Bosch in every detail. German Engineered.

Everyone knows Germans deliver world-class performance and quality craftmanship through making precise, powerful machines. Using the most advanced German technologies, we have created an Asian-inspired washing machine engineered to provide you an unsurpassed laundry experience.

Why choose Bosch?

Bosch quality

All Bosch products are manufactured to highest possible standards, using only premium quality materials. We undertake quality and endurance test for our products under continuous usage conditioning to further strengthen the customer's peace of mind.

Green Technology inside

This signet denotes products that focus on energy and water efficiency while achieving top performance based on Bosch technologies.

10 Year EcoSilence Drive® motor warranty

Bosch assures our customers with a 10 year motor warranty for our innovative EcoSilence Drive TM .

Professional washing solutions.

Bosch HomeProfessional boasts the very latest technology, offering you maximum washing power, minimum consumption and lots of convenient functions and programmes.

ActiveWater™

All Bosch washing machines feature an automatic load sensing function that adapts the water consumption to the relevant load size.

The reload function allows additional items of laundry to be added on after the programme

has started by pressing the start / reload button easily.

Reload function

^{*} Image for illustration purpose only.

^{*} Features applicable for specific washers only.

The unique waved surface of the drum, with its steep and flat structures is designed for both powerful and gentle treatment of laundry.

AquaStop™ **Anti-flood protection**

The AquaStop™ system includes a valve that is directly connected to the water tap. Should a leak be detected, the sensor activates and cuts off water supply at the tap connection, which prevents flooding.

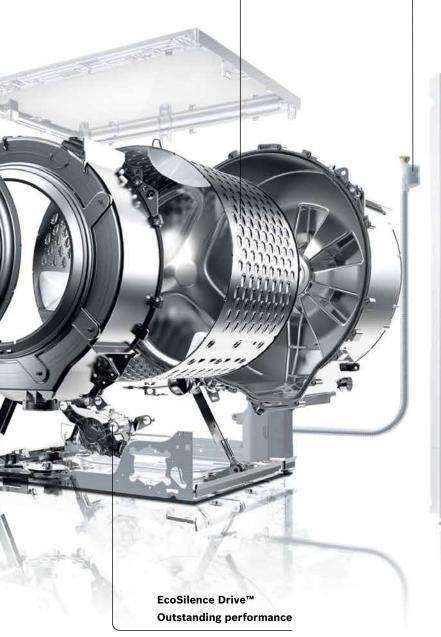

AntiVibration™

Our AntiVibration™ design increases stability of the housing and reduces vibrations.

design

Automatic Load Sensing

Detects the load quantity and ensures only the amount of electricity and water required for that load is used.

Powerful, durable, quiet and efficient. That is the brushless motor that provides better overall washing performance.

Breakthrough innovation

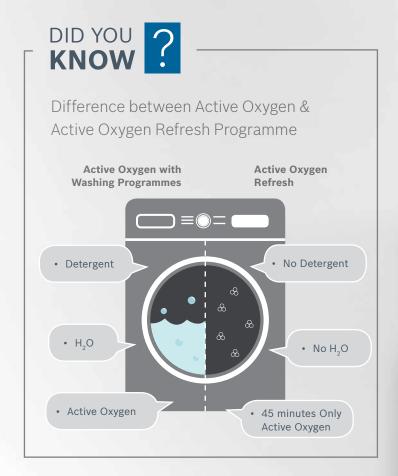

Hygienically clean at very low temperatures.

Active Oxygen

Thanks to our wfk-certified breakthrough ActiveOxygen[™] technology, up to 99.99%* of bacteria and germs are effectively eliminated from even the most delicate fabrics.

Even if you choose to wash your clothes at low temperatures to preserve their colours, you can still be assured of optimum hygiene levels without the use of chemical additives. Experience the best possible cleaning result that ensures your favourite clothes are well taken care of.

^{*} Up to 99.99% of E.coli, C. albicans, S. enterica, A. brasiliensis, S. aureus, Bacteriophage MS2 in the "Fast / mix cold" programme with regular liquid detergent in the recommended amount and a 4kg load - test MB 7623/15 of 29 July 2015 at the wfk - Institute for Applied Research GmbH for BSH Hausgeräte GmbH.

Active Oxygen Refresh

Our new Active Oxygen™
Refresh programme uses
breakthrough technology
to clean and remove
odours so you can freshen
your laundry with a quick,
hygienic wash.

Freshens in 45 minutes

A quick 45 minutes is all it takes to freshen up your clothes and also removes the BBQ odour from a smoky dinner out!

Garment Protection

Preserves delicate fabrics and colours as it cleans thoroughly even at low temperatures.

A whole new level of hygiene

Eliminates up to 99.99% of germs and bacteria with Active Oxygen™ that hygienically cleans without a need for chemical additives.

A quick guide to using ActiveOxygen™

2

Before washing cycle begins, ActiveOxygen™ will pretreat garments. A fine mist of ActiveOxygen, which is produced by the system itself, is emitted from the drum. No other chemicals additives are needed.

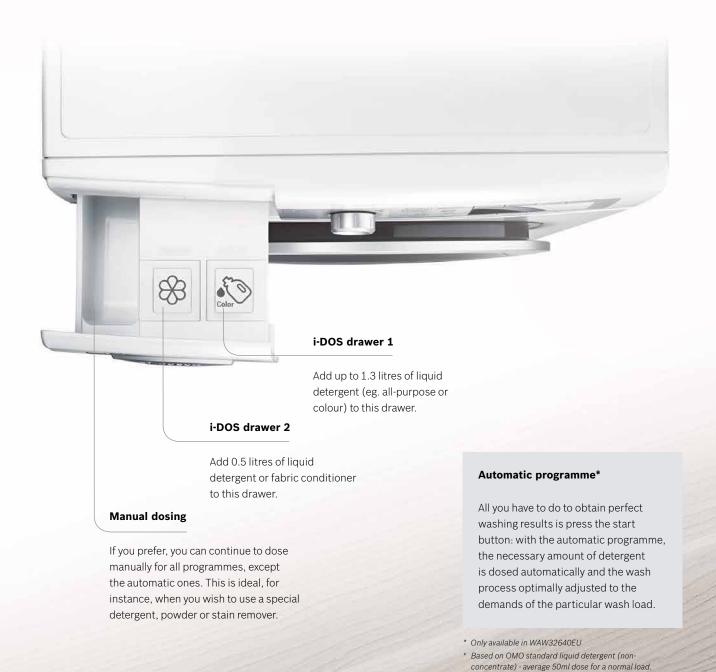

4

Your laundry is treated with ActiveOxygen $^{\text{\tiny{TM}}}$ again before the final spin cycle.

Results

Up to 99.99% of germs and bacteria removed with ActiveOxygen™ technology even at very low temperature. You can rely on this convenience; fill up once and save every time you wash. Thanks to this unique intelligent automatic dosing, you can now not only save detergent but also the equivalent of around 58 bathtubs full of water per year.

Overdosing	Underdosing	Correct Dosing
Too much detergent is not only harmful to your laundry and your skin; it also means increased consumption of water and energy.	Too little detergent is false economy since you'll have to wash clothes repeatedly in order to get them really clean.	i-DOS, the integrated automatic dosing system, dispenses the correct amount of liquid detergent to the very millilitre. That means a reduction of up to 30% in detergent requirements and a saving of up to 7.062* litres of water a year.

This is how i-DOS works:

Special sensors determine the laundry's weight, fabric type and in the automatic programmes, water hardness, and even the degree of soiling. Based on these factors, the optimum amount of detergent is dispensed.

EcoSilence Drive™ combined with AntiVibration™ design makes
Bosch washing machines among the quietest machines ever built.

Experience the power and energy efficiency of EcoSilence™ Drive

This revolutionary brushless motor is quieter, faster, more energy-efficient, durable and powerful than all others before it. Utilising the same advanced technology used in efficient machines such as wind turbines, the EcoSilence Drive™ achieves maximum power with minimum energy loss.

More efficiency – Thanks to its innovative design, the EcoSilence Drive™ is 35% more efficient than a standard motor.

