Cooking Solutions.

2017/2018

the state

When every single one of our appliances makes your life a little bit easier that's Bosch in every detail.

We believe the perfect cooking appliance must be designed for one thing above all else: to make your time spent in the kitchen as pleasant as possible. Every detail of every appliance has been carefully designed, produced and tested by our engineers to fully satisfy the highest standards in quality, performance and convenience. The result is cutting-edge technology, timeless design and remarkable ease of use, reducing the workload for you and consistently delivering perfect results.

Proven quality

We devote the same high level of care, passion and dedication to all areas of our work - from the first design draft right through to customer service. It's the same Bosch quality that you have been able to rely on for more than 128 years. Bosch appliances offer premium quality, advanced technology, ease of operation and outstanding German engineered technology. These attributes have earned us many accolades, national, and international, such as the red dot design award, the iF design award and other endorsements year after year.

Top performance

What drives us every day is our desire to improve. We strive to make the best even better, by developing functional, durable and energy-efficient innovations that surpass all expectations. Take, for example, the PerfectBake sensor in our Series 8 ovens - perfectly baked pastries and cakes, at the touch of a button.

Maximum convenience

Bosch is dedicated to making your life easier. Our innovative kitchen appliances are easy to use, and you won't waste a second trying to figure out how they work. Sophisticated features deliver the best results every time, and save you considerable effort and expense in the process.

Island & wall-mounted rangehoods

Island & wall-mounted rangehoods provide a focal point in any kitchen. Choose a design that compliments your style, plus they are also packed full of convenient features. Integrated rangehoods Sleek in design, Bosch fully integrated rangehoods are neatly concealed beneath the cupboard for a seamless look in the kitchen. Performance that is not seen or heard.

Compact appliances page 20 – 27

Combination steam ovens Cooking with steam helps retain vitamins and minerals in fresh foods, as well as maintain original colour, shape and consistency.

Combination microwave ovens Add speed to your traditional cooking process without compromising on taste.

Coffee machine Whether your preference is a skinny latte, a double shot cappuccino or a delicious hot chocolate, our coffee machine brings café-style drinks to your home.

Warming drawers Ensure food stays at just the right serving temperature. You can also defrost, prove dough or slow cook.

Cooktops page 28 – 46

Gas cooktops

The cooktop of choice in most professional kitchens, the new Bosch FlameSelect gas cooktops are innovative, stylish and help you to always get perfect results.

Induction cooktops Quite simply, Bosch has a range of induction cooktops that are designed to make it easier and quicker for you to create the dishes you love.

Ceramic cooktops With their electronic touchcontrols and flexible cooking zones, Bosch ceramic cooktops combine great looks with smart function and design.

Ovens

Ovens | Design

Put a new spin on your cooking with the Bosch Series 8 range.

With the Bosch Series 8 control panel, cooking just became a lot easier. Everything you need at hand: Our intuitive control ring makes cooking easier than ever.

TFT Touch Graphic Display

TFT Touch Symbol Display

Built-in single ovens Whether you're preparing poultry, meat, fish, vegetarian dishes, baked goods or desserts, your favourite dishes are always cooked to perfection - and it couldn't be easier. Now you have a master chef to help you in the kitchen: your oven.

Double oven The Bosch double oven allows you to roast in the bottom oven cavity while grilling in the top oven for maximum cooking convenience.

The iconic control ring and clear TFT screen display, combined with the direct select TouchControl buttons, make operating the Series 8 ovens simpler than ever before. Clear, vivid food images and helpful prompts guide you through each step as you navigate through the various menu options, giving you total flexibility and control of cooking functions.

The intuitive control ring and clear TFT display with DirectSelect icons make it easy to operate your oven. Shortcuts to the two most commonly used heating functions, helpful icons and clear descriptions inside the control ring provide all the information you need to keep track of your cooking.

Freestanding cookers

Each of the freestanding cookers offers reliable Bosch technology of the finest standard – technology that makes cooking, baking and roasting easy and more convenient.

Ovens | Automatic functions

With Bosch sensor technology it's the oven that cooks by itself. Automatically.

DishAssist

You could easily search through cookbooks and family recipes without ever finding the exact temperature or cooking time for that favourite dish. Thanks to DishAssist, you don't have to. The advanced sensor technology found in PerfectRoast and PerfectBake – combined with the functionality of automatic programs as we know them today – offers an extensive menu of food categories that help create your perfect meal. Simply select the desired dish, press start and your oven automatically sets the ideal heating mode, temperature and length of time, monitoring and modifying the cooking as required for the best results. Of course, you can also select these settings yourself every bit as easily.

PerfectBake

Baking has never been easier, thanks to the unique PerfectBake sensor. This function constantly measures the precise moisture level of your dishes and automatically adjusts the entire baking process, which means you'll never have to set the heating mode, length of time or temperature ever again. Simply choose the type of dish, such as 'Cake in Tin', press start and let your Bosch oven bake your cake to perfection*.

PerfectRoast

Achieve the perfect roast lamb, Christmas turkey, stuffed meats and fish. The PerfectRoast meat probe features three sensitive measuring points and uses the lowest temperature reading to determine the core temperature before calculating the residual cooking time. The results are simply perfect. Used manually or with DishAssist, you can modify the suggested core temperature (within a recommended range) and combine with microwave and steam cooking functions.

