The promise of quality

“I have always acted according to the principle that it is better to lose money than trust. The integrity of my promises, the belief in the value of my products and in my word of honour have always had a higher priority to me than a transitory profit.”

For over 125 years, the Bosch name has been synonymous with engineering excellence. Our home appliances are renowned for their quality, reliability and performance which derives from our inherent, unflagging commitment and the painstaking thoroughness with which every unit is made. As you would expect from German engineering, there are no gimmicks or frills with our products – just pure, clean lines and beautiful, functional simplicity that will enhance any kitchen.

The values that shaped Robert Bosch's vision for his new company in 1886 are the same principles that guide the business today; never lose the trust of your customers, look after your staff and partners and change things for the better. It's what has kept Bosch at the forefront of the home appliance industry and what will keep it there in the future.

Refrigeration | Range overview

Find the right fridge for your kitchen.

All our fridge freezers save you money and ensure optimum freshness thanks to their energy efficiency ratings, clever technology and storage systems. To help you choose the right Bosch fridge freezer we have divided them into four ranges.

Integrated fridge freezer:

Integrate your fridge freezer seamlessly into your kitchen. This model can be concealed entirely behind door panels to match the design of your kitchen cabinetry.

**French Door and Side-by-Side fridge freezer:**

The perfect match if you require a lot of fridge and freezer space. No matter if you need larger quantities for a dinner party or want to stock up your food supplies – this range offers you up to 762 litres of storage space for every big shopping trip.

**Bottom Mount fridge freezer:**

These fridge freezers are fitted with electronic touch control for easy use MultiAirflow system to guarantee constant storage temperatures – this will keep your food healthy and lasting longer.

**Top Mount fridge freezer:**

Our top mount fridge freezers offer plenty of space, storage solutions for fresh fruit and vegetables as well as additional space for bottles. With a 3.5 star energy efficiency rating and Frost Free technology, they offer great value for money.

Refrigeration | Freshness systems

Now the farmer's market takes place in your kitchen – every day.

Thanks to clever technology that regulates temperature and humidity, your fresh food will last longer in one of our fridges. Also, less waste means fewer trips to the shops and more money in your pocket.

VitaFresh plus

Keeps healthy food fresh up to two times longer.

Thanks to special drawer seals, ideal storage conditions are guaranteed in two different climate zones: in the top, drier zone, with a low temperature setting about 0°C, fish and meat can be stored safely. The more perishable the food the lower the temperature should be.

Fruits and vegetables should be stored in the big bottom drawer, which is optimally sealed. Humidity is maintained and can be easily regulated with two settings by an advanced slider mechanism: more humidity is required to store vegetables, less is needed to store fruits.

ChillerBox

Keep fish and meat fresh and safe.

The ChillerBox is a safe place to keep fish, meat and sausages: A cold current of air from the freezer section creates a temperature in the ChillerBox that is lower than in the rest of the refrigerator. Perishable food stays fresh here for much longer. The ChillerBox is also absolutely ideal for chilling drinks.

CrisperBox/VitaFresh

Great space for fresh fruit and vegetables.

The moisture-regulated drawer not only provides plenty of space for fruit and vegetables, it also helps keep them crisp and fresh for longer.

	Sample product	VitaFresh plus	Without VitaFresh plus
Maximum storage time/days			
 Vegetables	Asparagus	up to 15 days	3–5 days
	Lettuce	up to 14 days	3–7 days
	Spinach	up to 10 days	2–5 days
	Artichoke	up to 25 days	10 days
	Cauliflower	up to 20 days	12 days
	Celery	up to 20 days	7–14 days

	Sample product	VitaFresh plus	Without VitaFresh plus
Maximum storage time/days			
 Fruit	Apricots	up to 14 days	7 days
	Grapes	up to 25 days	14 days
	Kiwi fruit	up to 30 days	14–20 days
	Cherries	up to 12 days	7 days
	Peaches	up to 20 days	7 days
	Strawberries	up to 5 days	1–3 days

VitaFresh plus results are based on an independent study comparing Bosch VitaFresh plus refrigerators against Bosch conventional refrigerators performed by an independent research company in the USA. The displayed figures illustrate an average rate of decay of produce stored properly with VitaFresh plus and with conventional refrigeration. All displayed figures are guidelines and depend on factors including the quality of the produce and also assume appropriate storage and an uninterrupted refrigeration cycle from harvest until storage. Individual cases may vary.

Refrigeration | Features and functions

Features and functions
for everyday use.

Performance

FrostFree: You'll never have to defrost your fridge-freezer again.

With a FrostFree model, there's no more condensation of humidity in the appliance or on your food. The generator which draws the heat out of the freezer compartment, defrosts itself automatically from time to time. Thanks to that, there is less humidity in the appliance and practically no formation of ice. This not only saves you time but also energy – because ice formation in conventional refrigerators significantly reduces energy efficiency.

Intelligent Inverter Technology: Guarantees constant storage temperatures.

