Invented for life.

The beauty of German craftsmanship and design, perfectly showcased by Bosch over 130 years.

Founded in 1886, Bosch has been synonymous with outstanding technology and craftsmanship. Through continuous innovation, precise electrical engineering and electronic technology, Bosch has become the world’s pioneer in industrial technology. Simple yet elegant, Bosch home appliances make every kitchen an art space with their concise design and aesthetics of life.

Today, Bosch is one of the leading home appliances brands in Europe. The brand offers a full spectrum of small domestic, free-standing and built-in appliances in Hong Kong. Renowned for its one-stop cooking solution, Bosch products include the highly-rated kitchen machines; professional, high quality ovens, steam ovens, cooktops, cookerhoods, refrigerators and dishwashers. Other home appliances include vacuum cleaners, washing machines, irons and coffee machines, offering a complete solution for living with innovative designs to fulfil the unique need of every consumer.

“I would rather lose money than trust”, the philosophy of company founder, Robert Bosch, continues to guide Bosch in developing high-quality products and assuming social responsibility wherever it operates. Treating people and nature with respect has been a corporate principle from the beginning and is reflected in the company’s energy-efficient, resource-conserving and sustainable products and processes.

True to the brand’s philosophy brand “Invented for life”, Bosch will continue to offer consumers with quality and perfect technology for a better life.

Designing perfection.

“We take rational values and make them tangible at an emotional level”
Robert Sachon, Global Design Director of Bosch Brand

“Bosch” Stands for perfection

Bosch Home Appliance has stood for technical perfection and superior quality. The design team has always presented rational values, making them tangible through comprehensive and intuitive design. Bosch’s appliances showcase high-quality materials and deliver them right down to the smallest detail. We treat design as a key part of brand management. Our design team has always played a critical role in the development of product concepts from inception to ensure perfection is concisely achieved and quality is perceived with all senses.

Bosch is “Red Dot: Design Team of the Year 2018”

Our products have received applause world-wide with more than 500 awards in the past 10 years, thanks to their groundbreaking technology, outstanding quality and intelligent design. Today, Bosch continues its outstanding record of winning numerous prestigious international awards and accolades including the Red Dot Design Award and iF Product Design Award. For the 60th anniversary of the Red Dot Award, one of the largest and most prestigious award in the world, Bosch was given the honorary title of “Red Dot: Design Team of the Year 2018”. These honors demonstrate premium quality, advanced technology, ease of operation and outstanding German tradition, which Bosch has been able to rely on.

Quality from Bosch, around the world.

Bosch appliances offer premium home solutions for property developers worldwide.

North America: In the heart of Las Vegas and on the cutting edge.

The MGM CityCenter is a 308,000 m² large building complex which was commissioned by MGM International Resort and realized by eight internationally renowned architects. Being one of the most expensive privately funded construction projects in the U.S., it offers plenty of leisure space for the 2,700 exclusive apartments – many of them are fully equipped with Bosch appliances.

Arabia: New standards in Dubai and around the world.

The unique combination of traditional Arabic elements with modern architecture and unprecedented technology, Tom Wright created a Dubai landmark. At 321 meters high, the hotel is one of the tallest, most luxurious and expensive hotels in the world. Therefore it’s no wonder that the demands for quality kitchen appliances in each of the 16 suites were just as high.

Australia: Bright prospects.

At a height of 323 meters, the Q1 Tower is one of the tallest residential buildings in the world, dominating the skyline of Australia’s famous Gold Coast. Spread across 80 floors, the luxury apartments offer breathtaking views of the coast on the outside – and in the interior, the best views of German engineering.

Europe: Aiming high.

The renowned Spanish architect, Santiago Calatrava designed the Turning Torso. At 190 meters, it’s the tallest skyscraper in Scandinavia and is the urban highlight in Malmö. The building, with its exciting design evokes the impression that it revolves around its own axis. Trusted by Samark Arkitektur & Design AB who create extraordinary interiors, the 150 apartments were fitted with modern, Scandinavian design – and Bosch home appliances. Therefore, the building is an architectural masterpiece on both the inside and outside.

Online experience redefined.

Our website now not only includes a localised Chinese version, but also features a surprisingly simple user interface, even on smartphones and tablets. Get the latest news on our products and shop your Bosch home appliances at our online store anytime.

Bosch Cooking Group

We are launched the Bosch Cooking Group for cooking love sharing recipes, cooking tips and cooking information.

<https://bit.ly/2VfGHqj>

Bosch cooking appliances. Designed to make your everyday life easier.

