# 1 Safety

Observe the following safety instructions.

## 1.1 General information

- Read this instruction manual carefully.
- Keep the instruction manual and the product information safe for future reference or for the next owner.
- Do not connect the appliance if it has been damaged in transit.

## 1.2 Intended use

Only use this appliance:
- For drying and freshening up fabrics that are washed with water and suitable for dryers.
- In private households and in enclosed spaces in a domestic environment.
- Up to an altitude of max. 4000 m above sea level.

## 1.3 Restriction on user group

This appliance may be used by children aged 8 or over and by people who have reduced physical, sensory or mental abilities or inadequate experience and/or knowledge, provided that they are supervised or have been instructed on how to use the appliance safely and have understood the resulting dangers.
Children must not play with the appliance.
Cleaning and user maintenance must not be performed by children unless they are being supervised.
Keep children under the age of 3 years and pets away from the appliance.

## 1.4 Safe installation

Take note of the safety instructions when installing the appliance.

**⚠ WARNING – Risk of electric shock!**

Improper installation is dangerous.

- ▶ Connect and operate the appliance only in accordance with the specifications on the rating plate.
- ▶ Connect the appliance to a power supply with alternating current only via a properly installed socket with earthing.
- ▶ The protective conductor system of the domestic electrical installation must be properly installed. The installation must have a sufficiently large cross section.
- ▶ When using a residual current circuit breaker, only use a type with the ⎓ mark.
- ▶ Never equip the appliance with an external switching device, e.g. a timer or remote control.
- ▶ Never connect the appliance to a circuit that is regularly switched on and off by the energy supplier.
- ▶ When the appliance is installed, the mains plug of the power cord must be freely accessible. If free access is not possible, an all-pole isolating switch must be installed in the permanent electrical installation according to the installation regulations.
- ▶ When installing the appliance, check that the power cable is not trapped or damaged.

If the insulation of the power cord is damaged, this is dangerous.

- ▶ Never let the power cord come into contact with hot appliance parts or heat sources.
- ▶ Never let the power cord come into contact with sharp points or edges.
- ▶ Never kink, crush or modify the power cord.

**⚠ WARNING – Risk of fire!**

It is dangerous to use an extended power cord and non-approved adapters.

- ▶ Do not use extension cables or multiple socket strips.
- ▶ If the power cord is too short, contact Customer Service.
- ▶ Only use adapters approved by the manufacturer.

### ⚠ WARNING – Risk of injury!

The high weight of the appliance may result in injury when lifted.

- ▶ Do not lift the appliance on your own.

If this appliance is not correctly installed in a washer-dryer stack, the installed appliance may fall.

- ▶ Only stack the dryer on a washing machine using the connection kit from the dryer manufacturer → *"Accessories", Page 28*. No other installation method is permitted.
- ▶ Do not install the appliance in a washer-dryer stack if the dryer manufacturer does not offer a suitable connection kit.
- ▶ Do not install appliances from different manufacturers and with varying depths and widths in a washer-dryer stack.
- ▶ Do not install a washer-dryer stack on a platform; the appliances may tip over.

### ⚠ WARNING – Risk of suffocation!

Children may put packaging material over their heads or wrap themselves up in it and suffocate.

- ▶ Keep packaging material away from children.
- ▶ Do not let children play with packaging material.

### ⚠ CAUTION – Risk of injury!

The appliance may vibrate or move when in use.

- ▶ Place the appliance on a clean, even, solid surface.
- ▶ Align the appliance using the appliance feet and a spirit level.

If hoses and power cords have been laid incorrectly, this causes a tripping hazard.

- ▶ Lay hoses and power cords in such a way that there is no risk of tripping.

If the appliance is moved by holding onto protruding components, such as the appliance door, the parts may break off.

- ▶ Do not move the appliance by holding onto protruding parts.

### ⚠ CAUTION – Risk of cutting!

Touching sharp edges on the appliance may lead to cuts.

- ▶ Do not touch the sharp edges on the appliance.

- Wear protective gloves when installing and transporting the appliance.

## 1.5 Safe use

**⚠ WARNING – Risk of electric shock!**

If the appliance or the power cord is damaged, this is dangerous.

- Never operate a damaged appliance.
- Never pull on the power cord to unplug the appliance. Always unplug the appliance at the mains.
- If the appliance or the power cord is damaged, immediately unplug the power cord or switch off the fuse in the fuse box.
- Call customer services. → *Page 57*

An ingress of moisture can cause an electric shock.

- Only use the appliance in enclosed spaces.
- Never expose the appliance to intense heat or humidity.
- Do not use steam- or high-pressure cleaners, hoses or sprays to clean the appliance.

**⚠ WARNING – Risk of harm to health!**

Children can lock themselves in the appliance, thereby putting their lives at risk.

- Do not install the appliance behind a door as this may obstruct the appliance door or prevent it from opening.
- With redundant appliances, unplug the power cord. Then cut through the cord and damage the lock on the appliance door beyond repair so that the appliance door will no longer close.

**⚠ WARNING – Risk of suffocation!**

Children may breathe in or swallow small parts, causing them to suffocate.

- Keep small parts away from children.
- Do not let children play with small parts.

**⚠ WARNING – Risk of explosion!**

If there is coal dust or flour in the air around the appliance, this may cause an explosion.

- Keep the area around the appliance clean during operation.

### ⚠ WARNING – Risk of poisoning!

Condensation water from this appliance is not suitable for drinking and may be contaminated with fluff.

- ▶ Do not drink or reuse the condensation water from the appliance.

Detergents and care products may result in poisoning if consumed.

- ▶ If accidentally swallowed, seek medical advice.
- ▶ Keep detergents and care products out of the reach of children.

### ⚠ WARNING – Risk of fire!

The refrigerant R290 in this appliance is environmentally friendly yet combustible and may ignite if it comes into contact with open flames or ignition sources.

- ▶ Keep naked flames and ignition sources away from the appliance.

### ⚠ WARNING – Risk of explosion!

Highly flammable objects such as lighters or matches may ignite during the drying process.

- ▶ Remove all highly flammable objects from any pockets in your laundry before the drying process.

Unwashed laundry that has come into contact with solvents, oil, wax, wax remover, paint, grease or stain remover may ignite when drying is in progress.

- ▶ Do not place laundry in this appliance to be dried if the laundry has not been washed first.
- ▶ Rinse the laundry thoroughly with warm water and detergent before drying it in the machine.
- ▶ Do not use the appliance if industrial chemicals have been used to clean the laundry beforehand.

### ⚠ WARNING – Risk of fire!

If drying is interrupted early, the laundry is not cooled sufficiently and may ignite.

- ▶ Do not interrupt the drying programme early.

- If drying is interrupted early, remove the laundry immediately and spread it out.

**⚠ CAUTION – Risk of injury!**
The covering plate may break if you stand on or climb onto the appliance.
- Do not stand on or climb onto the appliance.

The appliance may tip over if you sit on or lean against the open door.
- Do not sit on or lean against the appliance door.
- Do not place any objects on the appliance door.

Reaching into the drum while it is still turning may cause hand injuries.
- Wait for the drum to come to a complete stop before reaching inside.

## 1.6 Safe cleaning and maintenance

Take note of the safety instructions when cleaning and performing maintenance work on the appliance.

**⚠ WARNING – Risk of electric shock!**
Incorrect repairs are dangerous.
- Repairs to the appliance should only be carried out by trained specialist staff.
- Only use genuine spare parts when repairing the appliance.
- If the power cord of this appliance is damaged, it must be replaced by the manufacturer, the manufacturer's Customer Service or a similarly qualified person in order to prevent any risk.

An ingress of moisture can cause an electric shock.
- Do not use steam- or high-pressure cleaners, hoses or sprays to clean the appliance.

**⚠ WARNING – Risk of injury!**
The use of non-original spare parts and non-original accessories is dangerous.
- Only use the manufacturer's original spare parts and original accessories.

**⚠ WARNING – Risk of poisoning!**

Poisonous fumes may be given off if you use cleaning agents that contain solvents.

▶ Do not use cleaning agents that contain solvents.

# 2 Preventing material damage

Follow these instructions to avoid material damage and damage to the appliance.

**ATTENTION!**
The functionality of the appliance may be impaired if you use the wrong quantity of fabric softener, detergent, care product or cleaning agent.
- ▸ Follow the dosage recommendations from the manufacturer.

Exceeding the maximum load capacity impairs the function of the appliance.
- ▸ Observe the maximum load capacity for each programme and do not exceed it.
  → *"Programmes", Page 25*

The function of the appliance may be impaired if the appliance overheats.
- ▸ During operation, keep the air inlet on the appliance clear.
- ▸ Make sure that the area is adequately ventilated.

Light objects such as hair and fluff may be sucked into the air inlet on the appliance during operation and impair the function of the appliance.
- ▸ Keep the area around the appliance clean during operation.
- ▸ Keep light objects away from the appliance.

Foam and foam rubber may deform or melt during the drying process.
- ▸ Do not dry laundry that contains foam or foam rubber.

Unsuitable cleaning products may damage the surfaces of the appliance.
- ▸ Do not use harsh or abrasive detergents.
- ▸ Do not use cleaning products with a high alcohol content.
- ▸ Do not use hard scouring pads or cleaning sponges.
- ▸ Clean the appliance with nothing but water and a soft, damp cloth.
- ▸ Remove all detergent residue, spray residue or other residues immediately if they come into contact with the appliance.

# 3 Environmental protection and saving energy

## 3.1 Disposing of packaging

The packaging materials are environmentally compatible and can be recycled.
- ▸ Sort the individual components by type and dispose of them separately.

## 3.2 Saving energy

If you follow these instructions, your appliance will use less power.

Operate the appliance in a well-ventilated room and keep the air inlet on the appliance clear.
- ✔ If air exchange is impeded, this extends the programme duration and increases energy consumption.

Spin the laundry in the washing machine before drying.
- ✔ If the laundry is excessively damp, this extends the programme duration and increases energy consumption.

Observe the programme's maximum load capacity.
→ *"Programmes", Page 25*

✔ If the maximum load is exceeded, this extends the programme duration and increases energy consumption.

Dry the filters in the filter system of the base unit → *Page 30* thoroughly after cleaning.

✔ If the filters are damp, this extends the programme duration and increases energy consumption.

Deactivate Wi-Fi on the appliance → *Page 37* if it is not being used.

✔ If the Wi-Fi is activated, this increases energy consumption.

## 3.3 Energy saving mode

If you do not use the appliance for an extended period, it automatically switches to energy-saving mode. All displays go out and ▷II flashes. Energy-saving mode ends when you use the appliance again, e.g. if you open or close the door.
If you do not use the appliance for an extended period, the appliance switches off automatically.

**Note:** If Wi-Fi is activated, the appliance will not switch itself off automatically.

# 4 Installation and connection

## 4.1 Unpacking the appliance

**ATTENTION!**
Objects remaining in the drum that are not designed for operation with the appliance may cause material damage and damage to the appliance.

▸ Remove these objects, along with all supplied accessories, from the drum before starting the appliance.