AutoPilot

The AutoPilot program helps achieve the best possible results with very little effort. Just insert your roast, enter its weight and select the desired program from the menu.

Ovens | Cleaning functions

At last, someone in the house who enjoys cleaning up.

Anyone who has ever cleaned an oven by hand knows it can be exhausting and time-consuming. Thanks to the new EcoClean Direct and pyrolytic self-cleaning function, manual cleaning is a thing of the past.

EcoClean Direct

The self-cleaning surfaces in the oven are directly coated with a patented, microfine ceramic material. This coating absorbs and breaks down grease and residue during baking and roasting. Before activating the cleaning function, all you need to do is wipe down the base of the oven and the inside of the glass door. For added convenience, the oven also prompts when it needs to run a cleaning cycle. Of course, you can also activate the cleaning program at any time.*

EcoClean

EcoClean uses a coating of microfine ceramic material applied to liners fitted within the oven cavity. This coating absorbs and breaks down grease and residue during roasting and baking. Depending on the model of the oven, the EcoClean system has rear wall, side walls and/or ceiling liners. As with other Bosch cleaning functions, all you need to do is wipe down the base of the oven and the inside of the glass door before activating.*

*Please remo EcoClean D discolourati To prevent t

Pyrolytic cleaning

During the pyrolytic cleaning function, the oven heats up to 480°C to burn off grease and food residue. What's left is a small residual amount of ash in the base of the oven that can be easily wiped clean. There are three different cleaning programs to choose from, depending on the degree of residue that has accumulated. The pyrolytic proof enamelled trays, shelf racking# and telescopic rails, mean you can now leave them in the oven during the cleaning program too.

*Please remove all accessories when activating the specific EcoClean Direct or EcoClean program. #Metal racks may show discolouration after prolonged use of the pyrolytic function. To prevent this you may choose to remove the wire racks during the pyrolytic cycle. Features may vary depending on models. Please check individual product specifications.

Ovens | Features and functions

Features and functions for everyday use.

Efficiency

Telescopic rail system

The Bosch telescopic rails are fully or partially extendable (depending on model) and are ideal for loading and removing trays with ease. Whether you choose a single or double rail option, all shelves are pyrolytic proof and compatible with microwave and steam cooking. Trays are also interchangeable between Series 8 full-sized ovens and compact appliances, excluding the pure steam compact oven.

SoftMove

SoftMove is a special damping mechanism, the oven door opens and closes softer and quieter than before. This convenient feature not only offers a premium finish, it also protects the oven and door during the life of the oven.

Lighting

Depending on the model, Series 8 ovens and compact appliances offer our classic, halogen lighting, LED ceiling light or the new multi-level LED lighting.

Energy efficient LED lighting offers vibrant illumination and longevity. The multi-level LED lighting offers illumination on each level, which is exceptionally convenient when baking on multiple levels.

Integrated halogen lighting ensures the interior cavity is brightly lit. More efficient than standard lights, they are durable and are designed to last longer.

Simplicity

Oven clock and timer with programming

The electronic clock displays time of day and also acts as a countdown timer with an audible beep to indicate the end of the timer function. Programming adds extra convenience. Simply select the end-time (when you arrive home, eg. 6.30pm), the length of cooking, along with the cooking function and temperature, and the oven will do the rest.

CoolTouch doors

For added safety, selected Bosch single ovens are fitted with quadruple-glazed CoolTouch doors. The reflective inner glass is designed to keep the heat in, while providing a safe-to-touch door on the outside.

Residual heat indicator

When the appliance is switched off, the display ring shows the residual heat in the cooking compartment. As the residual heat cools down, the display ring becomes darker, then disappears.

Cabinetry cooling fan

The fan circulates cool air around the oven to keep the appliance and the surrounding cabinetry free from the hot air vented by the oven.

Automatic switch-off

If left unattended the oven will switch-off after a period of time.

Child lock

Bosch Series 8 ovens are equipped with a child lock that prevents unwanted changes to settings. The control panel is locked so the appliance can only be switched off using the On/Off button. Optional door lock function on selected models

Performance

Added steam function

Enhance your cooking results by adding a little bit of moisture from time to time, thanks to the added steam function. Whether you're reheating dishes, proving dough, baking or roasting, you can set the oven to automatically add bursts of steam, or you can add steam manually to regulate the intensity. Create succulent roasts and perfectly browned bread crusts with ease. Added steam works with: 4D HotAir, Hot air grilling, Top and bottom heating and Keep warm.

Precise temperature control

Electronic thermostats monitor the ovens cavity temperature to maintain temperature consistency during the cooking process.

Ovens | Heating functions

Because there's hot, and then there's hot.

Perfect baking and roasting not only requires the right temperature, but also the appropriate heating function too. From 4D HotAir to Slow cooking, Bosch ovens offer heating functions that deliver everything from haute cuisine to everyday feasts.

4D HotAir*

Thanks to 4D HotAir, you can place your food on any shelf from level one to four, and the results will be consistently perfect. The rotating fan alternates its direction during cooking to distribute heat evenly on every level. And for reliable results 'top to bottom', you can also bake and roast on up to four different levels simultaneously.^

single tray. This energy efficient function distributes less heat into the oven and uses residual heat to maintain the set temperature

Uses both the upper and lower heating elements. Heat travels to the centre of the oven, which is the best position to obtain the selected temperature. Suitable for traditional baking and roasting, and offers best results for cakes with moist toppings.

