

2 | Bosch Laundry Solutions

Quality comes from experience

No single appliance leaves our factory until it has been proven to meet our high standards of quality, performance and sustainability. This was Robert Bosch's promise when he opened his first workshop in 1886, and this is the promise we strive to keep today. To help us achieve this, we are constantly developing new manufacturing processes.

Every Bosch washer that leaves our factory complies with stringent standards. All sub-assemblies and components undergo thorough inspection before they are included in the production of your new Bosch washing machine. To demonstrate our commitment to quality, a further 2-3% of all production is resubmitted for quality audits. We stand proud by all our products when they leave the factory so you have the confidence you have come to rely on when your appliance arrives.

Models featured: WAW28790AU, WTW87565AU

Choose the right laundry appliance for all your needs.

All our washing machines and dryers offer a range of advanced technologies as standard and additional options across the ranges to suit your individual requirements. To help you choose the right Bosch laundry appliance we have divided them into the ranges as follows.

4 | Bosch Laundry Solutions

Model featured: WAW28440AU

The pinnacle of the Bosch range, our Home Professional Washer and Dryer offer the upmost in style and garment care whilst also maintaining exceptional energy efficiency. The washer features iDos automatic detergent dosing, along with 16 automatic stain removal options which reliably and gently remove stains from even the most delicate clothing. The centrepiece of the dryer is the **EcoSilence Compressor**, which thanks to advanced technology, produces superior drying results up to 8 minutes per kilogram faster than other Bosch heatpump dryers.

Series 8: Enjoy more family time.

The Series 8 appliances not only fulfil all of the demands for perfection, but their clever sensors and functions also reduce your work. Models featuring the i-DOS automatic, self-dosing system add the optimum amount of liquid detergent for every load. While our **ActiveOxygen** model offers superior hygienic cleaning results, even at low temperatures. Our dryers with ActiveAir **technology** reuse air efficiently during the entire drying process. The **SelfCleaning Condenser** saves you the trouble of cleaning it, ensuring your dryer performs at its best, load after load and leaving you with more time to spend with your family. In short, our Series 8 range achieves perfect results with ease.

Washer

Series 6: Your eco-friendly laundry appliance.

Our Series 6 range offer great value for money but do not compromise on Bosch build quality. The Series 6 washing machines with the **EcoSilence Drive** are not only user-friendly, durable and extremely quiet, but they always get your laundry perfectly clean using the least amount of energy. Series 6 dryers are also known for their **sensor technology** that monitors the residual moisture and temperature during the drying process to ensure garments are dried efficiently. Additionally, our Bosch washer/dryer combines the best of both worlds, allowing you to wash and dry your laundry in only 60 minutes.

Series 4: The everyday performer.

In everyday family life, entire mountains of laundry seem to build up. Sometimes you need them to be washed quickly, this is why we have developed **SpeedPerfect**, a wash option in our Series 4 washing machines that operates up to 65% faster, saving you time when you need it. The Series 4 dryers with the Sensitive drying system provide gentle drying thanks to our unique drum structure VarioDrum.

Using too much detergent can result in higher water and energy consumption, as well as visible accumulation of detergent residue on your clothes. On the other hand, too little detergent may lead to stains not being completely removed, discolourations and unpleasant odours. Bosch i-DOS solves this problem by carefully determining the exact wash conditions before dispensing the precise amount of detergent to deliver perfect wash results.

Correct Dosing with i-DOS:

i-DOS, the integrated automatic dosing system, dispenses the correct amount of liquid detergent to the very millilitre. That means less guess work and no more incorrect dosing.

Manual dosing

If you prefer, you can of course continue to dose manually for all programs, except the automatic ones. This is ideal, for instance, when you wish to use a special detergent, powder or stain remover.

·· i-DOS drawer 1

Add up to 1.3 litres of liquid detergent (e.g. universal or colour) to this drawer.

i-DOS drawer 2

Add up to 0.5 litres of liquid detergent or fabric conditioner to this drawer.

Automatic program

All you have to do to obtain perfect washing results is press the start button: with the automatic program, the optimum amount of detergent is dosed automatically and the wash process optimally adjusted to the demands of the particular wash load.

