Why choose Bosch?

Quality comes from experience

Before our washing machines leave our factory, we test every tiny detail and subject them to extensive stress tests. Only when every one of the 1,000 or so components in our washing machines meets our high standards of function, quality and reliability is a Bosch appliance ready to face its most important challenge: being used by you at home.

Climate neutrality since 2020

Since 2020, the Bosch Group with its more than 400 locations worldwide has been climate neutral. But that's not all: we want to shape climate action beyond our immediate sphere of influence and also systematically reduce upstream and downstream emissions, which we aim to reduce by 15 percent by 2030.

10 Year EcoSilence Drive motor warranty

The EcoSilence Drive is Bosch's most powerful motor to date. Instead of supplying electricity to the rotating armature via carbon brushes, we equipped the armature itself with extremely strong permanent magnets. As a result, we are able to offer a 10-year motor warranty on washing machine models that feature the EcoSilence Drive.

Bosch AllergyPlus program

Selected washing machines with Bosch AllergyPlus, wash with a 60°C program that ensures 99.99% of bacteria will be removed*. Making sure you get hygienically clean clothes after every wash.

*99.99% bacterial reduction as tested by TÜV SÜD PSB Singapore on 16 Oct 2019 on 'AllergyPlus' wash program at 60°C for a recommended load of 4kg.

Australia's Most Trusted Brand 2021 for Laundry Appliances

Bosch has been awarded Australia's Most Trusted Brand 2021 for Laundry Appliances as voted by Australians, revealed exclusively in Reader's Digest. Australian Reader's Digest engaged an independent market research agency to conduct a stand-alone survey of a representative sample of more than 3,000 Australians.

Choose the right laundry appliance for your household needs.

All Bosch washing machines and Heat Pump dryers offer advanced technologies across the ranges, with additional options to suit your lifestyle needs. To help you choose the right Bosch laundry appliance we have divided them into the ranges below.

Series 8: Innovations and extra features.

The appliances of **Series 8** not only fulfil all of the demands for perfection, but their clever sensors and functions also reduce your work. The **i-DOS** automatic, self-dosing system adds the optimum amount of liquid detergent for every load. Additionally, the **4D wash system** in our top models directs additional water into the middle of the load for a more effective wash. The Heat Pump dryer is known for its drying speed and quiet operation. Fast dryer technology pumps in air at a higher operating temperature, drying your clothes up to 8 minutes per kilogram faster than other Bosch Heat Pump dryers. Our dryers with **ActiveAir technology** reuse air efficiently during the entire drying process resulting in up to a 10 star energy rating. New **AutoClean** automatic fluff removal (in WTX88MH0AU), means minimal maintenance, simply empty the lint collector every 20 cycles*. In short, our Series 8 range achieves perfect results with ease.

Washer

Dryer

* Based on 160 cycles/year in standard cotton program according to the EU regulation 392/2012. Figures may vary depending on usage behaviour.

Series 6: For a little more.

Our **Series 6** range offers great value for money without compromising on our Bosch quality. Our washing machines with **ActiveWater Plus** technology have advanced pressure and water sensors to measure the washing load and adjust the water intake during each cycle. This helps protect our environment by saving water, plus you benefit from reduced costs. The Series 6 **Washer/Dryer** combines the best of both worlds, allowing you to wash and dry your laundry in only 60 minutes.**

Washer

Washer/Dryer

Wash+Dry

**Based upon 2kg for washing, 1kg for drying. Final moisture can not be guaranteed in case of overload.

Series 4: The everyday performer.

The **Series 4** washing machines with the **EcoSilence Drive** are not only user-friendly, durable and extremely quiet, but they always get your laundry perfectly clean using the least amount of energy. The **Series 4 Heat Pump** dryer with the sensitive drying system provides gentle drying.

In everyday family life, entire mountains of laundry seem to build up. Sometimes you need them to be washed quickly, which is why we have developed **SpeedPerfect**, a wash option that speeds up your selected program. Alternatively, if you prefer an economical wash, our **EcoPerfect** wash option saves energy.

Washer

Dryer

Home Connect

Connect and control via your smart device.

Take a load off cleaning with Home Connect. The Home Connect app allows you to monitor every activity of your Bosch washing machine and dryer from the palm of your hand, no matter where you are.

