

Tumble dryer WTW87660GB

en Installation and operating instructions

Your new tumble dryer

You have opted for a tumble dryer manufactured by Bosch.

Please take a few minutes to read and become familiar with the advantages of your tumble dryer.

To meet the high quality demands required by Bosch, every tumble dryer that leaves our factory is carefully checked to ensure that it functions correctly and is in perfect condition.

For more information on our products, accessories, replacement parts and services, see our website www.boschhome.com or contact our Customer Service centres.

If the operating and installation instructions describe different models, any differences will be pointed out at the relevant points in the text.

Read these operating and installation instructions before operating the tumble dryer.

Intended use

- This appliance is intended for private domestic use only.
- Do not install or operate this appliance anywhere that is liable to experience frost and/or outdoor conditions. There is a risk that the appliance will be damaged if residual water in it freezes. If hoses freeze up, they may crack/burst.
- This appliance must only be used for drying and freshening up domestic laundry, consisting of items that have been washed with water and are suitable for tumble drying (see label on item). Using the appliance for any other purpose is outside of the scope of its intended application and is forbidden.
- This appliance is intended for use up to a maximum height of 4000 metres above sea level.

Before you switch on the appliance:

Check that there is no visible damage to the appliance. Do not operate the appliance if it is damaged. Should you have any problems, please contact your specialist dealer or our customer service.

Read and follow the operating and installation instructions and all other information provided with this appliance.

Retain the documents for subsequent use or for subsequent owners.

▲ Safety instructions

The following safety information and warnings are provided to protect you from injury and to prevent material damage to your surroundings.

It is nevertheless important to take the necessary precautions and to proceed with care when installing, maintaining, cleaning and operating the appliance.

Children/people/pets

Children and other people who are unable to assess the risks involved when using the appliance may injure themselves or may find themselves in life-threatening situations. Therefore please note:

- The appliance may be used by children over the age of 8 years and by persons with reduced physical, sensory or mental capacity or by persons with a lack of experience or knowledge as long as they are supervised or have received instruction on how to use the appliance safely and they have understood the potential risks of using the appliance.
- Children must not play with this appliance.

- Do not allow children to clean or maintain this appliance unsupervised.
- Keep children under 3 years and pets away from this appliance.
- Do not leave the appliance unattended when children or other people who are unable to assess the risks are in the vicinity.

Children may lock themselves inside appliances and find themselves in a life-threatening situation.

- Do not position the appliance behind a door, as this may obstruct the appliance door or prevent it from opening completely.
- Once an appliance has reached the end of its life, pull the mains plug from the socket **before** severing the mains cable, and then destroy the lock on the appliance door.

⚠ Warning Risk of suffocation!

If allowed to play with the packaging/plastic film or packing components, children may become caught in these or pull them over their heads and suffocate.

Keep packaging, plastic film and packing components away from children.

Detergents and care products may result in poisoning if consumed.

If accidentally swallowed, seek medical advice. Keep detergents and care products out of the reach of children.

⚠ Warning Eye/skin irritation!

Contact with detergents or care products may cause eye/skin irritation.

Rinse eyes/skin thoroughly if they/it come(s) into contact with detergents or care products. Keep detergents and care products out of the reach of children.

Installation

⚠ Warning

Risk of electric shock/fire/ material damage/damage to the appliance!

If the appliance is not installed properly, this may lead to a dangerous situation. Ensure the following:

- The mains voltage on your power socket must match the rated voltage specified on the appliance (identification plate). The connected loads and the required fuse protection are specified on the identification plate.
- The appliance must only be connected to alternating voltage via a protective contact socket that has been correctly installed. This plug socket must be freely accessible at all times.
- The mains plug and the protective contact socket must match and the earthing system must be correctly installed.
- The installation must have an adequate cross section.

- The mains plug must be freely accessible at all times. If this is not possible, in order to comply with the relevant safety regulations, a switch (all pole disconnection) must be built into the permanent installation in accordance with electrical installation regulations.
- If using a residual current circuit breaker, only use one that bears the following mark: ☒. The presence of this mark is the only way to be sure that it fulfils all the applicable regulations.

⚠ Warning Risk of electric shock/fire/ material damage/damage to the appliance!

If the appliance's mains cable is altered or damaged, this may result in electric shock, short circuiting or fire due to overheating.

The mains cable must not be kinked, crushed or altered, and must not come into contact with any heat sources.

The use of extension cords or power strips may result in fire due to overheating or short circuiting.

Connect the appliance directly to an earthed socket that has been correctly installed. Do not use extension cords, power strips or multi-way couplers.

- The appliance may vibrate or move when in operation, potentially resulting in injury or material damage.

 Place the appliance on a clean, even, solid surface and, using a spirit level to guide you, level it with the screw-in feet.
- Incorrectly placing (stacking) this appliance on top of a washing machine may result in injury, material damage and/or damage to the appliance. If this appliance is to be placed on top of a washing machine, the washing machine must be of at least the same depth and width as the appliance, and it must be secured in place with the appropriate connection set if available. \rightarrow Page 18 The appliance MUST be secured with this connection set. Stacking the appliance in any other way is forbidden.

If you take hold of any of the appliance's protruding parts (e.g. the appliance door) in order to lift or move it, these parts may break off and cause injury. Do not take hold of any of the appliance's protruding parts in order to move the appliance.

- The appliance is very heavy. Lifting it may result in injury. Do not lift the appliance on your own.
- The appliance has sharp edges on which you could cut your hands.
 Do not take hold of the appliance by its sharp edges. Wear protective gloves to lift it.
- If the hoses and mains cables are not correctly routed, they may constitute a tripping hazard, which may result in injury.
 Route hoses and cables such that they do not constitute a tripping hazard.

Operation

⚠ Warning Risk of explosions/fire!

Laundry that has come into contact with solvents, oil, wax, wax remover, paint, grease or stain remover may ignite when dried in the machine, or even cause the appliance to explode. Therefore please note:

- Rinse the laundry thoroughly with warm water and detergent before drying it in the machine.
- Do not place laundry in this appliance to be dried if the laundry has not been washed first.
- Do not use the appliance if industrial chemicals have been used to clean the laundry.

⚠ Warning Risk of explosions/fire!

- If there is any residual material left in the fluff filter, this may ignite when drying is in progress, or even cause the appliance to catch fire or explode.
 - Clean the fluff filter regularly.
- Certain objects may ignite when drying is in progress, or even cause the appliance to catch fire or explode.
 Remove any lighters or matches from pockets on items of clothing.
- If there is coal dust or flour in the air around the appliance, this may cause an explosion. Make sure that the area around the appliance is kept clean when it is in operation.

⚠ Warning

Risk of fire/material damage/damage to the appliance!

The appliance contains R290, a refrigerant that is environmentally friendly but flammable.

Keep open fire and ignition sources away from the appliance.

Marning

Risk of fire/material damage/damage to the appliance!

If a program is terminated before the drying cycle has finished, this prevents the laundry from cooling down sufficiently and may cause the laundry to ignite, or may result in material damage or damage to the appliance.

- During the last part of the drying cycle, the laundry in the drum is not heated (cooling cycle). This is to ensure that it remains at a temperature at which it will not be damaged.
- Do not switch off the appliance before the drying cycle has finished unless you remove all items of laundry from the drum immediately and spread them out (to dissipate the heat).

Condensation water is not suitable for drinking and may be contaminated with lint. Contaminated condensation water may be hazardous to health and may cause material damage.

Do not drink or reuse.

Poisonous fumes may be given off by cleaning agents that contain solvents, e.g. cleaning solvent.

Do not use cleaning agents that contain solvents.

- If you support your weight/sit on the appliance door when it is open, the appliance may tip over, which may result in injury.
 - Do not support your weight on the appliance door when it is open.
- If you climb onto the appliance, the worktop may break, which may result in injury.
 Do not climb onto the appliance.
- If you reach into the drum while it is still rotating, you risk injuring your hands.
 Wait until the drum has stopped rotating.