What could be more simple? Fill up once. Wash up to 33 times.*

You can rely on this convenience: fill up once and save every time you wash. Thanks to intelligent automatic dosing and automatic programs, the Bosch i-DOS always does everything exactly right.

This is how i-DOS works:

Special sensors determine the laundry's weight, fabric type and in the automatic programs, even the degree of soiling. Based on these factors, the optimum amount of detergent is dispensed.

Fabric type

Laundry weight

Soiling level

 $[\]hbox{\# Based on Persil standard liquid detergent (1 litre) - average 30ml dose for a normal load}.$

Perfectly clean at low temperatures.

Thanks to our wfk-certified breakthrough ActiveOxygen technology, up to 99.99%* of bacteria and germs are effectively eliminated from even the most delicate fabrics. Even if you choose to wash your clothes at low temperatures to preserve their colours, you can still be assured of optimum hygiene levels without the use of chemical additives. Experience the best possible cleaning result that ensures your favourite clothes are well taken care of.

ActiveOxygen button

ActiveOxygen generator

It's as simple as this:

Select your preferred wash program and activate ActiveOxygen.

During the selected wash cycle, clothes and textiles are thoroughly washed and cleaned.

ActiveOxygen is released before the final spin cycle.

Results

Up to 99.99%* of germs and bacteria removed with ActiveOxygen technology.

Features and functions for everyday use.

EcoSilence Drive

Setting a new benchmark in energy efficiency, the EcoSilence Drive motor works without brushes to eliminate mechanical stress, friction and wear – providing better washing performance. As there is no friction, there is also no excessive motor noise. That makes the EcoSilence Drive one of the quietest motors in its class and the best example that 'less can indeed be more'.

ActiveWater technology

All Bosch washing machines feature an automatic load sensing function that adapts the water consumption to the relevant load size.

AntiVibration side walls

The design of the side walls is not only eye catching, the system also provides greater stability and reduces vibration. The enhanced insulation also regulates noise levels, making Bosch washing machines very quiet even during the spin cycle.

Asymmetrical porthole

The glass of the special asymmetrically curved porthole softly projects into the VarioDrum. It gently returns washing back into the centre of the drum on each rotation, ensuring even circulation.

Sensor technology

A network of intelligent sensors automatically control the wash process that not only ensures perfect wash results, but minimises water and energy consumption.

AquaStop anti-flood protection

The AquaStop system provides 100% anti-flood protection* and is guaranteed for the entire service life of the appliance.

User-friendly interface

Stylish, straightforward control panel with JogDial and LED display for easy selection of wash programs, spin speeds, temperature and other functions.

Child lock

For added safety, the door can be locked manually to prevent children from accidentally opening the door. The buttons can also be locked to prevent tampering during operation.

VarioDrum

The VarioDrum design is gentle on your clothes, offering the best in garment care.

EcoProjection

An LED bar displays five possible levels of water and energy consumption per kilogram, giving you an indicator of the resource efficiency of your chosen program/option combination. The less bars shown, the greater the resource efficiency of the wash cycle.

and options.

Allergy Plus

A higher water level, extra rinse cycles and a higher water temperature (e.g. 60°C) wash away detergent residues left in the laundry for exceptional hygienic cleaning. Good news for those with sensitive skin.

Delicates / Silk

A wash program suitable for silks, delicate viscose and synthetic items. The standard wash temperature is preselected at 30°C, and depending on the fabric wash instructions, may be increased to 40°C or even reduced to a cold wash to provide a temperature-controlled wash.

The wool program is tailored to give the optimum treatment for wool garments. It offers a gentle wash action at an optimum temperature of 30°C. The gentle spin at the end of the cycle extracts water gently, which helps garments retain their shape.

Temperature selection

Manually adjust the temperature of the wash cycle to suit the specific garments in the load.

For stubborn stains or heavily soiled garments, a pre-wash will loosen dirt and remove it prior to the main wash.

Quilt / Duvet

This program uses higher water levels for washing and rinsing. Ideal for washing larger textiles such as quilts, duvets, blankets, bed covers and pillows filled with synthetic fibres up to 2.5kg.