1. Remove any packaging and protective covers completely from the appliance.
   → *"Disposing of packaging", Page 11*.
2. Check the appliance for visible damage.
3. Open the appliance door.
   → *"Basic operation", Page 29*
4. Remove any accessories from the drum.
5. Close the appliance door.

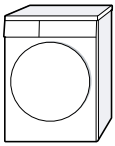

## 4.2 Scope of delivery

After unpacking all parts, check for any damage in transit and completeness of the delivery.

**ATTENTION!**
If the appliance is operated with incomplete or defective accessories, the appliance may not be able to operate properly, or this may result in material damage or damage to the appliance.

▸ Do not operate the appliance with incomplete or defective accessories.

- Replace the accessories in question before operating the appliance.
  → *"Accessories", Page 28*

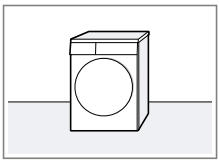

| Included with the appliance | Description |
|---|---|
|  | Tumble dryer |
|  | Accompanying documents |
|  | Water drain hose with connection adapter, fixing material and elbow.<br>→ *"Water drain hose", Page 14* |
|  | Water jug<br>→ *"Filling the water tank", Page 34* |

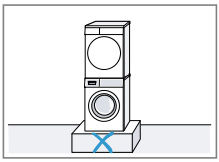

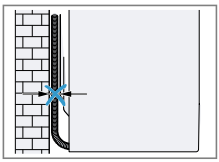

## 4.3 Requirements for the installation location

**ATTENTION!**
If the appliance is tilted at an angle greater than 40°, residual water may leak out of the appliance and cause material damage.
- Tilt the appliance carefully.
- Transport the appliance in an upright position.

If residual water in the appliance freezes, this may cause damage to the appliance.
- Do not install or operate this appliance anywhere that is liable to experience frost or outdoors.

If the appliance is operated immediately after transportation, the refrigerant contained in the appliance may result in damage to the appliance.
- Immediately after transporting the appliance, leave it to rest for two hours before putting it into operation.

| Installation location | Requirements |
|---|---|
| On the floor<br> | Place the appliance on a clean, level and firm surface.<br>Align the appliance<br>→ *Page 17.* |

| Installation location | Requirements |
|---|---|
| In a washer-dryer stack  | Only use the original connection set from the dryer manufacturer when setting up this appliance in a washer-dryer stack. → *"Accessories", Page 28*<br><br>→ *"Accessories", Page 28*<br>This appliance must only be stacked on a washing machine from the same manufacturer.<br>The depth and width of this appliance must correspond with the dimensions of the washing machine.<br>Do not place the washer-dryer stack on a platform. |
| Against a wall  | Do not trap the hoses between the wall and the appliance. |

## 4.4 Water drain hose

Condensation forms during drying, which your appliance uses for automatic cleaning. Use the water drain hose to drain away excess condensation directly into the waste water system.

**Notes**

- Operate this appliance using the water drain hose provided. If you connect the water drain hose → *Page 14*, you do not have to regularly empty the condensation container → *Page 32*.
- You can order this optional → *"Accessories", Page 28* from our customer service.

### Connecting the water drain hose

If you do not want to regularly empty the appliance's condensation container, connect the water drain hose.

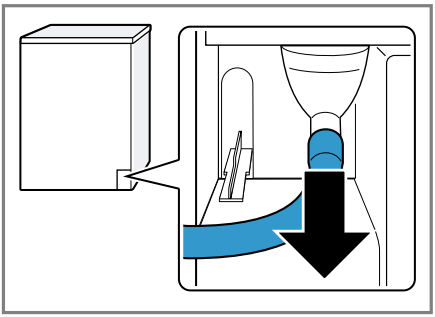

**ATTENTION!**
When operating the appliance without the water drain hose being connected properly, liquid may leak out of the connecting piece.

▸ Before operating the appliance, connect the water drain hose properly to the connecting piece.

**Requirements**

- The appliance and the accessory have been unpacked. → *"Unpacking the appliance", Page 12*
- The appliance is installed at the installation location. → *"Requirements for the installation location", Page 13*

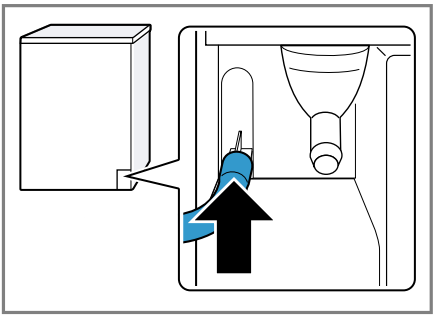

1. Pull out the condensation hose from the connecting piece.

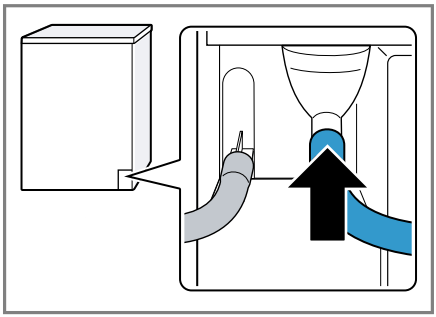

The condensation hose is connected to the connecting piece at the factory.

**Note:** When removing the condensation hose, liquid may leak out of the connecting piece.

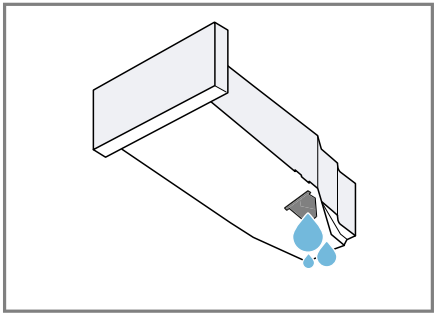

2. Push the condensation hose into the holder.

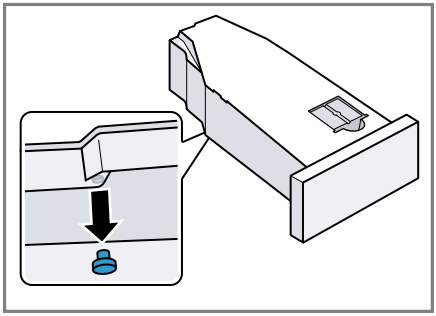

3. Push the water drain hose as far as it will go into the connecting piece.

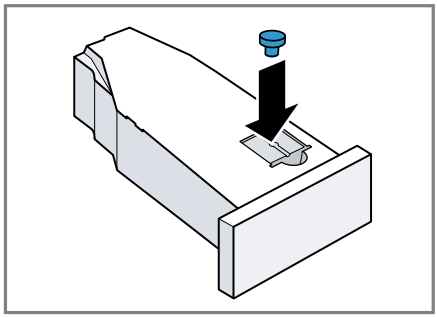

4. Empty the condensation container → *Page 32*.

5. Remove the stopper on the underside.

6. Insert the stopper into the recess in the top.

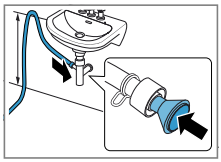

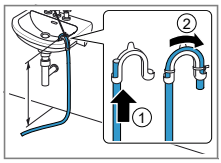

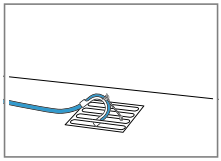

7. Insert the condensation container → *Page 33*.
8. Connect the appliance to the water outlet.
   → *"Water outlet connection types", Page 16*

**Tip:** To collect condensation in the condensation container again (e. g. if you change where the appliance is located), carry out these steps in reverse order.

## Water outlet connection types

**ATTENTION!**
In the event of a blocked or covered outlet, accumulated wastewater can flow back into the appliance.

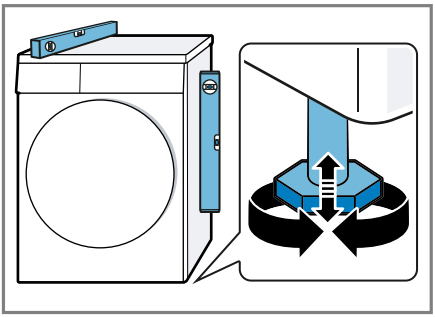

- Before operating the appliance, ensure that the wastewater drains away quickly and eliminate any blockages.

| | |
|---|---|
| Drainage into a siphon.<br> | Secure the connection point with a (12-22 mm) hose clamp. Secure the water drain hose with a hose guide at a height of at least 80 cm and no more than 100 cm. |
| | **Note:** You can use the Y-distributor → *Page 28* to connect the water drain hose of an additional appliance, such as a washing machine, to the same siphon outlet. |
| Drainage into a wash basin.<br> | Push the water drain hose fully through the elbow and secure it using fixing material. Secure the elbow at a height of no more than 100 cm. |
| Drainage into a gully.<br> | Push the water drain hose fully through the elbow and secure it using fixing material. Secure the elbow to the gully. |

## 4.5 Aligning the appliance

In order to reduce vibrations and noises, align the appliance correctly.

- To align the appliance, turn the appliance feet. Check that the appliance is level using a spirit level.

All appliance feet must stand firmly on the ground.

## 4.6 Connecting the appliance to the electricity supply

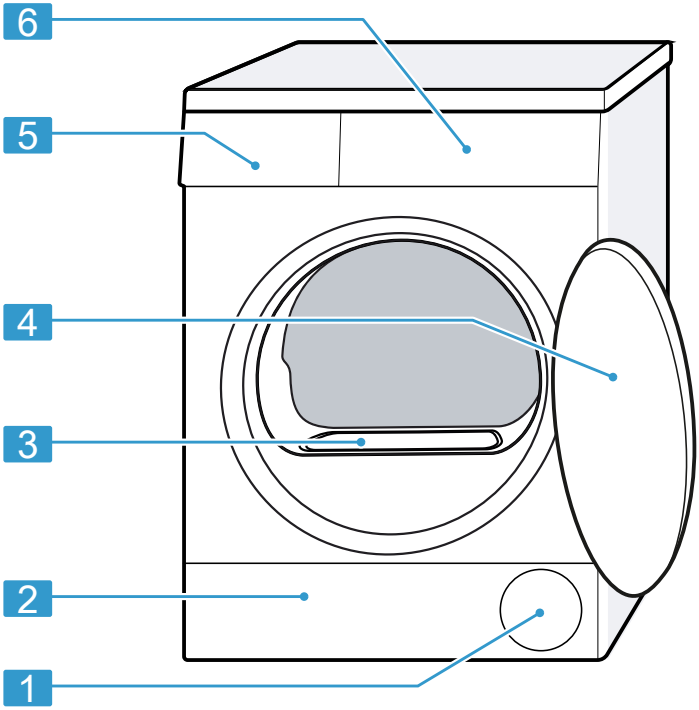

1. Insert the mains plug of the appliance's power cable in a socket nearby.

   The connection details of the appliance can be found under Technical data → *Page 59*.
2. Check the mains plug is inserted properly.

# 5 Familiarising yourself with your appliance

## 5.1 Appliance

You can find an overview of the parts of your appliance here.

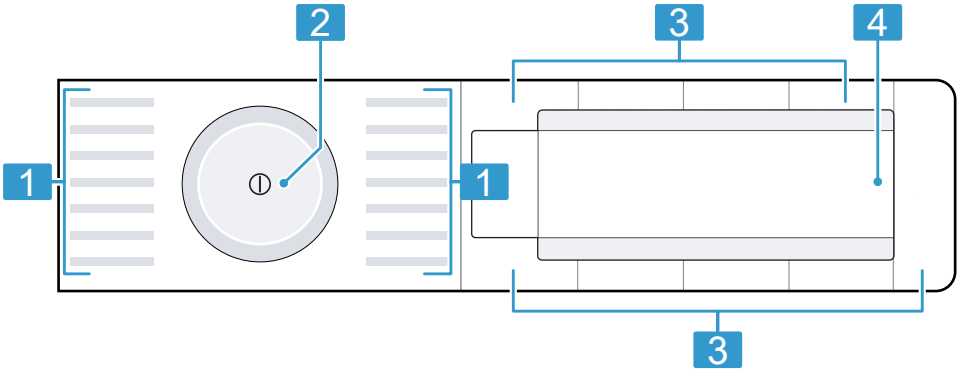

On certain models, specific details such as the colour and shape may differ from those pictured.

| | |
|---|---|
| 1 | Air inlet |
| 2 | Maintenance flap on the base unit → *Page 46* |
| 3 | Air channel cover (do not remove) |
| 4 | Door |
| 5 | Condensation container → *Page 32* |
| 6 | Control panel → *Page 19* |

## 5.2 Control panel

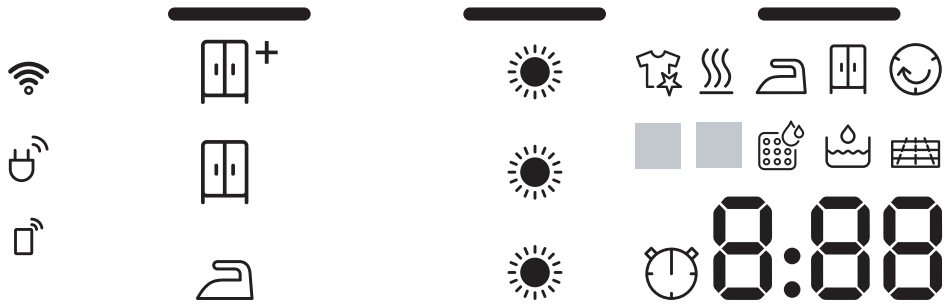

You can use the control panel to configure all functions of your appliance and to obtain information about the operating status.

| | |
|---|---|
| 1 | Programmes → *Page 25* |
| 2 | Programme selector → *Page 29* |
| 3 | Buttons → *Page 22* |
| 4 | Display → *Page 20* |

# 6 Display

The display shows the current settings, options or relevant information.

| Display | Designation | Description |
|---|---|---|
| 0:40 [1] | Programme duration/programme time remaining | Approximate expected programme duration or programme time remaining. |
| | Timed programme | The timed programme is set.<br>→ *"Timed programmes", Page 26* |

| Button | Selection | Description |
|---|---|---|
| ▷II | ■ Start<br>■ Cancel<br>■ Pause | Start, cancel or pause the programme. |
| ⏻ (mains switch) | ■ Switch on<br>■ Switch off | Switch the appliance on or off. |
| 3 sek. | ■ Activate<br>■ Deactivate | Activate or deactivate the childproof lock.<br>Disable the control panel to prevent unwanted or accidental operation.<br>If the childproof lock is activated and the appliance has been switched off, the childproof lock remains activated.<br>→ *"Childproof lock", Page 33* |
| | ■<br>■<br>■ | The dryness level defines how damp or dry the laundry is after the programme ends.<br>→ *"Dryness level", Page 24* |
| | ■<br>■<br>■ | Adjust the dryness level.<br>If the laundry feels too damp after it has been dried to a particular dryness level, you can adjust the dryness level.<br>→ *"Adjusting the dryness level", Page 24* |
| 60' | ■ Activate<br>■ Deactivate | Activate or deactivate the crease-reduction function.<br>Once the programme has ended, the drum moves the laundry at regular intervals for 60 minutes to prevent creasing. |

| Button | Selection | Description |
|---|---|---|
| 120' | ■ Activate<br>■ Deactivate | Activate or deactivate the crease-reduction function.<br>Once the programme has ended, the drum moves the laundry at regular intervals for 120 minutes to prevent creasing. |
| | ■ Activate<br>■ Deactivate | Activate or deactivate gentle drying.<br>The temperature is reduced for delicate fabrics, e.g. polyacrylic or elastane.<br>The programme duration is extended. |
| − + | ■ Programme end<br>■ Programme length | ■ Set the programme end.<br>The programme duration is already included in the set number of hours.<br>Once the programme has started, the programme duration is displayed.<br>■ Set the programme duration for timed programmes.<br>→ *"Timed programmes", Page 26* |
| | ■ Activate<br>■ Deactivate | Activate or deactivate the audible signal after the programme ends. |
| | ■ Activate<br>■ Deactivate<br>■ Open the Home Connect menu | → *"Remote start", Page 38* |

# 8 Dryness level

Each automatic programme has a specified dryness level. The dryness level defines how dry or damp your laundry is after the programme ends.

| Dryness level | Laundry | Drying result |
|---|---|---|
| | Multi-layered, thick laundry that does not dry readily. | The laundry is dry. |
| | Normal, single-layered laundry. | The laundry is dry. |
| | Normal, single-layered laundry | The laundry is still a little damp after drying.<br>To prevent creasing after drying, iron the laundry or hang it up. |

## 8.1 Changing the dryness level

For some automatic programmes, you can change the dryness level so that your laundry will be drier or more damp.

1. Set an automatic programme.
   → *"Automatic programmes", Page 25*
- ✔ The display shows the specified dryness level.
2. Press .
- ✔ The display shows: , or .

**Note:** If you change this setting, the change is retained even after the appliance is switched off.
For the **Cotton** programme, the change is not saved.

## 8.2 Adjusting the dryness level

If the laundry feels too damp after it has been dried to a particular dryness level, you can adjust the dryness level.

1. Set an automatic programme.
   → *"Automatic programmes", Page 25*
- ✔ The display shows the specified dryness level.
2. Press .
- ✔ The display shows: , or .

**Note:** If you change this setting, the change is retained even after the appliance is switched off.
For the **Cotton** programme, the change is not saved.

# 9 Programmes

You can dry your fabrics using either an automatic programme or a timed programme.

## 9.1 Automatic programmes

Automatic programmes are programmes in which humidity sensors measure the residual moisture in the laundry during the drying cycle. The programme only ends once the set dryness level is reached.
Each automatic programme has a dryness level → *Page 24*. The dryness level defines how dry or damp the laundry is after the programme ends.

**Tips**

- Select the dryness level according to the type of fabric or the desired drying result.
  → *"Dryness level", Page 24*
- The laundry's care labels provide you with additional information about programme selection. Care symbols on the care labels

| Programme | Description | Max. load (kg) |
|---|---|---|
| Cotton | Dry hard-wearing, heat-resistant fabrics made of cotton or linen. | 9,0 |
| Easy Care | Dry items made of synthetic materials or blended fabrics. | 3,5 |
| Mix | Dry items made of cotton and synthetics. | 3,0 |
| Delicate | Dry delicate items made of satin, synthetics or blended fabrics. | 2,0 |
| AllergyPlus | Dry hard-wearing, heat-resistant fabrics made of cotton or linen.<br>**Note:** Particularly suitable for strict hygiene requirements. | 4,0 |
| Shirts/Blouses | Dry shirts and blouses made of cotton, linen, synthetics or blended fabrics.<br>**Note:** For optimal drying results, dry a maximum of 5 shirts at one time.<br>Once the laundry is dry, iron it or hang it up. This will allow the residual moisture to be distributed evenly. | 1,5 |
| Rapid 40' | Dry items made of synthetics and light cotton. | 2,0 |
| Towels | Dry hard-wearing, heat-resistant towels and dressing gowns made of cotton or linen. | 6,0 |

| Programme | Description | Max. load (kg) |
|---|---|---|
| Smart Dry | After you have washed your laundry in the washing machine, the dryer will recommend a suitable programme for drying your laundry.<br>**Note:** The washing machine must be Home Connect-capable.<br>The washing machine and dryer must be connected to your home network and registered in your Home Connect app.<br>The selectable programme settings depend on the selected programme. | – |

## 9.2 Timed programmes

Timed programmes are programmes with a defined or adjustable programme duration. The programme ends once this time has elapsed, even if the laundry is still not dry, for example. Timed programmes are suitable for drying individual items of laundry or thin fabrics.

**Tip:** The laundry's care labels provide you with additional information about programme selection. Care symbols on the care labels

| Timed program | Description | Max. load (kg) |
|---|---|---|
| Wool Finish | Dry machine-washable items made of wool or containing wool.<br>**Note:** The laundry becomes fluffier but not dry.<br>Remove laundry once the programme has ended and allow it to dry. | 0,5 |
| Business | Reduce creasing and air-borne odours on dry suits, jackets and trousers that have hardly been worn and are labelled as dry-clean only.<br>→ *"Crease-removal function", Page 33*<br>**Notes**<br>■ Remove the laundry immediately after the programme has ended to prevent creasing.<br>■ The laundry is not dried or washed.<br>■ The programme is not suitable for thin, lightweight summer suits. | One suit or two items of laundry |

| Timed program | Description | Max. load (kg) |
|---|---|---|
| 5 Shirts | Reduce creasing and air-borne odours on shirts and blouses that have been worn once.<br>→ *"Crease-removal function", Page 33*<br>**Notes**<br>■ Remove the laundry immediately after the programme has ended to prevent creasing.<br>■ The laundry is not dried or washed. | 2 to 5 items of laundry |
| 1 Shirt | Reduce creasing and air-borne odours on shirts and blouses that have been worn once.<br>→ *"Crease-removal function", Page 33*<br>**Notes**<br>■ Remove the laundry immediately after the programme has ended to prevent creasing.<br>■ The laundry is not dried or washed. | One item of laundry |
| Time Program Warm | Dry all types of fabric except for wool and silk.<br>Suitable for pre-dried or slightly damp laundry and for drying off multi-layered, thick laundry. | 3,0 |
| Smart Dry | After you have washed your laundry in the washing machine, the dryer will recommend a suitable programme for drying your laundry.<br>**Note:** The washing machine must be Home Connect-capable.<br>The washing machine and dryer must be connected to your home network and registered in your Home Connect app.<br>The selectable programme settings depend on the selected programme. | – |

# 10 Accessories

Use original accessories. These have been made especially for your appliance.

**Note:** Some accessories are available in other colours. Contact → *"Customer Service", Page 57*.

| | Use | Order number |
|---|---|---|
| Connection kit | To save space, stack the appliance on a suitable washing machine of the same width and depth and that is from the same manufacturer. | WTZ27410 |
| Connection kit with pull-out worktop | To save space, stack the appliance on a suitable washing machine of the same width and depth and that is from the same manufacturer. The pull-out worktop makes it easier to load and unload the appliance. | WTZ27400 |
| Wool basket | Dry or air individual woollen items, sports shoes and soft toys. | WMZ20600 |
| Y-distributor | Connect the water drain hose of an additional appliance to the same siphon outlet. | 15000490 |
| Appliance care product | Spare part for the intensive appliance care function. | 00311829 |
| Platform | Install the appliance at a raised height so that it can be easily loaded and unloaded. | WTZPW20D |

# 11 Laundry

**Note:** You can find further information in the digital instruction manual by scanning the QR code in the table of contents or on www.bosch-home.com.

## 11.1 Preparing the laundry

**ATTENTION!**
Objects remaining in the laundry may damage the laundry and the drum.

- ▸ Remove all items from any pockets in your laundry before using the appliance.
- ▸ To protect your appliance and the laundry, prepare the laundry beforehand.
  - – Empty any pockets
  - – Brush sand out of all collars and pockets
  - – Close bed covers and cushion covers
  - – Close all zips, Velcro fasteners, hooks and eyes
  - – Tie cloth belts, apron strings, etc. together or use a laundry bag.
  - – Remove curtain hooks and lead strips or use a mesh laundry bag
  - – Use a mesh laundry bag for small items of laundry, such as children's socks
  - – Separate items of laundry and shake them out, or observe the programme description
  - – Spin the laundry before drying
  - – Dry woollen items, sports shoes and soft toys in the wool basket Wool basket

# 12 Basic operation

**Note:** You can find further information in the digital instruction manual by scanning the QR code in the table of contents or on www.bosch-home.com.

## 12.1 Switching on the appliance

**Requirement:** The appliance has been correctly installed and connected.
→ *"Installation and connection", Page 12*

- ▸ Press ⏻.
  The switch-on process takes a few seconds.

**Note:** The lighting for the drum goes out automatically.

## 12.2 Setting a programme

1. Turn the programme selector and set the required programme.
   → *"Programmes", Page 25*
2. If necessary, adjust the programme settings.

## 12.3 Adjusting the programme settings

Depending on the programme and programme progress, you can adjust or activate/deactivate the settings.

**Requirement:** A programme has been set.
→ *"Setting a programme", Page 29*

- ▸ Adjust the programme settings.
  → *"Buttons", Page 22*

**Note:** The programme settings are not saved permanently for the programme.

## 12.4 Loading laundry

**Note:** To prevent creasing, take note of the maximum load for the
→ *"Programmes", Page 25*.

**Requirement:** The laundry is prepared.
→ *"Laundry", Page 29*

1. Open the door.

   Make sure that the drum is empty.
2. Place the laundry in the drum.
3. Close the door.

   Ensure that there is no laundry trapped in the door.

## 12.5 Starting the programme

**Note:** If you want to change the time until the programme ends, set the "Ready in" time first.

- ▸ Press ▷II .
- ✔ The display shows either the programme duration or the "Ready in" time.
- ✔ After the programme has ended, the display shows: "-0-".

## 12.6 Adding laundry

After the programme starts, you can remove or add laundry at any time.

1. Press ▷II .

   The cooling process starts automatically after approx. 30 seconds and cools down the laundry while the drum is rotating. If you want to avoid or cancel the cooling process, open the door.
   → *"Display", Page 21*
2. Open the appliance door.
3. Add or remove laundry.
4. Close the appliance door.
5. Press ▷II .

## 12.7 Cancelling the programme

1. Press ▷II .

   The cooling process starts automatically after approx. 30 seconds and cools down the laundry while the drum is rotating. If you want to avoid or cancel the cooling process, open the door.
   → *"Display", Page 21*
2. Open the appliance door.
3. Remove the laundry → *Page 30*.

## 12.8 Unloading the laundry

1. Open the appliance door.
2. Remove the laundry.

## 12.9 Switching off the appliance

- ▸ Press ⏻.

## 12.10 Filter system on the base unit

During drying, fluff from the laundry is collected in the base unit's filter system. The filter system protects the appliance from fluff.

### Cleaning the filter system on the base unit

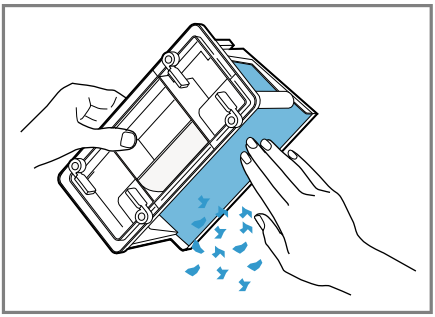

If the display shows a notification while the appliance is in operation, clean the base unit's filter system.

**Notes**

- You can clean the filter regularly system even without the notification being shown on the display. It is not necessary to clean after each drying cycle.
- If you do not clean the appliance as described, the appliance's functionality may be impaired.

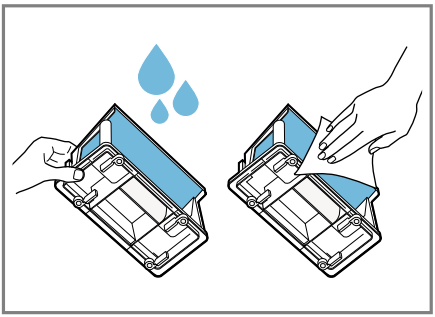

**Requirement:** The display shows the following during operation: .

1. Open the base unit → *Page 46*.
2. Remove the fluff.

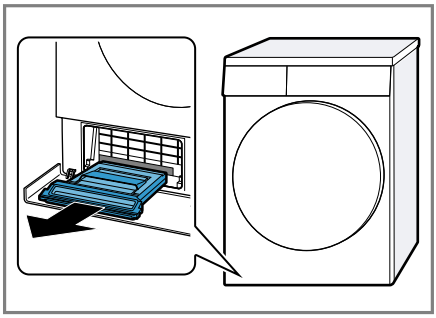

Make sure that you remove all dirt from the seal.

3. Clean the insides thoroughly under running water and then dry them off.

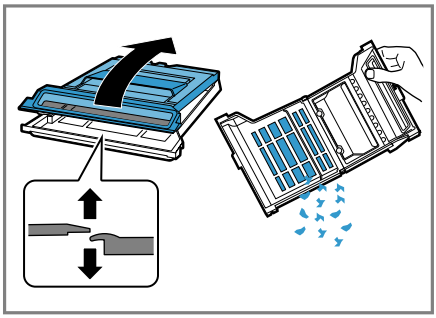

You can remove heavy soiling carefully with a soft brush.
Ensure that you thoroughly dry off the filter. If the filter is damp, this may increase the drying time and affect the drying result.

4. Pull the fluff collector out horizontally.

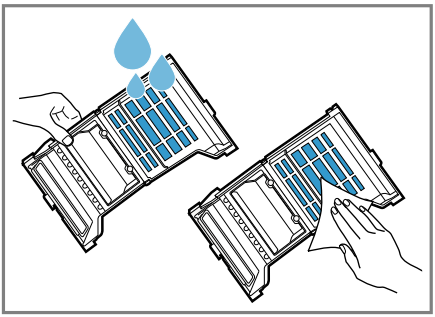

The fluff collector may contain condensation, which may drip out of it when you pull it out.

5. Open the fluff collector and remove any fluff.

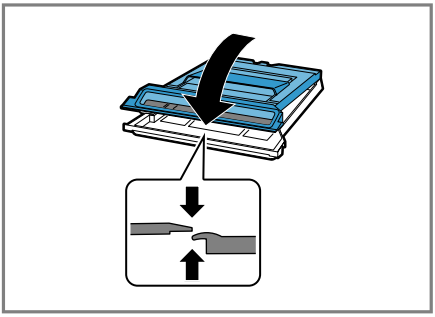

6. Clean the filter thoroughly under running water and then dry it off.

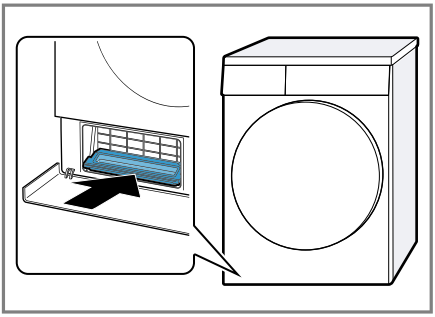

You can remove heavy soiling carefully with a soft brush.
You must not damage or remove the fluff collector's seal.
You can clean the fluff collector in the dishwasher.

7. Close the fluff collector until the tab engages.

8. Slide the fluff collector in horizontally as far as it will go.

9. Close the base unit → *Page 47*.

## 12.11 Condensation container

Condensation forms during drying, which your appliance uses for automatic cleaning. By default, the condensation is collected in the appliance's condensation container.

**Note:** Operate this appliance using the water drain hose provided. If you connect the water drain hose → *Page 14*, you do not have to regularly empty the condensation container → *Page 32*.

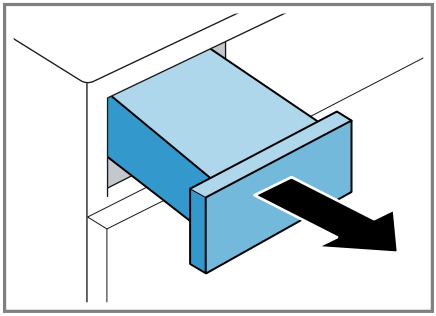

### Emptying the condensation container

If the drying programme has finished or the display shows a notification while the appliance is in operation, empty the condensation container.

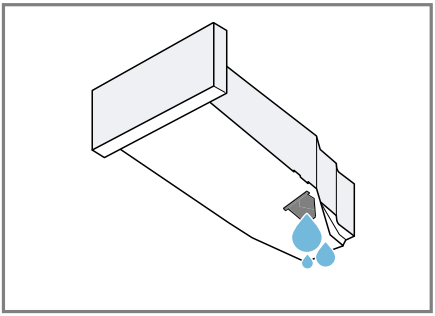

**Requirements**

- The display shows the following after drying: "-0-"
- or during operation: .

1. Pull out the condensation container, keeping it level.

2. Empty the condensation container.

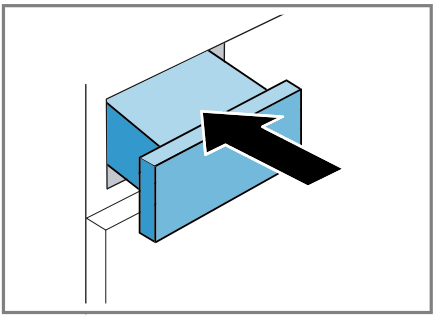

Check the condensation container filter → *Page 49* regularly and clean the filter if it is dirty.
Make sure that you insert the condensation container before operating the appliance.
→ *"Inserting the condensation container", Page 33*

**Inserting the condensation container**

**Requirement:** The condensation container → *Page 32* is removed from the appliance.

- Push the condensation container in as far as it will go.

# 13 Childproof lock

Secure your appliance against being operated unintentionally using the controls.

## 13.1 Activating the childproof lock

- Press and hold the two **3 sek.** buttons for approx. 3 seconds.
- ✔ The controls are locked.
- ✔ The childproof lock remains active even after the appliance has been switched off.