Top and bottom heat Eco

In addition to the Top and bottom heat function, selected Series 8 ovens feature a new eco-friendly mode, which supports cooking on a single shelf for energy efficient cooking. Prepare perfect sponges, pound cakes, delicate pastries and bread rolls while saving valuable energy.

Bottom heating

For cooking in a bain-marie and for the final baking stage. The heat is emitted from the lower heating element.

Intensive heat

Combines the top element with a more powerful bottom heating element that is perfect for crispy bases and baking in tins.

Hot air grilling*

Achieve rotisserie-style cooking for meat and poultry. The grill and fan alternate, which produces even and crisp cooking results.

Grill, large area

For grilling flat items, such as steaks and sausages, for making toast, and for cooking a gratin.

Grill, small area

For grilling small amounts of steaks or sausages, for making toast or where grilling a smaller surface area is required.

Pizza setting

Create crispy pizzas or give any dish that extra heat that's needed from underneath by using a combination of heating elements.

Keeping warm*

Preheat ovenware

A new feature that is useful for preheating ovenware and even dinnerware.

Drving

A new function for drying fruits, vegetables and herbs with maximum flavour. This function can also be used for drying out the oven cavity after the added steam function has been used.

Sabbath mode

Set a maximum timer of up to 74 hours using the Sabbath function. You can keep the food in the cooking compartment warm without having to switch the oven on or off.

HotAir Eco

HotAir Eco uses less energy by using a

Top and bottom heat*

A new feature that keeps cooked food warm. Slow cooking

tender pieces of meat in ovenware without a lid.

For gentle and slow cooking of seared,

Rapid heating

With rapid heating, you can shorten the heat-up time for selected heating functions, including 4D HotAir and Top and bottom heating.

3D HotAir Plus

Cook on up to 3 levels simultaneously with even heat distribution.

Fan forced hot air

A fan disperses heat evenly for cakes and pastries baked on two levels.

Fan assisted top and bottom heating

Uses both upper and lower heating elements while a fan disperses heat evenly.

Defrost

Perfect for gentle defrosting of meat, poultry, bread and much more.

Reheating*

For plated meals and baked items. Cooked food is gently reheated. The steam ensures the food does not dry out.

Dough proving*

For yeast dough and sourdough. Dough will rise considerably guicker than at room temperature. The surface of the dough does not drv out.

Compact appliances

Compact appliances | Design

The perfect compliment to your Series 8 kitchen.

For lovers of cooking, Bosch compact appliances offer exceptional cutting-edge features and extra cooking functionality. Perfectly matched design panels within Series 8 allow you to mix and match these appliances with full-sized ovens for a seamless and coordinated look. With the intuitive display and Bosch control ring, operating functions are harmonised for easy use.

Combination steam ovens Cooking with steam helps retain vitamins and minerals in fresh foods as well as maintain original colour, shape and consistency.

Combination microwave ovens Discover the speed and versatility of microwave technology. With the combination microwave oven you can add speed to your traditional cooking process without compromising on taste.

Microwave with grill Standard microwave cooking, with the addition of a grill to offer more cooking options.

Coffee machine

Whether your preference is a Latte or a double shot Cappuccino, our compact coffee machine brings cafe-style drinks to your home.

Bosch warming drawers ensure food stays just at the right serving temperature. You can gently defrost, prove dough or slow cook. They are the perfect partner for Bosch's Series 8 60cm wide built-in ovens and compact appliances.

Compact appliances | Steamers

Steams so gently, even vitamins stay for dinner.

There is no healthier or tastier way to prepare food than in a Series 8 combination steam oven. When gently cooked in steam, food retains its vitamins and aroma while bringing out the full and natural flavour. Vegetables stay fresh and crisp, while poultry and fish remain juicy and tender. With steam, you can even cook without adding oil or extra seasoning. Thanks to the integrated water tank, Bosch steamers don't require an external water connection, offering greater flexibility in choosing their position in your kitchen.

Menu cooking

With the Series 8 combination steam oven, you can prepare an entire set menu using up to three levels at once. Salmon with asparagus and rosemary potatoes? Cook them all together and everything will turn out perfectly. Need to prepare dessert, too? No problem. Thanks to the moisture in the oven, there's no intermingling of flavours – each dish retains its own authentic flavour.

Preserving vitamins and minerals

Dishes that are cooked in hot steam not only retain their vitamins and minerals, but also their full, natural flavour. So you can also go easy on the extra seasoning, and use much less salt when cooking. In short, healthy food has never tasted better.

Series | 8

The best of both worlds

With the Bosch Series 8 combination steam oven, you can bake, steam or both. Combine the benefits of pure steam cooking with functions of a conventional oven and discover the results of giving your roasts and home-made bread a crispy finish. The premium combination steam oven also comes with DishAssist, the PefectBake sensor and PerfectRoast meat probe for perfect cooking and baking results.

Reheating

At 90-95°C, food is gradually reheated to taste as if it was freshly cooked.

Dough proving

For yeast dough and sourdough. Dough will rise considerably quicker than at room temperature. The surface of the dough does not dry out.

Series | 8

Compact appliances Microwave, combination microwave oven and warming drawers

Fits every kitchen. And every need.

Microwave and combination microwave

Sometimes, you just can't get food to the table fast enough. Our new Series 8 combination microwave ovens help speed up the cooking process and give you perfect control over your menu and your schedule. Whether you're heating baby food, pre-cooked meals or frozen foods, you'll produce outstanding results quickly and without compromising on taste.

Automatic functions to speed up your cooking

Heat, defrost, roast or grill anything, thanks to up to 1000 watts and five power levels. The AutoPilot program helps achieve the best possible results with very little effort. Just insert your roast, enter its weight and select the desired program from the menu.

Sensor technology for perfect results

With DishAssist on our premium model, press start and the oven takes care of the rest, monitoring and modifying the cooking method as required for best results.

Warming drawers

Our Series 8 warming drawers can do much more than just keep food and plates warm; they're also perfect for slow-cooking meat, defrosting frozen foods and proving dough.

Designed to match

The warming drawers from Bosch can be installed either separately or in combination with Series 8 ovens, compact ovens and our built-in automatic coffee machine. The practical 'push and pull' technology ensures they are always easy to open, even when you have both hands full.

BOSCH

B BOSCH

-

Compact appliances Built-in coffee machine

Your favourite café is now open 24/7.

Latte, cappuccino or espresso? With the Series 8 built-in coffee machine, you can treat yourself and your guests to any beverage at the touch of a button. Bosch barista technology guarantees a full-bodied aroma and perfect crema – for coffees as delicious as those brewed in your favourite café.

SensoFlow system for a perfect aroma

The optimal brewing temperature for an espresso is between 90°C and 95°C. If the temperature is any higher or lower, the flavour of the beans is only partially released or the coffee is bitter. Our smart SensoFlow system heats the water to just the right temperature, for a full-bodied espresso aroma from the first to the last cup.

A choice of coffee at the touch of a button

With the OneTouch function, it'll be ready in an instant. Innovative technology regulates the release of coffee, hot milk and foam to deliver the beverage of your choice at the touch of a button.

Automatic cleaning of the milk system

Now you can clean your coffee maker as easily as you prepare your morning pick-me-up. Each time you make a coffee drink with milk, the milk system is automatically rinsed out with a blast of steam. The coffee machine takes total charge of the milk system's daily maintenance, so that you can concentrate on enjoying your cappuccino or latte macchiato instead of cleaning.

Cooktops

Cooktops | Design

Cooktops.

There is a wide range of gas, induction and ceramic cooktops to choose from. As you would expect from Bosch, all are made using high-quality materials, are easy to use and add versatility, style and elegance to any kitchen.

FlexInduction cooktops

Gas cooktops

The cooktop of choice in most professional kitchens, the new Bosch gas cooktops with FlameSelect offer absolute control when it comes to adjusting the flame. This innovative technology allows you to control nine predefined heating levels, you will enjoy a completely new level of precision in the kitchen.

The choice is all yours with Bosch's FlexInduction. You can use your cooktop like a conventional induction cooktop with separate cooking zones, or at the touch of a button, combine them to make large continuous cooking zones. This gives you additional space on which you can place a large cookware item, such as roasters, teppanyaki grills griddle plate. For even more freedom, there are extended zones to provide up to 20% more space.

Induction cooktops

With induction cooktops, heat is only generated where it is really needed – the underside of the pot. This means that water in an induction pot is not only heated faster, it is also safer as the minimal heating of the cooktop glass means that fingers are not at risk of being burnt. In addition, thanks to the automatic pot detection function, the cooktop switches off automatically when there is no pot on the cooking zone.

Ceramic cooktops

With their electronic touchcontrols and flexible cooking zones, Bosch ceramic cooktops combine great looks with smart function and design. Cooktops | FlameSelect

We didn't discover fire, but we've taken it to a new level. Nine, to be precise.

The new gas cooktops with FlameSelect from Bosch are packed with innovative technology. They offer you a completely new level of precision when it comes to adjusting the flame by selecting predefined power levels. But that's not all. Thanks to our timeless design and carefully selected materials, Bosch gas cooktops are also a true feast for the eyes.

() FlameSelect

Stop cooking with intuition. Start cooking with perfection.

At Bosch, we want to make your cooking with gas as easy, safe and enjoyable as possible. That's why we developed FlameSelect for you. Unlike conventional gas cooktops with inaccurate power settings, FlameSelect and its patented valve technology offer you incremental heat regulation within nine precisely defined power levels. So now, gas cooktops with FlameSelect offer you all the benefits of gas cooking combined with the comfort and precision of an electric cooktop.

Nine levels of precise power selection

Our gas cooktop surfaces Our cooktops are available in black tempered glass and stainless steel to perfectly match your kitchen and individual taste. 62

Cooktops | Gas cooktops

Where German engineering meets beautiful design.

Our gas cooktops are not only masterpieces in terms of function, but also of design. With their sleek construction of black tempered glass or premium stainless steel, they guarantee a clean, timeless look in every home to match your kitchen. And if that's not enough, the cooktops conveniently come with controls that are front mounted and with a variety of burner layouts. You can always be sure to find the perfect one for your individual taste and cooking needs.