The appliances from Bosch perfectly compliment each other to make every moment in your kitchen a perfect, tasteful and relaxed moment.

Hoods

A range of designs to suit your dream kitchen. From focal point canopy to hidden integrated hoods our whisper-quiet hoods will be a pleasant surprise and will allow you to enjoy cooking even more.

Food Preparation

Our multi-functional, award winning kitchen machines, food mixers and processors are packed with innovative, labour-saving technology so you can chop, blend, shred, mix and whisk your way more quickly through your food preparation task.

Refrigeration

Stylish matching your kitchen cabinetry and packed full of sensor technology keeping your food fresher for longer.

Hobs

Choose a hob to match your cooking habits: From our revolutionary gas hobs to innovative induction.

Dishwashers

A dishwasher is a must in any modern kitchen to save you the hassle of cleaning up. Choose from built-under, semi and fully integrated models to perfectly integrate into your kitchen.

Ovens

High-quality stainless steel combined with sleek black glass offers a timeless design, while sophisticated features deliver the best results meaning less work and more cooking pleasure.

Ovens.

[Discover more](#)

8 design options.

Fits every kitchen. And every need.

The new Series 8 appliances are the stand-out choice – not just because of their superior performance and convenience. They are engineered to perfection, thanks to precision craftsmanship and sophisticated design that extends down to the smallest detail. The panel heights and display designs for all Series 8 products are consistent across the entire range. No matter which built-in appliances or heights you choose, they all fit together in complete harmony. In addition, the elegant stainless-steel strip at the bottom of the appliances creates a uniform look, especially when installed side by side. Appliances stacked on top of one another complement each other perfectly without the stainless-steel strip at the bottom edge. We also offer matching chimney hoods and dishwashers, allowing you maximum freedom to plan your ideal kitchen.

Series 8 design options.

Design à la carte. Technology à la Bosch.

To make sure you'll never lose your appetite for the look of your kitchen, we also offer Series 8 appliances in timeless ColorGlass versions. Thanks to the ideal combination of glass and metal, these appliances fit seamlessly into almost any kitchen and can be combined with a perfectly matching Bosch chimney hood. In addition, our ColorGlass fronts are extremely impact-resistant and very easy to clean. You can even add your own unique touch of colour: Series 8 built-in appliances are also available in Artic White ColorGlass and Volcano Black ColorGlass, in addition to the classic stainless-steel version.

When every single of our appliances makes your life a little bit easier – that's Bosch in every detail.

We believe the perfect built-in appliance must be designed for one thing above all else: to make your time spent in the kitchen as pleasant as possible. So we developed the new Series 8. Every detail of every appliance has been carefully designed, produced and tested by our engineers to fully satisfy the highest standards in quality, performance and convenience. The result is cutting-edge technology, timeless design and remarkable ease of use, reducing the workload for you and consistently delivering perfect results. Discover the new Series 8 from Bosch.

Proven quality

The new Series 8 brings you much more than just outstanding functionality and craftsmanship. We devote the same high level of care, passion and dedication to all areas of our work – from the first design draft right through to customer service. It's the same Bosch quality that you have been able to rely on for more than 130 years.

Top performance

What drives us every day is our desire to improve. We strive to make the best even better, by developing functional, durable and energy-efficient innovations that surpass all expectations. Take for example, the new PerfectBake sensor in our Series 8 ovens – perfectly baked cookies and cakes, at the touch of a button.

Maximum convenience

Bosch is dedicated to making your life easier. Our innovative built-in appliances are easy to use, and you won't waste a second trying to figure out how they work. Sophisticated features deliver the best results every time, and save you considerable effort and expense in the process. That's what our new Series 8 stands for – less work and much more cooking pleasure.

The new Series 8 generation of ovens.

Put a new spin on your cooking career.

No matter how complicated a recipe may look, with the Series 8 ovens it will be a piece of cake. These cutting-edge ovens constantly monitor the progress of your cooking and automatically regulate temperature and length of time. Whether you're preparing poultry, meat, fish, vegetarian dishes, baked goods or desserts, your favourite dishes are always cooked to perfection – and it couldn't be easier. Now you have a master chef to help you in the kitchen: your oven.

Ovens | Control panel

We didn't reinvent the wheel.
But we taught it how to cook.

Everything you need at hand: our new, intuitive control ring makes cooking easier than ever. With just a small turn of the stainless steel ring, you can adjust any of your oven's settings. The TFT-touchdisplay, with its clear and straightforward design, guides you through the various menu options. This gives you full control over your dishes at all times and everything succeeds with ease.

