# Intended use

For domestic use only.

Emergency release

For the washing of machine-washable fabrics in a detergent

To be operated with cold mains water and commercially available low foam detergents and care products which are suitable for use in front loaded washer dryer.

- Do not leave children unattended near the washer dryer. Keep pets away from the washer dryer!

The washer dryer is not to be used by children or persons Keep the installation room well ventilated, clean the air inlet not familiar with the operating instructions. Install and operate the washer dryer in a room with a drain.

In order to ensure your safety, you must plug the cable into

a socket which has a reliable earth connection.

re using for the first time  $\rightarrow$  Page 6

The washer dryer was tested before leaving the factory. o remove any water left over from testing procedures, the first cycle should be carried out without any laundry with Fluff Clean  $\textcircled{s}^{\circ}$  programme.  $\rightarrow$  Page 6: **Before using for the first** 

Correct installation according to separate Installation and maintenance instructions.

#### Check the machine

 Never switch on a damaged machine! Inform your customer service!

With dry hands only! Take hold of the plug only!

## Turn on the tap

At the end of the drying programme there is an automatic cleaning fluff process, turn on the water tap even if a drying programme is selected.

#### of Cottons 🕃 90 °C programme without laundry are required to be run at initial setup. **Note**: This operation only needs to be completed once.

#### Provide good ventilation Good ventilation is required to extract air produced

durina drvina.

- Keep the installation room well ventilated.
- Clean the air inlet filter regularly. Do not block the air inlet and/or air outlet.

## Protection of the environment/

 Load the maximum amount of laundry to wash or dry for the particular programme. → Page 7: **Programme overview** Wash normally soiled laundry without prewash.

Select Cottons Eco @ 60°C and additional 

(Intensive) unction to obtain good cleaning results with significantly lower energy consumption

Dose the detergent according to the manufacturer's instructions and water hardness

- If the laundry is then to be dried in the appliance, select the highest selectable spin speed – because the more water that is spun out of the appliance, the less time and energy is required to dry it.

set 15 minutes drying time, then touch **Start**/Reload **DM** button.

## Washing drying preparing/Protecting the laundry and the machine

Important information

 Empty pockets ook out for metal items (paperclips, etc.).

Trousers, knitwear and knitted textiles, e.g. Jersey garments, T-shirts or sweatshirts should Ensure that underwired bras are machine washable.

Wash delicates in a net/bag (tights, curtains, underwired bras).

Fasten zips, do up any buttons.

Brush sand out of pockets and collars.

Remove curtain hooks or place curtains in a net/bag. Use only tumble-dry textiles if you select drying.

Before tumble-drying, handwash items should be spun using the appropriate spin speed. Remove as much water as possible before tumble-drying. Recommended spin speed for cottons is more than 1000 rpm; for easy-care is more than 800 rpm.

- In order to ensure uniform drying, sort the items according to fabric type and degree

Items which require ironing do not have to be ironed immediately after being tumble-dried.

It is a good idea to fold or roll them together for a while, so that any remaining moisture is evenly distributed. To achieve good drying performance, dry quilt covers, terry towels or other large textile

items individually. Terry towels not more than 4 pieces (or 3 kg).

## Before using for the first time

Do not put any laundry in the washer dryer. Turn on the tap, pour ½ measuring cup of detergent into dispenser II. Set the Fluff Clean @ 40 °C programme and select

At the end of the programme, set the programme selector to • Off.

# Laundry with different degrees of soiling

Do not prewash If required, pretreat stains. Select **Cottons Eco** @ programme or (intensive) additional function.

Pour soaking agent/detergent into dispenser II according to the manufacturer's instructions. Set Cottons & 30 °C programme and select Start/Reload DM.

or 🗑 (intensive) additional function.

Load laundry of the same colour

# After approx. 10 minutes, select Start/Reload DM. After the required soaking time, reselect

**Start**/Reload DIII if the programme is to be continued or change the programme. Laundry must not be treated with fabric softener

Load less laundry, Prewash.

Starching is possible in all wash programmes using liquid starch. Pour the starch into the abric softener compartment according to the manufacturer's instructions (if necessary clean

Always follow the dye manufacturer's instructions. **Do not** bleach laundry in the washing

Dye should only be used in normal household quantities. Salt may damage stainless steel.

Start/Reload indicator light goes out and - ☐- or - - - (if ☐ was selected.

when the spinning starts. The programme is paused and the door lock is released. You can remove the laundry.

# Select Start/Reload DII.

Touch **Start**/Reload **D** button to continue the programme. The pause function cannot be activated during drying phase.

Śelect Intensive Dry 🌣 or Gentle Dry 🌣 , touch 🌣 (Dry) option button,

# Safety instructions

 Read and follow the operating and Installation and maintenance instructions and all other information enclosed with the washer dryer. Retain documents for subsequent use.

Switch off the appliance, wait 5 seconds and switch it back on.

If the display appears again, call the customer service.

- Run the **Fluff Clean** ® \* (cold) programme without laundry.

shock

 Never pull out the mains plug by tugging the power cord. Never insert/pull out the mains plug with damp hands.

For worn-out appliances

Pull out the mains plug.

Sever the power cord and discard together with the plug. Destroy the lock on the washer dryer door.

This will prevent children from locking themselves in and risking their lives. Keep packaging, plastic film and packaging parts out of the reach

Risk of poisioning - Keep detergents and care products out of the reach of children. Items of laundry pretreated with cleaning agents containing solvents, e.g. stain remover/cleaning solvents may lead to an explosion after being

loaded into the washer drver. Rinse items of laundry thoroughly by hand before.

Washer dryer door may become very hot. Take care when draining hot detergent solution. Do not climb onto the washer dryer.

Do not lean on the open washer dryer door.

Do not touch the drum in case it is still spinning.

Ensure that the pump cap is screwed on while the machine is running to prevent the escape of water and contact with moving pump parts. If a drying programme was interrupted, the washer dryer and the laundry

may be very hot, select Intensive Dry 🔅 or Gentle Dry 🌣 and set 15 minutes programme to cool down the laundry, then remove the

 ensure suitable power supply. – Air inlet filter blocked? →Installation and maintenance instructions, Page 9: Clean the air inlet filter

- Thick multilayered textiles or textiles with thick fillings – these textiles easily dry on the surface, but not inside. This equalization process may take longer. Please use time drying programs to completely dry these kinds of textiles.

A small amount of water is observed dripping on the dried laundry load when the door is opened.

- Drying time is shortened with a small load. Some residual moisture may remain in the drying system. Opening the door quickly creates a suction effect which pulls moisture from the Open the door slowly. Avoid jerking the door open.

The line voltage of the power supply is too low (below 200 V)

If you cannot correct a fault yourself or a repair is required:

- Turn the programme selector to • Off and pull the mains plug out of the socket. - Turn off the tap and call customer services.

The programme will continue to run when the power is restored. However, if the laundry has to be removed, the washing machine door can be opened as follows:

Risk of scalding.

The detergent solution and laundry may be hot.

If possible, leave it to cool down. Do not open the washer dryer door if water can be seen through the glass.

Set the programme selector to • Off and disconnect the mains plug.

Drain the detergent solution. →Installation and maintenance

instructions, Page 8

 Pull the emergency release with a tool and release. The washer dryer door can then be opened.

**en** Instruction manual

# Your washer dryer

**Congratulations** – You have opted for a modern, high-quality domestic appliance manufactured by BOSCH. The washer dryer is distinguished by its economical use of water and energy. Each appliance which leaves our factory is inspected thoroughly to ensure that it functions properly and is in perfect condition.

For further information about products, accessories, spare parts and services visit our web site: www.bosch-home.com or contact our aftersales service centres.

You can find the contact details for your nearest after-sales service here or in the after-sales service directory (depending on model).

Observe the safety instructions on page 11.

Read these instructions before switching on the washer dryer. Also follow the separate installation instructions.

## Intended use

- For domestic use only.
- For the washing of machine-washable fabrics in a detergent solution.
- To be operated with cold mains water and commercially available low foam detergents and care products which are suitable for use in front loaded washer dryer.

- Do not leave children unattended near the washer dryer.
- Keep pets away from the washer dryer!
- The washer dryer is not to be used by children or persons not familiar with the operating instructions.
- Install and operate the washer dryer in a room with a drain.
- In order to ensure your safety, you must plug the cable into a socket which has a reliable earth connection.

# Preparation

Before using for the first time → Page 6

The washer dryer was tested before leaving the factory. To remove any water left over from testing procedures, the first cycle should be carried out without any laundry with **Fluff Clean** ⊕° programme. → Page 6: **Before using for the first time** 

Correct installation according to separate Installation and maintenance instructions.

# Ø----

#### Check the machine

- Never switch on a damaged machine!
- Inform your customer service!