More stability with AntiVibration™ design

The special AntiVibration™ design of the side walls increases stability and reduces vibrations. Improved sound insulation and low noise shock absorbers dampen noise further giving you a whisper-quiet machine.

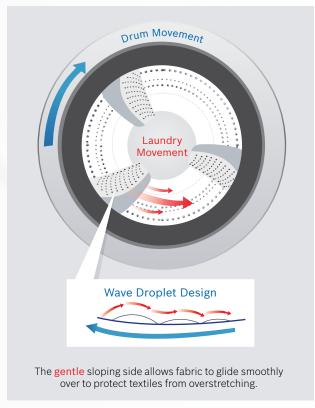

Gentle & thorough wash with VarioDrum™

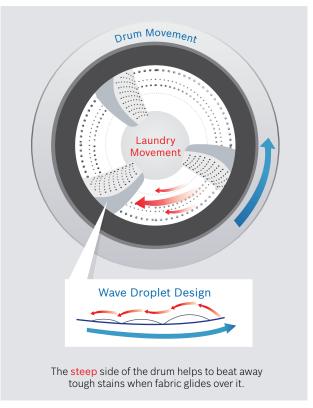

The VarioDrum[™] caters to all fabrics, taking into consideration the varied Asian climate. In one direction, the flat side of the paddle is extremely soft on fine textiles. If the drum rotates in the opposite direction, the steep side of the paddle ensures intensive cleaning for heavily soiled garments.

Furthermore, the wave droplets improve cleaning performance by providing additional surface contact with soiled garments in both directions. The spacious drum, optimised for loads of up to 9kg, turns out a perfect wash result, everytime.

Illustration of VarioDrum™ during a wash cycle

Gentle on fabrics Tough on stains

Just 60 minutes for laundry.

ExpressWash

We at Bosch know that quality time for you and your family is important. That is why we save every precious second of yours with our new range of washing machines with ExpressWash.

Designed to wash your clothes in less than 60 minutes[^], we push the boundaries of how fast laundry can be done while keeping the results pristine perfect for you.

Programme	Normal wash cycle	With ExpressWash*
Cottons	175 MIN	60 MIN
Synthetics	119 MIN	59 MIN

^ Please refer to specifications for details on the list of wash programmes that can be completed within 60 mins.

Wash Programmes to suit every need.

Be it your new jeans, woollen garments, or favourite party dress, Bosch offers a number of special programmes to provide the ultimate in garment care and convenience.

SuperQuick 15' / 30'

Short wash programme of approximately 15 / 30 minutes for up to 2 / 3.5kg of lightly soiled washing. Packing in a wash, two rinse cycles and improved rinse spinning, this is one of the shortest complete wash programmes in the market.

AllergyPlus

Reduces exposure to allergens that irritate sensitive skin by prolonging the maximum wash temperature, increasing the water level and adding an extra rinse to the wash cycle.

Automatic Programmes

2 automatic programmes which offer the ultimate in convenience: just press the button to automatically adjust the wash programme and dosing to the type of washing, load size and degree of soiling for perfect washing and rinsing results.

Mix / Daily Wash

Designed to wash mixed loads of cottons and synthetic fabrics.

^{*} Features vary depending on models.

Wool Programme

Tailored to give the optimum treatment of wool garments. It offers a gentle wash action at a optimum temperature of 30°C. The gentle spin at the end of the cycle is short yet effective, extracting water gently from the woollen garments allowing them to retain their shape.

Delicate / Silk Programme

Suitable for silks, delicate viscose and synthetic items. The standard wash temperature is preselected at 30°C and depending on the fabric wash instructions, may be increased to 40°C or reduced to a cold wash to provide an accurate temperature controlled washing environment.

Kids

A thorough wash that removes unseen allergens, germs or dust mites that cling onto children's clothes, nappies and soft toys. An extra rinse follows to remove any traces of harmful detergent.

Duvet Programme

Machine-washable items stuffed with synthetic fibres, such as pillows, quilts and bedspreads; also suitable for items stuffed with down.