PerfectBake

Baking has never been easier. The PerfectBake sensor offers uniquely precise sensitivity, constantly measuring the moisture level of your dishes and automatically regulating the baking process. You'll never have to set the heating mode, length of time or temperature ever again – the PerfectBake sensor has it all under control. Simply select the type of dish, such as "Cake", and press "Start". Your oven will do the rest. The result: muffins, cake and quiche baked to perfection.

Ovens | Functions | PerfectBake and PerfectRoast

Become a master chef – at the touch of a button.

When you cook with a Series 8 oven with the PerfectBake and PerfectRoast functions, there is almost no limit to what you can do. The combination of these two sensor-controlled functions ensures that your oven always knows precisely how your dish is progressing. It sets the optimal heating mode, temperature and cooking time accordingly. Every dish, from roast beef to lemon pie, is cooked to perfection, so you no longer need to constantly check on their progress – unless you can't help but admire the cutting-edge technology at work.

PerfectRoast

Christmas turkey, Easter lamb or Sunday roast – with the PerfectRoast meat probe, you'll get perfect results every time. Just like a professional chef, but with total ease. Through several highly sensitive measuring points, the probe determines the core temperature of your roast to the exact degree and second, guaranteeing perfect roasting results. Another benefit: you can also use the meat probe in the microwave and steam oven mode.

Ovens | Functions | Assist

The first recipe collection in the form of an oven.

You could search through stacks of cookbooks and old family recipes without ever finding precise information on temperature or cooking time. Thanks to the Bosch Assist function for automatic oven settings, you don't have to worry about that anymore: simply select the desired dish in the control panel and your oven automatically sets the ideal heating mode, temperature and length of time. Of course, you can also select these settings yourself every bit as easily.

4D HotAir

Thanks to 4D HotAir, you can place your food on any shelf level from one to four and the results will be consistently perfect. Our new fan wheel makes it possible: it changes the direction of rotation during operation to distribute heat evenly on every level. And that's not all: with 4D HotAir, you can also bake and roast on up to four different levels simultaneously. For reliable results from top to bottom.

Ovens | Heating modes

Because there's hot – and then there's hot.

Truly perfect baking and roasting requires not only the ideal temperature, but also the appropriate heating mode. From 4D HotAir to HotAir Eco to desiccation, Series 8 ovens offer up to 15 different heating modes that deliver great results, whatever the dish. For everything from haute cuisine to simple daily dishes, exceptional quality is guaranteed.

HotAir Eco

HotAir Eco is our improved version of convection, the heating mode most commonly used in homes. Thanks to special temperature controls, your oven is never a single degree hotter than necessary and uses up to 30 per cent less energy. This makes our ovens great for precision cooking on a single baking level – ideal for cakes, casseroles, meat dishes, frozen foods, and much more.

Top and bottom heating Eco

In addition to classic top and bottom heat, Series 8 ovens feature a new eco-friendly mode for extremely efficient operation. Prepare perfect sponges, pound cakes, delicate pastries, bread and rolls while saving valuable energy.

Desiccation

Our desiccation heating mode is a healthy alternative to buying dried fruit from the supermarket. Whether you want dried apples for muesli or dried tomatoes for antipasti – your oven has it covered. You'll taste the difference – and can be sure that additives such as sulphur dioxide never reach your plate.

Ovens | Cleaning functions

Delegate the cleaning.

Anyone who has ever cleaned an oven by hand knows how exhausting and time-consuming it can be. However, this chore is a thing of the past, thanks to our new EcoClean Direct cleaning aid. While the oven is in operation, the special EcoClean Direct coating works to reduce dirt accumulation. You won't waste a minute on cleaning, leaving you more time to enjoy cooking.

Save time and energy with EcoClean Direct

While the oven bakes or roasts, the special direct coating of microfine ceramic particles on its interior walls absorbs grease and residue and breaks them down through oxidation. All you need to do is wipe the area with EcoClean Direct saving you time and energy.

The direct coating regenerates every time you heat the oven, and continues to do so for the entire service life of the appliance.

EcoClean Direct at sides of oven

Oil/Grease

The microfine ceramic lining

... soaks up the grease deposits

... breaks them down and...

... regenerates when heated

Ovens | Equipment options | Doors

Open for your wishes.

Different people need different things in their kitchen, so the Series 8 ovens are available with a wide variety of features. Whether it concerns the interior lighting, the door or the rail system, with our ovens you can find the solution that fits you best. No matter what you choose, the baking and roasting results will always be the same: perfect.

