Please keep this instruction manual. When passing the vacuum cleaner on to a third party, please also pass on this instruction manual.

Intended use

This vacuum cleaner is intended for domestic use and not for commercial use. Only use this vacuum cleaner in accordance with the instructions in this instruction manual. The manufacturer will not accept any responsibility for damage caused by improper use or incorrect operation.

Therefore, please note the following points.

The vacuum cleaner must only be operated with:

- Original replacement parts, accessories or special accessories

In order to prevent injuries and damage, the vacuum cleaner must not be used for:

- Vacuum-cleaning persons or animals
- Vacuuming up:
 - insects or spiders.
 - hazardous, sharp-edged, hot or glowing substances.
 - damp or liquid substances.
 - highly flammable or explosive substances and gases.
 - ash, soot from tiled stoves and central heating systems.
 - toner dust from printers and copiers.

en

Safety information

This vacuum cleaner complies with the recognised rules of technology and the relevant safety regulations.

- The appliance may be used by children over the age of 8 years and by persons with reduced physical, sensory or mental capacity or by persons with a lack of experience or knowledge if they are supervised or have been instructed on the safe use of the appliance and the have understood the potential dangers of using the appliance.
- Children must never play with the appliance.
- Cleaning and user maintenance must never be carried out by children without supervision.
- Plastic bags and films must be kept out of the reach of children before disposal. => Risk of suffocation.

Proper use

- Only connect and use the vacuum cleaner in accordance with the specifications on the rating plate.
- Never vacuum without the dust bag or dust container, motor protection or exhaust filter.
=> This may damage the vacuum cleaner.
- Do not vacuum close to the head when using a nozzle and tube. => This could cause injury!
- When vacuuming stairs, the appliance must always be positioned below the user.
- Do not use the power cord or the hose to carry or transport the vacuum cleaner.
- For safety reasons, if this appliance's mains power cable becomes damaged, it must be replaced by the manufacturer, their after-sales service department or a similarly qualified person.
- Fully extend the power cord when using the vacuum cleaner continuously for several hours.

en

- When disconnecting the appliance from the mains, pull on the plug itself to remove it; do not pull on the power cord.
- Do not pull the power cord over sharp edges or allow it to become trapped.
- Pull out the mains plug before carrying out any work on the vacuum cleaner.
- Do not operate the vacuum cleaner if it is damaged. Unplug the appliance from the mains if a fault is detected.
- For safety reasons, only authorised after-sales service personnel are permitted to carry out repairs and fit replacement parts to the vacuum cleaner.
- Protect the vacuum cleaner from the weather, moisture and sources of heat.
- Do not pour flammable substances or substances containing alcohol onto the filters (dust bag, motor protection filter, exhaust filter, etc.).
- The vacuum cleaner is not suitable for use on construction sites.
=> Vacuuming up building rubble could damage the appliance.
- Switch off the appliance when it is not in use.
- At the end of its life, the appliance should immediately be rendered unusable, then disposed of in an appropriate manner.

! Please note

The mains socket must be protected by at least a 16 amp circuit breaker.

If a circuit breaker is tripped when you switch on the vacuum cleaner, this may be because other electrical appliances which have a high current draw are connected to the same power circuit.

To prevent the circuit breaker from tripping, select the lowest power setting before switching the appliance on, and increase the power only once it is running.

en

Disposal information

■ Packaging

The packaging is designed to protect the vacuum cleaner from being damaged during transportation. It is made of environmentally friendly materials and can therefore be recycled. Dispose of packaging that is no longer required at an appropriate recycling point.

■ Old appliance

Old appliances still contain many valuable materials. Therefore, please take appliances that have reached the end of their service life to your retailer or recycling centre so that they can be recycled. For current disposal methods, please enquire at a retailer or your local council.

■ Disposal of filters and dust bags

Filters and dust bags are manufactured from environmentally friendly materials. Provided they do not contain substances that are not permitted in household waste, you can dispose of them with your normal household waste.

*Dependent on model purchased

Optional accessories / Replacement parts

Replacement filter pack BBZ41FP

Contains: 4 replacement filters with lock
1 micro-hygiene filter

<http://www.dust-bag-bosch.com>

HEPA filter

Replacement part no.: 650 305

Recommended for allergy sufferers.
Ensures very clean exhaust air.

Motor protecting filter

Replacement part no.: 618 907

Protects the motor in your vacuum cleaner
and thus increases its service life.
Replace once a year.

Optional accessories / Replacement parts

TURBO-UNIVERSAL® brush BBZ102TBB

All in one brushing and vacuuming of short-pile pile rugs and carpets and all hard floor coverings. Especially suitable for picking up pet hair. The brush roller is driven by the air flow through the vacuum cleaner. No separate electrical connection is needed.

Hard-floor brush BBZ123HD

For vacuuming hard floors (parquet flooring, tiles, laminate, etc.)

TURBO-UNIVERSAL® brush for upholstery BBZ42TB

All in one brushing and vacuuming of upholstered furniture, mattresses, car seats, etc. Especially suitable for picking up pet hair. The brush roller is driven by the suction air flow of the vacuum cleaner. No separate electrical connection is needed.

Setting up

en

Congratulations on your purchase of a Bosch BSG8 vacuum cleaner. This instruction manual describes various BSG8 models, which means that some of the equipment features and functions described may not be available on your model.

You should only use original Bosch accessories, which have been specially developed for your vacuum cleaner to achieve the best possible vacuuming results.

Insert the flexible hose adapter into the air intake opening and allow it to engage.

Push the handle straight into the telescopic tube until it engages.

Push the telescopic tube straight into the connecting piece of the floor tool until it engages.

Setting up**en**

Press the adjusting sleeve in the direction of the arrow and adjust the telescopic tube to the length required.

Holding the power cord by the plug, pull out the required length and plug the plug into the mains socket.

To switch your vacuum cleaner on and off, press the On/Off button in the direction of the arrow.

Vacuuming

en

You have bought an extremely powerful device. The highest suction setting is therefore only recommended for heavily soiled, short-pile carpets and hard floors.

The required suction power can be selected by adjusting the suction regulator.

- Low
suction range: 
For vacuuming delicate fabrics, e.g. curtains.
- Moderate
suction range: 
For daily vacuuming of lightly soiled floors.
- High
suction range: 
For vacuuming durable floor coverings, hard floors and for heavily soiled surfaces.
- Turbo range: turbo
For vacuuming stubborn dirt and very heavily soiled surfaces.

Vacuuming

en

Adjusting the floor tool:

For vacuuming rugs and carpets => 

For vacuuming hard floors => 

Caution!

Floor tools are subject to a certain amount of wear, depending on the type of hard floors you have (e.g. rough, rustic tiles). Therefore, you must check the underside of the floor tool at regular intervals. Worn undersides of floor tools may have sharp edges that can damage sensitive hard floors, such as parquet or linoleum. The manufacturer does not accept any responsibility for damage caused by worn floor tools.

Vacuuming with accessories

Remove the accessory from the case and attach to the handle or suction pipe.

Professional crevice nozzle

Extra long crevice nozzle for cleaning crevices, corners and narrow spaces, e.g. in a car.

Professional furniture brush

For large-surface vacuuming of furniture requiring particular care, picture frames, books, etc.

Vacuuming

en

Professional upholstery nozzle

- For gently and thoroughly cleaning upholstered furniture, curtains, etc.
- To clean the professional upholstery nozzle, simply vacuum using the handle.
- If it is very dirty, the professional upholstery nozzle can also be opened. To do this, turn the two screws on the sides of the nozzle (e.g. using a coin) and remove the inner part from the nozzle. After cleaning, replace the inner part (make sure it is correctly seated) and screw to the housing.

After use, the professional accessories can again be conveniently stowed in the accessories case.

You can use the parking aid on the back of the vacuum cleaner if you wish to stop vacuuming for a short time. Slide the plastic lug on the tool connector into the groove at the back of the vacuum cleaner.

When the work is done

en

- Switch the vacuum cleaner off and unplug the power cord from the mains.
- Tug the power cord and let go. The cable then rewinds automatically.
- To reactivate or deactivate the cable brake, quickly tug the power cord.

To store or transport the vacuum cleaner, use the storage aid on the underside of the vacuum cleaner. Stand the vacuum cleaner up on its end. Slide the plastic lug on the floor tool into the groove on the underside of the unit.

To remove the flexible hose, press the two lugs together and pull the tube out.

When the work is done**en**

To release the connection, squeeze the collar sleeve and pull the handle out.

To release the connection, squeeze the locking collar and pull the telescopic tube out.

Changing the dust bag and filters

en

Replacing the dust bag

■ If the dust bag change indicator lights up brightly and evenly when the floor tool is lifted from the carpet and the highest suction power is selected, the dust bag must be changed, even though it may not yet be full. In this case it is essential to change the dust bag due to the type of material it contains.

■ Open the dust bag compartment lid by moving the dust compartment locking lever in the direction of the arrow.

Changing the dust bag and filters

en

Seal the dust bag by pulling the self-seal tap and then remove it.

Insert a new dust bag into the holder and close the dust bag compartment lid.

! Caution: the dust bag compartment lid will only close when the disposable or textile filter are inserted. If the dust bag change indicator is still lit after the dust bag has been changed, please check whether the nozzle, tube or flexible hose are blocked.

Changing the dust bag and filters

en

Cleaning the motor protection filter

The motor protection filter should be cleaned regularly by knocking out the dirt and rinsing.

- Open the dust bag compartment lid.
- Pull out the motor protection filter in the direction of the arrow.
- Clean the motor protection filter by tapping it.
- If it is very dirty, the motor protection filter should be rinsed.
The filter must then be left to dry for at least 24 hours.
- After cleaning, insert the motor protection filter into the appliance as far as it will go and close the dust bag compartment lid.

You can order new filters from our after-sales service using the following replacement part number: 618 907

Changing the dust bag and filters

en

Rinsing the Hepa filter

The Hepa filter is designed so that it does not need to be replaced if the appliance is used as intended for household cleaning. To ensure that the vacuum cleaner keeps working at its optimum performance level, the Hepa filter should be rinsed clean after approx. 1 year. The filtering effect of this filter is maintained, even though the filter surface may become discoloured.

- Open the exhaust grille by pressing the release button.
- Unlock the Hepa filter by pressing the locking tab and remove it from the appliance.

- Tap out the Hepa filter and rinse under running water

Changing the dust bag and filters

en

- Do not re-insert the Hepa filter into the appliance until it has completely dried and then close the exhaust filter compartment.

Care

en

Always switch off the vacuum cleaner and disconnect the power cord from the mains before cleaning the vacuum cleaner.

The vacuum cleaner and plastic accessories can be cleaned with a commercial plastic cleaner.

! Do not use a scourer, glass-cleaning agent or all-purpose cleaning product.

Never immerse the vacuum cleaner in water.

The dust compartment can, if necessary, be cleaned with a second vacuum cleaner or simply wiped with a dry cloth or dusting brush.

Subject to technical modifications.

Conditions of guarantee

For this appliance the guarantee conditions as set out by our representatives in the country of sale apply. Details regarding same may be obtained from the dealer from whom the appliance was purchased. For claims under guarantee the sales receipt must be produced.

This appliance is labelled in accordance with European Directive 2012/19/EU concerning used electrical and electronic appliances (waste electrical and electronic equipment - WEEE). The guideline determines the framework for the return and recycling of used appliances as applicable throughout the EU.

Printed on recycled paper.

The design of this product is environmentally friendly.
All plastic parts are marked for recycling.