Cooktops | Gas features and functions

Features and functions for everyday use.

Efficiency

O BOSCH

One-hand ignition

Push and turn the ergonomically designed control knobs and the gas ignites automatically. As well as offering the convenience of only using one hand, there is also no separate ignition button to clean.

Easy clean tempered glass

Premium models with tempered glass base are easy to clean for total convenience and completed by a frameless finish for a stylish and sleek look.

Cleaning rounded off to perfection

The rounded edges of our gas cooktops ensure effortless cleaning - dirt simply doesn't have anywhere to collect.

FlameSelect and its patented valve technology offer you incremental heat regulaton within nine precisely defined power levels, making your cooking with gas as easy, safe and enjoyable as possible. Flame failure device

Simplicity

FlameSelect

stops the supply of gas to the burners if the flame is extinguished. Cast-iron supports

Cast-iron pan supports are both stylish and highly durable, providing solid and robust support for your cooking pans.

Performance

High-power wok-style burner

Selected gas cooktop models feature a powerful wok-style burner, which provides up to 18Mj/h. Suitable for use with flat-based pans or with a wok using the wok ring provided.

Flexible burners

All our gas cooktops feature different burner combinations for greater flexibility. With wok, high-speed, standard and economy burners, you can cook more efficiently with the burner most suited to the size of the pan.

For added safety, all Bosch gas cooktops feature a flame failure device. This feature

Cooktops | Induction

The best cooking needs just one ingredient: Bosch.

Modern cooking offers so many wonderful new tastes and textures, you need a cooktop that's flexible enough to keep up.

Most of your old pots will also work with induction if they have a magnetic base. All pots and pans with ferromagnetic bases are suitable for induction. So, if a fridge magnet sticks to your pot, you know it's induction-ready. In general, special stainless steel, iron and enamel are all suitable.

Bosch FlexInduction

The ultimate Bosch Induction experience. Unique technology provides even heating across the entire FlexZone. The FlexZone can be used as two separate zones or combined into a single zone where the entire area becomes your cooking canvas.

Bosch Induction

Bosch's Induction cooktops put you in control with 17 power levels plus PowerBoost for each zone, dual function timer with automatic switch-off, residual heat indicators, child lock and more.

Cooktops | FlexInduction

FlexInduction cooktops

Introducing Bosch FlexInduction, the result of decades of research and development. Introducing true freedom in the kitchen.

Ideal for small pots, large pots, multiple pots, frying pans or casserole dishes - you name it, thanks to the unique coil shapes you get the ultimate flexibility and heat distribution. At the touch of a button, two induction zones become one large FlexInduction surface.

MoveMode

Pre-set 3 different power levels and move from boil to simmer in just seconds.

- 1. Perfect for rapid boiling (Power level 9 – Front FlexZone)
- 2. Medium heat cooking (Power level 5 – Middle FlexZone)
- 3. Ideal for simmering (Power level 1 – Back FlexZone)

Perfect FrySensor – for a steak that is just right

With up to 5 automatic settings, the pan is heated to just the right temperature. Sensors inside the cooktop continuously measure the temperature and maintain it for perfect results.

CombiZone With Bosch Combilnduction you have the freedom to use your biggest pans and baking trays for more adventurous cooking. Switching from small to large pans is as simple as a single touch that merges two standard cooking zones into one large cooking zone. *Only available on HCA858450A

Boiling over is over forever with the Bosch PerfectCook sensor. The PerfectCook sensor provides precise temperature control while cooking, so you never have to worry about your pots boiling over again. The PerfectCook sensor is magnetically attached to the pot and sends information to the cooktop. The PerfectCook mode is activated by pressing a button on the sensor and confirming the chosen cooking zone on cooktop. Visual and audible feedback is provided when the desired temperature has been reached.

Cooktops | Induction features and functions

Features and functions for everyday use.

Efficiency

WipeProtection

Stay in complete cooking control even when you've had a spill or boil-over. Bosch WipeProtection locks the control panel for 20 seconds so you can clean the surface of the control panel easily, without losing your cooking settings.

QuickStart

Start cooking quicker. New Bosch QuickStart functionality automatically detects the location of your pot and displays the cooking zone on the control panel. Just select the power level and you're away.

ReStart

Things happen quickly in the kitchen – if you spill something on the control panel or accidentally switch-off the cooktop, ReStart will store your last selected settings. Those settings can be instantly recalled by simply pressing the main power switch within 4 seconds.

Energy Consumption Display

Each time you finish cooking, your Energy Consumption Display shows exactly how much power you've used. So if you wish, you can adapt your cooking style to save energy. (For example, placing a lid on a pot can help reduce your energy consumption).

Automatic pot detection

Bosch Induction cooktops feature automatic pot detection, which recognises the diameter of the cookware and determines the size of the cooking zone accordingly. If the pot is removed, the control panel indicator will flash and remain inactive until the pot is detected.

Simplicity

Dual function timer including automatic switch-off for each zone

Use the independent audible timer to set the length of cooking time or set the cooking zone at a specific temperature (ie. level 5.5) for up to 99 minutes – ideal for busy households. Once the selected time has been reached, the cooking zone is switched off automatically.