Door versions

Whether you're thinking about buying an oven, compact oven, steam oven or microwave, our doors are perfectly tailored to Series 8 appliances in both form and function. For example, our ovens with pyrolytic cleaning or microwave function come with flatter inner glazing, which makes them much easier to clean. All of our doors also have the practical SoftOpen & SoftClose function, so they can be opened and closed even more softly and quietly. Of course, safety is also of paramount importance: all doors stay cool enough for comfortable handling while the oven is operating to provide maximum protection for large and small hands alike.

Ovens | Equipment options | Shelf systems and lighting

Perfection on every level.

As far as we're concerned, safe and convenient baking begins with the loading and unloading of baking trays. That's why our new Series 8 ovens come with several different shelf systems, including easy-glide, triple and fully-extendable telescopic rails, ensuring you'll always be able to handle your dishes safely and easily. Three different lighting options guarantee optimal visibility – for example, the energy-saving lateral LED lights not only illuminate your dishes from all sides, but also save you money – all during a service life of up to 40 years.

Shelf systems

Whether you choose a standard shelf system or one with single, double or triple telescopic rails – all of our shelf systems are safe and easy to use. Our telescopic rail sets are fully extendable on up to three levels – ideal for conveniently loading and removing baking trays. And for the first time, all shelves are pyrolytic-proof and suitable for microwave and steam operation.

Lighting versions

Depending on the model, Series 8 ovens are equipped with our classic halogen, standard LED or new lateral LED illumination. LEDs are currently the brightest lights on the market. They provide perfect illumination, are highly efficient and have the longest service life. The lateral LED lighting also offers separate illumination on each level, which is especially convenient when baking with multiple trays simultaneously.

Installation with a hob.

	HBG633BS1 60cm built-in oven	\$15,800
	  	
Performance	• 10 cooking methods: - 4D HotAir - HotAir Eco - Hot air grilling - Top and bottom heating - Top and bottom heating eco - Bottom heating - Grill – small area - Grill – large area - Pizza setting - Defrost • Energy efficiency class: A+

Gas hob	30 mm	38 mm
Electric hob	27 mm	30 mm

Ovens | Added steam

Add a touch of steam.

Added Steam function

When you cook using one of our classic heating modes, dishes turn out even better if you add a little bit of moisture from time to time. And that's exactly what our added steam function does. Whether you're reheating dishes, proving dough, baking or roasting, you can simply set the oven to automatically add steam, or you can add steam manually and regulate its intensity.

Regeneration

Reheating a prepared dish is known as "regeneration". Dishes are gently heated in 90–95°C steam and taste as delicious as if they had been cooked fresh. Regeneration even keeps meat wonderfully crisp, so your holiday roast will taste great long after the festive season is over.

Dough proving

For yeast dough and sourdough. Dough will rise considerably quicker than at room temperature. The surface of the dough does not dry out.

The new Series 8 generation of combination steam ovens/steam ovens.

Steams so gently that even vitamins stay for dinner.

There is no healthier or tastier way to prepare food than in a Series 8 combination steam oven/steam oven. When gently cooked in steam, foods retain their vitamins and aroma while bringing out their full and natural flavour. Vegetables stay crisp, while poultry and fish remain juicy and tender. With steam, you can even cook without adding oil or fat. Thanks to its integrated water tank, the oven doesn't need a direct water connection, giving you much more flexibility in choosing its location.

Menu cooking

With the Series 8 steam oven, you can prepare an entire set menu using up to three levels at once. Salmon with asparagus and rosemary potatoes? Cook them all together and everything will turn out perfectly. Need to prepare dessert too? No problem. Thanks to the moisture in the oven, there's no intermingling of flavours – each dish retains its own authentic flavour.

Preserving vitamins and minerals

Dishes that are cooked in hot steam not only retain their vitamins and minerals, but also their full, natural flavour. So you can also go easy on the extra seasoning, and use much less salt when cooking. In short, healthy food has never tasted better.

Mineral content

Steam function

The steam function automatically adds a constant flow of moisture when the oven is in one of the classic heating modes. The result: your roasts are juicy on the inside and beautifully crisp on the outside, and your bread crusts are perfectly browned. Ovens featuring this function can also be used to steam vegetables and fish.

Ovens | Microwave function

Ready before you've even set the table.