Caution! Material damage/damage to the appliance

- If the amount of laundry in the appliance exceeds its maximum load capacity, it may not be able to operate properly, or this may result in material damage or damage to the appliance.
 Do not exceed the maximum load capacity of dry laundry. Make sure you comply with the maximum load capacities specified for each of the programs. → Page 25
- If you operate the appliance without a fluff catcher (e.g. fluff filter, fluff depot, depending on appliance specifications), or if the fluff catcher is incomplete or defective, this may result in damage to the appliance. Do not operate the appliance without a fluff catcher, or with a fluff catcher that is incomplete or defective.
- Light objects such as hair and lint may be sucked into the air inlet when the appliance is in operation. Keep these away from the appliance.
- Foam and foam rubber may deform or melt if dried in the appliance.
 Do not dry laundry items that contain foam or foam rubber in the appliance.

- If you pour the wrong quantity of detergent or cleaning agent into the appliance, this may result in material damage or damage to the appliance. Use detergents/care products/cleaning agents and softeners in accordance with the manufacturers' instructions.
- If the appliance overheats, it may not be able to operate properly, or this may result in material damage or damage to the appliance.
 Make sure that the appliance's air inlet is never obstructed when the appliance is in operation, and that the area around the appliance is adequately ventilated.

Cleaning/Maintenance

The appliance is powered by electricity. There is a risk of electric shock if you come into contact with live components. Therefore please note:

- Switch off the appliance. Disconnect the appliance from the power supply (pull out the plug).
- Never take hold of the mains plug with wet hands.
- When removing the mains plug from the socket, always take hold of the plug itself and never the mains cable, otherwise this may damage the mains cable.
- Do not make any technical modifications to the appliance or its features.
- Repairs and any other work on the appliance must only be conducted by our customer service or by an electrician. The same applies for replacing the mains cable (when necessary).
- Spare mains cables can be ordered from our customer service.

appliance!

Poisonous fumes may be given off by cleaning agents that contain solvents, e.g. cleaning solvent.

Do not use cleaning agents that contain solvents.

If moisture penetrates the appliance, this may cause it to short circuit.

Do not use a pressure washer, steam cleaner, hose or spray gun to clean your appliance.

↑ Warning Risk of injury/material damage/damage to the appliance!

The use of spare parts and accessories supplied by other brands is dangerous and may result in injury, material damage or damage to the appliance. For safety reasons, use genuine spare parts and accessories only.

Caution! Material damage/damage to the appliance

Cleaning agents and agents for pretreating laundry (e.g. stain removers, prewash sprays, etc.) may cause damage if they come into contact with the surfaces of the appliance. Therefore please note:

- Do not allow these agents to come into contact with the surfaces of the appliance.
- Clean the appliance with nothing but water and a soft, damp cloth.
- Remove any detergent, spray or other residues immediately.

Energy-saving tips

- Spin the laundry before drying. The drier the laundry, the shorter the programme will be, in turn reducing energy consumption.
- Load the appliance with the maximum loads permitted for the programmes.

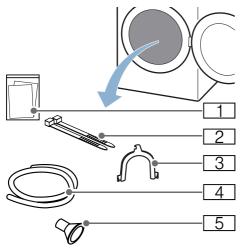

Note: If the maximum load is exceeded, this extends the programme duration and increases energy consumption.

- Operate the appliance in a ventilated room and make sure that the air inlet on the appliance is unobstructed so that air exchange can take place unhindered.
- Regularly remove the fluff from the appliance. If there is fluff in the appliance, this extends the programme duration and increases energy consumption.
- If you do not perform any actions on the appliance for an extended period before the programme starts or once the programme has ended, the appliance will automatically switch to Energy saving mode. The display and indicator lights will go out after a few minutes and DM (Start/Pause) will flash.To end Energy saving mode, all you need to do is perform an action on the appliance, such as opening and closing the door.
- If you do not perform any actions on the appliance for an extended period when it is in Energy saving mode, the appliance will automatically switch itself off.

en

Installing and connecting the appliance

Included with the appliance:

- Accompanying documents (e.g. installation and operating instructions)
- 2 Fastening parts
- 3 U-piece for fixing the drain hose in place
- 4 Drain hose
- 5 Connection adapter

- Remove any packaging and protective covers completely from the appliance.
- **2.** Open the door.
- Remove all the accessories from the drum.

You can now install and connect the appliance.

Caution!

Risk of material damage/damage to the appliance

Objects remaining in the drum that are not designed for operation with the appliance may result in material damage and damage to the appliance. Remove these objects, along with all accessories, from the drum.

Installing the appliance

⚠ Warning Risk of death!

Children may lock themselves inside appliances and find themselves in a lifethreatening situation.

- Do not position the appliance behind a door, as this may obstruct the appliance door or prevent it from opening completely.
- Once an appliance has reached the end of its life, pull the mains plug from the socket **before** severing the mains cable, and then destroy the lock on the appliance door.

If there is coal dust or flour in the air around the appliance, this may cause an explosion.

Make sure that the area around the appliance is kept clean when it is in operation.

A Warning

Risk of fire/material damage/damage to the appliance!

The appliance contains R290, a refrigerant that is environmentally friendly but flammable. Keep open fire and ignition sources away from the appliance.

Warning Risk of injury/material damage/ damage to the appliance!

- The appliance may vibrate or move when in operation, potentially resulting in injury or material damage.
 Place the appliance on a clean.
 - Place the appliance on a clean, even, solid surface and, using a spirit level to guide you, level it with the screw-in feet.
- Incorrectly placing (stacking) this appliance on top of a washing machine may result in injury, material damage and/or damage to the appliance.

If this appliance is to be placed on top of a washing machine, the washing machine must be of at least the same depth and width as the appliance, and it must be secured in place with the appropriate connection set if available.

→ Page 18

The appliance MUST be secured with this connection set. Stacking the appliance in any other way is forbidden.

If you take hold of any of the appliance's protruding parts (e.g. the appliance door) in order to lift or move it, these parts may break off and cause injury.

Do not take hold of any of the appliance's protruding parts in order to move the appliance.

en

⚠ Warning Risk of injury!

- The appliance is very heavy. Lifting it may result in injury.
 Do not lift the appliance on your own.
- The appliance has sharp edges on which you could cut your hands. Do not take hold of the appliance by its sharp edges. Wear protective gloves to lift it.

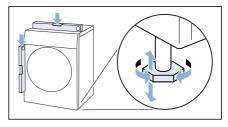

Caution! Material damage/damage to the appliance

If the appliance overheats, it may not be able to operate properly, or this may result in material damage or damage to the appliance.

Make sure that the appliance's air inlet is never obstructed when the appliance is in operation, and that the area around the appliance is adequately ventilated.

Install the appliance as follows:

- 1. Place the appliance on a clean, even, solid surface.
- 2. Check that the appliance is level using a spirit level.

3. If necessary, turn the appliance feet to make sure it is level.

You can now connect the appliance.

Notes

- All appliance feet must stand firmly on the ground.
- If appliances are not installed correctly, this may result in noises, vibrations, uneven drum operation and/or to residual water leaking out of the appliance.

Connecting the appliance

Warning

Risk of electric shock/fire/material damage/damage to the appliance!

If the appliance is not installed properly, this may lead to a dangerous situation. Ensure the following:

- The mains voltage on your power socket must match the rated voltage specified on the appliance (identification plate). The connected loads and the required fuse protection are specified on the identification plate.
- The appliance must only be connected to alternating voltage via a protective contact socket that has been correctly installed. This plug socket must be freely accessible at all times.
- The mains plug and the protective contact socket must match and the earthing system must be correctly installed.
- The installation must have an adequate cross section.
- The mains plug must be freely accessible at all times. If this is not possible, in order to comply with the relevant safety regulations, a switch (all pole disconnection) must be built into the permanent installation in accordance with electrical installation regulations.
- If using a residual current circuit breaker, only use one that bears the following mark:

 The presence of this mark is the only way to be sure that it fulfils all the applicable regulations.

