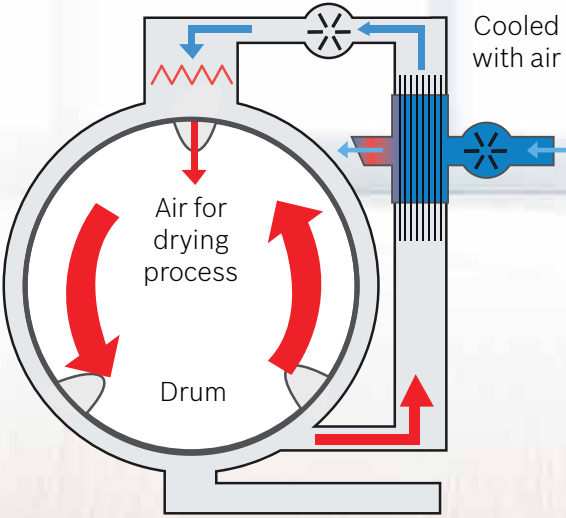

Breakthrough Innovation that is environmentally friendly and reduce cost. Traditional dryers rely on water to cool and condense the air circulating inside. Our advanced system does not utilise any water for an effective solution that is green and extremely cost effective.

Service you can depend on.

Expert, fast and reliable customer service from Bosch, before and after your purchase, Bosch is your partner for life.

- Reliability guaranteed. No compromises.**
All Bosch home appliances are produced with maximum care, using high quality materials. We promise it in our 2-year manufacturer's warranty on all appliances.
- Speedy Response**
Our customer's time is valuable and so we react quickly. We aim for a business response time of 2 business days from your call, offering on-site diagnosis and repairs. Our customer's time is valuable and so we react quickly. We aim for a business response time of 2 business days from your call, offering on-site diagnosis and repairs.
- Quality service straight from the manufacturer. Original Bosch.**
We are committed to quality - also when it comes to after sales service. No-one knows our appliances better than our highly trained service engineers. They are working with the latest equipment for measuring, diagnostics and repairs, and use only original Bosch spare parts.
- Lifetime service. It goes without saying at Bosch.**
Once your warranty period is over, we are still there to assist you. You can rely on our expert care and first-rate service throughout your appliance's life cycle. From missing instruction manuals to appliance repair - we take care of everything. A promise is a promise!
- Original accessories. Effective care products.**
Take a look at our extensive range of accessories for some inspiration: discover additional uses, replace old materials for optimum operation or simply give a trusty home appliance a good work-over. With the right care, you will be able to enjoy your high quality appliance for many years to come. To help you do so, we offer a wide range of Bosch-certified cleaning and care products.
- Tested and Approved Cleaning and Care Collection**
Cleaning and caring for your appliances is crucial to maintaining optimum performance and keeps your appliances looking good. Our cleaning and care collection undergoes stringent test and quality checks. They are developed to complement your appliances, to tackle the toughest cleaning job and to keep your appliances in top shape.
- Bosch Online Store**
Shop at your convenience with the Bosch Online Store. Browse the Cleaning and Care Collection and wide range of accessories from the comfort of your home. Visit us at www.bosch-home.com.sg/store.
- On-Call**
Our friendly Bosch Customer Service team provides competent, reliable assistance for all of your needs; whether that is product advice, to arranging a visit from a service engineer, or ordering the right original accessories or spare parts.

For engineer visits, spare parts replacement and accessories or product advice, please contact:
