

Consumption values

Additional consumption values in accordance with EN 60456, valid until 1st March 2021

The indicated consumption values are approximate. The values may deviate from the indicated values depending on water pressure, water hardness, water inlet temperature, room temperature, type of laundry, amount and soiling of laundry, detergent used, fluctuations in the mains voltage and selected settings.

² Information on residual moisture based on programme-dependent spin-speed limit and maximum loads.

³ Information for test institutes: During a test in compliance with the applicable standard EN60456, you must select the maximal possible spin speed and deactivate the automatic dosing, insofar as this function is not the subject of the test.

⁴ Programme setting with maximum speed for testing and energy labelling in accordance with Directive 2010/30/EU with cold water (15 °C). These programmes are suitable for cleaning normally soiled cotton laundry and are the most efficient in terms of combined energy and water consumptions. The stated programme temperature is based on the temperature indicated on the care label for the laundry. The actual washing temperature may differ from the stated programme temperature for energy-saving reasons, the washing performance index meets the legal requirements. The programme **Cotton Colour** complies with the requirements of the standard **Cottons 60 °C** standard programme and the standard **Cottons 40 °C** programme in accordance with the (EU) Regulation No. 1015/2010.