#### Insert mains plug

With dry hands only!
Take hold of the plug only!

#### Turn on the tap

- At the end of the drying programme there is an automatic cleaning fluff process, turn on the water tap even if a drying programme is selected.
- İ

To achieve the labeling comsumption values, two cycles of Cottons ② 90 °C programme without laundry are required to be run at initial setup.

**Note**: This operation only needs to be completed once.

#### Provide good ventilation

Good ventilation is required to extract air produced during drying.

- Keep the installation room well ventilated.
- Clean the air inlet filter regularly.
- Do not block the air inlet and/or air outlet.

#### Protection of the environment/ Conservation tips

- Load the maximum amount of laundry to wash or dry for the particular programme. →Page 7: Programme overview
- Wash normally soiled laundry without prewash.
- Select Cottons Eco @ 60°C and additional 
   ill (Intensive)
   function to obtain good cleaning results with significantly
   lower energy consumption.
- Dose the detergent according to the manufacturer's instructions and water hardness.
- If the laundry is then to be dried in the appliance, select the highest selectable spin speed – because the more water that is spun out of the appliance, the less time and energy is required to dry it.
- Keep the installation room well ventilated, clean the air inlet filter regularly.
- Installation and maintenance instructions. →Page 9 Please do not dry dripping-wet laundry.

Waste of time and energy!

# Drying

Washing Washing + Drying without interru

#### Display panel/ Option buttons/ Additional functions

#### Programme selector

Start/ Reload

Programme selector for switching the machine on and off and for selecting the programme. Can be rotated in either direction.

Detailed programme overview. →Page 7/8

## ption

ар

## Sort and load the laundry

- Observe the care information provided by the manufacturer.
- Sort according to the information on the care labels.
- Sort according to type, colour, soiling and temperature.
- Remove any foreign objects risk of rusting.
- Do not exceed the maximum load. →Page 7
- If drying programme selected.  $\rightarrow$  Page 4: Sort and load the laundry (drying)
- Observe the instructions in the Important information section.  $\rightarrow$  Page 6
- Load both large and small items of washing.
- Close the washer dryer door. Take care not to trap any items of clothing between the loading door and rubber seal.

## Add detergent and care product

- Add the appropriate dose according to: Amount of washing, soiling, water hardness (ask your water supply company) and manufacturer's instructions.
- Models without insert for liquid detergent: pour liquid detergent into an appropriate dispenser and place in the drum.
- Use commercially available low foam detergents for washer dryer only.
- During operation: close the detergent drawer!

Compartment ⊗: Fabric softener

Compartment I: Detergent for pre-wash

Turn the programme selector to desired washing programme. →Page 7: Programme overview
 Use option buttons and additional functions. →Page 9/10

Set and adjust the programme

All buttons are sensitive and a gentle touch is adequate! If you press and hold the °C (**Temp.**), © (**Finish in**) or © (**Spin**) option buttons, the setting options automatically scroll through.

If washing and drying without interruption is desired (only possible for **Cottons** ②, **Cottons Eco** ②, **Mixed fabrics** ②和, **Easy-Care** ② and **PowerWash 60**' ③):

- Activate drying function Rule for Rule by touching ☼ (**Dry**) button.→Page 10.
- Do not exceed the maximum load for the drying function. → Page 7

Select Start/Reload

 Select maximun selectable spin speed of washing programme to ensure the drying result.

## Sort and load the laundry (drying

Only dry laundry that is labelled with the following care symbols:

- □ = tumble-dry at normal heat setting (Intensive Dry ☼).
- □ = tumble-dry at low heat setting (Gentle Dry ☼).

The following textiles should not be tumble-dried:

- $\boxtimes =$  do not tumble-dry care symbol.
- Woollens or items containing wool. Risk of shrinking!
- Delicate fabric (silk, synthetic net curtain). Risk of creasing!
- Items containing foam rubber or similar material.
- Items which have been treated with flammable solvents, such as stai removers, petrol, paint thinners. Explosion hazard!
- Items still containing hair lacquer or similar substances.
- Dangerous vapours!

Do not exceed the maximum drying load.  $\rightarrow$ Page 7

## Set and adjust the drying programme

Turn the programme selector to Intensive Dry ☼ or Gentle Dry ☼

 →Page 7: Programme overview

Intensive Dry © OH (2) Control of the Control of th

The default drying mode is  $\mathbb{R}_{L} \succeq \mathbb{I}$ , in this mode the drying time automatically adjusted to the load amount to obtain cupboard dri laundry ready to fold and stack in the cupboard. You can chang the drying mode to  $\mathbb{R}_{L} \succeq \mathbb{I}$  in order to obtain extra dry laundry, of time dry and define the drying time by touching the  $(\mathbf{Dry})$  but to estimate or select drying duration.  $\rightarrow Page 8$ : **Drying table** 

i Al

All buttons are sensitive and a gentle touch is adequated if you press and hold the **Finish in** ① option buttons, the setting options automatically scroll through.

Select Start/Reload

... Washing/Washing + Drying

3

4

# **玉**

3

# Removing laundry

Open washer dryer door and remove laundry.

Leave the washer dryer door and detergent drawer open so that any residual water can evaporate!

## Turn off the tap

Not required for Aqua-Stop models.  $\longrightarrow$  Installation maintenance instructions, Page 9

#### Switch off

Set programme selector to • Off.

## Programme ended when ...

... Start/Reload indicator light goes out and -  $\[ \Box \]$  - or - - - - (if  $\[ \Box \]$  was selected, no final spin/drain) appears on the display field, the buzzer sounds. Set volume of buzzer.  $\[ \rightarrow \]$  Page 10

If 

was selected, and - - - - is displayed, touch the **Start**/Reload 

button.

The programme continues with draining the water and spinning the laundry

(the default spin speed can be changed in advance).

- If you only want to drain the water, touch the Start/Reload D

 □ button again
 when the spinning starts. The programme is paused and the door lock is
 released. You can remove the laundry.

If  $h \cap h$  flashes on the display field before the end of a drying programme  $\rightarrow$  high drum temperature. Cool-down programme is running until drum is cooled down.  $\rightarrow Page \ 11$ : **Information on the display** 

## Change the programme ...

If you have selected the wrong programme by mistake:

Reselect the washing/drying programme.

If required, adjust the programme setting and/or select additional functions.
 →Page 9/10

Select Start/Reload D. II.

#### Pause the programme ...

- Touch the Start/Reload DI button.

- Follow the instructions in the display field: when **②** lights up and **③** F **⑤** appears in the display, the door can be opened. If required, add/remove a laundry item; If **⑥ ⑤** and **⑥ ⑥ ⑥** are displayed alternately, the door cannot be opened due to a high water level in drum or a high temperature.
- Touch **Start**/Reload **D** button to continue the programme.
- The pause function cannot be activated during drying phase.

## ... or terminate the programme

Washing programmes with high temperature:

- Cool down laundry: Select **Řinse**/Śpin₩/⑤, touch **Start**/Reload D**W**. Washing programmes at lower temperature:

- Select Rinse/Spin w/ ©, touch Start/Reload D. ..

Drying programme:

 Select Intensive Dry ☼ or Gentle Dry ☼ , touch ☼ (Dry) option button, set 15 minutes drying time, then touch Start/Reload DIII button.

# Important information

#### Washing drying preparing/Protecting the laundry and the machine

Empty pockets.

- Look out for metal items (paperclips, etc.).

- Trousers, knitwear and knitted textiles, e.g. Jersey garments, T-shirts or sweatshirts should be turned inside out.
- Ensure that underwired bras are machine washable.
- Wash delicates in a net/bag (tights, curtains, underwired bras).

Fasten zips, do up any buttons.

- Brush sand out of pockets and collars.

- Remove curtain hooks or place curtains in a net/bag.

Use only tumble-dry textiles if you select drying.

- Before tumble-drying, handwash items should be spun using the appropriate spin speed.

 Remove as much water as possible before tumble-drying. Recommended spin speed for cottons is more than 1000 rpm; for easy-care is more than 800 rpm.

In order to ensure uniform drying, sort the items according to fabric type and degree
of drying required.

Items which require ironing do not have to be ironed immediately after being tumble-dried.
 It is a good idea to fold or roll them together for a while, so that any remaining moisture is evenly distributed.

 To achieve good drying performance, dry quilt covers, terry towels or other large textile items individually. Terry towels not more than 4 pieces (or 3 kg).

#### Before using for the first time

Do not put any laundry in the washer dryer. Turn on the tap, pour ½ measuring cup of detergent into dispenser II. Set the **Fluff Clean ® 40 °C** programme and select **Start/**Reload **\)**.

At the end of the programme, set the programme selector to • Off.

#### Laundry with different degrees of soiling

Wash new items separately.

Heavy ••••

Do not prewash.

If required, pretreat stains. Select **Cottons Eco** @ programme or **@ (intensive)** additional function.

Load less laundry. Prewash.

If required, pretréat stains. Select **Cottons Eco** @ programme or  $\cong$  (**intensive**) additional function.

#### Soaking

Load laundry of the same colour

Pour soaking agent/detergent into dispenser II according to the manufacturer's instructions. Set Cottons (2 30 °C) programme and select Start/Reload DII.

After approx. 10 minutes, select Start/Reload DM. After the required soaking time, reselect Start/Reload DM if the programme is to be continued or change the programme.

#### Starching

#### Laundry must not be treated with fabric softener

Starching is possible in all wash programmes using liquid starch. Pour the starch into the fabric softener compartment according to the manufacturer's instructions (if necessary clean it first).

#### Dyeing/bleaching

Dye should only be used in normal household quantities. Salt may damage stainless steel. Always follow the dye manufacturer's instructions. **Do not** bleach laundry in the washing machine.

- $\mathbb{E}: \mathbb{R}^*: Information on the display. \longrightarrow Page 11$

#### Option buttons

You can change the spin speed and temperature even while the selected programme is running. The effects depend on the progress of the programme.

#### °C Temp

You can change the indicated washing temperature. The maximum washing temperature which can be selected depends on the programme that has been chosen.  $\rightarrow$  Page 7

# Additional functions and Individual settings

#### ( Finish in

When you select a programme, the respective programme duration is displayed. You can delay the start of the programme before it begins. The finish-in time indicates when the programme will be finished. It can be set in hour increments up to a maximum of 24 h.

Press and hold the **Finish in** () button until the required number of hours is shown (h=hour). Select **Start**/Reload DM, the door is locked.

#### © Spin speed

You can change the indicated spin speed. The maximum spin speed which can be selected depends on the chosen programme. If  $\Box$  is selected, the load is held in the rinsing water.

#### **♡ Drv**

You can activate, deactivate and set the drying function by touching this option button. Mode of washing and drying without interruption is auto dry only; when single drying programme is selected, you can choose auto dry, or time dry with desired drying time.  $\rightarrow$  Page 8

Additional functions	See also <b>Programme overview</b> → Page 7
<b>Ů</b> Prewash	For heavily soiled laundry. Prewash at max. 30°C.
Rinse plus	Additional rinse cycle. Prolonged programme duration. For areas with very soft water or for further improving the washing result.
<u>△</u> Less Iron	Special spin sequence with subsequent fluffing. Gentle final spin – residual moisture in the laundry increased slightly.
	Extends the washing time for a more intensive washing of heavily soiled items.

#### Start/Reload DM

For starting or pausing the washing/drying programme.

#### Signal volume (for button signal and information signal)

\*If required, set repeatedly

#### Childproof lock -o Programme will not be changed by accidental operation.

To activate the childproof lock:

- After the programme starts or finish in time being activated  $\rightarrow$  Page 10, press and hold the Finish in (b) button for 5 seconds.;
- Release when the →o symbol lights up. If button signal is on, an acoustic signal will be heard.
   When the programme ends, the Start/Reload DII indicator remains on to remind you to deactivate the childproof lock.

To deactivate the childproof lock:

- Touch the **Finish in** (button until the -o symbol turns off.
- Release the button.

#### ⇒o symbol flashes if the programme has been changed while childproof lock is activated. If the childproof lock is deactivated while the programme selector is in a different position from when the childproof lock was activated, the running programme will be halted.

# Information on the display

Flashing (no water supply):

Inlet filter blocked? Clean filter. →

Tap turned on?

Please close the door immediately because of rising water level. In pause status Fill and IP Ell are displayed alternately. Door is locked for safety reasons (water level and/or temperature are too high). For washing programme: In pause status, ASS and PASS are displayed alternately. If you need to open the door, wait for the temperature to drop or drain the water (e.g. select Rinse/Spin w/o or Drain \ programme).

For **drying programme**: If you need to open the door, wait for the temperature to drop or set drying programme for 15 minutes to cool down the laundry.

- If R:02 is frequently indicated when the drying programme ends:

   Clean the air inlet filter. → Installation and maintenance instructions, Page 9
- Run the **Fluff Clean ® \*** (cold) programme without laundry.
- Door cannot be locked/unlocked due to high temperature of the door lock. Keep the machine switched on for about 1 minute. Then the machine can be locked/ unlocked again.