2-stage residual heat indicators

Provides clear indication of when a zone is still hot after use. Two levels: 'H' means residual heat sufficient to finish off cooking or to keep items warm; 'h'- residual heat insufficient to cook, but zone is still hot enough to advocate caution.

Child lock

Maximum safety for tiny hands. Lock your cooktop's control panel and prevent accidental little chefs from 'helping out' and hurting themselves. Enjoy the reassurance of maximum safety for both you and your loved ones.

TouchSelect

With this control panel, you can regulate the desired cooking zone easily. Select your cooking zone and use the +/- keys to choose the power level you need.

Automatic safety switch-off

Never worry again if you have forgotten to turn off the cooktop. If you've stopped using it, your Bosch Induction cooktop will automatically shut down.

Performance

DirectSelect Premium

Taking easy to use, intuitive controls to the next level, new DirectSelect Premium gives you complete cooking control with intermediate levels and unsurpassed accuracy.

DirectSelect

Enjoy total convenience with DirectSelect. Simply select the required power level from the power settings laid out on the cooktop, without the need to press +/- repeatedly.

17 power levels

Enjoy total control on every recipe with 17 power levels. This function allows cooking zones to be set in increments of 0.5 (eg. 0.5, 1, 1.5, 2...9).

PowerBoost - now with even more power!

PowerBoost channels increased power to a selected zone to turbocharge the cooking process. With PowerBoost, you can boil 2 litres of water almost three times faster than on a conventional glass-ceramic cooktop.

ShortBoost

Reduce the time to heat up pans – this boost function heats up the pan for 30 seconds at high power before automatically reducing the heat to the correct power setting.

Keep warm

Ideal setting for keeping food warm before serving at the touch of a button.

on approach.

Efficiency

WipeProtection

Stay in complete cooking control even when you've had a spill or boil-over. Bosch WipeProtection locks the control panel for 20 seconds so you can clean the surface of the control panel easily, without losing your cooking settings.

ReStart

Things happen quickly in the kitchen if you spill something on the control panel or accidentally switch off the cooktop, ReStart will store your last selected settings. Those settings can be instantly recalled by simply pressing the main power switch within 4 seconds.

Energy consumption display

Each time you finish cooking, your energy consumption display shows exactly how much power you've used. So if you wish, you can adapt your cooking style to save energy. (For example, placing a lid on a pot can help reduce your energy consumption).

Extendable zone

Selected cooking zones can be extended giving you a much larger area to accommodate big saucepans, casserole and other (large) cooking dishes.

QuickTherm technology

For improved control and flexibility, heat is delivered to the cooking zone in approximately three seconds. This feature is guicker than standard ceramic zones or electric-sealed plates.

DirectSelect Premium

Taking easy to use, intuitive controls to the next level, new DirectSelect Premium gives you complete cooking control with intermediate levels and

With this control panel, you can regulate the desired cooking zone easily. Select your cooking zone and use the +/- keys to choose the power level you need.

The rotary controls make the cooktop easy to operate for those who like a more hands

2-stage residual heat indicators

Provides clear indication of when a zone is still hot after use. Two levels: 'H' means residual heat sufficient to finish off cooking or to keep items warm; 'h'- residual heat insufficient to cook, but zone is still hot enough to advocate caution.

Performance

17 power levels

Enjoy total control on every recipe with 17 power levels. This function allows cooking zones to be set in increments of 0.5 (eg. 0.5, 1, 1.5, 2...9).

Dual circuit cooking zone

Available on selected ceramic cooktops, this energy-saving feature allows you to select a smaller cooking zone for small pans, and a larger zone for larger pans.

Automatic electronic boil start

The automatic electronic boil start heats the hotplate using the highest heat setting and then reverts down to the simmer setting you have previously selected, reducing the risk of boil overs.

PowerBoost

PowerBoost now on selected Bosch ceramic cooktops lets you heat up large volumes of water even faster than on the highest power level.

Keep warm

Ideal setting for keeping food warm before serving at the touch of a button.

Rangehoods

Integrated rangehoods Great performance in a tiny space. These neatly concealed rangehoods are housed underneath the

kitchen cabinetry.

Bosch rangehood performance

Our rangehoods swiftly and reliably extract odours and grease particles from your kitchen. They create a consistently fresh ambience before, during and after cooking. At the same time, they perfectly illuminate your worktop area and still look unbelievably attractive even after all that hard work. And some Bosch rangehoods feature the CleanAir module that eliminates odours with the recirculation system just as effectively as a ducted system.

Ducted extraction

Ducting out is the most effective method of extraction. Ideally the rangehood should be sited on an outside wall, or an outside wall can be reached via ducting. All Bosch extractors are now standardised to facilitate a 150mm diameter outlet for maximum performance, although smaller ducting can be used if required. Please refer to the installation guide for further advice on best practice installation.

What extraction rate do I need?

It is recommended that air be extracted (or exchanged) in a room depending on your type of cooking: minimum of 6 times per hour; and a maximum of 12 times per hour. Air extraction is measured using room volume. This is calculated by multiplying Length x Width x Height.

Bosch extraction rates are tested inline with EU standards. See page 68 for more information.

Island rangehood

Our rangehood has been specially developed for use over your kitchen island and is freely suspended from the ceiling above it.