Remote monitoring and control

Use your mobile device to begin and control your laundry. Simply set the start or end time to ensure the laundry is ready when you are. The app will also allow you to monitor the progress of your wash and let you know when it is finished.

Easy Start assistant

Choose the right program every time. Based on fabric type and load size, the Easy Start assistant recommends the best suited program to use. Having the answer at your fingertips saves you time with no more guess work.

Voice Control

With voice control assistants like Alexa or Google Assistant, you can simply ask your washing machine for updates. For example "Alexa, ask Home Connect washing machine when the laundry will be ready". You can even call for the machine to pause so you can reload to add any forgotten item.

i-DOS automatic dosing.

Protecting your clothes and the environment.

Using too much detergent can result in higher water and energy consumption, as well as visible accumulation of detergent residue on your clothes. On the other hand, too little detergent may lead to stains not being completely removed, discolourations and unpleasant odours. Bosch i-DOS solves this problem by carefully determining the exact wash conditions before dispensing the precise amount of liquid detergent to deliver perfect wash results, all while maintaining the best fabric care.

Correct Dosing with i-DOS

i-DOS, the intelligent automatic dosing system, dispenses the correct amount of liquid detergent to the very millilitre. That means, less guess work and no more incorrect dosing – and far greater water savings.

Serie | 8

i-DOS washing machine
WAW28620AU

"i-DOS is so easy no mess & is going to be so much cheaper on washing liquid & fabric softener."

Incentivised review.

*Average rating for WAW28620AU is 4.8 stars as at September 2021.

How does i-DOS 2.0 technology work?

The unique new and improved i-DOS 2.0 automatic dosing system doses liquid detergents and fabric softener with maximum precision. Special sensors determine the laundry's weight, type of textile and even the degree of soiling on most programs. This conveniently helps to take most of the guess work out of doing the washing.

On the original Bosch i-DOS system (WAW28620AU) the degree of soiling is detected on the Automatic program only. For all other programs recommended dosage amounts are preset and can be adjusted accordingly at the touch of a button.

Manual dosing

If you prefer, you can of course continue to dose manually for all programs, except the automatic ones. This is ideal for when you wish to use a special detergent, powder or stain remover.

i-DOS drawer 1

Add up to 1 litres* of liquid detergent (e.g. universal or colour) to this drawer.

i-DOS drawer 2

Add up to 430ml* of liquid detergent or fabric softener to this drawer.

* Detergent drawer size can vary by model.

* Fabric softener drawer size can vary by model.

i-DOS – the intelligent dosing system from Bosch.

i-DOS automatically determines the amount of **liquid detergent and water** needed based on 3 factors:

Weight of the load

Fabric type

Degree of soiling

4D Wash System for spotless results, even when fully loaded.

The innovative 4D wash system reduces the wash time with brilliant cleaning results thanks to a highly efficient delivery of water and detergent. Laundry is spun to create a tunnel, detergent is directly sprayed inside the tunnel where it can penetrate fabrics efficiently, even when fully loaded. The result: a spotless wash.

AntiStain System helps to remove four of the most stubborn stains.

The temperature, drum movement, and soaking time get adjusted allowing the washing machine to easily remove up to four of the most stubborn stains. It's the perfect way to remove butter or oil, grass, red wine, and blood stains.

Save more time, water and energy than ever before.

The latest Bosch laundry appliances give you peace of mind when washing your clothes. With a range of advanced technologies across our models, your clothes are washed perfectly and energy efficiently.

ActiveWater Plus: Saves on running costs and the environment.

Highly efficient water management technology. The exact load is automatically detected (up to 256 precise levels) to then determine the most efficient water flow possible. This means that 1kg of laundry can be washed just as efficiently as a full load.

VarioPerfect: Choose to wash faster or more energy efficiently.

Get perfect washing results suited to your lifestyle. **SpeedPerfect** can reduce the selected program times by up to 65%. Alternatively if you are not in a hurry selected models with **EcoPerfect** can reduce energy consumption by up to 50%.*

Features vary depending on model. Please check individual product specifications.

*Basis: Difference between the duration of the Cottons 40°C program & pressing EcoPerfect or SpeedPerfect button.

Features and functions for everyday use.

Discover the advanced features available on selected Bosch washing machines.

