

Consumption values

Additional consumption values in accordance with EN 60456, valid until 1st March 2021

The indicated consumption values are approximate. The values may deviate from the indicated values depending on water pressure, water hardness, water inlet temperature, room temperature, type of laundry, amount and soiling of laundry, detergent used, fluctuations in the mains voltage and selected settings.

² Information on residual moisture based on programme-dependent spin-speed limit and maximum loads.

³ Information for test institutes: During a test in compliance with the applicable standard EN60456, you must select the maximal possible spin speed.

⁴ Program settings with maximum spin speed for testing and energy labeling in accordance with EU Directive 2010/30/EU with cold water (15°C). The programs are suitable for the cleaning of normally soiled cotton textiles and regarding the combination of energy and water consumption the most effective. The specification of the programme temperature is based on the temperature stated on the care label in the textiles. The actual washing temperature may deviate from the indicated programme temperature for reasons of saving energy. The washing efficiency corresponds to the legal requirements.

The programme **Cottons Intensive 40 °C** corresponds to the requirements of the standard **Cottons 60 °C** programme and the standard **Eco 40-60 Cottons 40 °C** programme according to the Regulation (EU) No 1015/2010.