This program has the end sound turned off, thus making it suitable to be run at night. It uses 40°C water to wash and dries at a spin speed of 800rpm with lower noise output. Suitable for cotton, synthetic fabrics or blended fabrics. Maximum load capacity 3.5kg.

SuperQuick 15 / SuperQuick 30

A short wash program of approximately 15 minutes for up to 2kg of lightly soiled washing or a 30 minute wash program for up to 3.5kg. With extra rinse cycles and improved rinse spinning, this is one of the shortest complete wash programs.

Easy Iron

Clothes are tumbled gently during the normal program spin cycle and then at the end of the spin phase. This keeps laundry fluffy and tangle-free for reduced creasing and easy ironing.

Reduces program times for the fastest wash possible - perfect for when speed is of the essence.

Allows most programs to be more resource efficient and is the ultimate program for saving energy.

Sportswear

The Sportswear wash program is designed specifically for performance and sports fabrics with micro-fibre technology, like those used for gym, cycling or jogging. The program offers two rinse cycles with a gentle washing action for greater fabric protection.

Drum Clean

To prevent odour build-up, a regular drum clean is recommended if you regularly wash at 40°C or lower. An LED reminder function will flash after more than 20 washes (of 40 $^{\circ}\text{C}$ or lower) when drum clean is required.

With the 24hr Start Delay, you can enjoy even more flexibility. You can preset the required end time for the washing machine program to be completed by. That way, your washing will be finished exactly when you want.

Mixed load / Mix

A program designed to wash mixed fabrics of up to 3.5kg in approximately 60 minutes. Ideal for garments that need to be washed urgently, without the need to wait for a full load.

Easy Care

Recommended for synthetic and blended fabrics up to 4kg, with a temperature of 60°C.

Cottons Eco

For even greater efficiency, Bosch has developed a program for the resource-savvy. On selected models, the Cottons Eco wash program offers an initial 60 minute wash cycle before the first rinse. Ideal for light-to-medium soiled garments, a longer wash reduces resource consumption, while still providing impressive wash results.

Dark Wash

Dark clothes, particularly jeans, often need special treatment. The Dark Wash program suitable for cotton and synthetic textiles, features low water temperatures, which provide better wash results for darker garments. The gentle washing action helps protect fibres against bleeding and keeps dark clothes looking new.

Shirts / Blouses

This program is ideal for up to 2kg of shirts and blouses. The gentle spin cycle makes ironing effortless and for greater convenience, no-iron shirts can simply be hung to dry.

Front Load Washing Machines.

Heat pump dryer:

The most economical choice

Bosch heat pump dryers are amongst the most economical dryers on the market. Heat pump dryers don't heat the air using heating rods like conventional dryers, but use a heat pump instead. The air used for drying is heated by the heat pump and the existing heat is reused efficiently during the entire drying process.

Thanks to our **patented SelfCleaning Condenser** which cleans itself automatically up to four times per drying process, our Bosch heat pump dryers stay efficient during the entire working life of the machine – and you don't have to do any cleaning.

In addition, heat pump dryers don't need to be vented to the outside. Enjoy peace of mind and perfect results with our Bosch heat pump dryers.

Condenser dryer: No need for a hole in the wall

Our Bosch condenser tumble dryers are not only **economical to use**, they also don't need to be vented to direct hot air to the outside, which makes them the perfect choice for rentals. The moisture extracted from the washing is pumped to the drain, so you don't even need to empty the water container after

Faster drying with outside ducting

In a vented dryer your washing **dries particularly fast** and to just the right level of dryness thanks to our ingenious programs. Vented dryers operate via a heating element that blows hot air through the clothes to evaporate the water. The damp air is then directed through a venting hose at the back of the dryer to the outside

SelfCleaning Condenser

The patented SelfCleaning Condenser not only saves you the chore of manual cleaning, it also ensures the dryer performs economically with optimal energy efficiency.

Intelligent sensors monitor the temperature and residual moisture content throughout the drying process to ensure your garments are dried precisely to the desired setting without over or under heating. This ensures garments are treated with maximum care whether you select iron, cupboard or extra dry programs.