10 Year
Motor
Warranty

EcoSilence Drive

Setting a benchmark in energy efficiency, the EcoSilence Drive brushless motor is our most powerful motor to date that works without brushes to eliminate mechanical stress. It is extremely energy efficient, durable, and one of the quietest motors in its class. As a result, we are able to offer a 10-year motor warranty on washing machine models that have EcoSilence Drive.

AntiVibration side walls

The side wall design is not only eye catching, but also provides greater stability and reduces vibration. The enhanced insulation also regulates noise levels, making Bosch washing machines very quiet even during the spin cycle.

Asymmetrical porthole

The glass of the special asymmetrically curved porthole softly projects into the drum. It gently returns washing back into the centre of the drum on each rotation, ensuring even circulation.

Sensor technology

A network of intelligent sensors automatically controls the wash process, not only ensuring perfect wash results, but minimising water and energy consumption.

AquaStop anti-flood protection

The AquaStop system provides 100% anti-flood protection*.

AquaSecure anti-flood protection

The AquaSecure self-sealing hose minimises the risk of flooding.

User-friendly interface

Stylish, straightforward control panel with an LED display for easy selection of wash programs, spin speeds, temperature and other functions.

Child lock

For added safety, the door can be locked manually to prevent children from accidentally opening the door. The buttons can also be locked to prevent tampering during operation.

VarioDrum

The VarioDrum design gently and efficiently washes all types of clothing by even water distribution and without stretching, creasing or damaging your most beloved items. The droplet-shaped design and the asymmetrical paddles gently rotate your laundry to the centre ensuring an intensive, quick, and thorough cleaning for the entire load.

Water & Energy consumption indicator

An LED bar displays five possible levels of water and energy consumption per kilogram, indicating the efficiency of your chosen program/option combination. The less bars shown, the greater the resource efficiency of the wash cycle.

The power of Silence.

At Bosch we understand life can get busy and extra noise can be frustrating. That's why we ensure our machines operate quietly to let you get on with life.

EcoSilence Drive

The EcoSilence Drive motor operates without carbon brushes, eliminating the disadvantages of conventional motors. Instead of energy loss, wear and noise, you get efficiency, durability, and smooth operation. The result: low noise levels with high power.

Noise is measured in numeric decibels or dB(A). It is important to note that a few decibels can make a huge difference.

Your guide to our wash programs and options:

Standard wash programs

Cottons

This program is ideal for hard-wearing items made from cotton, linen or blended fabrics. For optimal results wash white cottons at 60°C or higher, while multi-coloured cottons are better suited to lower temperatures.

Cottons Eco

On selected models, the Cottons Eco wash program offers an initial 60 minute wash cycle before the first rinse. Ideal for light-to-medium soiled garments, a longer wash reduces resource consumption, while still providing impressive wash results.

Delicate/Silk

The wash temperature is preselected at 30°C, and depending on the fabric wash instructions, may be increased to 40°C or even reduced to a cold wash to provide a temperature-controlled wash. Suitable for silks, delicate viscose and synthetic items.

Easy care

Recommended for synthetic and blended fabrics up to 4kg, with a temperature of 60°C.

Wool

The wool program provides a gentle wash action at an optimum temperature of 30°C. The gentle spin at the end of the cycle extracts water, helping garments retain their shape.

Additional specialty programs

(available on selected models)

AllergyPlus

Suits items that need to be hygienically clean such as towels, bed sheets or pillow cases by washing them thoroughly at a 60°C ensuring that 99.99% of bacteria is removed*.

Automatic

Exclusive to washing machines with i-DOS technology, the Automatic program adjusts the dosing and spin speed based on the detected load size, textile type and the soiling level. Available for up to 3 different temperatures.

Drum clean

To prevent odour build-up, a regular drum clean is recommended if you regularly wash at 40°C or lower. An LED reminder function will flash after more than 20 washes (of 40°C or lower) when a drum clean is required.

Jeans/Dark Wash

Dark clothes, particularly jeans, often need special treatment. The Jeans/Dark Wash program optimises water, temperature and spin speed for dark cotton and synthetic textiles helping to protect fibres against bleeding and keeps dark clothes looking new.

Kidswear

An energy optimised program for heat-resistant items made of cotton or linen worn by children. Suitable for washing whites, and for multi-coloured laundry at various temperatures.

Mixed

A program designed to wash mixed fabrics in approximately 60 minutes. Ideal for garments that need to be washed urgently, without the need to wait for a full load.

