Set to ●

- Completely remove the detergent drawer -> Page 8.

Do not use insert (push up):

- for gelatinous detergents and washing powders; - for programmes with **Prewash**.

However, if the washing is to be removed, the door can be opened by actuating the emergency release. Risk of scalding!

Keep hands clear of the drum if it is still rotating.

- Turn the programme selector to **Off** and disconnect it from
  - Drain the water -> Page 9.
- Pull the emergency release with a tool, the door can then be opened.

♠ Important information

- Wash delicates in the net/bag (tights, curtains, underwired bras). Close zips, button up covers

- Brush sand out of pockets and collars. - Remove curtain fittings or include in the net/bag. Before washing for the first time,

Do not put any washing in the washing machine! Turn on the tap, fill the appliance with approx.1 litre of water and then pour ½ measuring cup of detergent into dispenser II. Set the Easy-Care & 60 °C programme and select Start/Pause . At the end of the programme set the programme selector to Off.

Wash new items separately.

Starching Laundry must not be treated with fabric softener Starching is possible in all wash programmes if liquid starch is used. Add starch to the fabric softener compartment & in accordance with the manufacturer's instructions

Dye in small quantities only. Salt can corrode stainless steel.

Observe the dye manufacturer's specifications. Do **not** bleach laundry in the washing machine.

Do not open the door if water can be seen through

the power supply.

# Maintenance

Allow deterhgent solution to cool down!

# Detergent solution pump

Set programme selector to **Off**, pull out the mains plug.

1. Take the drainage hose out of the retainer. Remove the sealing cap, allow the detergent solution to flow out. Push the sealing cap back on.

#### Filter in the water inlet hose

Risk of electric shock! Do not immerse Agua-Stop safety device in water (contains electric valve).

Release water pressure in the supply hose:

- 1. Turn off the tap! 2. Select any programme (except Spin @/Drain ).
- 3. Select ♦ Start/Pause. Leave programme for approx. 40 seconds. 4. Set programme selector to Off. Pull out the mains plug.

#### Clean filter:

- 1. Depending on model: -Remove hose from tap.
- -Clean filter with small brush.

- -Remove hose from the rear. -Remove filter with pliers and clean.
- 2. Connect the hose and check for leaks.

## What to do if ...

Water not visible in the — Not a fault — water below the visible area. Spin result not Wash small and large items of washing together. - Reduced Ironing 2 selected? -> Page 5. satisfactory.

 Too low speed selected? -> Page 3. Spin cycle actuated Not a fault – unbalanced load detection system adjusts several times.

- Remove the insert. Clean detergent drawer and insert -> Page 8. Dispenser % not completely rinsed out.

Select \* Rinse/Freshen Up or brush the laundry after washing.

In the pause state  $\diamondsuit$  — Water level too high. Top up washing is not possible. Start/Pause flashes very If required, close door immediately. guickly and a signal - Select "Start/Pause" to continue the programme.

If a fault cannot be rectified or a repair is required: Set programme selector to Off and pull out the mains plug.

- Turn off tap and call customer service -> Installation instructions, Page 7.

# Safety instructions

- Read and follow the operating and installation instructions and all other information enclosed with the washing machine.
- Retain documents for subsequent use.

Risk of electric shock — Never pull out the mains plug by tugging the power cord! Never insert/pull out the mains plug with damp hands.

Danger to life

Risk of suffocation

Risk of poisioning

Risk of explosion

Risk of injury

Redundant appliances: - Pull out the mains plug.

- Sever the power cord and discard together with the plug. Destroy the lock on the washing machine door.

This will prevent children from locking themselves in and suffocating. Keep packaging, plastic film and packaging parts out of the reach

of children.

- Keep detergents and care products out of the reach of children. Caused by detergents containing solvents, e.g. stain

remover/items of washing pretreated with solvent naphtha may result in an explosion after being loaded into the washing machine. Before hand thoroughly rinse items of washing by hand.

- Washing machine door may become very hot. Caution when draining hot detergent solution.
- Do not climb on the washing machine.
- Do not lean on the open washing machine door.
- Do not touch the drum in case it is still spinning.

