* The values may deviate from the indicated values depending on water pressure, water hardness, water inlet temperature, ambient temperature, type of laundry, amount and soiling of laundry, detergent used, fluctuations in the power supply and the selected additional functions.

** Information on residual moisture based on program-dependent spin-speed limit and maximum loads.

Most efficient programmes for cotton fabrics

The following programs (standard programs, indicated by ) are suitable for cleaning normally soiled cotton fabrics and are the most efficient with respect to combined energy and water consumption.

Standard programmes for cottons in accordance with reg- ulation(EU) No. 1015/2010	Load size	Approximate pro- gramme duration
Cottons programme   EcoPerfect 	6 kg	3 ½ h
Cottons programme   EcoPerfect 	3 kg	3 ½ h
Cottons programme   EcoPerfect 	3 kg	3 h
Programme setting for testing and energy labelling in accordance with Directive 2010/30/EU with cold water (15 °C). The specification of the programme temperature is based on the temperature stated on the care label in the textiles. The actual washing temperature may deviate from the stated programme temperature for energy-saving reasons.