On (low water pressure):

Only information. No influence on the

programme process. The programme

- Door cannot be opened due to the high temperature after the drying programme. The cooling down process will continue until this display disappears and the door can be opened.
- Installation and maintenance instructions, Page 8 duration will be prolonged. Supply hose kinked or blocked? Clean drain pump. → Installation and maintenance instructions, Page 8;
- outlet pipe/drainage hose blocked. Hold down the (Dry) button for 3 seconds to clear this display.
- Clean the air inlet filter. →Installation and maintenance instructions, Page 9 Run the Fluff Clean ® ♣ (cold) programme without laundry.

Switch off the appliance, wait 5 seconds and switch it back on. other displays If the display appears again, call the customer service.

# Safety instructions

- Read and follow the operating and Installation and maintenance instructions and all other information enclosed with the washer dryer.
- Retain documents for subsequent use.

Risk of explosion

Risk of injury

Risk of electric Never pull out the mains plug by tugging the power cord. shock Never insert/pull out the mains plug with damp hands.

For worn-out appliances:

 Pull out the mains plug. - Sever the power cord and discard together with the plug. Risk of death

Destroy the lock on the washer dryer door.

This will prevent children from locking themselves in and risking their lives. Keep packaging, plastic film and packaging parts out of the reach

Risk of suffocation of children. Risk of poisioning

Keep detergents and care products out of the reach of children.

- Items of laundry pretreated with cleaning agents containing solvents, e.g. stain remover/cleaning solvents may lead to an explosion after being loaded into the washer dryer.

Rinse items of laundry thoroughly by hand before. Washer dryer door may become very hot.

Take care when draining hot detergent solution.

Do not climb onto the washer dryer.

 Do not lean on the open washer dryer door. Do not touch the drum in case it is still spinning.

- Ensure that the pump cap is screwed on while the machine is running to prevent the escape of water and contact with moving pump parts.

 If a drying programme was interrupted, the washer dryer and the laundry may be very hot, select Intensive Dry or Gentle Dry or and set 15 minutes programme to cool down the laundry, then remove the laundry.

# What to do if ...

- According to the air cooling principle, higher environment Drying duration extended. temperature will result in poor drying performance, so the drying duration will be extended. Ensure a good ventilation to remove exhaust heat.
  - Air inlet filter blocked? → Installation and maintenance instructions, Page 9: Clean the air inlet filter
  - Run the **Fluff Clean** ®° **※** (cold) programme without laundry to remove fluff accumulated in the tub and drying system.
- Drying programme does not Drying programme not selected? → Page 10: **Dry** ⊗ option button and Page 7: Programme overview
  - Loading door not closed properly?
  - Pump is blocked? →Installation and maintenance instructions, Page 8: Clean the drain pump
- The drying result is not satisfactory (laundry is not dry enough).
- Too high environmental temperature (above 30 °C) or bad ventilation of the room, where the washer dryer is placed ensure good ventilation to remove exhaust heat.
- The laundry has not been spun well enough before drying always set the highest selectable spin speed for all washing
- Machine overload: please follow the load recommendation in the progamme table and load display, do not overload machine, because of maximum load amount for drying is lower than for washing unload the machine after washing with maximum load for washing and separate the load into two drying cycles.
- The line voltage of the power supply is too low (below 200 V) - ensure suitable power supply.
- Air inlet filter blocked? →Installation and maintenance instructions, Page 9: Clean the air inlet filter
- Thick multilayered textiles or textiles with thick fillings these textiles easily dry on the surface, but not inside. This equalization process may take longer. Please use time drying programs to completely dry these kinds of textiles.
- A small amount of water is observed dripping on the dried laundry load when the door is opened.
- Drying time is shortened with a small load. Some residual moisture may remain in the drying system. Opening the door quickly creates a suction effect which pulls moisture from the drying system. - Open the door slowly. Avoid jerking the door open.
- If you cannot correct a fault yourself or a repair is required:
- Turn the programme selector to Off and pull the mains plug out of the socket.
- Turn off the tap and call customer services.

## Emergency release e.g. in the event of power failure

The programme will continue to run when the power is restored. However, if the laundry has to be removed, the washing machine door can be opened as follows:

Risk of scalding. The detergent solution and laundry may be hot. If possible, leave it to cool down.

Do not open the washer dryer door if water can be seen through the glass.

- Set the programme selector to Off and disconnect the mains plug.
- Drain the detergent solution. →Installation and maintenance instructions, Page 8
- Pull the emergency release with a tool and release. The washer dryer door can then be opened.