The time remaining display shows you how long is left in the program, while the delay function allows you to delay the start of drying for 60 minutes or up to 24 hours.

Sensitive drying system

A textile-friendly drum design and SoftFlow paddles ensure soft and fluffy laundry. The large capacity drum (depending on model) additionally protects laundry and reduces creasing.

User-friendly interface

All functions are now easier and faster to access thanks to the new user logics and light guidance system.

Selected Bosch dryers have a clear glass door, which offers maximum visibility during the drying program.

AntiVibration side walls

Psst! The special AntiVibration design of the side walls makes Bosch washing machines and dryers extremely quiet. It also helps reduce vibrations and ensures greater stability... just in case you want to do the drying at night.

A gentle drying program developed to handle performance and sports fabrics with micro-fibre technology that complements the Sportswear washing program in selected Bosch washers.

Down Wear

This special drying program is a moisture-controlled program with interval spinning. It dries up to 1.5kg of down clothing to soft and feather-light perfection without the addition of agitating aids (e.g. tennis balls).

Even heavy textiles are fully dried thanks to moisture-controlled programs in which the degree of moisture remaining in the garments is constantly measured. Terry towelling items like bath robes and hand towels come out soft and fluffy.

Wool / Shoes in basket program

A time based special program that allows your woollen clothing / favourite shoes to be dried using the woollen basket and therefore ideal for items that do not require mechanical action.

Easy Iron

The reduced ironing feature with 2 setting options helps reduce creasing and extends the anti-creasing phase once the program

Low Heat Delicates

Bosch dryers have an innovative low heat feature that protects temperature sensitive textiles by automatically reducing the heat and extending the drying time.

SuperQuick 40

The SuperQuick 40 option is designed for washing to be dried quickly - maximum 2kg load. Specifically for synthetic fabrics, cotton and blended fabrics.

Not only have we rolled two appliances into one, we've also made sure the Bosch Washer Dryer is a top performer.

AirCondensation Technology

Did you know that some washer/dryers use water to dry clothes? At Bosch, we think that's wasteful so we developed AirCondensation Technology.

Thanks to this revolutionary technique, the condensation system uses air to dry your clothes instead of water, making it one of the most efficient dryers on the market.

Technical Information	Dimensions (HxWxD)mm	845 x 600 x 600

Serie 6

Save space by stacking.

By stacking your dryer on top of your front load washing machine, the footprint in the laundry is only approx. 0.34m². Both can be stacked together with the aid of a stacking kit.

Stacking kits anchor the machines together to ensure stability and ease of use. The stacking kit with pull out drawer can also hold up to 15kg for total in-laundry convenience.

Laundry Accessories and Stacking Kits				
WTZ11311	Stacking kit, suits WTA74200AU dryer with all washer types			
WTZ20410	Stacking kit, suits WTB86200AU, WTG86400AU, WTW87565AU, WTY88701AU and WTY877W0AU dryers with all washer types

Quality Service.

The customer service of Bosch, before and after purchase.

Important notes

Model numbers and specifications are for reference only and subject to change without prior notice.

For additional information on products, please refer to your local Bosch retailer. Bosch is continuously seeking to improve specification, design and production of its appliances and alterations may take place regularly.

All descriptions and technical diagrams are intended as a guide only. For additional technical information, full dimensional and installation details, please refer to the instruction and installation manuals supplied with the appliance.

The electrical and water connection should only be made in accordance with the regulations of the national authorities.

For model and accessory availability, please contact BSH Home Appliances Limited.

(See back cover for details)

Quality service for quality appliances

Quality of our after-sales service is just as important as the quality of our products. In the unlikely event that service is required on your appliance, our extensive network of authorised service agents throughout New Zealand will ensure you are provided with the full support to ensure your appliance is operating at optimal condition.

Warranty

All Bosch products are covered under a 2-year comprehensive parts and labour warranty.

EcoSilence Drive

More energy-efficient, stronger, quieter and longer-lasting.

10 year motor warranty on washing machine models that feature the EcoSilence Drive.
