

BOSCH

Invented for life

Dishwashing Solutions.

Quiet. Efficient. Advanced performance.

**WORLD'S
BRAND NO.1***

* For dishwashers. Source: Euromonitor, volume sales 2017

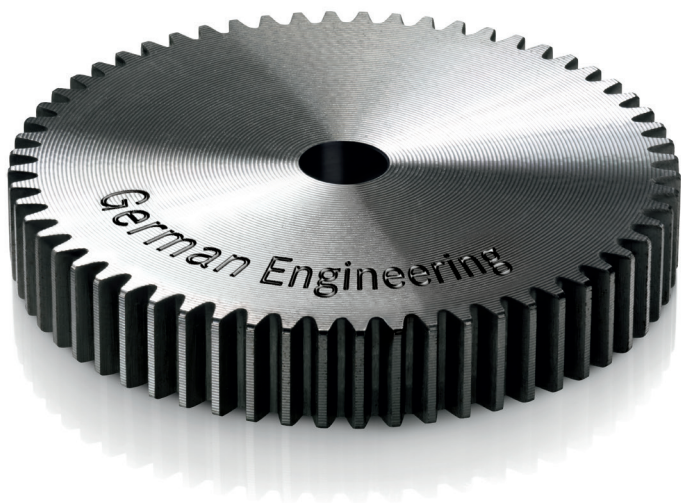

Bosch in every detail.

Quality comes from experience

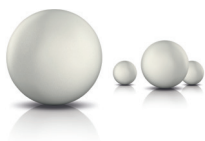

No single appliance leaves our factory until it has been proven to meet our high standards of quality, performance and sustainability. This was Robert Bosch's promise when he opened his first workshop in 1886, and this is the promise we strive to keep today. To help us achieve this, we are constantly developing new manufacturing processes.

All Bosch ActiveWater™ dishwashers undergo 200 individual quality control checks before being released from the factory.

ActiveWater™ is a revolutionary dishwashing system that uses every single drop of water to the maximum. Our ActiveWater™ dishwashers are amongst the most resource-efficient in the world, generating the cleaning power of over 4000 litres from as little as 12.3 litres per wash.

Why choose Bosch?

Zeolite® Drying Technology

We discovered the natural mineral Zeolite® for dishwashers that absorbs water molecules and then releases them as energy. This ground-breaking technology dries your dishes quicker and results in the world's most energy efficient dishwashing.

Green Technology inside

This signet denotes products that focus on energy and water efficiency while achieving top performance based on Bosch technologies - and, like all Bosch products, have been manufactured with the aim of minimizing their impact on the environment. The signet stands for the resource-efficiency of our products - quite simply, for their "Green Technology".

10 Year Rust-through warranty for the inner tub

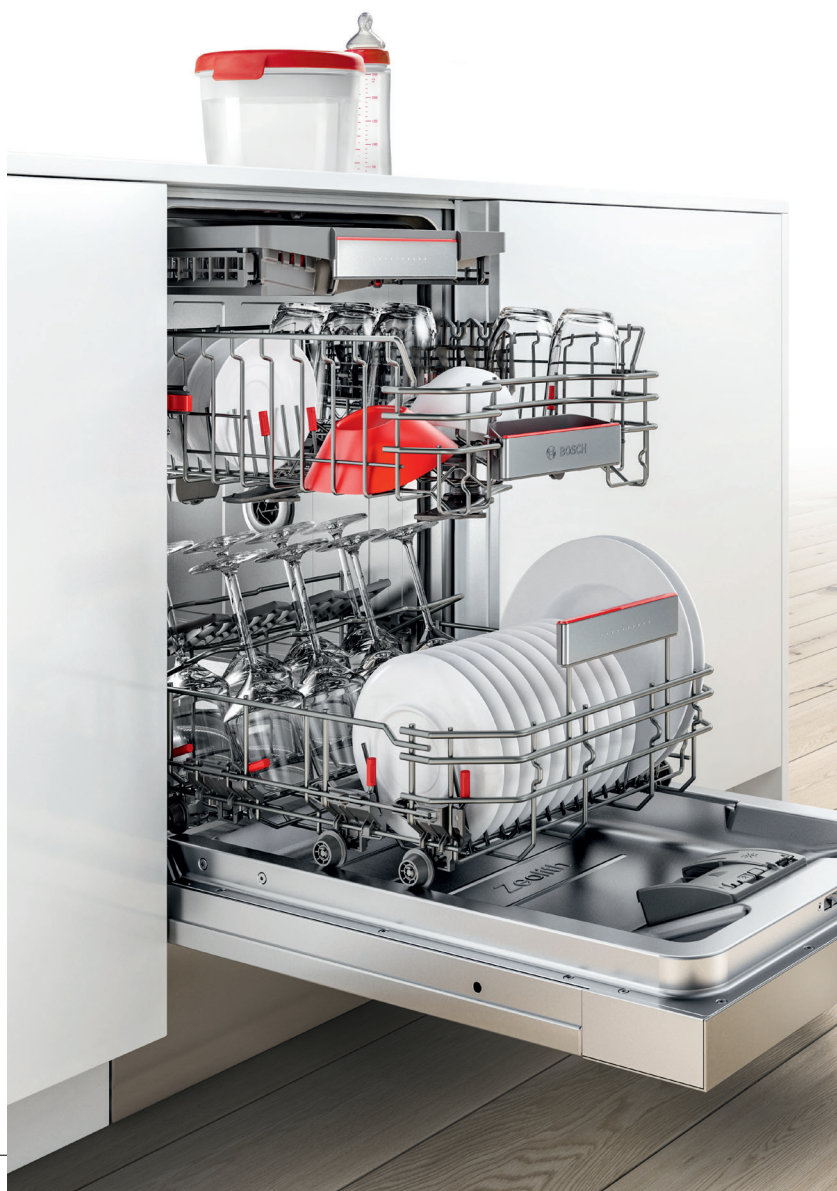

We have developed special surface treatments as well as production and joining technologies that are precisely tailored to the materials used in the interior of our dishwashers. We also use high-quality thin sheets of stainless steel. As a result, we are able to offer a 10-year warranty against interior rust-through on all of our dishwashers as standard.