## 13.2 Deactivating the childproof lock

**Requirement:** To deactivate the childproof lock, the appliance must be switched on.

- Press and hold the two **3 sek.** buttons for approx. 3 seconds.

# 14 Crease-removal function

In order to reduce creasing and airborne odours, such as cigarette smoke, you can use a programme with a crease-removal function for any laundry that has not been worn for long.

## 14.1 Starting a programme with the crease-removal function

**Note**
Wash items of laundry that have traces of sweat, perfume or deodorant before wearing them again.
Do not use dryer cleaning sets.

Do not use a programme with the crease-removal function for the following fabrics:
- Wool, leather and viscose
- Fabrics with parts made from metal, wood or plastic
- Waxed jackets and oilskin jackets

**Requirements**
- The laundry is prepared.
  → *"Preparing the laundry", Page 29*
- The laundry is sorted. Sorting laundry
- The laundry is inserted into the appliance.
  → *"Loading laundry", Page 30*

1. Set a programme with the crease-removal function.
   → *"Timed programmes", Page 26*
2. Start the programme → *Page 30*.
   If the water tank is empty, the display shows: .
   → *"Filling the water tank", Page 34*
   The average programme duration of the crease-removal function is approx. 45 minutes and may be longer or shorter depending on the ambient temperature.

✔ After the programme has ended, the display shows: "-0-".

3. The
   → *"Unloading the laundry", Page 30*.
   The results of the crease-removal function may vary depending on the type of fabric, the amount of laundry and the selected programme.
   Remove the laundry immediately after the programme has ended to prevent creasing.
4. Hang up the items of laundry and pull them into shape.

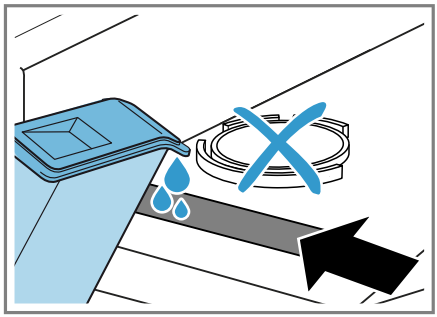

## 14.2 Filling the water tank

Your appliance removes the creases from rarely worn clothing using cold drinking water. If the display shows a notification while the appliance is in operation, fill the water tank.

**ATTENTION!**
Operating the appliance with water that is dirty or too hot may result in damage to the appliance.
- ▸ Only fill the water tank with cold drinking water.
- ▸ Never use condensed water, distilled water, additives or descaler for the crease-removal function.

**Requirements**
- You have started a programme with the crease-removal function.
  → *"Starting a programme with the crease-removal function", Page 33*
- The display shows: .
- The condensation container → *Page 32* is removed from the appliance.

1. Add approx. 180 ml cold drinking water through the front opening, using the water jug provided.

Check the water tank filter regularly and clean the filter if it is dirty. → *"Cleaning the water tank filter", Page 48*
If does not go out on the display, add cold drinking water through the front opening and align the appliance correctly. → *"Aligning the appliance", Page 17*

✔ goes out on the display.

2. Insert the condensation container → *Page 33*.
3. Start the programme. → *"Starting a programme with the crease-removal function", Page 33*

# 15 Home Connect

This appliance is network-capable. Connecting your appliance to a mobile device lets you control its functions via the Home Connect app, adjust its basic settings and monitor its operating status.

**Note:** You can find further information in the digital instruction manual by scanning the QR code in the table of contents or on www.bosch-home.com.

The Home Connect services are not available in every country. The availability of the Home Connect function depends on the availability of Home Connect services in your country. You can find information about this at: www.home-connect.com.

- → *"Connecting the appliance to a WLAN home network (Wi-Fi) with WPS function", Page 36*
- → *"Connecting the appliance to a WLAN home network (Wi-Fi) without WPS function", Page 36*

The Home Connect app guides you through the entire login process. Follow the instructions in the Home Connect app to configure the settings.

**Tips**

- Please consult the documents supplied by Home Connect.
- Please also follow the instructions in the Home Connect app.

**Notes**

- Please note the safety precautions in this instruction manual and make sure that they are also observed when operating the appliance via the Home Connect app. → *"Safety", Page 4*
- Operating the appliance on the appliance itself always takes priority. During this time it is not possible to operate the appliance using the Home Connect app.

## 15.1 Connecting the appliance to a WLAN home network (Wi-Fi) with WPS function

**Requirements**
- Your router has a WPS function.
- Wi-Fi is activated on the router.
- The Wi-Fi basic setting is activated on the appliance.
  → *"Activating Wi-Fi on the appliance", Page 37*
- The appliance receives signals from the WLAN home network (Wi-Fi) at its installation location.
- The Home Connect app is installed on your mobile device.

1. Press and hold for at least 3 seconds.

✔ The display shows **Aut**.

2. Press ▷II .
3. Press the WPS button on the router within the next 2 minutes.

   Take note of the information in the documents for your router.

✔ flashes on the display.
✔ The device connects to the Wi-Fi home network.
✔ If the display shows "con" and lights up permanently, the appliance is connected to the Wi-Fi home network.

4. If the appliance is not connected to the Wi-Fi home network, the display shows "Err".
   - Check whether the appliance is within the range of the Wi-Fi home network.
   - Reconnect the appliance to the Wi-Fi home network with WPS function.
5. Connect the appliance to the Home Connect app. → *Page 37*

## 15.2 Connecting the appliance to a WLAN home network (Wi-Fi) without WPS function

If your router does not have a WPS function, you can connect the appliance to your WLAN home network (Wi-Fi) manually.

**Requirements**
- Wi-Fi is activated on the router.
- The Wi-Fi basic setting is activated on the appliance.
  → *"Activating Wi-Fi on the appliance", Page 37*
- The appliance receives signals from the WLAN home network (Wi-Fi) at its installation location.
- The Home Connect app is installed on your mobile device.

1. Press and hold for at least 3 seconds.

✔ The display shows **Aut**.

2. Set the programme to position 2.

✔ The display shows **SAP**.

3. Press ▷II .

✔ flashes on the display.
✔ The appliance now sets up its own Wi-Fi home network with the name (SSID) HomeConnect.

4. Call up the Wi-Fi settings on the mobile device.

   Connect the mobile device to the HomeConnect Wi-Fi network and enter the Wi-Fi password (key) HomeConnect.

✔ Your mobile device connects to the appliance. The connection process may take up to 60 seconds.

5. Open the Home Connect app on your mobile device and carry out the steps in the app.

6. In the Home Connect app, enter the network name (SSID) and password (key) for your home network.
7. Carry out the steps in the Home Connect app to connect the appliance.

✔ If the display shows "con" and lights up permanently, the appliance is connected to the Wi-Fi home network.

8. If the appliance is not connected to the Wi-Fi home network, the display shows "Err".
   – Check whether the appliance is within the range of the Wi-Fi home network.
   – Reconnect the appliance to the Wi-Fi home network with WPS function.
9. Connect the appliance to the Home Connect app → *Page 37*.

## 15.3 Connecting the appliance to the Home Connect app

**Requirements**

- The appliance is connected to the WLAN home network (Wi-Fi).
- The Home Connect app is open and you have logged on.

1. Set the programme to position 3.

✔ The display shows **APP**.

2. Press .

✔ The appliance connects to the Home Connect app.

3. Once your appliance is displayed in the Home Connect app, carry out the last steps in the Home Connect app.

✔ If the display shows "con", the appliance is connected to the Home Connect app.

## 15.4 Activating Wi-Fi on the appliance

**Note:** When Wi-Fi is activated, the energy consumption increases in comparison to the values specified in the consumption value table.

1. Press and hold for approx. 3 seconds.
2. Set the programme to position 4.

✔ The display shows **Con**.

3. Press repeatedly until the display shows **on**.

✔ Wi-Fi is activated.

**Note:** If Wi-Fi is activated, the appliance will not switch itself off automatically.

## 15.5 Deactivating Wi-Fi on the appliance

1. Press and hold for at least three seconds.
2. Set the programme to position 4.

✔ The display shows **Con**.

3. Press repeatedly until the display shows **oFF**.

✔ Wi-Fi is deactivated.

**Note:** The connection is automatically re-established when the Wi-Fi is switched back on.

## 15.6 Resetting the appliance network settings

1. Press and hold for at least 3 seconds.
2. Set the programme to position 5.

✔ The display shows **rES**.

3. Press .

✔ The display shows "YES".

4. Press .

✔ The network settings are reset.

✔ If **End** is shown on the display, the network settings are reset.

## 15.7 Remote start

Enable the appliance for remote start via the Home Connect app.

### Activating remote start

**Notes**

- Remote start is deactivated for safety reasons in the following circumstances:
  - Open the appliance door.
  - Press ▷II .
  - Press .
  - Switch off the appliance.
  - Following a power cut.
- Remote start cannot be activated for safety reasons in the following circumstances:
  - The appliance door is open.
  - The refresher tank is empty.

**Requirements**

- The appliance is connected to your Wi-Fi home network.
- The appliance is connected to the Home Connect app.
- A programme is selected.

▸ Press .

If you press and hold the button for at least 3 seconds, the Home Connect menu opens.
If you briefly press the button, the appliance is enabled for remote start via the Home Connect app.
If you open the appliance door, the function is automatically deactivated.

✔ lights up.

**Note:** To deactivate the function, press .

## 15.8 Intelligent programme recommendation

After you have washed your laundry in the washing machine, the dryer will recommend a suitable programme for drying your laundry.
To determine the best drying programme to use, your appliances must transmit and receive information. Observe the following:

- The washing machine must be an appliance with the Home Connect function.
- The washing machine and dryer must be connected to your home network and registered in your Home Connect app.

### Using the intelligent programme recommendation

1. Set the **Smart Dry** programme.

   The appliance detects a suitable programme.
   If the appliance finds a suitable programme, the display for the programme lights up and the programme information is displayed.
   If the appliance does not find a suitable programme, an audible signal sounds and the display shows .

   **Note:** To cancel or change the programme recommendation, set a different programme or switch the appliance off.
2. Press ▷II .

**Note**

Why is my dryer unable to recommend a programme?

- No suitable drying programmes for the selected washing programme on the dryer.
- No data is available for the last washing programme used. The data is stored for 24 hours and then deleted.

- The washing programme has been cancelled. The washing programme must run through to the end for analysis to be possible.

### 15.9 Remote diagnostics

Customer Service can use Remote Diagnostics to access your appliance if you contact them, have your appliance connected to the Home Connect server and if Remote Diagnostics is available in the country in which you are using the appliance.

**Tip:** For further information and details about the availability of Remote Diagnostics in your country, please visit the service/support section of your local website: www.home-connect.com

### 15.10 Data protection

Please see the information on data protection.
The first time your appliance is registered on a home network connected to the Internet, your appliance will transmit the following types of data to the Home Connect server (initial registration):

- Unique appliance identification (consisting of appliance codes as well as the MAC address of the Wi-Fi communication module installed).
- Security certificate of the Wi-Fi communication module (to ensure a secure data connection).
- The current software and hardware version of your appliance.
- Status of any previous reset to factory settings.

This initial registration prepares the Home Connect functions for use and is only required when you want to use the Home Connect functions for the first time.

**Note:** Please note that the Home Connect functions can only be utilised with the Home Connect app. Information on data protection can be retrieved in the Home Connect app.

## 16 Basic settings

You can configure the appliance to meet your needs.

**Note:** You can find further information in the digital instruction manual by scanning the QR code in the table of contents or on www.bosch-home.com.

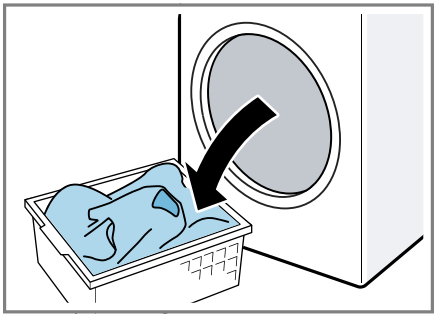

## 17 Appliance care

### 17.1 Preparing the appliance for the appliance care programme

The appliance must be prepared before basic or intensive appliance care is carried out.

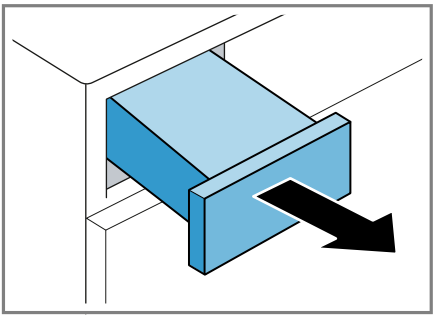

**Requirement:** The base unit is cleaned.
→ *"Cleaning the base unit", Page 47*.

1. Remove the laundry.

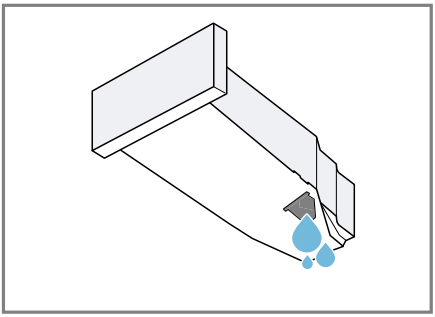

2. Close the appliance door.

3. Pull out the condensation container, keeping it level.

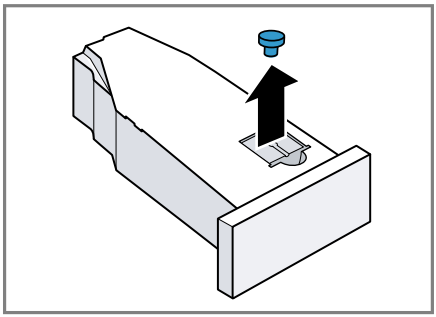

4. Empty the condensation container → *Page 32*.

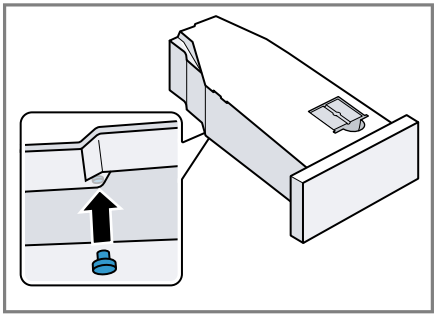

## 17.2 Preparing the condensation container for the appliance care programme

**Note:** If the condensation is drained using the drain hose, the condensation container must be prepared before the basic or intensive appliance care programme.
→ *"Water drain hose", Page 14*Water drain hose

1. Remove the stopper from the recess in the condensation container.

2. Insert the plug from below.

✔ The condensation container is ready for the appliance care programme.

**Note:** If the condensation is drained using the drain hose, perform the above-mentioned steps after the basic or intensive appliance care programme in the reverse order.

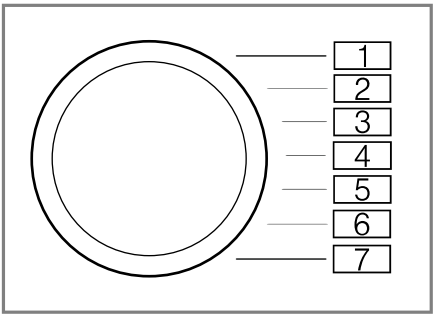

## 17.3 Starting the appliance care programme

**Requirements**

- The appliance is ready to run the appliance care programme.
  → *"Preparing the appliance for the appliance care programme ", Page 39*.
- The condensation container is ready for the appliance care programme.
  → *"Preparing the condensation container for the appliance care programme", Page 40*.

1. Press ⏻.

   The switch-on process takes a few seconds.
2. Set the programme to position 1.

3. Press and hold ☼ ⌓.
4. Set the programme to position 4.
5. Release ☼ ⌓.

✔ "CP1" and the programme duration alternate on the display.

## 17.4 Running the basic appliance care programme on the appliance

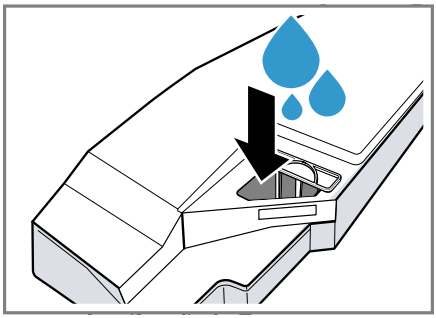

To remove any light soiling, you can run a basic appliance care programme.

**Note:** After a certain period of use, the appliance automatically recommends that you run the basic appliance care programme. Before the start and end of the programme, the display shows the note "CrE" for 5 seconds. The note is shown repeatedly until the basic appliance care programme has been run completely.

**Requirements**

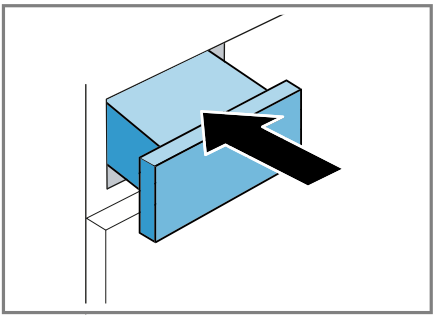

- The appliance is ready to run the appliance care programme.
  → *"Preparing the appliance for the appliance care programme ", Page 39*.
- The appliance care programme has started.
  → *"Starting the appliance care programme", Page 41*

1. Add approx. 1 ½ litres of hot tap water into the condensation container.

Hold the full condensation container level so that no liquid spills out.

2. Insert the condensation container so that it locks into place.

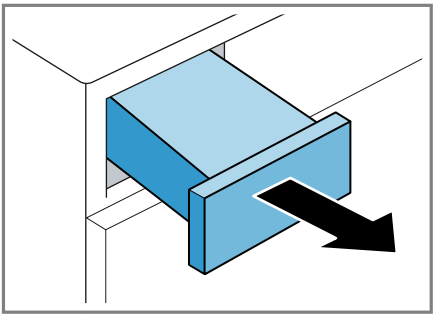

3. Press ▷II .

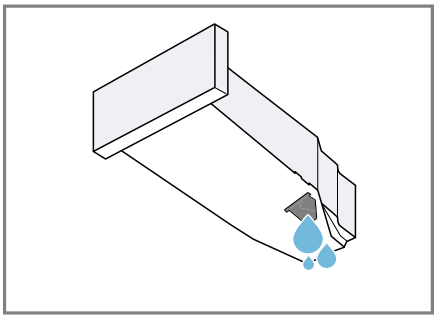

✔ The appliance care programme starts and an audible signal sounds.

✔ "-0-" appears on the display once the appliance care programme has ended and an audible signal sounds.

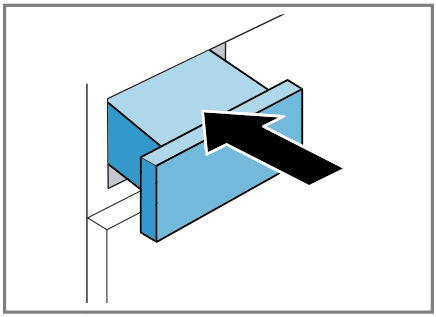

4. Pull out the condensation container, keeping it level.

5. Empty the condensation container → *Page 32*.

6. Insert the condensation container so that it locks into place.

✔ The appliance care programme has been completed.

**Note:** If the condensate water has been drained from the machine via the drain hose, please follow the steps in → *"Preparing the condensation container for the appliance care programme", Page 40* in reverse order, after both the intensive and regular cleaning processes.

## 17.5 Preparing the appliance for the intensive appliance care programme

If the appliance is not used for more than one month, stubborn dirt or odours may occur. To remove this, you can run an intensive appliance care programme.

**Note:** The intensive appliance care programme runs for approximately 4 hours. The programme may take longer if you do not carry out the necessary steps in good time while the programme is running.
Once it has started, the intensive appliance care programme should not be cancelled.

**Requirements**

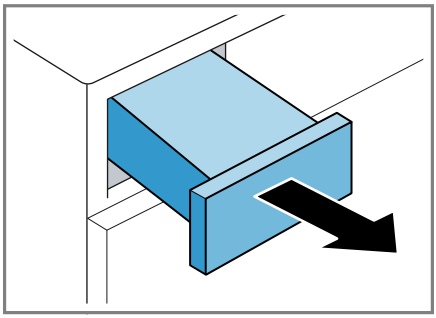

- The appliance is ready to run the appliance care programme.
  → *"Preparing the appliance for the appliance care programme ", Page 39*
- The appliance care programme has started.
  → *"Starting the appliance care programme", Page 41*

▸ Press **+**.

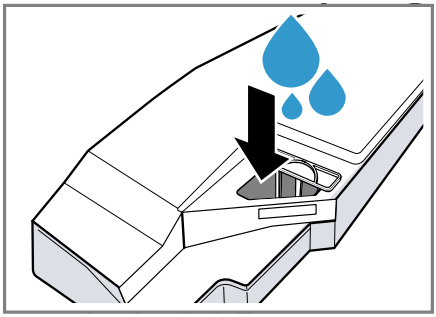

✔ "CP2" and the programme duration alternate on the display.

## 17.6 Running the intensive appliance care programme

1. Pull out the condensation container horizontally and empty it.

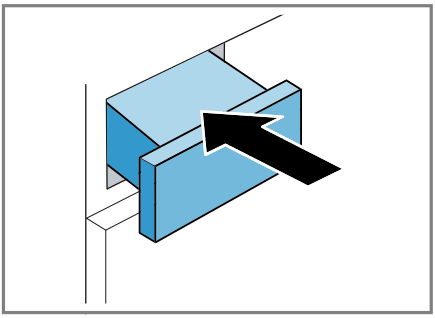

2. Pour a bottle of the original appliance care product
   → *"Accessories", Page 28* and approx. 1 ½ litres of warm tap water into the condensation container.

Hold the full condensation container level so that no liquid spills out.

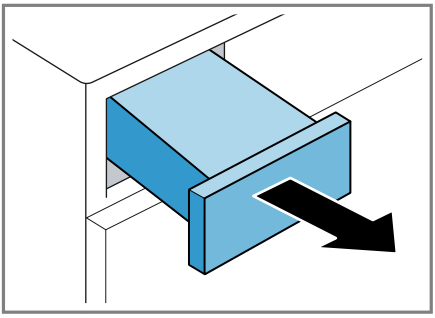

3. Insert the condensation container so that it locks into place.

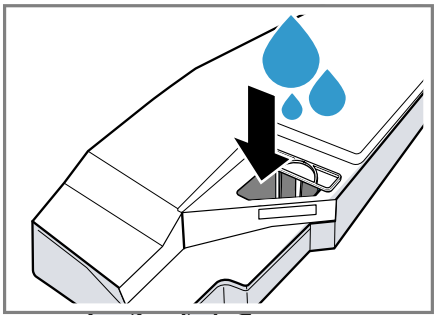

4. Press ▷II . The appliance care programme starts and an audible signal sounds.

   After around 3 hours, the appliance pauses the appliance care programme and the remaining programme duration flashes on the display.

5. Pull out the condensation container horizontally and empty it.

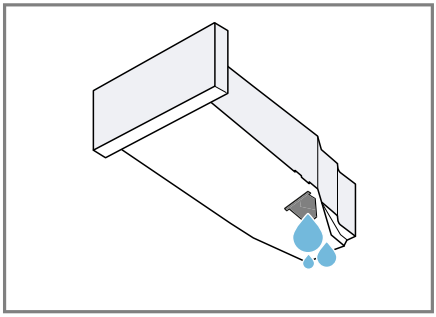

6. Add approx. 1 ½ litres of hot tap water into the condensation container.

   Hold the full condensation container level so that no liquid spills out.

7. Carefully tip and empty the condensation container horizontally in order to remove any remaining original care product.

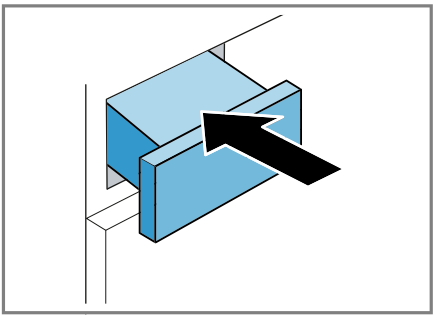

## 17.7 Ending the intensive appliance care programme

1. Add approx. 1 ½ litres of hot tap water into the condensation container.

Hold the full condensation container level so that no liquid spills out.

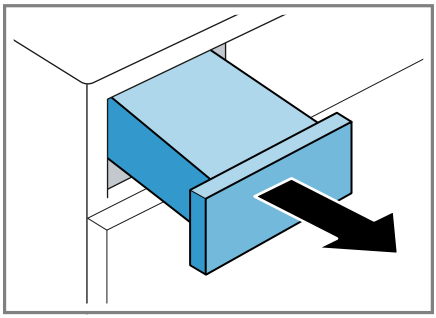

2. Insert the condensation container so that it locks into place.

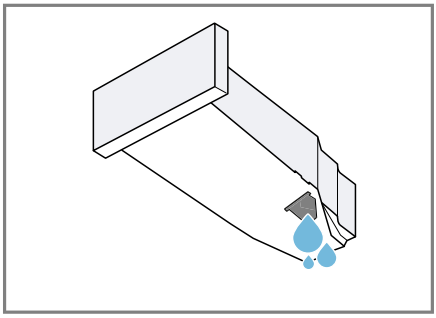

3. Press ▷II .

✔ The appliance care programme is resumed. "-0-" appears on the display and a signal tone sounds once the appliance care programme has ended.

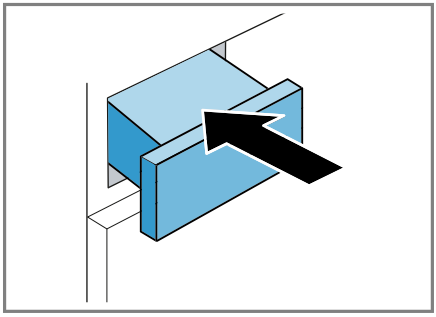

4. Pull out the condensation container, keeping it level.

5. Empty the condensation container → *Page 32*.

6. Insert the condensation container so that it locks into place.

7. Switch off the appliance. → *"Switching off the appliance", Page 30*

✔ The appliance care programme has been completed.

**Note:** If the condensate water has been drained from the machine via the drain hose, please follow the steps in
→ *"Preparing the condensation container for the appliance care programme", Page 40* in reverse order, after both the intensive and regular cleaning processes.

# 18 Cleaning and servicing

To keep your appliance working efficiently for a long time, it is important to clean and maintain it carefully.

**Note:** You can find further information in the digital instruction manual by scanning the QR code in the table of contents or on www.bosch-home.com.

## 18.1 Tips on cleaning and care

| | |
|---|---|
| Wipe down the housing and the controls with nothing but water and a damp cloth. | This ensures the parts of the appliance will remain clean and hygienic. |
| Remove all detergent residue, spray residue or other residues immediately. | Fresh deposits are easier to remove without leaving any residue. |
| Leave the appliance door open after use. | This allows the residual water to dry, reducing odours in the appliance. |

## 18.2 Base unit

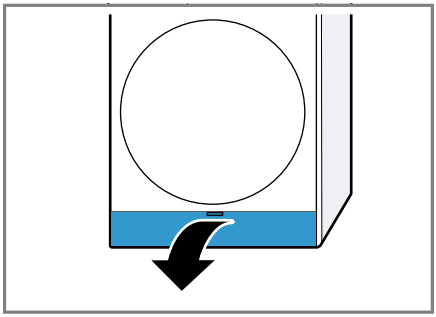

The base unit is the accessible area at the bottom of the appliance in which you will find the heat exchanger.

### Opening the base unit

**Requirements**

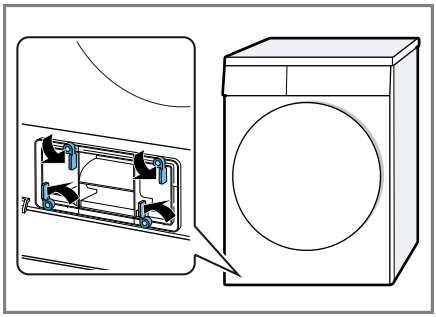

- The appliance has cooled down for 30 minutes.
- The appliance door is closed.

1. Open the maintenance flap.

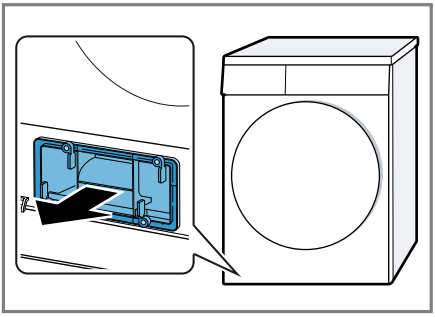

If you place a cloth beneath the maintenance flap, you can collect the remaining water from the base unit.

2. Open the lever for the heat exchanger cover.

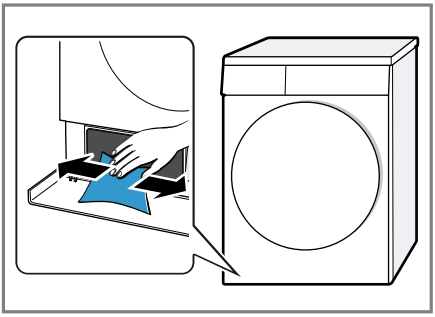

3. Pull out the heat exchanger cover by the handle.

## Cleaning the base unit

You can remove any visible dirt in the base unit.

1. Open the base unit → *Page 46*.
2. Clean the opening with a soft, damp cloth.

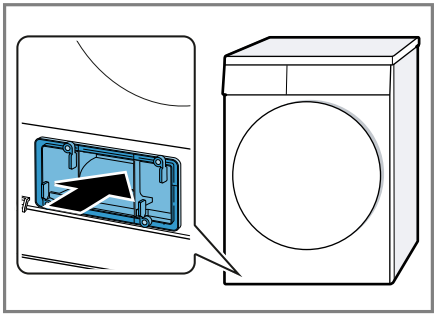

3. Close the base unit → *Page 47*.

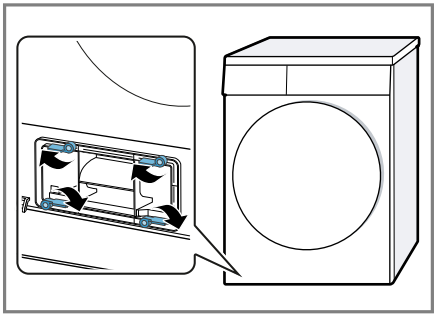

## Closing the base unit

**Requirement:** The base unit is open.
→ *"Opening the base unit", Page 46*

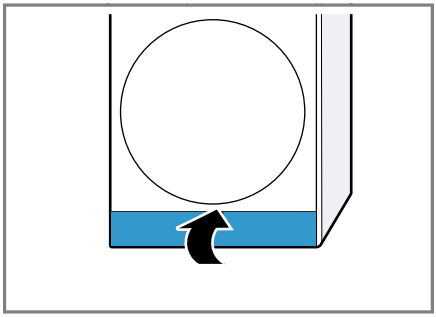

1. Insert the heat exchanger cover by the handle.

2. Close the lever for the heat exchanger.

3. Close the maintenance flap.

## 18.3 Water tank filter

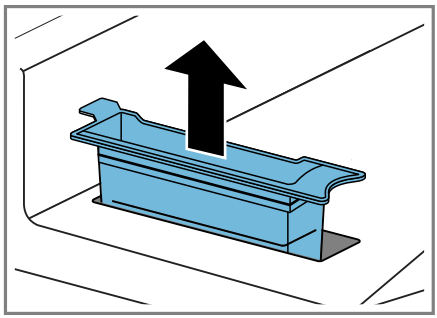

The filter in the water tank protects the appliance from dirt and contaminants.

### Cleaning the water tank filter

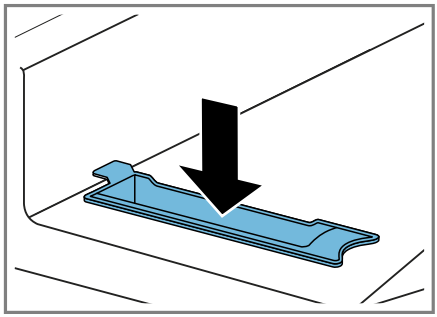

Check the filter regularly and clean the filter if it is dirty.

**Requirement:** The condensation container → *Page 32* is removed from the appliance.

1. Pull out the filter.

2. Clean the filter under warm, running water or in the dishwasher.
3. Fit the filter.

4. Insert the condensation container → *Page 33*.

## 18.4 Moisture sensor

The moisture sensor in this appliance measures how damp the laundry is during the drying cycle. The appliance changes the duration of the automatic programme depending on the residual moisture in the laundry.