Marning

Risk of electric shock/fire/material damage/damage to the appliance!

If the appliance's mains cable is altered or damaged, this may result in electric shock, short circuiting or fire due to overheating.

The mains cable must not be kinked. crushed or altered, and must not come into contact with any heat sources.

Warning

Risk of fire/material damage/damage to the appliance!

The use of extension cords or power strips may result in fire due to overheating or short circuiting. Connect the appliance directly to an earthed socket that has been correctly installed. Do not use extension cords, power strips or multi-way couplers.

Warning Risk of injury!

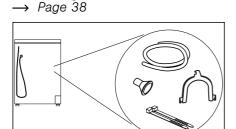

If the hoses and mains cables are not correctly routed, they may constitute a tripping hazard, which may result in injury.

Route hoses and cables such that they do not constitute a tripping hazard.

en

Connect the appliance as follows:

1. Connecting the drain hose.

- 2. Plug the appliance's mains plug into the designated socket.
- 3. Check that the mains plug is in securely.

Your appliance is now ready to use.

Caution!

Risk of material damage/damage to the appliance

The appliance contains refrigerant and may be damaged if it is operated immediately after transportation.

Allow the appliance to rest for two hours before initial use.

Note: If in doubt, have your appliance connected by a qualified professional.

Before using the appliance for the first time

Before you switch on the appliance:

Check that there is no visible damage to the appliance. Do not operate the appliance if it is damaged. Should you have any problems, please contact your specialist dealer or our customer service.

Note: Once the appliance has been properly installed and connected, it is ready to use. No further steps are necessary.

Optional accessories

Order optional accessories* from the after-sales service:

Basket for woollens:

Dry or air individual woollen items, sports shoes and soft toys in the basket for woollens.

Order number: WMZ20600.

Platform:

For easier loading and unloading, raise your dryer with a platform. You can transport laundry with the laundry basket integrated into the platform drawer.

Order number: WMZ20500.

Washer-dryer stack connection kit:

To save space, the dryer can be placed on top of a suitable washing machine of the same width and depth.

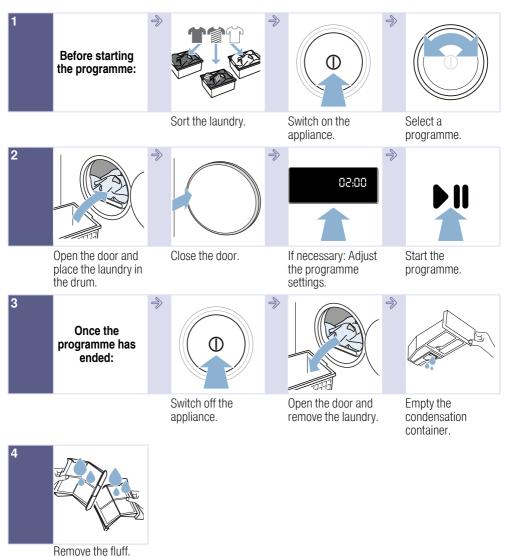

Only this connection kit may be used to secure the dryer to the washing machine.

- Order number with pull-out worktop: WTZ27400
- Order number without pull-out worktop: WTZ27410.

HoŁ	CoolDown	The appliance can reach high temperatures when drying. The CoolDown process reduces the temperature to prevent damage to the laundry when you:
		Pause the programmeCancel the programmeSwitch off the appliance via the app
		The CoolDown process does not start until 30 seconds after pausing/cancelling the programme or switching off the appliance via the app. You can continue to operate the appliance during the CoolDown process.
		Notes
		 The drum continues to rotate during the CoolDown process, even if you have paused the programme. Do not change the programme during the CoolDown process. Temperature regulation can take up to 10 minutes.

Overview of programmes

Programme	Maximum load
Programme name Brief explanation of the programme and the items for which it is suitable.	Maximum load based on the dry weight of the items
Cottons	8 kg
Hard-wearing items and heat-resistant items made of cotton or linen.	
Easy-Care	3.5 kg
Items made of synthetic or blended fabrics.	
Mixed Load	3 kg
Mixed load consisting of items made from cotton and synthetic fabrics.	
Delicates Delicate, washable items, e.g. made from satin, or synthetic or blended fabrics.	2 kg
Wool Finish Machine-washable items made of wool or containing wool. Notes Laundry becomes fluffier but not dry. Remove laundry once the programme has ended and allow to dry.	0.5 kg
Time Progr. cold	3 kg
Timed programme for all types of fabric except for wool and silk.	
For freshening up or airing clothing that has hardly been worn.	
Note: You can adjust the programme duration. → "Programme settings" on page 27	
Time Progr. warm	3 kg
Timed programme for all types of fabric except silk. Suitable for pre-dried or slightly damp laundry and for drying off multi-layered, thick laundry.	Max. load for wool- lens/soft toys in the basket: 1 basket load
Notes ■ Dry woollens, sports shoes and soft toys only with the basket for woollens. ■ In the timed programme, the laundry's remaining moisture is not automatically detected. If the laundry is still too damp when the drying programme has ended, repeat the programme and, if required, extend the programme duration. → "Programme settings" on page 27	Max. load for shoes in the basket: 1 pair
Shirts	1.5 kg
Shirts/blouses made of cotton, linen, or synthetic or blended fabrics.	
Note: Once the laundry is dry, iron it or hang it up. This will allow the residual moisture to be distributed evenly.	

en Overview of programmes

Duvet Clothing, pillows, quilts or bedspreads filled with synthetic fibres. Note: Dry large items individually. Follow the instructions on the care label.	2.5 kg
 Down Clothing, bedspreads or eiderdowns stuffed with down. Notes Dry large items individually. Once the programme has ended, shake the items of laundry to distribute the stuffing and eliminate any pockets of moisture. Restart the programme if necessary. 	1.5 kg
Sportswear Weatherproof and outdoor clothing with a membrane coating and water-repellent fabrics.	1.5 kg
Towels Hard-wearing towels and dressing gowns made of cotton.	6 kg
Super Quick 40' Mixed load of synthetic fabrics and light cottons.	2 kg
Allergy+ Hard-wearing items. Note: The programme reaches high temperatures. Particularly suitable for strict hygiene requirements.	4 kg

programme, e.g. ☐☐: Ч5 (hours:minutes). 2. Press ② (Ready in). Note: You can use the + and — selection buttons to alter the setting values. 3. Press ▷ ⑥ (Start/Pause). This will activate the "Ready in" time. Before the programme starts, the selected "Ready in" time (e.g. ② ☐B: Ч5) is shown on the display and counts down until the drying programme starts. The duration of the programme will then be displayed.
Note: The programme duration is included in the "Ready in" time.

en Programme settings

	E.g. <i>[]</i> : 4 []	The drying time for timed programmes can be extended to up to 3 hours 30 minutes in 10-minute increments. Note: You can use the $+$ and $-$ selection buttons to alter the setting values.
⊙ 60min (Anti-Crease 60 min.)⊙ 120min (Anti-crease 120 min.)	©	The drum moves the laundry at regular intervals after drying to prevent creasing. You can activate the Anti-Crease function for 60 minutes (press © 60min (Anti-crease 60 min.)) or 120 minutes (press © 120min (Anti-crease 120 min.)), or you can deactivate this function.
屬 (Low Heat)		Reduced temperature for delicate fabrics, e.g. polyacrylic or elastane; may increase the drying time.
☆ (Favourite programme)		Press ☆ (Favourite programme) to save the settings and activate a programme with customised programme settings. Saving or overwriting a favourite programme:
		 Set the programme you require. The programme settings will appear on the display. Adjust the programme settings if required. Press and hold ☆ (Favourite programme) for 3 seconds. This programme with your customised programme settings has now been saved to your list of favourites. Note: The selected settings will be retained even after the ap-
		pliance has been switched off.
		Activating a favourite programme:
		 Press ⊕ to switch on the appliance. Press ☆ (Favourite programme). This favourite programme with your customised programme settings has now been activated.

Laundry

Preparing the laundry

Marning

Risk of explosions/fire!

Certain objects may ignite when drying is in progress, or even cause the appliance to catch fire or explode. Remove any lighters or matches from pockets on items of clothing.

Caution!

Risk of damage to the drum and laundry

Leaving objects in the pockets of your clothing can cause damage to the drum and laundry when the appliance is in operation. Remove all objects (e.g. metal items) from clothing pockets.

Prepare the laundry as follows:

- Tie cloth belts, apron strings, etc. together or use a laundry bag.
- Close zips, hooks, eyelets and buttons. Button up large items of laundry, such as covers.
- Always dry very small items of laundry, e.g. babies' socks, together with large items such as towels.
- Use timed programmes for single items.
- Knitted items, such as T-shirts and jerseys, often shrink slightly the first time they are tumble-dried. Use a gentle programme.

- Do not overdry easy-care laundry.
 This leads to increased creasing of your laundry.
- Some detergents and care products, e.g. starch or softeners, contain particles that may accumulate on the moisture sensor. This may impair the sensor's performance and, in turn, the drying result.

Notes

- When washing laundry to be tumble-dried, use the correct amount of detergent and care products as specified in the manufacturer's instructions.
- Clean the moisture sensor regularly → Page 42.

Sorting laundry

Note: Load the laundry item by item into the appliance. For more effective drying, do not stuff an entire bundle of laundry into the dryer at once.

Caution!

Risk of material damage to the dryer or laundry

Laundry that is unsuitable for tumbledrying may damage the appliance and the laundry when it is dried. Before you dry it, sort the laundry according to the information given on the care label:

- Suitable for tumble drying
- Dry at normal temperature
- Dry at low temperature
- □ Do not tumble-dry

When sorting the laundry to be dried, take the following points into account:

- To achieve an even drying result, only dry laundry of the same type of fabric and texture together. If you dry thin, thick and multilayered fabrics together, they will dry to differing degrees.
- Use the fabric descriptions given for the individual drying programmes to help you choose the most appropriate programme.
 - → "Overview of programmes" on page 25

Note: You can select a timed programme to add extra drying time for laundry that is still damp.

Caution!

Risk of material damage to the appliance and laundry

Do **not** tumble-dry the following items or fabrics in the appliance:

- Laundry contaminated with solvents. wax or grease.
- Unwashed items.
- Items made from non-breathable fabrics (e.g. rubber-coated).
- Items made from delicate fabrics, such as silk and curtains made of synthetic material.

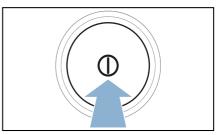

Operating the appliance

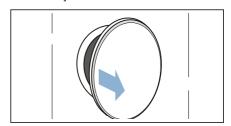

Loading laundry and switching on the appliance

Note: The appliance must be correctly installed and connected. → Page 14

- 1. Prepare and sort the laundry.
- 2. Press (1) to switch on the appliance.

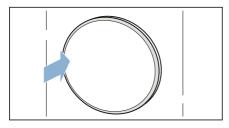

3. Open the door. Check that the drum has been completely emptied. Empty it if necessary.

Load the laundry unfolded into the drum.

5. Close the appliance door.

Caution!

Risk of material damage to the appliance or laundry.

Make sure that laundry is not trapped in the door.

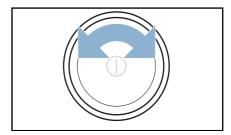

Note: The appliance's drum is lit up after the door is opened and closed and once the programme has started. The drum's interior light goes out on its own.

Setting a programme

Note: If you have activated the childproof lock, you must deactivate it before you can set a programme.

- → Page 35
- 1. Set the programme you require.

The programme settings will appear on the display.

- 2. Adjust the programme settings, if required.
 - → "Programme settings" on page 27

Starting a programme

Press DII (Start/Pause).

Note: If you want to prevent the programme from being adjusted inadvertently, you can activate the childproof lock. → *Page 35*

Programme progress

The programme status will be indicated on the display.

Note: When a programme is selected, the expected drying time for the maximum permitted load is displayed. The moisture sensor measures the residual moisture in the laundry as it is being dried. The programme duration and the remaining time indicated on the display are automatically adjusted as the programme progresses, depending on how damp the laundry is (exception: Timed programmes).

Changing the programme or adding more laundry

You can remove or add laundry and change or adjust the programme at any time during drying.

- Open the door or press ▷ (Start/ Pause) to pause the programme.
 Note: The drum will continue to rotate when the CoolDown process is in progress, even if you have paused the programme. You can stop the CoolDown process at any time by opening the door.
- 2. Add or remove laundry.
- 3. If required, select a different programme or a different programme setting. → "Overview of programmes" on page 25 → "Programme settings" on page 27

Note: Do not change the programme during the CoolDown process.

- 4. Close the door.
- 5. Press DM (Start/Pause).

Note: The programme duration is updated on the display, depending on the load and on the residual moisture in the laundry. The values displayed may change when the programme or load is changed.

Cancelling the programme

The programme can be cancelled at any time by opening the door or pressing **D** (Start/Pause).

Caution! Risk of fire. Laundry may catch fire.

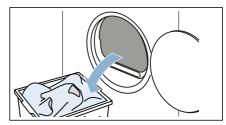

If you cancel the programme, remove all items of laundry from the dryer and spread them out to allow the heat to dissipate.

Programme end

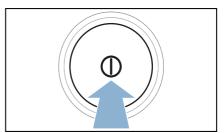

End will appear on the display.

Removing laundry and switching off the appliance

1. Remove the laundry.

2. Press ① to switch off the appliance.

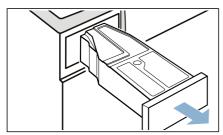

Emptying the condensation container

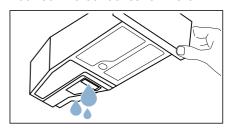

By default, the condensation from the appliance runs into the condensation container.

Alternatively, you have the option of discharging the condensation water* supplied depending on the model. If you choose to discharge the condensation water into the waste-water system, you will not need to empty the condensation container during the drying programme or after each time you use the dryer.

1. Pull out the condensation container horizontally.

2. Pour out the condensation water.

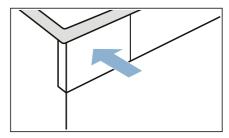

Caution!

Risk of harm to health and material damage

Condensation water is not suitable for drinking and may be contaminated with fluff.
Contaminated condensation water may be harmful to your health and cause material damage. Do not drink the condensation water or reuse it.

3. Push the condensation container back into the appliance until you feel it lock into place.

Note: The filter in the condensation container filters the condensation water, which is used during the appliance's automatic cleaning cycle. The filter is cleaned by emptying out the condensation water. You should still check the filter regularly for any buildup, and remove this if necessary.

→ "Cleaning the filter in the condensation container" on page 42

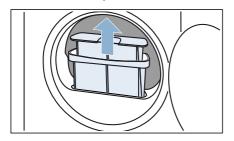

into the waste-water system via a drain hose

Removing the fluff

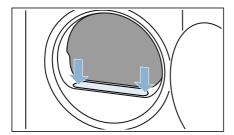

Note: During drying, fluff and hair from the laundry is trapped by the fluff filter. If the fluff filter is clogged or dirty, this reduces the flow of air, preventing the appliance from achieving optimal drying results. Dirty fluff filters increase the power consumption and increase the required drying time.

