Values determined in accordance with EN60456.

\* The observed values may differ from the indicated values due to the influence of water pressure, hardness and inlet temperature, ambient temperature, type, amount and soiling of laundry, detergent used, fluctuations in the power supply and any additional functions selected.

\*\* Programme setting at maximum speed for testing and energy labelling in accordance with Directive 2010/30/EU with cold water (15 °C).  
These programmes are suitable for cleaning normally soiled cotton items and are the most efficient in terms of combined energy and water consumption.  
The stated programme temperature is based on the temperature indicated on the care label for the laundry. The actual washing temperature may differ from the stated programme temperature for energy-saving reasons; the washing performance meets legal requirements.

\*\*\* The stated residual moisture is based on the maximum spin speed and load of each individual programme.
