## Full steam ahead for effortless, quick and safe ironing.

Other than having a good iron, it is also important to know how you can best use it. Here are some general tips to help you with your ironing pile simply and easily.

- ☒ Always follow the garment care label instructions when ironing.
- ☒ If you are planning to do a pile of ironing, always sort them by materials. This is to use the right temperature for the right garment without having to switch over too often. Else, switch to Bosch I-Temp Advanced setting for an ideal temperature for all fabrics.
- ☒ Always start with the garment that require lowest temperature, then step up to garments that require highest temperature. This is to avoid burning delicate fabrics for example, synthetics, silk, wool, cotton and linen.
- ☒ If you have an embroidery pattern, studs or buttons, always iron it face down with a towel underneath. This will keep them in shape and avoid scratching the soleplate of the iron.