Clean the fluff filter after each drying cycle:

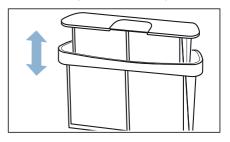

- 1. Open the door and remove all fluff from it.
- 2. Pull out the two-part fluff filter.

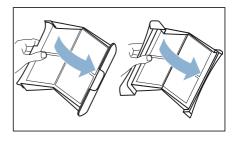

3. Remove the fluff from the fluff filter recess. Ensure that no fluff falls into the open shaft.

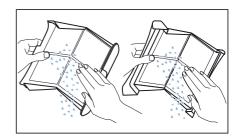

4. Pull the two-part fluff filter apart.

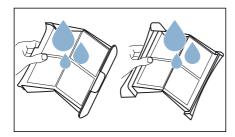

5. Open the two parts of the filter.

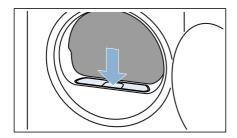

6. Remove all fluff from both parts of the filter.

7. Rinse off fluff under warm, running water.

8. Dry the two parts of the fluff filter, snap them shut and reinsert the filter.

Caution! Material damage/damage to the appliance

If you operate the appliance without a fluff catcher (e.g. fluff filter, fluff depot, depending on appliance specifications), or if the fluff catcher is incomplete or defective, this may result in damage to the appliance.

Do not operate the appliance without a fluff catcher, or with a fluff catcher that is incomplete or defective.

Appliance settings

You can activate/deactivate appliance settings directly or alter them under \mathcal{P} .

Childproof lock

Activating the childproof lock prevents the settings from being accidentally changed on the control panel.

Activating/deactivating the childproof lock:

Press and hold \hookrightarrow 3sec (Child lock) for 3 seconds.

Note: The childproof lock will remain active, even once the appliance has been switched off. If you wish to change settings on the control panel when you turn on the appliance, you will need to deactivate the childproof lock.

Quiet drying

If you activate \$ (Quiet drying), the appliance will operate without any audible operating or notification signals.

Activating/deactivating "Quiet drying":

Press \$\mathbb{G}\$ (Quiet drying).

The appliance's audible operating and notification signals are now activated/ deactivated.

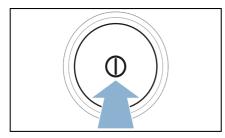

Altering the appliance settings

You can change the following appliance settings under 2° :

- Volume of the audible operating signals
- Display brightness
- Volume of the audible notification signals (e.g. at the end of a programme)

Call up & as follows:

1. Press ① to switch on the appliance.

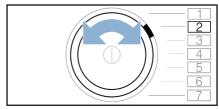

2. Press and hold \$\mathbb{S}\$ (Quiet drying) for 3 seconds.

will be shown on the display.

You can now alter the appliance settings.

Adjusting the volume of the audible operating signals

1. Set the programme to position 2.

b and the current setting value will appear on the display.

2. Press and hold + until the setting value you require appears on the display.

Setting values:

- 0 Off
- 1 Low
- 2 Medium
- 3 High
- 4 Very high
- Alter any additional appliance settings you require or save and exit the appliance settings.

Adjusting the display brightness

1. Set the programme to position 3.

L and the current setting value will appear on the display.

 Press and hold + until the setting value you require appears on the display.

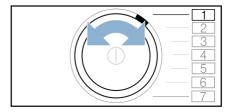

Setting values:

- 1 Low
- 2 Medium
- 3 High
- 4 Very high
- Alter any additional appliance settings you require or save and exit the appliance settings.

Adjusting the volume of the audible notification signals

1. Set the programme to position 1.

R and the current setting value will appear on the display.

 Press and hold + until the setting value you require appears on the display.

Setting values:

- 0 Off
- 1 Low
- 2 Medium
- 3 High
- 4 Very high
- Alter any additional appliance settings you require or save and exit the appliance settings.

Saving and exiting the appliance settings

Save and exit the appliance settings as follows:

- Press \$ (Quiet drying) or:
- Wait 10 seconds or:
- Press ① to switch off the appliance.

Note: The selected settings will be retained even after the appliance has been switched off.

Draining the condensation water

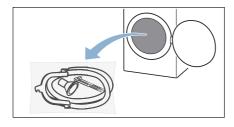

Condensation will form in the appliance as it dries the laundry.

You must ensure that the drain hose is connected when you operate the appliance.

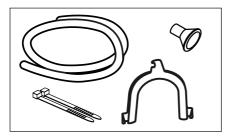

If there is no drain hose connected to the appliance, the condensation water from the appliance will run into the condensation container. In this case, you will need to empty the condensation container each time the dryer finishes drying the laundry, and also if it becomes full before drying is complete.

Connect the drain hose as follows:

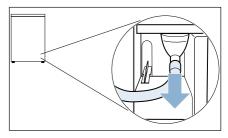

Remove any accessories from the drum.

2. Remove all items from the bag.

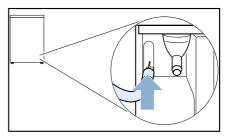

Detach the condensation hose from the socket.

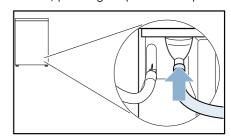

Note: The appliance comes delivered with the condensation hose already fitted to the socket.

4. Place the condensation hose in the "parked" position.

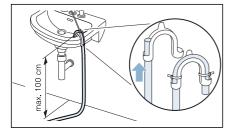

5. Take the drain hose from the accessories and attach it to the free socket, pushing it up to the stop.

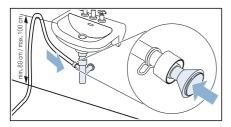

Secure the other side of the drain hose using the remaining accessories, depending on the connection situation.

Washbasin:

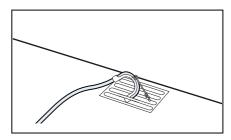

Siphon:

The connection point must be secured using a hose clamp (12-22 mm clamping range, available from specialist retailers). When connecting to a siphon, make sure that the drain hose is routed at a height of at least 80 cm, but no more than 100 cm.

Floor drain:

Caution!

Risk of material damage due to leaks or draining water.

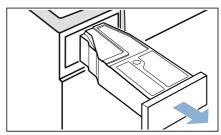

Secure the drain hose to prevent it from slipping out. Do not kink or bend the drain hose. The height difference between the surface on which the appliance is installed and the drain hose must be no more than 100 cm.

Caution!

Risk of accumulated water being drawn back into the appliance and causing material damage.

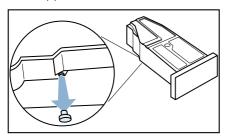

Check that the water drains away quickly. The drain must not be sealed or blocked.

Pull out the condensation container horizontally and empty it.

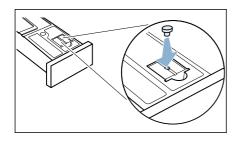

en Draining the condensation water

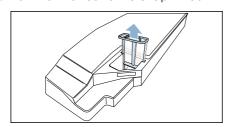

8. Turn the condensation container 180° onto its underside and remove the stopper that is fitted.

 Turn the condensation container 180° again and insert the stopper into the recess in the top of the condensation container.

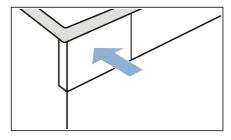

10. Pull the filter out of its snap-in lock.

11. Place the filter into the recess on the condensation container.

12. Slide in the condensation container until it clicks into place.

The condensation water is now discharged via the drain hose into the waste-water system or into a washbasin.

Note: If you want to drain the condensation water back into the condensation container, reverse these steps.

Caution! Risk of material damage/damage to the appliance

If you are draining condensation water into the condensation container, liquid may leak out of the socket and cause material damage. Before operating the appliance, make sure that the condensation hose is secured to the socket.

Cleaning and maintenance

Cleaning the appliance

⚠ Warning Risk of death!

The appliance is powered by electricity. There is a risk of electric shock if you come into contact with live components. Therefore please note:

- Switch off the appliance. Disconnect the appliance from the power supply (pull out the plug).
- Never take hold of the mains plug with wet hands.
- When removing the mains plug from the socket, always take hold of the plug itself and never the mains cable, otherwise this may damage the mains cable.
- Do not make any technical modifications to the appliance or its features.
- Repairs and any other work on the appliance must only be conducted by our customer service or by an electrician. The same applies for replacing the mains cable (when necessary).
- Spare mains cables can be ordered from our customer service.

Poisonous fumes may be given off by cleaning agents that contain solvents, e.g. cleaning solvent.

Do not use cleaning agents that contain solvents.

Marning

Risk of electric shock/material damage/damage to the appliance!

If moisture penetrates the appliance, this may cause it to short circuit. Do not use a pressure washer, steam cleaner, hose or spray gun to clean your appliance.

Caution!

Material damage/damage to the appliance

Cleaning agents and agents for pretreating laundry (e.g. stain removers, prewash sprays, etc.) may cause damage if they come into contact with the surfaces of the appliance. Therefore please note:

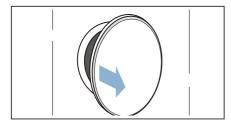

- Do not allow these agents to come into contact with the surfaces of the appliance.
- Clean the appliance with nothing but water and a soft, damp cloth.
- Remove any detergent, spray or other residues immediately.

en

Cleaning the moisture sensor

Note: The moisture sensor measures the amount of moisture in the laundry. After long periods of usage, the moisture sensor may become covered by a fine layer of limescale or detergent and care product residue. These deposits must be removed regularly, otherwise the drying results may not be optimal.

1. Open the door.

2. Clean the moisture sensor with a rough sponge.

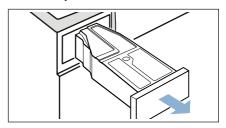

Caution! Risk of damaging the moisture sensor.

The moisture sensor is made from stainless steel. Do not clean the sensor with abrasive cleaning products or wire wool.

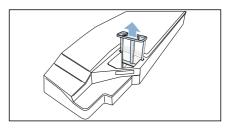

Cleaning the filter in the condensation container

Note: The filter in the condensation container cleans the condensation water, which is used during the appliance's automatic cleaning cycle.

1. Pull out the condensation container horizontally.

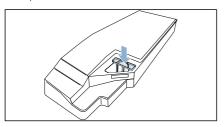

- 2. Pour out the condensation water.
- 3. Remove the filter.

4. Clean the filter under warm, running water or in the dishwasher.

5. Push the filter in until you feel it lock into place.

Caution!

If the filter is not inserted, fluff can find its way inside the appliance and damage it.

Only operate the appliance with the filter inserted.

6. Push the condensation container in until you feel it lock into place.

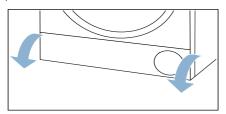

Cleaning the base unit

You can clean the appliance's base unit if it has fluff in it, for example.

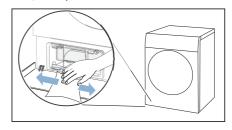

Note: Allow the appliance to cool down for approximately 30 minutes after use before commencing cleaning.

Clean the base unit as follows:

 To open the maintenance flap, take hold of it at the top at both sides and pull it down.

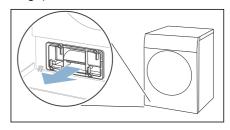

2. Clean the maintenance flap with a soft, damp cloth.

3. Unlock the levers on the heat exchanger cover.

4. Pull the heat exchanger cover out by its grip.

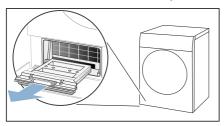

5. Use a soft brush to clean the heat exchanger cover.

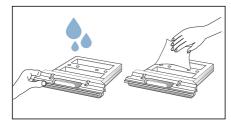

Note: Make sure that no dirt or debris is left on the seal.

en Cleaning and maintenance

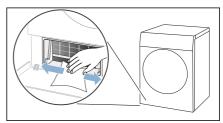

6. Pull the insert out horizontally.

7. Rinse the insert under running water and dry it off.

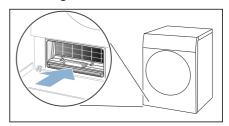

8. Clean the opening in the appliance with a soft, damp cloth.

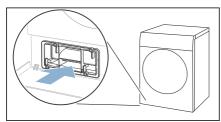

Notes

- Be careful not to damage the heat exchanger, as it is exposed.
- Thanks to the appliance's selfcleaning function, you do not need to clean the heat exchanger.
- 9. Slide the insert in horizontally as far as it will go.

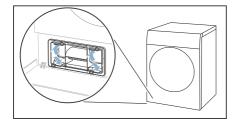

10. Slide the heat exchanger cover in by its grip.

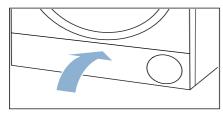

Note: You can only slide the heat exchanger cover in if the insert is in the appliance.

11. Lock the levers on the heat exchanger cover.

12. Close the maintenance flap.

You have now finished cleaning the appliance's base unit.

Appliance care

The appliance offers both a basic appliance care programme for longlasting, optimal drying results, and an intensive appliance care programme for eliminating any unpleasant odours that may have built up if the appliance has not been used for an extended period. Before running an appliance care programme, the appliance must be suitably prepared.

Warning

Risk of scalding/material damage/ damage to the appliance!

Boiling or hot water can cause severe scalding as well as material damage and damage to the appliance if it is spilled or leaks out.

Do not use boiling water for this appliance or its components or accessories. Do not allow hot water or steam to come into contact with your skin.

Marning

Risk of poisoning/material damage!

Condensation water is not suitable for drinking and may be contaminated with lint. Contaminated condensation water may be hazardous to health and may cause material damage. Do not drink or reuse.

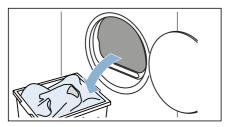

Preparing the appliance for appliance care

Preparing the appliance for appliance care

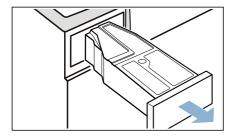

The appliance must be prepared **before** you can run a basic or intensive appliance care programme.

Prepare the appliance for appliance care as follows:

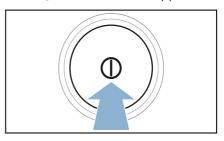

1. Remove the laundry.

- 2. Clean the fluff filter. → Page 34
- 3. Close the door.
- 4. Pull out the condensation container horizontally and empty it.

5. Press ① to switch on the appliance.

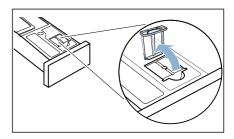

The appliance is now ready to run the appliance care programme.

Preparing the condensation container for appliance care

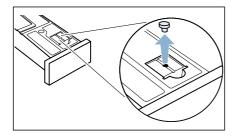

If you are draining the condensation water from the appliance using the drain hose, the condensation container must be prepared **before** the basic or intensive appliance care programme can be run.

Prepare the condensation container for appliance care as follows:

 Remove the filter from the recess on the condensation container.

Remove the stopper inserted in the recess on the condensation container.

3. Turn the condensation container 180° onto its underside and insert the stopper.

The condensation container is now ready for the appliance care programme.

Note: If you are draining the condensation water from the appliance using the drain hose, reverse these steps **after** running the basic or intensive appliance care programme.

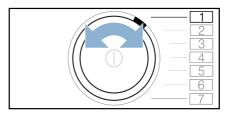

Running the basic appliance care programme

To ensure that you achieve optimal drying results again and again, you can run the basic appliance care programme.

