“I would rather lose money
than trust.”

Robert Bosch

It's a Bosch!

Robert Bosch, our founder, centered the organisation's philosophy on performing even the smallest of tasks to perfection. For decades we have upheld this belief by creating home appliances of unparalleled quality that deliver absolute perfection.

Our assurance of perfection is credited to German engineering - a combination of high class workmanship, creativity and the innovative strength of our engineers. Crafted with the finest quality materials, our products are hailed as the finest in Europe.

Why choose Bosch?

Proven quality

Bosch appliances offer premium quality, advanced technology, ease of operation and German engineering. These attributes have earned us many national and international accolades, such as the Red Dot Design Award, the iF product design award and other endorsements, year after year.

Top performance

What drives us every day is our desire to improve. We strive to make the best even better, by developing functional, durable and energy-efficient innovations that surpass all expectations.

Making your life easier

Our refrigerators are packed with great ideas, features and technology like the best fridge is to freezer ratio ideal for Indian usage, a freshness system which keeps food fresh for longer and energy efficiency to make your kitchen better and more efficient than ever.

Refrigerator Space | Surprisingly spacious

Refrigerators with the Biggest Fridge Space in India[#]

Thanks to our eating habits, we need more space in the fridge section than the freezer section. This led our German designers and engineers to design the product range with the biggest fridge section in India[#].

Biggest crisper box in the market[^]

The VitaFresh compartment in the Bosch Refrigerator is so roomy, that other crisper boxes could fit in to ours with couple of inches to spare.

BIGGEST FRIDGE SPACE IN INDIA[#]

Freezer

[#]As per internal test, in comparison Bosch products have a better Fridge:Freezer ratio compared to competition as per available market information, within the same capacity classes.
[^]As per internal test in comparison, Bosch products have a bigger size crisper box compared to competition as per available market information, within the same capacity class
^{**}T&C apply. Features available in select models only. Refer specification sheet for details.

 **VitaFresh** | Keeps food fresh longer

Technology that keeps apples fresh for 120 days⁺

Bosch refrigerators come equipped with the VitaFresh ^{plus} system which is a product of unique German innovation. It balances the humidity in the vegetables and fruits compartment ensuring that the food stays fresh for really long! VitaFresh ^{plus} efficiently maintains the original flavour, texture and appearance of fruits and vegetables and you are assured of fresh tasting food every day.

 **VitaFresh**
Up to 10 days⁺

⁺Actual storage life of fruits and vegetables may vary depending on the state of the food item when bought, type of storage compartment and different test and storage condition.
⁺VitaFresh freshness system may vary depending on the model. Please refer to specification information for more details.
⁺VitaFresh Plus results are based on an independent study comparing Bosch VitaFresh Plus refrigerators against Bosch conventional refrigerators performed by an independent research company in the USA. The displayed figures illustrate an average rate of decay of produce stored properly with VitaFresh Plus and with conventional refrigeration. All displayed figures are guidelines and depend on factors including the quality of the produce and also assume appropriate storage and an uninterrupted refrigeration cycle from harvest until storage. Individual cases may vary.

VarioCompressor | Save up to 30% on energy¹

Refrigerators that are energy efficient 100% of the time

The refrigerator in your house has to run 24/7, 365 days a year. Thanks to Bosch technology, our refrigerators provide energy efficiency and performance at the same time.

VarioCompressor

While Bosch refrigerators keep your fruits and vegetables fresh, they do so super efficiently. They are designed to give you all the cooling power you need, while using as much electricity as it takes to power a single light bulb².

Home UPS compatible

Runs on home invertor/UPS during power cut³

Automatic holiday mode

Automatically detects the usage and goes into energy-saving mode after 8 hours

Lower noise levels

Lowest noise level among models within the same capacity class⁴

Automatic fan stop

The fan switches off as soon as the fridge door opens. It helps keep the cold air inside and saves energy.

Cooling retention

Best and most effective cooling retention. Maintains a temperature of -6° in the freezer and 8° in the fridge after 14*/16* hours of power cut⁴.

Energy efficient

Consumes less energy than 1 CFL Bulb².

Durability

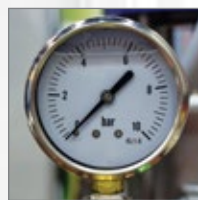

10 year warranty on compressor[~]

1. T&C: For Vario compressor saving up to 30% is based on internal test based on IS15750 and in comparison with 2017 models (KDN43VS20I vs KDN43VS30I)
2. 1CFL bulb of 11kW
3. Conditions subject to home invertor/UPS capacity
4. Est conducted in BSH lab under defined test conditions *In Top Freezer models KDN30VS30I, KDN30VR30I, KDN43VS30I, KDN43VR30I, KDN30VV30I, KDN30VU30I, KDN43VV30I and KDN43VU30I
**In Side-By-Side models KAN56V40NE
~Terms & conditions apply.

VarioInvertor Compressor | Save up to 40% energy**

An inverter that adjusts to both
what’s inside and outside the fridge:
VarioInverter Compressor

Like the VarioCompressor, but unlike a conventional compressor that operates consistently at a single speed, the Bosch VarioInverter compressor adjusts its speed efficiently according to the surrounding conditions and refrigerator loads.

**Makes the best out of
a low voltage situation**

Bosch refrigerators can now operate safely without a stabilizer while withstanding voltage fluctuations between the range of 135V and 290V**.

Fast cooling

VarioInverter reaches the desired temperature faster than conventional compressors.

**A compressor that could
help you save up to 40%
on your electricity bill**

The VarioInverter Compressor adjusts the compressor speed to the current conditions inside and outside the refrigerator, using least amount of power.

**10 year warranty
on compressor~**

Bosch refrigerators are long running and conveniently low maintenance.

**In selected models only (BEE 2016). Please refer to specifications list for details.
*Based on Singapore's test requirements between similar Bosch bottom freezer models. Energy savings may vary depending on test conditions and models.
~T&C: For VarioInverter compressor saving up to 40% is based on internal test based on IS15750 and in comparison with 201X models (KDN43VS201 vs KDN43VL40U).
-Terms & conditions apply

Sensors | Precise temperature control

Sensors that keep an eye out for energy saving

Bosch Refrigerators come equipped with many sensors that make them more efficient and less energy-consuming.

Freezer Sensor

It provides very precise temperature compartment control, with compressor activation to cool down and keep food properly stored.

Evap sensor

The Evap sensor waits till the evaporator is free of frost then starts the compressor again. This ensures very precise defrost time control and energy saving.

Fridge Sensor

The fridge sensor keeps track of the fridge temperature, starting the compressor only when needed. This allows for very precise temperature control.

Freezer doorswitch sensor

Sensors on the freezer door count the number of times the door opens and defrost only as often as necessary.

Fridge doorswitch sensor

Sensors on the fridge door count the number of times the door opens and defrost only as often as necessary.

*T&C Apply. Different sensors in different models.

TwinCooling | Separate cooling system

A refrigerator that cools faster and stays that way longer

The TwinCooling System is a highlight with this refrigerator. Cold air is not shared between the fridge and the freezer. The temperature in the freezer and fridge is maintained constant at the desired level and is subject to very less fluctuation. Thus there is no transfer of odour and humidity from the fridge to freezer and vice versa. Power consumption is also reduced as the cooling systems function optimally in their respective sections:

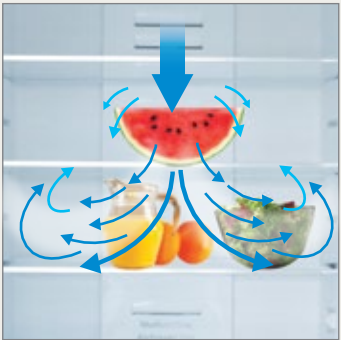

DoorAirFlow*

A system that makes sure cool air reaches every nook and corner of the door.