# Important information

#### Protecting the washing and the machine

- Empty pockets.
- Remove metal parts (paper clips, etc.).
- Wash delicates in the net/bag (tights, curtains, underwired bras).
- Close zips, button up covers.
- Brush sand out of pockets and collars.
- Remove curtain fittings or include in the net/bag.

# i

#### Before washing for the first time,

Do not put any washing in the washing machine! Turn on the tap, fill the appliance with approx.1 litre of water and then pour  $\frac{1}{2}$  measuring cup of detergent into dispenser II. Set the **Easy-Care** 2 60 °C programme and select **Start**/Pause 4. At the end of the programme set the programme selector to **Off**.

#### Washing with different degrees of soiling

	Wash new items separately.
L <b>i</b> ght	Do not prewash.
	If required, pretreat stains. Select Wash Plus 🗑 additional function.
heavy	Load less washing. Prewash.
	If required, pretreat stains. Select <b>Wash Plus</b> 🗑 additional function.

#### Soaking Load washing of the same colour

Pour soaking agent/detergent into dispenser II according to the manufacturer's instructions. Set **Cottons** at **30 °C** programme and select **Start/**Pause t. After approx. 10 minutes select **Start/Pause** t. After the required soaking time reselect **Start/Pause** t, if the programme is to be continued or change the programme.

#### Starching Laundry must not be treated with fabric softener

Starching is possible in all wash programmes if liquid starch is used. Add starch to the fabric softener compartment  $\otimes$  in accordance with the manufacturer's instructions.

Dye in small quantities only. Salt can corrode stainless steel.

Observe the dye manufacturer's specifications. Do not bleach laundry in the washing machine.

#### Insert for liquid detergent

#### depending on model

Position insert for dispensing liquid detergent:

- Completely remove the detergent drawer -> Page 8.
- Push insert forwards.

Do not use insert (push up):

- for gelatinous detergents and washing powders;
- for programmes with **Prewash**.

#### Emergency release, e.g. in the event of a power failure

Programme continues running when the power has been restored. However, if the washing is to be removed, the door can be opened by actuating the emergency release.

Risk of scalding!

The detergent solution and washing may be hot. If required, leave it to cool down.

Keep hands clear of the drum if it is still rotating.

Do not open the door if water can be seen through the glass.

- Turn the programme selector to **Off** and disconnect it from the power supply.
- Drain the water -> Page 9.
- Pull the emergency release with a tool, the door can then be opened.

## Care

Risk of electric shock!
 Pull out the mains plug!
 Risk of explosion! No solvents!

#### Machine housing, control panel

- Wipe with a soft, damp cloth.
- Do not use any abrasive cloths, sponges or cleaning agents (stainless-steel cleaner).
- Immediately remove washing and cleaning agent residue.
- Do not clean the appliance with a water jet.

#### Clean the detergent drawer ...

- ... if it contains detergent or fabric softener residue.
- 1. Pull out, depress insert, completely remove. Remove insert: Press insert upwards with finger.

- 3. Attach insert and engage (connect cylinder to guide pin).
- 4. Insert detergent drawer.

Leave detergent drawer open so that residual water can evaporate.

#### Drum

Leave washing machine door open so that the drum can dry out.

Rust stains – use chlorine-free cleaning agent, not steel wool.

• Descaling No washing in the machine!

Not necessary if detergent dispensed correctly. However, follow the instructions of the descaler manufacturer.

# Information about the indicator lights

depending on model

A signal sounds and the spin speed indicator lamps and the status displays flash:

## Maintenance

Risk of scalding!Allow deterhgent solution to cool down!Turn off the tap!

#### Detergent solution pump

Set programme selector to Off, pull out the mains plug.

- Take the drainage hose out of the retainer. Remove the sealing cap, allow the detergent solution to flow out. Push the sealing cap back on.
- 2. Carefully unscrew the pump cover (residual water).

- 3. Clean the interior, pump cover thread and pump housing (fan impeller in the detergent solution pump must rotate).
- 4. Re-insert pump cover and screw on tight, handle is upright. Insert the drain hose into the holder.

To prevent unused detergent from flowing into the outlet during the next wash:

Pour 1 litre of water into dispenser II and start the **Drain** by programme.

#### Filter in the water inlet hose

Risk of electric shock! Do not immerse Aqua-Stop safety device in water (contains electric valve).