Wall-mounted rangehoods This type of rangehood fits beautifully into the line of your kitchen units whilst providing effective ventilation.

Recirculation kit

Odours are extracted and filtered, then purified air is returned to the room. The kit comprises of a carbon filter and all components needed to ensure that odour free air is returned into the kitchen. To maintain performance, the carbon filter should be replaced on a regular basis. A recirculation kit needs to be purchased as a separate accessory.

necessary air extraction rate at normal use (simmering on 2-3 hotplates)

necessary air extraction rate at intensive use (eg. strong frying activities)

Rangehoods | CleanAir

With recirculation you save a hole in the wall.

You don't need an exhaust air duct. The Bosch CleanAir module eliminates odours from your kitchen just as effectively as a ducted system.

Recirculation operating principle

The recirculation operation of a rangehood is based on the principle of air exchange. Instead of extracting kitchen vapours to the outside like a ducted system and taking in fresh air through the window, the vapours are filtered and purified in recirculation operation. The air is constantly renewed in a continuous cycle. An active carbon filter is always required for the purpose: either as a standard active carbon filter or CleanAir module.

CleanAir module The CleanAir module consists of a special active carbon filter and an outer panel. This Accessory is to be purchased separately.*

*Available for selected Bosch rangehoods.

Standard active carbon filter

CleanAir filter

Thanks to the large, slat-like surface of the CleanAir active carbon filter and its very high active carbon content (equivalent in surface area to around 50 football pitches), particularly intensive odour reduction is achieved. The special active carbon filter therefore obtains results similar to a ducted system and is better than a standard active carbon filter.

You can choose the recirculation starter kit for recirculation operation. It contains an active carbon filter which eliminates unpleasant odours and is easy to install and replace.

Minimizing noise with the Bosch CleanAir module

Your guests are not alone in appreciating a relaxed cook. So you can chat with guests while cooking, we have made our recirculation rangehoods so quiet you hardly notice them. Generally, a swishing sound is generated by the noise of the motor itself and the air flow, depending on the level of counterpressure. On ducted models, 50 % of the noise is ducted to the outside. By contrast, with recirculation models, the air stays in the room and is circulated. So operational noise stays in the room, too.

By increasing the size (the outlet area has been practically doubled) and setting the active carbon filter higher up in the CleanAir module, counterpressure has been dramatically reduced and the noise along with it. Patented insulation and the twin-channel high-power fan further reduce motor noise on our top models. As a result, Bosch rangehoods with the CleanAir module generate less noise than conventional recirculation systems while offering the same performance.

Rangehoods | Silence

Relax in a quieter kitchen with family and friends.

A few decibels can make the difference between harmful, loud and pleasant. Operating at 41dB(A), our quietest rangehood means you can have it on while listening to music, enjoying a conversation or while your baby rests.

Silence

Noise is measured in numeric decibels or dB(A). It is important to note that a few decibels can make a huge difference.

EcoSilence Drive motor

The EcoSilence Drive motor operates without carbon brushes, eliminating the disadvantages of conventional motors. Instead of energy loss, wear and noise, you get efficiency, durability, and smooth operation. To reduce motor noise even further (1dB(A) noise reduction compared to other motors), we have optimised the airflow inside the rangehood. The result: low noise levels with high power.

Rangehoods | Functions and features

Features and functions for everyday use.

Efficiency

Automatic power revert

When the intensive setting is selected, it can be set to automatically revert to a pre-defined setting after a short period of time.

LED lighting

The new LED lights offer a longer lifetime and use less energy than conventional halogen lighting. Additional convenience is offered with SoftLight which gently fades lighting in and out with dimmer function.

Halogen lighting

Integrated halogen lighting ensures that the cooking area is clearly illuminated. They are more efficient than standard lights and are designed to last longer.

Variable power settings

All Bosch rangehoods feature variable power settings, which can be set to effectively remove odours, smoke and moisture caused by cooking. Many models also feature an intensive extraction setting, which gives an extra boost to the performance when required.

CleanAir Recirculation

The CleanAir module is an optional accessory for rangehoods. The special active carbon filter, when compared to ducted systems, is equal in performance for odour reduction and grease absorption. It also uses up to 3 dB(A) less noise than conventional recirculation systems. Easy to install, the surface of the carbon filter is the equivalent of around 50 soccer fields offering more performance and greater energy efficiency.

Simplicity

Electronic filter saturation indicator

For maximum extraction efficiency, an illuminated light indicates when the filter needs cleaning. For hassle-free cleaning, the one-piece filter can be loaded into your Bosch dishwasher.

Electronic control

3 power levels + 2 additional intensive settings, automatic run-on, filter saturation indicator, automatic power revert and SoftLight with dimmer function, control at your fingertips.

Electronic button control

This control provides you with 3 power levels + 1 intensive setting. There's also a push-button for turning the lights on and off. And to make operation even easier. the buttons are back-lit.

Rocker switch control

It doesn't get any easier: one switch with 3 power levels and one for turning the lights on and off.

Extraction rates

from Bosch has a multi-patented filter

system with 12-layer filter mats.

sealing system and flow-optimised filter

elegant stainless steel cover with a

exceptionally high level of grease

Air extraction is measured using room volume. This is calculated by multiplying Length x Width x Height. Bosch rangehoods offer powerful maximum extraction rates for when you are cooking up a storm in the kitchen. While the variable power settings allow you to navigate just the extraction power you need for each meal

Rangehoods | Overview

Integrated rangehoods.