* 99.99% bacterial reduction as tested by TÜV SÜD PSB Singapore on 16 Oct 2019 on 'AllergyPlus' wash program at 60°C for a recommended load of 4kg.

Additional specialty programs

(available on selected models)

Night Wash

The end sound is switched off in this program, making it suitable to run at night. It washes at 40°C with a spin speed of 800rpm resulting in lower noise output. Suitable for cotton, synthetic fabrics or blended fabrics. Maximum load capacity 3.5kg.

Quilt/Down Wear

This program uses higher water levels for washing and rinsing. Ideal for washing larger textiles such as quilts, duvets, blankets, bed covers and pillows filled with synthetic fibres up to 2.5kg.

Rinse/Spin

Rinses with cold water then spins the laundry, and then drains the water.

Shirts/Blouses

This program is ideal for shirts and blouses. The gentle spin cycle makes ironing effortless and for greater convenience, no-iron shirts can simply be hung to dry.

Spin/Drain

Spins the wet laundry after rinsing to reduce excess water.

Sportswear

Designed specifically for performance and sports fabrics with micro-fibre technology, like those used for gym, cycling or jogging. The Sportswear program offers two rinse cycles with a gentle washing action for greater fabric protection.

SuperQuick 15/SuperQuick 30

A short wash program of approximately 15 minutes for up to 2kg of lightly soiled washing or 30 minutes for more. Extra rinse cycles and improved rinse spinning, this is one of the shortest complete wash programs.

Wash options

(available on selected models)

Temperature and Spin Speed selection

Selected programs allow you to manually adjust the temperature of the wash cycle and spin speed to suit the specific garments in the load.

Finish in (delayed start)

You can enjoy even more flexibility by delaying the start of the program by up to 24 hours. Simply preset the required end time for the washing machine program to be completed exactly when you want.

Easy Iron

Clothes are tumbled gently during the normal program spin cycle and then at the end of the spin phase. This helps to keep laundry fluffy and tangle-free for reduced creasing and easy ironing.

EcoPerfect

Wash more efficiently with the EcoPerfect mode and save up to 50% in energy consumption.***

Prewash

For stubborn stains or heavily soiled garments, and to loosen and remove debris prior to the main wash. Add additional detergent to both detergent chambers for the prewash.

Rinse Plus

Adds more rinse cycles, suited for highly soiled clothing.

SpeedPerfect

Speeds up the selected program by up to 65% of the standard duration without compromising the wash result.**

Features vary depending on model. Please check individual product specifications.

** Difference between the duration of Easy Care program 40°C and the duration of Easy Care program 40°C with SpeedPerfect. Duration of time saved varies based on load size.

*** Basis: Difference between the duration of the Cottons 40°C program & pressing EcoPerfect.

Bosch solutions for your laundry care.

Do you need to add an item during the wash cycle?

The 'reload' function on our washing machines allows you to add a forgotten garment after the wash cycle has started. You can add items of laundry immediately during up to 89% of the wash cycle, while it is within safe water and temperature levels*.

QuickWash

Bosch washing machines include a handy 15/30 min SuperQuick wash program which is suitable for lightly soiled laundry. Wash up to 2kg in approximately 15 minutes or 30 minutes if washing more.

Night wash program

The Night wash program lowers the spin speed and turns off the sound at the end of the cycle. This way you can easily run your washing machine at night.

* Reloading is not possible when suds temperature is higher than 50°C or when water level is too high.

WTW87564AU

"Looks after your clothes perfectly."

Incentivised review.

*Average rating for WTW87564AU is 4.8 stars as at September 2021.

Perfect programs for your favourite fabrics.

When it comes to caring for your favourite items, Bosch has you covered. With specially targeted programs and our fabric-protecting drum structure, your clothes are in the best hands when it comes to washing and drying.

Suitable Bosch programs

Silk

Take extra care when it comes to your delicate items, simply wash with the **Delicates/Silk**. Then dry with the **Low Heat Delicates** program in our Heat Pump dryer to ensure your sensitive textiles are always protected.

Cotton

Wash and dry with the Bosch **Cottons** program featuring a wide temperature range to achieve great results for your everyday clothes. Or try our **SuperQuick** programs for your smaller loads to get the laundry done from as little as 15 minutes.