Super Cooling

Thanks to a faster rate of cooling, you can reduce the fridge/freezer temperature quickly. The compressor automatically switches off once it's done. From now on, you won't have to wait for your favourite drinks to cool.

Multi Airflow*

Multi Air Flow is designed to improve the circulation of air. It regulates temperature and also eliminates all possibilities of condensation.

* In selected models only. Please refer to specifications list for details.

Cooling Retention Technology | Keeps cool during power cut

A refrigerator that stays cool even after a 16 hour power cut

The Bosch cooling retention technology keeps the fridge cool for 16^h hours even after a power cut. The temperatures in the fridge and the freezer are maintained at 8°C and -6°C respectively.

^hIn selected models only. Please refer to specifications list for details.

Additional features

NoFrost

This technology protects food from ice crystal formation so there is no need to defrost again.

Ice Twister

IceTwister is easy to operate and gives quick and fuss-free access to ice cubes.

AirFresh Filter

This filter eliminates odour and filters the bacteria inside the fridge so that food smells good. You'll never need to change the filter. It lasts for the entire life span of the fridge.

Wine Rack

Wine bottles need to be stored at the optimum angle, so we designed this shelf which also works as a no-roll shelf.

Easy Access Shelf

Get easy access to all your food thanks to a layout that makes even the back-bench items easy to spot.

Safety Glass Shelf

Easy to clean and therefore maintains a hygienic storage environment.

Electronic Temperature Control With Touch Screen Controller

This regulates temperature, ensuring the selected temperature setting is accurately maintained at all times. The tempered glass touch panel can be cleaned with a simple wipe.

LED Light

LED light illumination is brighter, more energy efficient and longer-lasting than conventional light bulbs.

Low Voltage Startability

Even when the voltage is low, Bosch fridges have no problem starting. They can withstand voltage fluctuations within the range of 135-290V.

Perfect Fit

No distance to wall or furniture needed. Even if you have to place the fridge directly next to the side wall, you have full access. Also, you get full access to all drawers even if placed directly to side wall thanks to a 90° opening angle.

Double Layer Door Pocket

A useful pocket to help you organize bottles of different sizes with ease.

Movable Twist Ice Tray

Being able to shift the position of the ice tray allows you flexibility for better use of the storage space.

*In selected models only. Please refer to specifications list for details.

Service you can depend on.

Expert, fast and reliable customer service from Bosch, before and after your purchase. Bosch is your partner for life.

Reliability guaranteed. No compromises.

All Bosch home appliances are produced with maximum care, using quality materials. We promise it in our manufacturer’s warranty on our appliances.

Speedy Response

Our customer’s time is valuable and so we react quickly. We aim for a business response time of 48 hrs from your call, offering on-site diagnosis and repairs. Our customer’s time is valuable and so we respond quickly.

Quality service straight from the manufacturer. Original Bosch.

We are committed to quality – also when it comes to after sales service. No-one knows our appliances better than our highly trained service engineers. They are working with the latest equipment for measuring, diagnostics and repairs, and use only original Bosch spare parts.

Lifetime service. It goes without saying at Bosch.

Once your warranty period is over, we are still there to assist you. You can rely on our expert care and first-rate service throughout your appliance’s life cycle. From missing instruction manual to appliance repair – we take care of everything. A promise is a promise!

Original accessories. Effective care products.

Take a look at our extensive range of accessories for some inspiration: discover additional uses, replace old material for optimum operation or simply give a trusty home appliance a good work-over. With the right care, you will be able to enjoy your high quality appliance for many years to come. To help you do so, we offer a wide range of Bosch-certified cleaning and care products.

On-Call

Our friendly Bosch Customer Service team provides competent, reliable assistance for all of your needs; whether that is product advice, to arranging a visit from a service engineer, or ordering the right original accessories or spare parts.

For engineer visits, spare parts replacement and accessories or product advice, please contact:
