“It has always been an unbearable thought to me that someone could inspect one of my products and find it inferior in some way. For that reason I have consistently tried to produce products which can withstand the closest scrutiny – products which prove themselves to be superior in every respect.”

Automatic cleaning of the milk system for perfect hygiene.

Say goodbye to the hassle of cleaning the milk system each day. Fully automatically, AutoMilk Clean steam-cleans the system, keeping it clean and hygienic. By thoroughly cleaning the milk system after each drink, it saves you from having to do it every day.

All coffee specialties at the touch of a button: OneTouch Function.

Whatever you want – espresso, cappuccino or latte macchiato – preparing all coffee specialties with the OneTouch Function practically happens by itself, and in no time at all. As dispensing the coffee and milk froth is controlled automatically with the help of innovative technology, every beverage is available at just the touch of a button.

Extra strong coffee with less bitterness.

The more water passes through ground coffee, the more bitter the result. AromaDouble Shot grinds and brews extra strong coffee in two steps – and as only half the water is used at each step, the coffee produced is less bitter. So you can enjoy maximum flavour – even when drinking coffee at maximum strength.