Lifetime Anti-flood

AquaStop™ Anti-flood protection, guaranteed for the life of the dishwasher. For added security and safety, all Bosch dishwashers have an AquaStop™ device that cuts off the water supply directly at the tap outlet in case of leaks. Unlike other Anti-flood devices, the AquaStop™ operates 24 hours a day, 7 days a week, provided the dishwasher is switched on at the mains.

The benefits of
a dishwasher.

Protects your hand

Manual dishwashing often causes your hands to become dry and rough. With a dishwasher, there is no contact with water or detergent.

Use 10x LESS amount of water

Washing by hand Dishwasher

Kills 99.9% Germs at 70°C

A dishwasher also reduces the risk of cross-contamination because sponges and kitchen towels are not needed to clean and wipe the dishes.

Saves Energy*

With the energy savings from using a dishwasher, you will be able to operate a freezer and refrigerator for 1 year.

Saves Time & Electricity

Dishwasher saves up the time for you as you can perform other chores at the same time. With Zeolite® minerals, dishes will be dried faster and with less energy consumption.

*Based on average water and energy consumption for a standard program of a Premium-class dishwasher. Source of water and energy consumption by hand wash: Study by University Bonn, Germany based on 113 people from 7 European countries.

The perfect Bosch dishwasher to fit your kitchen.

Compact

Designed especially for small kitchens and households, when there is no space for a full size dishwasher.

Fully-Integrated

These dishwashers are entirely concealed behind a furniture door. The control panel is integrated into the top of the dishwasher door. They can also be fitted with a stainless steel front panel accessory if you desire.

Semi-Integrated

These dishwashers are designed to be fitted with a kitchen furniture panel to match the design of the kitchen. Only the control panel of the dishwasher is exposed. Alternatively, they can be fitted with a stainless steel front panel accessory.

Freestanding

These dishwashers can be installed anywhere in your kitchen. They have a lid which can be removed if the dishwasher is built under a worktop.

Perfect results made easy with Bosch dishwashers.

EcoSilence Drive™

Working without brushes, the EcoSilence Drive™ eliminates mechanical stress, friction and wear. This makes it exceptionally quiet and guarantees low energy consumption – 30% more efficient than the qualifying limit for class A energy efficiency rating.

DosageAssist™ detergent system

Unique to Bosch, the DossageAssist™ feature maximises the effectiveness of detergent tablets by dropping it into a specially designed tray that is targeted by water jets, resulting in a tablet that dissolves evenly under control.

AquaSensor™ technology

The AquaSensor™ helps you save even more water as it measures the amount of soiling at the end of the pre-rinse cycle, reusing water when it can, saving up to 20% for the entire wash.

VarioSpeed™

You can save up to 50% of wash time with the VarioSpeed™ option while maintaining the best cleaning and drying results for your utensils.

Wok program

The first program especially designed for your heavily soiled woks and pots so you can do your Asian cooking without worrying about the dishwashing. The results is spotlessly clean and dry dishes.

HygienePlus™ option

The HygienePlus™ option offers a hotter final rinse, perfect for removing most bacteria from your cooking utensils, chopping boards and baby bottles.

For baby bottles, we recommend using traditional sanitation methods in conjunction with this option.

Features may vary depending on model. Please check individual product specifications.

IntensiveZone™ wash option

The IntensiveZone™ function transforms the entire bottom basket into a power cleaning zone, by increasing the water pressure in the bottom basket, saving you the chore of scrubbing heavily soiled pots and pans.

Half Load

Unlike other systems that only wash in either the top or bottom baskets, Half Load provides the best possible wash performance for dishes stacked anywhere within the dishwasher.

Load Sensor

The load weight is detected by a rotary speed sensor, which recognises the water level. This optimises water usage for half or partial loads, resulting in savings in your utility bills.

ExtraDry

ExtraDry uses a higher temperature in the final rinse. The resulting residual heat is used in the drying process to provide an even better drying result. Especially useful for glassware and plastics.

Machine Care

Helps remove grime and limescale build-up from your dishwasher to keep it clean and fresh. We recommend using this function once a month or every 30 wash cycles.

VarioFlex™ Pro.

The innovative VarioFlex™ Pro basket system offers the greatest flexibility. With foldable racks, the system can be adapted to any load, and all items are assured a firm, secure place in the protective racks.

VarioDrawer™ and VarioDrawer™ Pro

A third loading level for cutlery and smaller items. VarioDrawer™ Pro provides flexibility for larger items.

Rackmatic

This system makes it a simple matter to adjust the height of the upper basket, so a large variety of plates, glasses or even pots can easily be accommodated.

Features may vary depending on model. Please check individual product specifications.
