**Most efficient programs for cotton fabrics**

The following programs (standard programs, indicated by ◻) are suitable for cleaning normally soiled cotton fabrics and are the most efficient with respect to combined energy and water consumption.

| Standard programs for cottons in accordance with the (EU) directive no. 1015/2010                                                                                                                                                                                                                                                                                                                                        |           |                                |

| Programme setting for testing and energy labelling in accordance with directive 2010/30/EU with cold water (15 °C).<br>The specification of the programme temperature is based on the temperature stated on the care label in the textiles. The actual washing temperature may deviate from the stated programme temperature for energy-saving reasons; the washing performance corresponds to the selected temperature. |           |                                |