Thanks to temperature sensors inside and outside the fridge, optimal storage temperatures will be guaranteed for your food. If changes are detected, the electronic system adjusts the cooling power automatically – in this way, the desired temperature will be maintained inside.

MultiAirflow: Even cooling on all levels.

Thanks to a constant stream of cold air on all levels, the ventilator-supported MultiAirflow ensures that there are fewer temperature fluctuations. This also means that the cool-down time is shorter. This feature protects your food and guarantees consistently optimal conditions in the entire refrigeration compartment.

LED lighting: Ideal lighting for the fridge area.

LED lights bring a completely new lighting concept to fridges, guaranteeing even, glare-free interior illumination. LED lights use less electricity than conventional fridge lights and last an (appliance) lifetime.

Freshness

SuperCooling: Cool down your fridge quickly.

Putting new food into your fridge causes the internal temperature to rise, which means the fridge has to work harder to cool down and regulate the temperature again. SuperCooling will prepare your fridge by rapidly reducing the temperature, keeping the contents cool, and quickly cooling the new groceries down to 2°C.

SuperFreezing: Rapidly freeze fresh food.

Adding new food to the freezer can increase the internal temperature, which can affect existing food by partly defrosting. The SuperFreezing function rapidly lowers the temperature in the freezer, ensuring the fresh food is frozen quickly, while surrounding food stays frozen.

AirFresh Filter: No more unpleasant odours in your fridge.

The AirFresh Filter with AntiBacteria actively neutralises odours inside the refrigerator and filters out bacteria. Unpleasant substances from foods with strong odours are absorbed, and the air remains clean and fresh – without replacing the filter for the life of the appliance.

Convenience

TouchControl Panel: Precise control and regulation of the refrigerator and freezer compartments.

Thanks to the elegant, easy-to-read display integrated into the fridge door, you can check the temperature of your fridge and freezer compartments at any time with just a glance. You can adjust the temperature without opening the fridge door – which not only saves you energy, but is also better for your food.

EasyLift glass shelf and door bins: Easily adjust height

The EasyLift glass shelves can be height-adjusted by up to 6 cm. Items don't even need to be removed. And if you need more space upwards in the door, the height of the EasyLift door bin is infinitely variable by up to 40 cm, even when it's fully loaded.

BottleRack: Perfect cooling of beverages.

In addition to space in the fridge door, the BottleRack gives you extra cooling options for beverage bottles. Your bottles will be safe in this specially shaped rack – and they'll be cooled ideally and evenly on all sides, so you can offer your guests plenty of refreshing drinks on hot days.

Telescopic rails: For easy access even to items at the back of drawers

Get even better access to your fresh fruit and vegetable drawers – they glide gently towards you on telescopic rails, which makes inserting and removing food child's play.

Water and ice dispenser: Enjoy cold water and ice instantly

Thanks to our innovative technologies, you can get ice cubes and cold water at the touch of a button. Just place your glass under the dispenser, choose between cold water and ice and enjoy a cold beverage on those hot summer days. And the best thing is, you don't even have to refill a water tank inside the fridge with our plumbed water and ice dispensers.

Ice twister: quick and fuss-free access to ice cubes

A small compartment in the freezer section allows you to easily access, fill and store lots of ice cubes – perfect for a refreshing drink on a hot summer day.

*Available at selected retailers. Please visit www.bosch-home.com.au for list of stockists. All descriptions and technical diagrams are intended as a guide only. For additional technical information, full dimensional and installation details, please refer to the instruction and installation manuals supplied with the appliance.

This much is for sure: you can trust in our service.

Reliable, experienced, fast. The customer service of Bosch; before and after purchase.

Quality service straight from the manufacturer. Original Bosch.

We are committed to quality even when it comes to after-sales service because no one knows Bosch appliances better than our highly trained service engineers. Working with the latest equipment for measuring, diagnostics and repairs, Bosch service engineers only use original Bosch spare parts.

Reliability guaranteed. No compromises.

All Bosch home appliances are produced with maximum care using high-quality materials. We promise it in our 2-year manufacturer's warranty on all appliances.

Lifetime service. It goes without saying at Bosch.

Once your warranty period is over, we are still there to assist you. You can rely on expert care and first-rate service throughout the life cycle of your appliance. From missing instruction manuals to appliance repair – we take care of everything.

Original accessories. Effective care products.

Take a look at our extensive range of accessories for some inspiration: discover additional uses, replace old materials for optimum operation or simply give a trusty home appliance a good work-over. With the right care, you will be able to enjoy your high-quality appliance for many years to come. To help you do so, we offer a wide range of Bosch certified cleaning and care products.

Extensive customer service network. Just a call away.

Customer Care

Our friendly Bosch Customer Care team is on-hand to provide competent, reliable assistance. Before or after purchase, the Bosch team will be happy to advise you on products, their use and special functions.

Service & Repairs

Our team is there to provide the right advice on faults, arranging a visit of a service engineer and ordering the right accessories or spare parts.