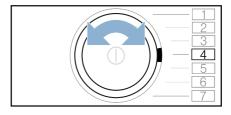

Note: After a certain period, your appliance will automatically recommend that you run the basic appliance care programme. *LRrE* will then appear on the display for 5 seconds before the programme starts, and again once the programme ends. This message will appear repeatedly until you have run the basic appliance care programme through to the end.

Run the appliance care programme as follows:

- Prepare the appliance for appliance care. → Page 46
- 2. Set the programme to position 1.

- 3. Press and hold (Iron Dry). At the same time:
- 4. Set the programme to position 4.

EP I and the programme duration will now alternate on the display.

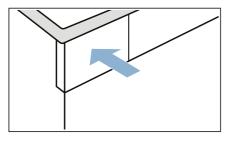

en Appliance care

Pour approx. 1 ½ litre of warm tap water into the condensation container.

Note: Hold the full condensation container horizontally at all times so that no liquid spills out.

6. Slide in the condensation container until it clicks into place.

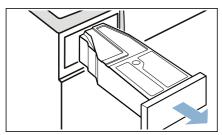

7. Press DII (Start/Pause).

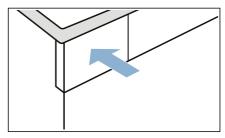

The appliance care programme will start and an audible signal will sound.

End will appear on the display once the appliance care programme has ended and an audible signal will sound.

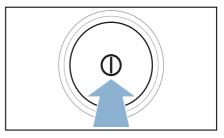

8. Pull out the condensation container horizontally and empty it.

9. Slide in the condensation container until it clicks into place.

10. Press ① to switch off the appliance.

You have now completed the appliance care programme.

Running the intensive appliance care programme

If your appliance has not been used for an extended period (more than one month), you should run the intensive appliance care programme. This prevents any unpleasant odours from building up in the appliance.

Notes

- The intensive appliance care programme runs for approximately 4 hours. The programme may take longer if you do not carry out the necessary steps in good time while the programme is running.
- Once it has started, the intensive appliance care programme should not be cancelled.

When you run the intensive appliance care programme, you will need to use the original appliance care product. This can be ordered from our after-sales service using spare part number 00311829. Contact information for all countries can be found in the enclosed after-sales service directory.

Marning

Risk of injury/material damage/damage to the appliance!

The use of spare parts and accessories supplied by other brands is dangerous and may result in injury, material damage or damage to the appliance. For safety reasons, use genuine spare parts and accessories only.

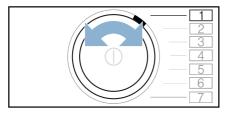

Caution!

Material damage/damage to the appliance

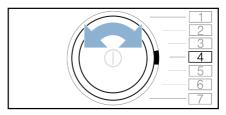

If you pour the wrong quantity of detergent or cleaning agent into the appliance, this may result in material damage or damage to the appliance. Use detergents/care products/cleaning agents and softeners in accordance with the manufacturers' instructions.

Run the appliance care programme as follows:

- 1. Prepare the appliance for appliance care. → Page 46
- 2. Set the programme to position 1.

- Press and hold (Iron Dry). At the same time:
- 4. Set the programme to position 4.

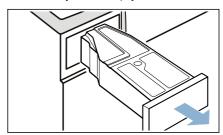

EP I and the programme duration will now alternate on the display.

5. Press +.

EP2 and the programme duration will now alternate on the display.

6. Pull out the condensation container horizontally and empty it.

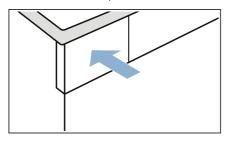

en Appliance care

 Pour a bottle of the original appliance care product and approx. 1 ½ litre of warm tap water into the condensation container.

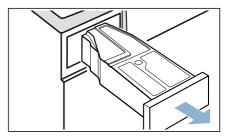

Note: Hold the full condensation container horizontally at all times so that no liquid spills out.

8. Slide in the condensation container until it clicks into place.

9. Press (Start/Pause). The appliance care programme will start and an audible signal will sound. After a while, the appliance will pause the appliance care programme and the remaining programme duration will flash on the display.

10. Pull out the condensation container horizontally and empty it.

 Pour approx. 1 ½ litre of warm tap water into the condensation container.

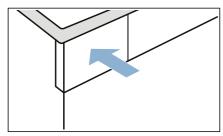

Note: Hold the full condensation container horizontally at all times so that no liquid spills out.

12. Carefully swing the condensation container round horizontally and empty it to dispose of any remaining original appliance care product.

13. Pour approx. another 1 ½ litre of warm tap water into the condensation container. **14.** Slide in the condensation container until it clicks into place.

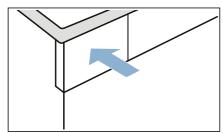

15. Press ▷ (Start/Pause).

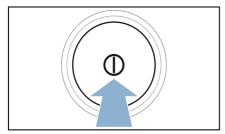

The appliance care programme will then be resumed.

End will appear on the display once the appliance care programme has ended and an audible signal will sound.

- **16.** Empty the condensation container again.
- **17.** Slide in the condensation container until it clicks into place.

18. Press ① to switch off the appliance.

You have now completed the appliance care programme.

Help with the appliance

Faults	Cause/remedy		
The appliance will not start.	Check the mains plug and the fuses.		
Creasing.	 ■ Load exceeded or incorrect programme selected for a type of fabric. All the required information can be found in the programme table. → Page 25 ■ Remove laundry from the drum as soon as the drying programme has finished. Creasing occurs when clothing is left in the drum. 		
Water is leaking out.	 The appliance may be positioned at an angle. Level the appliance. In the base unit, make sure that: The heat exchanger cover is properly locked. There is no dirt or debris on the heat exchanger cover's seal. → Page 43 If the optional drain hose* is installed, make sure that the drain hose is correctly connected. → Page 38 		
Programme duration displayed changes as drying progresses.	Not a fault. The moisture sensor measures the residual moisture in the laundry and adjusts the programme duration (with the exception of timed programmes).		
Laundry is not dried properly or is still too damp.	 After the programme has ended, warm laundry feels damper than it actually is. Spread out the laundry and let it cool down. Adjust the drying time or increase the degree of dryness. This will extend the drying time but the temperature will remain the same. Select a timed programme to add extra drying time for laundry that is still damp. Select a timed programme for a small load. Do not exceed the maximum load for a programme. → Page 25 Clean the moisture sensor in the drum. The sensor may become covered in a fine layer of limescale or detergent and care product residue, which then impairs its performance. → Page 42 Drying has been interrupted as a result of a power cut, because the condensation container is full or because the maximum drying time has been exceeded. Note: See also the laundry tips. → Page 29 		
The programme will not start	Make sure that: ■ The door is closed. ■ 3sec (Child lock) has been deactivated ■ You have pressed D (Start/Pause) Note: If the programme has been delayed by setting (ready in), the programme will start later.		

Drying is taking too long.	 The appliance may have fluff in it. This will increase the required drying time.Remove the fluff. → Page 34 The heat exchanger may have fluff in it. Run the basic appliance care programme. → Page 47 If the air inlet on the appliance is blocked or not fully open, this may increase the drying time. Make sure that the air inlet remains unobstructed. If the ambient temperature is lower than 15 °C or higher than 30 °C, this may increase the drying time. Inadequate air circulation in the room may increase the drying time. Make sure the room is adequately ventilated. 	
Unpleasant odour in the appliance	Run the intensive appliance care programme. \longrightarrow <i>Page 48</i>	
Humidity in the room is increasing.	Make sure the room is sufficiently ventilated.	
Unusual noises when drying.	When drying is in progress, the pump and compressor generate noise when operating normally. This does not indicate that the appliance is malfunctioning.	
The appliance feels cold despite drying.	Not a fault. The appliance can dry effectively at low temperatures using a heat pump.	
Drying programme is stopped.	If the drying programme is stopped due to a power failure, restart the programme or remove the laundry and spread it out.	
Residual water in the condensation container despite the appliance being connected to the drain hose*.	If the optional drain hose is installed, residual water remains in the condensation container due to the appliance's self-cleaning function.	