Wool

With the Bosch **Wool** program, your favourite knits are washed at the perfect temperature paired with a gentle wash process. With the **Wool program** and optional basket accessory (sold separately) your woolen items can be dried optimally.

Serie 8 WT88M20AI

When tested in accordance with AS/NZS 4222, the energy consumption of this dryer is 1.1 kWh per cycle. The energy consumption of this dryer is 1.1 kWh per cycle. The energy consumption of this dryer is 1.1 kWh per cycle.

Bosch Heat Pump dryer solutions.

Energy efficient and quiet in operation

ActiveAir technology makes Bosch Heat Pump dryers amongst the most economical dryers in Australia. Energy is saved by reusing existing heat efficiently during the entire drying process.

Fabric-friendly drying

With the Sensitive Drying System, laundry is dried with great fabric care, by warm air coming from all sides for an even distribution of heat. Garments are also gently tumbled by the SoftFlow paddles, instead of lying flat on the fabric-friendly drum structure. Simply put, no overheating.

No compromise on air quality

Bosch Heat Pump dryers recycle air during the drying process, resulting in less humidity and lint pollution in your home. Stored water from the condenser tank is used to perform a cleaning cycle to flush away lint and fluff gathered in the condenser.

Find the perfect pair for your laundry.

Now your laundry can be as stylish as your clothes with Bosch matching washing machines and dryers. Designed to allow for stacking with the Bosch stacking kit, these pairs provide flexible space saving solutions. With top fabric care and energy efficiency seen throughout our ranges, you won't only be saving space, but your clothes and the environment too.

Innovative Heat Pump dryer features for all of your drying needs.

SelfCleaning Condenser

Selected dryers have a SelfCleaning Condenser to protect your clothing while remaining highly energy efficient. The condenser is cleaned automatically, up to four times during the drying process, providing low energy consumption, cycle after cycle.

ActiveAir technology

Bosch Heat Pump dryers are designed to work without conventional heating. Thanks to ActiveAir technology, existing heat is reused efficiently during the entire drying process, making them amongst the most economical dryers in Australia.

AntiVibration side walls

Psst! The special AntiVibration design of the side walls makes Bosch dryers extremely quiet. It also helps reduce vibrations and ensures greater stability... just in case you want to do the drying at night.

AutoClean

Selected dryers with AutoClean require minimal cleaning effort thanks to automatic lint removal technology. Lint is automatically blown to a lower catchment, meaning it only needs to be cleaned after every 20 cycles* (8 times per annum) rather than after every use. There's also an alert to let you know when the fluff collector needs to be cleaned.

Sensitive drying system

A textile-friendly drum design and SoftFlow paddles ensure soft and fluffy laundry. The large capacity drum additionally protects laundry and reduces creasing.

Timer (delayed start)

The time remaining display shows you how long is left on the program, while the delay function allows you to delay the start of drying for 60 minutes or up to 24 hours.

Child safety control lock

Prevent children from tampering with the program settings and turning on the appliance.

Dryer Basket (WMZ20600)

Purchase drying basket for drying shoes or woollen clothing to avoid tumble action.

Features vary depending on model. Please check individual product specifications.

* Based on 160 cycles / year in standard cotton program accordingly to the EU regulation 392/2012. Figures might vary depending on usage behavior.

Drying programs and options.

AllergyPlus

Selected dryers allow optimal drying for hard wearing items that need to be hygienically clean. AllergyPlus helps to remove dust mites and allergens from clothing which is particularly good for people with sensitive skin.

Cottons

Developed for drying hard wearing fabrics, which do not require sensitive temperatures.

Delicates

An innovative low heat feature that protects temperature sensitive textiles by automatically reducing the heat and extending the drying time.

Down Wear

Selected dryers include this special down drying program, a moisture-controlled program with interval spinning. It dries down items to soft and feather-light perfection without the addition of agitating aids (e.g. tennis balls).

Easy Care

Drying program for items made from synthetic or blended fabrics that complements the Easy Care washing program in Bosch washing machines.

Mixed Load

For mixed synthetic and cotton textiles that do not require sensitive temperatures. Moisture is measured several times during the drying process, adjusting the drying time accordingly, assuring a uniform drying result.

Quilts

Selected dryers with the Quilts program allow optimal drying of fabrics, pillows quilts or bedspreads filled with synthetic fibres. Recommended to dry large items individually.

