GAGGENAU

In 1683, from the depths of the Black Forest, a flame sprang to life and the age of the industrial craftsmanship began.

333 years of working with metal is an achievement only few can claim. It exposes a success that has crossed time, distance and cultures. Gaggenau is not just a kitchen appliance; it is the soul of a home and it is this passion that has been 333 years in the making.

Gaggenau is refined engineering and rugged design. We offer the eye a clean, minimalist line, and the chef immense control and capabilities. Open a door, turn a control knob, press a button, feel the difference.

...in the making since

1683

The difference is **Gaggenau**.

Authenticity. We attach great importance to the quality and careful selection of materials. We make products that are not only durable, but that also have a completely unique feel. By choosing materials based on their natural strengths, we create a perfect balance between form and function.

Uncompromising innovation. We take our inspiration from professional-grade kitchens to create an incomparable experience. By focusing on the needs and experience of professional chefs, we constantly reinforce our position as innovation leader.

Extraordinary performance. The story of Gaggenau's success, which dates back more than 330 years, is above all one of extraordinary products: unique appliances born of uncompromising standards in terms of quality, design and materials.
