- Carefully read the instruction manual and the information enclosed, and act accordingly. Keep the machine's documentation for future reference.

Risk of electric shock! Never insert/disconnect the mains plug with damp hands.

Safety instructions

Never pull the cable to disconnect the mains plug!

Danger to life! For worn-out appliances:

Disconnect the mains plug.

Sever the mains cable and discard along with the plug.

Destroy the lock on the washing machine door. This will prevent children from locking themselves in and risking their lives.

Danger of suffocation! Risk of poisoning! Risk of explosion!

Risk of injury!

Keep packaging, film and packaging parts out of the reach of children.

Keep detergents and care products out of the reach of children.

Items of laundry pretreated with cleaning agents containing solvents, e.g. stain remover/cleaning solvent may lead to an explosion after being loaded into the washing machine.

Rinse items of laundry thoroughly by hand beforehand.

The washing machine door may become very hot.

Be careful when draining hot detergent solution.

Do not climb onto the washing machine.

 Do not lean on the open washing machine door. Do not reach into the drum if it is still rotating.

Be careful when opening the detergent drawer while the machine is in operation.

Machine housing, control panel

 Remove detergent and cleaning agent residue. Nipe with a soft, damp cloth. Do not wash the machine with a jet of water!

Cleaning the detergent drawer .

... if it contains detergent or fabric softener residues.

3. For models with insert for liquid detergent: Slide the insert upwards and remove it from the back. **4.** Clean the detergent dispenser tray and inserts with water and a brush and dry them.

5. Attach the insert and engage (connect the cylinder to the guide pin). **6.** Push in the detergent drawer.

Leave the washing machine door open so that the drum can dry out. For rust stains, use chlorine-free cleaning agent, not steel wool.

Descaling Ensure there is no laundry in the machine!

This will not be necessary if the correct dosage of detergent is used. If it is, descale the appliance according to the manufacturer's instructions. Descaling products can be acquired on the website or from customer services \longrightarrow Installation

Emergency release (e.g. in the event of a power cut)

The programme continues to run when the power has been restored. However, if the laundry has to be removed, the washing machine door can be opened as follows:

Risk of scalding!

The detergent solution and laundry may be hot. Let it cool. Do not reach into the drum if it is still rotating.

Do not open the washing machine door if water can be seen through the glass.

- 1. Turn the programme selector to **Off** and disconnect the mains plug.
- Drain the detergent solution → page 10.
- **3.** Pull the emergency release downwards with a tool and release. The washing machine door can then be opened.

Information on the display panel depending on model

: 15 Close the washing machine door properly; laundry may be caught. Turn on the (cold water) tap fully, supply hose kinked or trapped;

Clean the filter \rightarrow page 10, water pressure too low.

Childproof lock activated: to deactivate \longrightarrow page 5.

Maintenance

Allow the detergent solution to cool.

Detergent solution pump

Turn the programme selector to **Off** and disconnect

3. For models with a drainage hose: Remove the drainage hose from the retainer and pull it Remove the sealing cap, allow the detergent solution to flow out into the container. Replace

the sealing cap and place the drainage hose in the retainer.

6. Replace the pump cover and screw it tightly. 7. Return the drainage hose (depending on model) and the folding gutter to their start position.

8. Place the service flap back on and close.

To prevent unused detergent from flowing straight into the drain during the next wash: Pour 2 litres of water into compartment | and then start the **Drain** F programme.

Drainage hose at the siphon

Turn the programme selector to **Off** and disconnect the mains plug. 1. Loosen the hose clamp, carefully remove the drainage hose (residual water).

- **2.** Clean the drainage hose and siphon connecting piece.
- **3.** Reattach the drainage hose and secure the connection with the hose clamp.

| Filter in the water supply

Risk of electric shock!

Do not immerse the Aqua-Stop safety device in water (contains an electric valve).

Reduce the water pressure in the supply hose:

- 1. Turn off the tap.
- 2. Select any programme (except Rinse/Spin @ // Drain \). **3.** Choose **D II Start/**Reload. Let the programme run for approximately 40 seconds.
- **4.** Turn the programme selector to **Off**. Disconnect the mains plug. Clean the filter:

	Attach/replace the drainage hose correctly.Tighten the screw connection of the supply hose.
Detergent not dispensed.	 DII Start/Reload not selected? Tap not turned on? Filter blocked? Clean the filter → page 10. Supply hose kinked or trapped?
open.	 Safety function active. Programme stopped? → page 4. Rinse Hold (without final spin) selected? → page 3, 4. Can be opened by emergency release only? → page 9. Door locked after the washing machine is switched off: Switch on the washing machine and wait for 5 seconds.

Important information

1

Protecting the laundry and the machine

- When determining the dosage of all washing powders, additives and cleaning agents, you must follow the manufacturer's instructions..
- Empty all pockets
- Check for metal items (paper-clips, etc.).
- Wash delicates in a laundry bag (tights, curtains, underwired bras).
- Fasten zips, do up any buttons.
- Brush sand out of pockets and collars.
- Remove curtain fittings or place in the laundry bag.

Laundry with varying degrees of soiling

Wash new items of clothing separately.

ht Do not prewash. If required, choose the additional function **SpeedPerfect**

Pre-treat any stains as necessary.

intense wash

Load less laundry. Choose a programme with a prewash.

[O]

Soaking Load laundry of the same colour.

Pour soaking agent/detergent into compartment **II** in accordance with the manufacturer's instructions. Turn the programme selector to **Cottons 念 30 °C** and press **DII Start/**Reload. After approx. 10 minutes, press **DII Start/ Reload** to pause the programme. Once the required soaking time has elapsed, press **DIII Start/**Reload again to continue the programme, or select a different programme.

Starch Laundry should not be treated with fabric softener.

Starching is possible in all wash programmes if liquid starch is used. Pour the starch in accordance with the manufacturer's instructions into fabric softener compartment & (rinse first if necessary).

Dyeing / Bleaching

Dye should only be used in normal household quantities. Salt may damage stainless steel. Always follow the dye manufacturer's instructions. Do **not** use the washing machine for bleaching clothes.

Insert for liquid detergent depending on model

Position the insert for dispensing liquid detergent:

- Remove the detergent drawer completely \longrightarrow page 9
- Slide the insert forwards and click into place.

Do not use the insert (slide upwards): for gel detergents and washing powder, for programmes with **Prewash** $\sqrt{1}$, and end time option.

Refer to the table of consumption values on page 8, and advice and warnings on page 6. Overview of programmes

Robert Bosch Hausgeräte GmbH Carl-Wery Str. 34 81739 Munich / Germany

WAQ283S0GB /...

Safety instructions

- Carefully read the instruction manual and the information enclosed, and act accordingly.
- Keep the machine's documentation for future reference.

Risk of electric shock!

- Never pull the cable to disconnect the mains plug!
- Never insert/disconnect the mains plug with damp hands.

Danger to life!

For worn-out appliances:

- Disconnect the mains plug.
- Sever the mains cable and discard along with the plug.
- Destroy the lock on the washing machine door. This will prevent children from locking themselves in and risking their lives.

Danger of suffocation! Risk of poisoning!

- Keep packaging, film and packaging parts out of the reach of children.
- Keep detergents and care products out of the reach of children. Risk of explosion!
 - Items of laundry pretreated with cleaning agents containing solvents, e.g. stain remover/cleaning solvent may lead to an explosion after being loaded into the washing machine.

Rinse items of laundry thoroughly by hand beforehand.

Risk of injury!

- The washing machine door may become very hot.
- Be careful when draining hot detergent solution.
- Do not climb onto the washing machine.
- Do not lean on the open washing machine door.
- Do not reach into the drum if it is still rotating.
- Be careful when opening the detergent drawer while the machine is in operation.

Consumption values depending on model

Load	Electricity***	Water***	Programme duration***
8 kg	0.37 kWh	681	2 ½ h
8 kg	1.05 kWh	681	2 ¾ h
8 kg	1.15 kWh	681	2 ¾ h
8 kg	2.30 kWh	801	2 ¾ h
3.5 kg	0.64 kWh	551	1 ¾ h
3.5 kg	0.54 kWh	47 I	1 h
2 kg	0.19 kWh	341	3∕₄ h
2 kg	0.10 kWh	391	³⁄₄ h
	8 kg 8 kg 8 kg 8 kg 3.5 kg 3.5 kg 2 kg	8 kg 0.37 kWh 8 kg 1.05 kWh 8 kg 1.15 kWh 8 kg 2.30 kWh 3.5 kg 0.64 kWh 2 kg 0.19 kWh 2 kg 0.10 kWh	8 kg 0.37 kWh 68 l 8 kg 1.05 kWh 68 l 8 kg 1.15 kWh 68 l 8 kg 2.30 kWh 80 l 3.5 kg 0.64 kWh 55 l 3.5 kg 0.54 kWh 47 l 2 kg 0.19 kWh 34 l 2 kg 0.10 kWh 39 l

Programme setting for testing in accordance with valid standard EN60456. Note on comparative tests: For testing the test programmes, wash the specified load using the maximum spin speed.