Today's busy schedules don't always leave enough time for cooking. Series 8 ovens with integrated microwave function will allow you to find time to make any dish. Whether you want to roast, bake or just heat something up – the smart combination of classic heating and the microwave function helps you achieve perfect results in minutes. It's almost twice as fast, saves energy, and retains the full flavour.

Discover more

The new Series 8 microwaves can be installed above another oven in a cabinet or separately in an overhead cabinet.

The new Series 8 generation of microwaves.

Some gourmets shouldn't be kept waiting.

Sometimes you just can't get food to the table fast enough. Our new Series 8 microwaves help you speed up the cooking process and give you perfect control over your menu and your schedule. Whether you're heating baby food, pre-cooked meals or frozen foods, you'll get outstanding results quickly, hygienically and without compromising on taste. So instead of killing time waiting for dinner to be ready, you and your loved ones will have much more time to enjoy it.

Power levels and automatic programmes

Our Series 8 microwave ovens with high-resolution TFT displays allow you to heat, defrost, roast or grill anything – thanks to 1,000 watts with five power levels. The AutoPilot programme also helps you achieve the best possible results with next to no effort. Just insert your roast, enter its weight and select the right programme from the menu. The rest takes care of itself, with 100% flavour guaranteed.

The new Series 8 generation of built-in coffee machine.

Now your favourite café is open 24/7.

Espresso, cappuccino or latte macchiato? With the Series 8 built-in coffee machine, you can treat yourself and your guests to any beverage at the touch of a button. Bosch Barista technology guarantees a full-bodied aroma and perfect crema – for coffees as delicious as those brewed in your favourite café.

Optimal brewing temperature

The optimal brewing temperature for an espresso is between 90°C and 95°C. If the temperature is any higher or lower, the flavour of the beans is only partially released or the coffee is bitter. Our smart SensoFlow system heats the water to just the right temperature, for a full-bodied espresso aroma from the first cup to the last.

Perfect tamping pressure

The AromaPro Concept brings you the finest aroma and an exquisite crema. A precision pressure system compresses the ground coffee perfectly every time, whatever the quantity. The convex shape of the tamper means that the water takes longer to pass through the ground coffee, enabling more flavours to be dissolved.

For the perfect aroma

Not all coffees are the same: Each coffee variety, mixture and roast differs in grinding. The sensor-controlled grinder automatically adjusts the grinding time to the type of beans you are using – ensuring that you always grind the optimal quantity of beans for the desired strength of coffee.

Extra Strong coffee with less bitterness

The more water passes through ground coffee, the more bitter the result. AromaDouble Shot grinds and brews extra strong coffee in two steps – and as only half the water is used at each step, the coffee produced is less bitter. So you can enjoy maximum flavour – even when drinking coffee at maximum strength.

New Series 8 drawer elements.

Sometimes our best ideas end up in a drawer.

Our Series 8 warming drawers can do much more than just keep food and plates warm. They're also perfect for slow-cooking meat, defrosting frozen foods, melting chocolate, drying fruit and proofing dough.

Warming drawers

The new warming drawers from Bosch can be installed either separately or in combination with our Series 8 ovens, compact ovens and built-in automatic coffee machines. Our practical Push & Pull technology ensures they are always easy to open, even when you have both hands full.

Our service quality. Awarded!

Our Bosch customer service scores top marks around the world for its performance. In Great Britain, for instance, it was winner of the “Total Excellence & Quality Award”.

Quality service straight from the manufacturer. Original Bosch.

We are committed to quality – also when it comes to after sales service. For no-one knows our appliances better than our highly trained service engineers. They are working with the latest equipment for measuring, diagnostics and repairs, and use only original Bosch spare parts.

Fair repair prices. Guaranteed.

Our customer-friendly pricing system is transparent and reliable. We will be happy to advise you the best solution. An extra 2-month warranty will be offered on chargeable repairs performed after the 2-year warranty period.

Lifetime service. It goes without saying at Bosch.

Once your warranty period is over, we are still there to assist you. You can rely on expert care and first-rate service throughout your appliance’s life cycle. From missing instruction manuals to appliance repair – we take care of everything. A promise is a promise.

Original accessories. Effective care products.

Take a look at our extensive range of accessories available for order: discover additional uses, replace old materials for optimum operation or simply give a trusty home appliance (designated models) a good work-over. With the right care, you will be able to enjoy your high quality appliances for many years to come.

Extensive customer services network. Just a call away.

Help in your home for large appliances such as washing machines or dishwashers need specialised engineers who offer on-site diagnosis and repairs. We are just a phone call away!