* Depending on how the appliance is equipped or the available accessory

Note:

If you cannot rectify the fault yourself by turning the appliance off and then on again, please contact our after-sales service. \rightarrow Page 57

Transporting the appliance

Marning

Risk of injury/material damage/damage to the appliance!

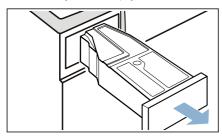

If you take hold of any of the appliance's protruding parts (e.g. the appliance door) in order to lift or move it, these parts may break off and cause injury. Do not take hold of any of the appliance's protruding parts in order to move the appliance.

⚠ Warning Risk of injury!

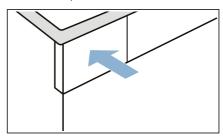

- The appliance is very heavy. Lifting it may result in injury.
 Do not lift the appliance on your own.
- The appliance has sharp edges on which you could cut your hands. Do not take hold of the appliance by its sharp edges. Wear protective gloves to lift it.

Prepare the appliance for transportation as follows:

1. Pull out the condensation container horizontally and empty it.

Push the condensation container back into the appliance until you feel it lock into place.

- 3. Switch on the appliance.
- 4. Set any programme.
- 5. Press Di (Start/Pause).
- 6. Wait for 5 minutes.

The condensation water will be drained.

- **7.** Empty the condensation container again.
- If installed, remove the drain hose from the washbasin, siphon or floor drain. → Page 38

Caution!

Secure the drain hose to the appliance to prevent it from slipping out. Do not kink the drain hose.

- 9. Switch off the appliance.
- **10.** Disconnect the appliance's mains plug from the power supply.

The appliance is now ready to be transported.

Caution!

Risk of material damage/damage to the appliance

Despite draining, there will always be some residual water in the appliance. Any residual water may leak out and cause material damage.

The appliance should therefore be transported upright.

Consumption values

Consumption values table

Programme	Spin speed used for spinning the laundry (in rpm)		tion** min)	Energy con: (in k	
◯ Cottons		8 kg	4 kg	8 kg	4 kg
Cupboard Dry ⊞*	1400	132	87	1.22	0.74
	1000	148	95	1.44	0.85
	800	164	103	1.66	0.96
Iron Dry △ *	1400	97	61	0.87	0.51
	1000	113	69	1.09	0.62
	800	129	77	1.31	0.73
Easy-Care		3.5 kg		3.5 kg	
Cupboard Dry ⊞*	800	57		0.43	
	600	66		0.53	

Programme setting for testing in accordance with the applicable EN61121 standard.

Most efficient programme for cotton laundry

The "standard cottons programme" below (denoted by the C symbol) is suitable for drying cotton laundry with a normal dampness level, and is the most efficient programme for drying damp cotton laundry in terms of combined energy consumption.

Standard programmes for cottons in accordance with current EU regulation 932/2012				
Programme + dryness level	Load (in kg)	Energy consumption (in kWh)	Programme duration (in min)	
Cottons + Cupboard Dry ⊞	8/4	1.44/0.85	148/95	
Programme setting for testing and energy labelling in accordance with Directive 2010/30/EU.				

The values may differ from those specified, depending on the type of fabric, composition of laundry to be dried, residual moisture in the laundry, the degree of dryness that has been set, the amount of laundry being loaded, the environmental conditions, and any additional functions that have been activated.

Dimensions:

 $850 \times 600 \times 640 \text{ mm}$ (height x width x depth)

Weight:

56 kg (depending on the model)

Mains connection:

Mains voltage 220 - 240 V, 50 Hz

Nominal current 10 A

Nominal power 800 W

Maximum load:

8 kg

Power consumption when switched off:

0.10 W

Power consumption when left on: 0.10 W

Drum interior light*

Ambient temperature:

5 - 35 °C

Dispose of packaging and the appliance in an environmentally responsible manner.

This appliance is labelled in accordance with the European Directive 2012/19/EU, which governs waste electrical and electronic equipment (WEEE). The directive provides a framework for the collection and recycling of old appliances, which is valid across the EU.

Caution!

Risk of fire/risk of poisoning/risk of material damage and damage to the appliance

The appliance contains R290, a refrigerant that is environmentally friendly but flammable. If it is not disposed of correctly, this may result in fire or poisoning.

Dispose of the appliance correctly and do not damage the pipes in the refrigerant circuit.

After-sales service

If you cannot rectify the fault yourself by turning the appliance off and then on again, please contact our after-sales service.

Enclosed after-sales service directory or cover page

We will always find an appropriate solution in order to avoid unnecessary visits by engineers.

Please provide the after-sales service with the product number (E no.) and the production number (FD) of the appliance.

E-Nr	FD

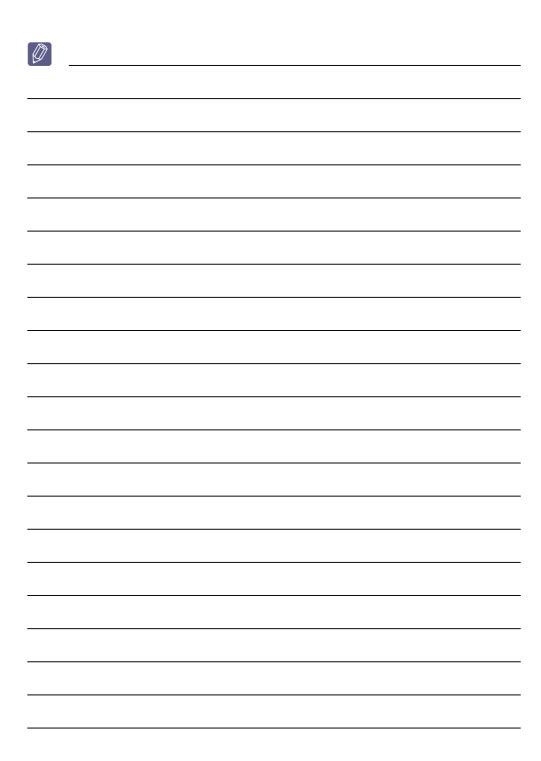

E no. Product number FD Production number

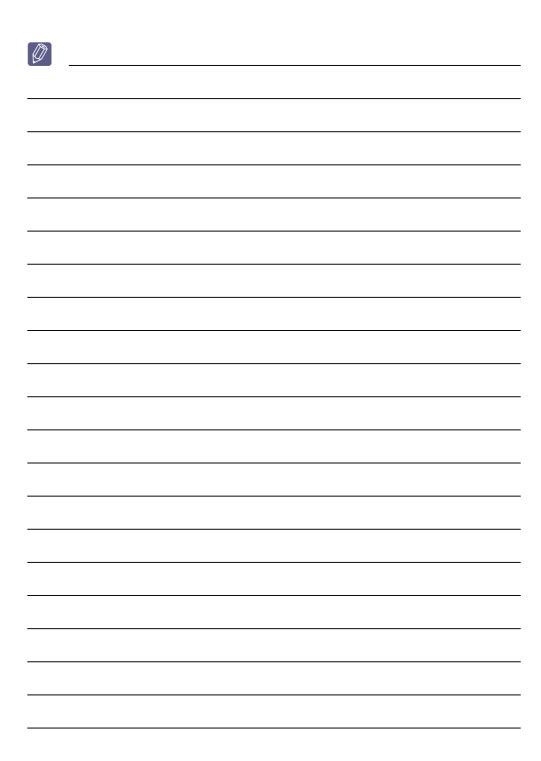

You can find this information, depending on the model*:

On the inside of the door*/open service flap* and at the rear of the appliance.

Trust in the expertise of the manufacturer.

Contact us for assistance. By doing so, you can be sure that the repairs are carried out by trained service engineers using genuine spare parts.