Great performance in a tiny space. These neatly concealed rangehoods are housed underneath the kitchen unit and can be seen if you look underneath the kitchen cabinetry.

Series | 8

Series | 6

Series 8 | DHL895CAU 86cm Integrated Rangehood

Power functions

820m³/h maximum extraction capacity with rim ventilation 3 power settings + 1 intensive setting with automatic revert to previous setting Automatic run-on time 30 mins EcoSilence Drive brushless motor

Convenience

Noise level: 41dB at minimum level (150mm ducted) Low-lift push button controls for power and light 2 x 1W LED lights with dimmer function

Cleaning Dishwasher-safe metal grease filters Electronic filter saturation indicator

Dimensions (HxWxD) Product: 418 x 860 x 282 mm Built-in: 418 x 836 x 264mm (ducted or recirculating)

Optional Accessory DHZ5605 Recirculation kit

Complete specifications Reference guide see pages 68 - 69

Series 6 | DHL785BAU 70cm Integrated Rangehood

Power functions

730m³/h maximum extraction capacity with rim ventilation 3 power settings + 1 intensive setting with automatic revert to previous setting

Convenience

Noise level: 53dB at minimum level (150mm ducted) Low-lift push button controls for power and light 2 x 20W halogen lights

Cleaning Dishwasher-safe metal grease filters

Dimensions (HxWxD)

Product: 418 x 700 x 282 mm Built-in: 418 x 676 x 264mm (ducted or recirculating)

WOUEI		Series 8
Dimensions	Appliance dimensions (HxWxD)	455 x 594 x
	Built-in dimensions (HxWxD)	375mm 449 x 558 x 354mm
Design		Stainless steel & black glass
	Display	TFT Touch Graphic Display
	Controls	Bosch Control Ring with TFT Display
Convenience	SensoFlow system: constant brewing temperature	•
	AromaPro concept: optimnal aroma extraction	•
	Intelligent AutoValve system switches automatically between steam and hot water	
	SilentCeram drive ceramic grinding unit	•
	Coffee outlet height-adjustable up to 15cm (max)	•
	Flexible milk solution: decide for yourself if you prefer connecting the yes milk container or using any other container	•
	Bean container with aroma protection lid for up to 1kg	•
	Water pump with 19 bar pressure	•
	One touch function for Ristretto, Espresso, Espresso Macchiato, Coffee, Cappuccino, Latte Macchiato, Caffe Latte at the touch of a button	•
	6 Personalised beverages: save favourite beverages with individual names and adjustable mixing ratio of milk and espress	•
	Fully programmable functions including grinding grade, cup size, strength and temperature	•
	Milk froth, warm milk and hot water separately available	•
	Early warning of bean container and water tank close to empty	•
	Bean container and water tank empty indicator	•
	Removable brewing unit and 2.4L water tank	•
Cleaning	Fully automatic-descaling and cleaning program	•
	Fully automatic rinse cycle when switched on and off	•
	Hygienic single portion cleaning function	
	Steam blast: fully-automatic steam cleaning of the milk system after every beverage	•
	Removable milk nozzle for easy cleaning (dishwasher safe)	•
	Display of remaining cups before cleaning or descaling	
Safety Technical	Child-proof lock	•
Technical	Total connected load	1600w
requirements	Power requirements	220-240V / 50-60Hz
Supplied	1 water filter cartridge	•
accessories	1 measuring spoon	•
	1 milk container and hose	•
	1 set assembly screws	•

Air extraction calculation examples to help you calculate your own requirements

Kitchen dimensions: L x W x H	Room volume	Minimum extraction rate (6 x per hour)	Maximum extraction rate (12 x per hour)
3 x 4 x 2.5m =	30m³	6 x 30m ³ = 180m³/h	12 x 32m ³ = 360m³/h
4 x 4 x 2.5m =	40m ³	6 x 40m ³ = 240m³/h	12 x 40m ³ = 480m³/h
4 x 5 x 2.5m =	50m³	6 x 50m ³ = 300m³/h	12 x 50m ³ = 600m³/h

DHZ5316	Active carbon filter. Suitable for DHL895CAU & DHL785BAU	

This much is for sure: you can trust in our service.

Reliable, experienced, fast. The customer service of Bosch; before and after purchase.

Important notes

Model numbers and specifications are for reference only and subject to change without prior notice.

For additional information on products, please refer to your local Bosch retailer. Bosch is continuously seeking to improve specification, design and production of its appliances, and alterations may take place regularly.

All descriptions and technical diagrams are intended as a guide only. For additional technical information, full dimensional and installation details, please refer to the instruction and installation manuals supplied with the appliance.

The electrical and water connection should only be made in accordance with the regulations of the national authorities.

For model and accessory availability,

Quality of our after-sales service is just as optimal condition.

Warranty

Quality service for quality appliances

important as the quality of our products. In the unlikely event that service is required on your appliance, our extensive network of authorised service agents throughout New Zealand will ensure you are provided with the full support to ensure your appliance is operating at

> All Bosch products are covered under a 2-year comprehensive parts and labour warranty.