Shirts/Blouses

Specially created for blouses or business shirts, which should be ironed or hang up immediately after the program completes.

Smart Dry

Selected Bosch dryers with Home Connect (WTX88MH0AU) can automatically set the ideal drying program settings based on what it has just washed in a Bosch washing machine that also has Home Connect (WAX32K41AU).

Sportswear

A gentle drying program developed to handle performance and sports fabrics with micro-fibre technology that complements the Sportswear washing program in Bosch washing machines.

SuperQuick 40

The SuperQuick 40 minute option is designed for small loads of washing to be dried quickly. Specifically for synthetic fabrics, cotton and blended fabrics.

Timed Program Warm/Cold

Selected dryers allow you to manually set a custom drying time. Use the Timed Program Warm for drying slightly damp or multi layered thick items, or use the Timed Program Cold to refresh dry clothing that has already been worn that does not require washing.

Towels

Even heavy textiles are fully dried thanks to moisture-controlled programs in which the degree of moisture remaining in the garments is constantly measured. Terry towelling items like bath robes and hand towels come out soft and fluffy.

Wool/Shoes in basket program

A time based special program that allows your woollen clothing / favourite shoes to be dried using the woollen basket and therefore ideal for items that do not require tumbling.

Easy Iron 60'/120' – Anti-crease technology

Ensures that the laundry is loosened once the program has ended, the drum moves the laundry at regular intervals minimising creases.

Drying Target

Set the desired dryness level: Cupboard Dry for regular items. Cupboard Dry Plus for thicker garments. Iron Dry for items that still need a to be a little damp after drying for ironing or hanging up.

Drying Level

If you feel that the laundry is too damp when the drying program has ended you can adjust the drying level for future uses of the program to make the program run longer.

Bosch Dryers.

My drying time

Set your preferred time for the drying program to be completed in, so it's finished exactly when you need.

Save space by stacking.

By stacking your dryer on top of your front load washing machine, the footprint in the laundry is only approx. 0.34m². Both can be stacked together with the aid of a stacking kit.

Stacking kits anchor the machines together to ensure stability and ease of use.

The stacking kit with pull out drawer can also hold up to 16kg for total in-laundry convenience.

Shelf
holds up
to 16kg

Bosch stacking kits

Suitable dryers

WTZ11400 (with pull out)
WTZ20410 (without pull out)

WTW87564AU

WTZ27400 (with pull out)
WTZ27410 (without pull out)

WTX88M20AU
WTX88MH0AU
WTR85T00AU

All Bosch washing machines are compatible with the above stacking kits, except WAN24121AU.

Installation Tip:

If stacked washer & dryer are placed on a wooden floor it is recommended to use fixing brackets.

Bosch part number: 00493529.

Pedestals (WMZ20540WW)

The Bosch washing machine and dryer pedestal saves you from bending over further while loading/unloading. The convenient drawer can also be used to store items like detergent. Suits all Bosch washing machines and dryers, excluding Series 4 WAN washing machines.

Dryers on pedestal require an additional kit accessory for install (kit number: 10001484)

This much is for sure: you can trust our service.

Reliable, experienced, fast. The customer service of Bosch; before and after purchase.

Quality service straight from the manufacturer. Original Bosch.

We are committed to quality even when it comes to after-sales service because no one knows Bosch appliances better than our highly trained service engineers. Working with the latest equipment for measuring, diagnostics and repairs, Bosch service engineers only use original Bosch spare parts.

Reliability guaranteed. No compromises.

All Bosch home appliances are produced with maximum care using high-quality materials. We promise it in our two year manufacturer's warranty on all appliances.

Original accessories.

Effective care products.

Take a look at our extensive range of accessories for some inspiration: discover additional uses, replace old materials for optimum operation or simply give a trusty home appliance a good work-over. With the right care, you will be able to enjoy your high-quality appliance for many years to come. To help you do so, we offer a wide range of Bosch certified cleaning and care products.

Extensive customer service network. Just a call away.

Customer Care

Our friendly Bosch Customer Care team is on-hand to provide competent, reliable assistance. Before or after purchase, the Bosch team will be happy to advise you on products, their use and special functions.

Service & Repairs

Our team is there to provide the right advice on faults, arranging a visit of a service engineer and ordering the right accessories or spare parts.
