**Predicted reliability** Predicted reliability icons are based on estimated breakage rates for newly purchased dishwashers, not under service contract, within the first five years of ownership.

**Owner satisfaction** Owner satisfaction icons are based on the proportion of members who are extremely likely to recommend their dishwasher to their friends and family.

**Washing** Assessed by running the sensor, normal or equivalent cycle to clean a full load of dishes with baked-on food.

**Drying** Drying is our assessment of how thoroughly a model dries

plastic items, the most stubborn in any load. We evaluate drying performance using the same cycle we use for our Washing test. As directed by manufacturers, we use rinse aid in every load.

**Energy use** The normal cycle is used for the yellow energy sticker. Our score is based on the selected wash cycle. The largest portion is needed for heating water, both at the water heater and in the machine.

**Noise** Judged during fill, wash, and drain, mainly by a listening panel.

**Cycle time** Based on running the washing test cycle to clean a full load with high temperature options selected (if available).