Release water pressure in the supply hose:

- 1. Turn off the tap!
- 2. Select any programme (except Spin @/Drain 👾).
- 3. Select  $\diamondsuit$  Start/Pause. Leave programme for approx. 40 seconds.
- 4. Set programme selector to Off. Pull out the mains plug.

#### Clean filter:

- 1. Depending on model:
- Remove hose from tap.
  - -Clean filter with small brush.

or

- Remove hose from the rear.
  - -Remove filter with pliers and clean.

## What to do if ...

- Water is running out. Correctly attach/replace drainage hose. - Tighten screw-fitting on the supply hose. Water not flowing in. - ♦ Start/Pause not selected? Detergent not washed - Tap not open? - Filter blocked? Clean filter -> Page 9. in. - Supply hose kinked or jammed? Washing machine door - Safety function active. Wait approx. 2 minutes. - Rinse Hold (Rinse stop = without final spin) selected? -> Page 4. cannot be opened. - Can be opened via emergency release only -> Page 6. Programme does not - ♦ Start/Pause selected?
  - start. Washing machine door closed?

    Detergent solution is not Clean detergent solution pump —> Page 9.
  - drained. Clean outlet pipe and/or drainage hose.

    Water not visible in the drum. Not a fault water below the visible area.
  - Spin result not
    satisfactory.

     Wash small and large items of washing together.
     Reduced Ironing ≥ selected? -> Page 5.
     Too low speed selected? -> Page 3.
- Spin cycle actuated Not a fault unbalanced load detection system adjusts imbalance.
- Dispenser & not Remove the insert. Clean detergent drawer and insert -> Page 8. completely rinsed out.
  - Odour formation in the washing machine.

     Run Cottons 企 90 °C programme without washing. Use standard detergent.
  - Foam is coming out of the detergent drawer.

     Too much detergent used?

    Mix 1 tablespoon of fabric conditioner with ½ litre of water and pour into dispenser II in the detergent drawer.

     Reduce detergent dosage for the next wash cycle.
  - Intense noise formation, vibrations and Secure appliance feet fixed?

    Secure appliance feet -> Installation instructions, Page 5.

    Transportation safety devices removed?
  - cycle. Remove transportation protection devices -> Installation instructions, Page 4.

    Indicator lights do not Power failure?
- function while the appliance is running.

   Fuse tripped? Switch on/replace fuse.
   If the fault occurs repeatedly, call customer service.
   Not a fault unbalanced load detection system adjusts imbalance
  - longer than usual.

    Not a fault unbalance read detection system adjusts imbaland by repeatedly distributing the washing.

    Not a fault foam detection system active a rinse cycle is
    - Not a fault foam detection system active a rinse cycle is started.
  - Detergent residue on the washing.

     Occasionally phosphate-free detergents contain water-insoluble residue.
     Select \* Rinse/Freshen Up or brush the laundry after washing.
- In the pause state ♦ Water level too high. Top up washing is not possible.

  Start/Pause flashes very If required, close door immediately.
- quickly and a signal Select "Start/Pause" to continue the programme. sounds.
- If a fault cannot be rectified or a repair is required:
  - Set programme selector to **Off** and pull out the mains plug.
  - Turn off tap and call customer service -> Installation instructions, Page 7.

# ▲ Safety instructions

- Read and follow the operating and installation instructions and all other information enclosed with the washing machine.
- Retain documents for subsequent use.

Risk of electric shock

- Never pull out the mains plug by tugging the power cord!
- Never insert/pull out the mains plug with damp hands.

Danger to life

Redundant appliances:

- Pull out the mains plug.
- Sever the power cord and discard together with the plug.
- Destroy the lock on the washing machine door.
   This will prevent children from locking themselves in and suffocating.

Risk of suffocation

 Keep packaging, plastic film and packaging parts out of the reach of children.

Risk of poisioning Risk of explosion - Keep detergents and care products out of the reach of children.

 Caused by detergents containing solvents, e.g. stain remover/items of washing pretreated with solvent naphtha may result in an explosion after being loaded into the washing machine. Before hand thoroughly rinse items of washing by hand.

Risk of injury

- Washing machine door may become very hot.

- Caution when draining hot detergent solution.
- Do not climb on the washing machine.
- Do not lean on the open washing machine door.
- Do not touch the drum in case it is still spinning.