Programme	Additional function	Load	Annual energy consumption	Annual water consumption
Cottons 40/60 °C	EcoPerfect @**	8/4 kg	179 kWh	8700 l

Programme setting for testing and energy labelling in accordance with EU directive 2010/30/EU with cold water (15 °C). *** The values deviate from the indicated values depending on water pressure, hardness, and inlet temperature, ambient temperature, type, amount and soiling of the laundry, detergent used, fluctuations in the power supply and selected additional functions.

Care and cleaning

Risk of electric shock! Disconnect the mains plug. Risk of explosion! Do not use solvents.

Before the first wash

Do not put laundry in the machine! Turn on the tap. Put into compartment II:

approx. 2 litres of water

detergent (measure according to the manufacturer's instructions for lightly soiled laundry and water hardness)

Turn the programme selector to Cottons (2000) Start/Reload. At the end of the programme, turn the programme selector to **Off**.

Machine housing, control panel

- Remove detergent and cleaning agent residue.
- Wipe with a soft, damp cloth.
- Do not wash the machine with a jet of water!

... if it contains detergent or fabric softener residues.

Cleaning the detergent drawer ...

1. Pull out, press insert down and remove drawer completely.

2. To remove the insert: press upwards from below with your finger.

For models with insert for liquid detergent: Slide the insert upwards and remove it from the back.

Clean the detergent dispenser tray and inserts with water and a brush and dry them.

Attach the insert and engage (connect the cylinder to the guide pin).

6. Push in the detergent drawer.

Leave the detergent drawer open so that any residual water can evaporate.

Drum

Leave the washing machine door open so that the drum can dry out.

For rust stains, use chlorine-free cleaning agent, not steel wool.

Descalina Ensure there is no laundry in the machine!

This will not be necessary if the correct dosage of detergent is used. If it is, descale the appliance according to the manufacturer's instructions. Descaling products can be acquired on the website or from customer services \longrightarrow Installation instructions

Emergency release (e.g. in the event of a power cut)

The programme continues to run when the power has been restored. However, if the laundry has to be removed, the washing machine door can be opened as follows:

Risk of scalding!

The detergent solution and laundry may be hot. Let it cool. Do not reach into the drum if it is still rotating.

Do not open the washing machine door if water can be seen through the glass.

- 1. Turn the programme selector to **Off** and disconnect the mains plug.
- **2.** Drain the detergent solution \longrightarrow page 10.
- **3.** Pull the emergency release downwards with a tool and release. The washing machine door can then be opened.

Information on the display panel depending on model

C: 10	Close the washing machine door properly; laundry may be caught.
E: 17, E: 29	Turn on the (cold water) tap fully, supply hose kinked or trapped; Clean the filter → page 10, water pressure too low.

- F: 18 Detergent solution pump blocked; Clean the detergent solution pump \longrightarrow page 10.
 - Drainage hose / waste pipe blocked; Clean the drainage hose at the siphon → page 10.
 - Heavy foam build-up → page 11, status indicator Wash flashes.
- F: 23 Water in the base tub, appliance leaking. Call customer services!
- 8: 10
 - Open the (hot water) tap fully.
 - Inlet hose kinked/trapped.
 - Water pressure too low. Clean the filter \longrightarrow page 10.
 - Hot water hose not connected; appliance will operate using cold water only. Ignore information, only for first

Childproof lock activated: to deactivate \longrightarrow page 5

Maintenance

Risk of burning! Allow the detergent solution to cool. Turn off the tap.

Detergent solution pump

Turn the programme selector to **Off** and disconnect the mains plug.

- 1. Using a screwdriver or the insert for liquid detergent (depending on model), open and remove the service flap.
- 2. Remove the folding gutter and place a large enough container underneath.
- For models with a drainage hose: Remove the drainage hose from the retainer and pull it from the housing.

Remove the sealing cap, allow the detergent solution to flow out into the container. Replace the sealing cap and place the drainage hose in the retainer.

solution has completely drained out.