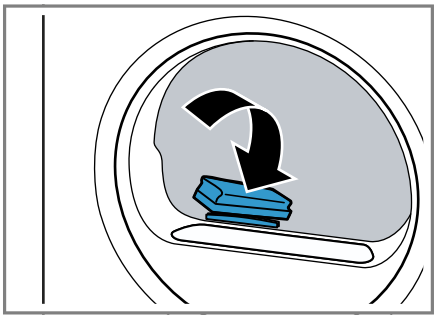

### Cleaning the moisture sensor

Over time, residue from limescale, detergents and care products can build up on the moisture sensor. Clean the moisture sensor regularly.

**ATTENTION!**
Hard or rough objects may damage the moisture sensor.
- ▸ Do not use hard or rough objects, abrasive cleaning products or steel wool for cleaning.

**Note:** If you do not clean the appliance as described, the appliance's functionality may be impaired.

1. Open the door.
2. Clean the moisture sensor with a sponge.

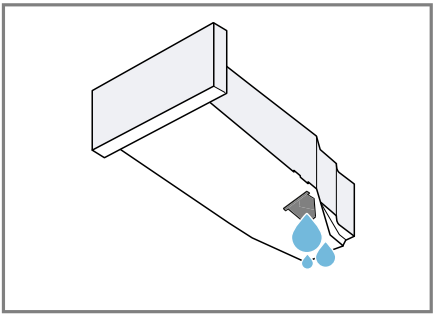

## 18.5 Condensation container filter

During drying, fluff from the laundry gets into the condensation. The filter in the condensation container protects the appliance from fluff.

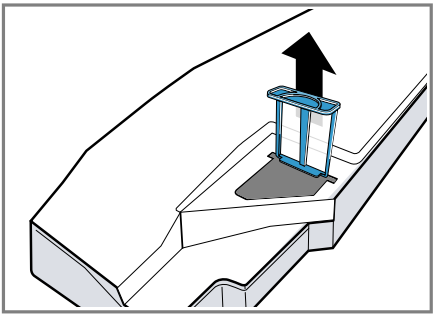

### Clean the filter for the condensation tank.

The filter is cleaned automatically when the condensation container is emptied. Check the filter regularly and clean the filter if it is dirty.

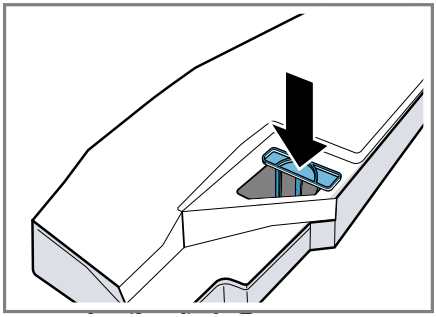

1. Empty the condensation container → *Page 32*.

2. Remove the filter.

3. Clean the filter under warm, running water or in the dishwasher.
4. Slide in the filter as far as it will go.

5. Insert the condensation container → *Page 33*.

# 19 Troubleshooting

You can rectify minor faults on your appliance yourself. Read the troubleshooting information before contacting after-sales service. This will avoid unnecessary costs.

**⚠ WARNING**
**Risk of electric shock!**
Incorrect repairs are dangerous.
- ▸ Repairs to the appliance should only be carried out by trained specialist staff.
- ▸ Only use genuine spare parts when repairing the appliance.
- ▸ If the power cord of this appliance is damaged, it must be replaced by the manufacturer, the manufacturer's Customer Service or a similarly qualified person in order to prevent any risk.

| Fault | Cause and troubleshooting |
|---|---|
| "Hot" and the drum rotates. | Cooling process active.<br>1. Not a fault.<br>2. Do not change the programme during the cooling process.<br>**Note:** The cooling process takes up to 10 minutes. You can continue to operate the appliance. |
| Humming noise. | Compressor active.<br>▸ Not a fault – normal operating noise. |

# 20 Transportation, storage and disposal

You can find out here how to prepare your appliance for transportation and storage. You will also find out how to dispose of old appliances.

## 20.1 Preparing the appliance for transportation

**ATTENTION!**
If the appliance is operated immediately after transportation, the refrigerant contained in the appliance may result in damage to the appliance.
- ▸ Immediately after transporting the appliance, leave it to rest for two hours before putting it into operation.

**Tip:** The appliance may contain residual water, which may drip out of it when transported. The appliance should be transported upright.

**Requirements**
- The condensation container is emptied. Emptying the condensation container → *Page 32*
- The appliance has been switched on.
  → *"Switching on the appliance", Page 29*

1. Set any programme → *Page 29*.
2. Start the programme → *Page 30* and wait 5 minutes.
- ✔ The condensation is drained.
3. Switch off the appliance.
   → *"Switching off the appliance", Page 30*
4. Remove the water drain hose from the connection point.
   → *"Water outlet connection types", Page 16*
5. Secure the water drain hose on the appliance against unintentional loosening.

   Ensure that you do not bend the water drain hose.
6. Empty the condensation container → *Page 32*.
7. Insert the condensation container → *Page 33*.
8. Disconnect the appliance's mains plug from the power supply.
- ✔ The appliance is now ready to be transported.

## 20.2 Disposing of old appliance

Valuable raw materials can be reused by recycling.

**⚠ WARNING**
**Risk of harm to health!**
Children can lock themselves in the appliance, thereby putting their lives at risk.
- ▸ Do not install the appliance behind a door as this may obstruct the appliance door or prevent it from opening.
- ▸ With redundant appliances, unplug the power cord. Then cut through the cord and damage the lock on the appliance door beyond repair so that the appliance door will no longer close.

**⚠ WARNING**
**Risk of fire!**
The refrigerant R290 used in this appliance is environmentally friendly. It is however flammable and may ignite if appliances are not disposed of properly.
- ▸ Dispose of the appliance properly.
- ▸ Do not damage the tubing of the refrigerant circuit.

1. Unplug the appliance from the mains.
2. Cut through the power cord.
3. Dispose of the appliance in an environmentally friendly manner.

   Information about current disposal methods are available from your specialist dealer or local authority.

This appliance is labelled in accordance with European Directive 2012/19/EU concerning used electrical and electronic appliances (waste electrical and electronic equipment - WEEE). The guideline determines the framework for the return and recycling of used appliances as applicable throughout the EU.

# 21 Customer Service

If you have any queries on use, are unable to rectify faults on the appliance yourself or if your appliance needs to be repaired, contact Customer Service.
Function-relevant genuine spare parts according to the corresponding Ecodesign Order can be obtained from Customer Service for a period of at least 10 years from the date on which your appliance was placed on the market within the European Economic Area.

**Note:** Under the terms of the manufacturer's warranty the use of Customer Service is free of charge.

Detailed information on the warranty period and terms of warranty in your country is available from our after-sales service, your retailer or on our website.
If you contact Customer Service, you will require the product number (E-Nr.) and the production number (FD) of your appliance.
The contact details for Customer Service can be found in the enclosed Customer Service directory or on our website.

## 21.1 Product number (E-Nr.) and production number (FD)

You can find the product number (E-Nr.) and the production number (FD) on the appliance's rating plate.
Depending on the model, the rating plate is located:

- On the inside of the door.
- On the inside of the maintenance flap.
- On the rear of the appliance.

Make a note of your appliance's details and the Customer Service telephone number to find them again quickly.

# 22 Consumption values

The programme
**Cotton** +
(denoted by the arrow symbol) is suitable for drying cotton laundry with a normal dampness level, and is the most efficient programme for drying damp cotton laundry in terms of combined energy consumption.
The consumption values for this programme that are declared on the energy label refer to a moisture content of the laundry of 60%.
The values given for other programmes are indicative only and were determined in accordance with the applicable standard EN61121.

The actual values may deviate from the indicated values depending on the type of fabric, composition of laundry to be dried, residual moisture in the fabric, set degree of dryness, amount of laundry being loaded, environmental conditions and the activation of additional functions.
The expected programme duration/"Ready in" time that is shown on the appliance display when selecting the programme is based on the spin speed in the washing machine of 1000 rpm when the appliance is delivered.

| Programme | Final moisture level (%) | Load (kg) | Spin speed (rpm) | Initial moisture level (%) | Programme duration (h:min) | Energy consumption (kWh/cycle) |
|---|---|---|---|---|---|---|
| Cotton + | 0,0 | 9,0 | 1400 | 50 | 2:32 | 1,81 |
| Cotton + | 0,0 | 4,5 | 1400 | 50 | 1:39 | 1,09 |
| Cotton + | 0,0 | 9,0 | 1000 | 60 | 2:51 | 2,10 |
| Cotton + | 0,0 | 4,5 | 1000 | 60 | 1:49 | 1,24 |
| Cotton + | 0,0 | 9,0 | 800 | 70 | 3:10 | 2,39 |
| Cotton + | 0,0 | 4,5 | 800 | 70 | 1:59 | 1,39 |
| Cotton + | 12,0 | 9,0 | 1400 | 50 | 1:55 | 1,24 |
| Cotton + | 12,0 | 4,5 | 1400 | 50 | 1:14 | 0,73 |
| Cotton + | 12,0 | 9,0 | 1000 | 60 | 2:14 | 1,53 |
| Cotton + | 12,0 | 4,5 | 1000 | 60 | 1:24 | 0,88 |
| Cotton + | 12,0 | 9,0 | 800 | 70 | 2:33 | 1,82 |
| Cotton + | 12,0 | 4,5 | 800 | 70 | 1:34 | 1,03 |
| Easy Care + | 2,0 | 3,5 | 800 | 40 | 1:04 | 0,58 |
| Easy Care + | 2,0 | 3,5 | 600 | 50 | 1:13 | 0,69 |

# 23 Technical data

| | |
|---|---|
| Appliance height | 84,2 cm |
| Appliance width | 59,8 cm |
| Appliance depth | 59,9 cm |
| Weight | 56,1 kg[1] |
| Maximum load | 9,0 kg |
| Mains voltage | 220-240 V, 50 Hz |
| ⎓ Minimum installation protection | 10 A |
| Nominal power | 800 W |
| Power consumption | ■ Off mode: 0,10 W<br>■ Left-on mode: 0,10 W |
| Ambient temperature | ■ Minimum: 5 °C<br>■ Maximum: 35 °C |
| Length of the power cable | 145 cm |

[1] Depending on the appliance specifications

This product contains light sources from energy efficiency class F. These light sources are available as a spare part and must only be replaced by trained specialist staff.
You can find more information about your model online at https://eprel.ec.europa.eu/[1]. This web address is linked to the official EU EPREL product database. Please then follow the instructions on searching for the model. The model identifier is made up of the characters before the slash in the product number (E-Nr.) on the rating plate. Alternatively, you can also find the model identifier in the first line of the EU energy label.

# 24 Declaration of Conformity

Robert Bosch Hausgeräte GmbH hereby declares that the appliance with Home Connect functionality conforms to the basic requirements and other relevant provisions of Directive 2014/53/EU.
A detailed RED Declaration of Conformity can be found online at www.bosch-home.com among the additional documents on the product page for your appliance.

CE

Hereby, Robert Bosch Hausgeräte GmbH declares that the appliance with Home Connect functionality is in compliance with relevant statutory requirements.[2]
A detailed Declaration of Conformity can be found online at www.bosch-home.co.uk among the additional documents on the product page for your appliance.[2]