- **4.** Carefully unscrew the pump cover (there may be residual water).
- 5. Clean the interior, pump cover thread and pump housing (the impeller in the detergent solution pump must rotate).
- Replace the pump cover and screw it tightly.
- 7. Return the drainage hose (depending on model) and the folding gutter to their start position.
- **8.** Place the service flap back on and close.

To prevent unused detergent from flowing straight into the drain during the next wash: Pour 2 litres of water into compartment **II** and then start the **Drain** F programme.

Drainage hose at the siphon

Turn the programme selector to **Off** and disconnect the mains plug.

- 1. Loosen the hose clamp, carefully remove the drainage hose (residual water).
- 2. Clean the drainage hose and siphon connecting piece.
- 3. Reattach the drainage hose and secure the connection with the hose clamp.

Filter in the water supply

Risk of electric shock!

Do not immerse the Aqua-Stop safety device in water (contains an electric valve).

Reduce the water pressure in the supply hose:

- 1. Turn off the tap.
- 2. Select any programme (except Rinse/Spin @ // Drain F).
- 3. Choose **Slill Start/**Reload. Let the programme run for approximately 40 seconds.
- **4.** Turn the programme selector to **Off**. Disconnect the mains plug. Clean the filter:

What to do if.

VVI	nat to do it	
•	Water is leaking out	Attach/replace the drainage hose correctly.Tighten the screw connection of the supply hose.
•	No water supply. Detergent not dispensed.	 D Start/Reload not selected? Tap not turned on? Filter blocked? Clean the filter → page 10. Supply hose kinked or trapped?
•	The appliance door will not open.	 Safety function active. Programme stopped? → page 4. Rinse Hold (without final spin) selected? → page 3, 4. Can be opened by emergency release only? → page 9. Door locked after the washing machine is switched off: Switch on the washing machine and wait for 5 seconds.
•	The selected programme does not start.	 D Start/Reload or (□) (Ready in) time selected? Washing machine door closed? Childproof lock active? Deactivate → page 5.
•	Detergent solution is not drained.	 Rinse Hold (without final spin) selected? → page 3, 4. Clean the detergent solution pump → page 10. Clean the waste pipe and/or drainage hose.
	No water can be seen in the drum.	- Not a fault. Water remains inside below the visible area.
•	Spin result not satisfactory. Laundry wet/too damp.	 Not a fault. Spin control system has stopped the spin cycle. Uneven distribution o laundry. Distribute large and small items of laundry evenly in the drum. Reduced Ironing ⊇ selected? → page 5. Selected speed too low? → page 5.
•	Programme duration changes suddenly during operation.	 Not a fault. The program time can vary according to the distribution of laundry, with it therefore being possible for the display panel to show adjustments in the duration.
	Spin cycle performed several times.	 Not a fault. The balance control system has detected an imbalance and is attempting to redress this by repeating the spin.
	Residual water in the compartment for care products.	 Not a fault: the action of the care product is not affected. Clean the compartment if necessary → page 9.
	Odour formation in the washing machine.	- Run programme Cottons ☎♀ 90 °C without laundry. Use standard detergent.
	Status display Wash flashing. Appliance has detected a detergent overload.	 Too much detergent used? If foam is escaping from the detergent drawer: mix 1 tablespoon of fabric softene with ½ litre of water and pour into compartment II (not with outdoor or down fabrics). Reduce the detergent dosage for the next wash cycle.
•	Intense noise formation, vibrations and "wandering" during the spin cycle.	 Are the appliance feet fixed? Secure the appliance feet → Installation instructions. Transportation safety devices removed? Remove transportation safety devices → Installation instructions.
•	Display panel/indicator lamps remain turned off while the machine is working.	 Energy-saving mode → page 5. Power cut? Fuses triggered? Reset/change the fuse. If the fault occurs repeatedly, call customer services.
	Programme sequence longer than usual.	 Not a fault. Unbalanced load detection system adjusts imbalance by repeatedly distributing the laundry. Not a fault: foam detection system active; adds an additional rinse cycle.
	Detergent residues on the laundry.	 Occasionally, phosphate-free detergents contain water-insoluble residues. Select WRinse/Spin or brush out the laundry after washing.

- If you cannot correct a fault yourself or if a repair is necessary:

 Turn the programme selector to **Off** and remove the mains plug from the socket.

 Turn off the water supply and call customer services → *Installation instructions*.