Top Load Washers

PowerWave Pro Wash System

Featuring a vario inverter with an innovatively-designed impeller and a dynamic waterflow system unique to top-loading washers, you can be assured of a thorough yet gentle wash for all your laundry.

How does it work?

Its powerful water displacement capabilities ensure spotless cleaning while the multidirectional water movement helps protect garments by gently gliding them against the drum surface.

O PowerWave Pro

Innovative Impeller Design

Multi-directional Waterflow

Top Load Features

Top Load Washer Programmes

Performance

VarioInverter Motor

Make it last with an energy-efficient motor system that is powerful, silent and backed by a 10-year warranty.

SpeedPerfect

There's no rush with this time-saving feature that delivers the same perfect results 20% faster.

Variety of Wash Programmes

Clean any fabric easily with a variety of wash programmes: 'Normal' for everyday wear, 'Soft' for new and delicate clothes and 'Bedsheets / Towels' for heavy loads.

Convenience

Delay Start

You get to decide exactly when your clothes are cleaned. Go ahead and schedule the wash cycles for up to 24 hours — you're in charge.

One Touch Start

Skip the headache of not knowing which water level or wash options to select. Simply press the button and we'll decide for you.

Soft Closing Lid With Toughened Glass

No more loud noises or injuries with this gradually closing lid. Made with smooth, toughened clear glass, it gives you an unhindered view of what's in your washing machine at all times.

Memory Wash

It memorises your selected options and programme steps, even after being powered off. The next time you turn it on, simply use your saved settings.

AirDry

A 1hr program that dries clothes with induced fresh air. No more unwanted smells from drying clothes indoors!

Information

Bosch Dryers perfects your drying solutions.

The Bosch heat pump, condenser and vented dryers bring you more benefits than you realise.

Save yourself from waiting for your clothes to dry under the sun. Unpredictable weather in the open may allow pollutants to contaminate them. Enjoy your clothing in softer and greater comfort state with Bosch dryers now.

Choosing a dryer.

	Heat pump dryers	Condenser dryers	Vented dryers
	before a circums		
Air vent	-	-	✓
Energy Efficient	√√√	√ ✓	✓
Consider	Typically use less than half the energy per load compared to a non heat pump dryer	Your laundry area will be cooler as the dryer uses an internal heat exchanger to cool the air and condense the water vapour into either a drain pipe or a collection tank	These dryers simply expel warm moist air through a vent or a hose

We take the chore out of laundry.

As No.1 washing machine manufacturer, you can rest assured that when it comes to laundry, we've thought of everything to make sure you get the best drying results.

Stainless Steel Drum

Bosch dryers come with high quality stainless steel drum which is corrosion-resistant, ensuring long-term performance.

SelfCleaning Condenser™

The patented SelfCleaning Condenser™ means the water extracted during the drying cycle automatically cleans the condenser up to 4 times, removing the lint that would otherwise reduce its efficiency.

Sensitive Drying System

Gentle drying for every kind of fabric. With the Sensitive Drying System, your laundry is penetrated by a constant flow of gentle air from all sides. The unique SoftFlow® paddles rotate individual garments to take the rough out of the tumble. The result is soft and fluffy laundry without creases or wrinkling.

ActiveAir dryers are one of the most economical dryers on the market. The heat pump technology is designed to work without conventional heating. The air used for drying is heated by the heat pump and the existing heat is reused efficiently during the entire drying process.

^{*} Image for illustration purpose only.

^{*} Features applicable for specific dryers only.

A shorter programme of 40 minutes for lighter loads up to 2kg, with sensor control to ensure great drying results, specifically for synthetic fabrics, cotton and blended fabrics.

Duo-Tronic

Throughout the drying cycle, built-in electronic sensors monitor moisture levels and temperature differences to prevent overheating and stop automatically once your garments reach the desired level of dryness. This ensures your garments are treated with maximum care with no excess energy consumption.

Anti-Crease Cycle

Bosch dryers feature an anti-crease programme to reduce the burden of ironing. A gentle drum action automatically separates and smoothens your garments for up to 60 minutes on standard dryers, or 120 minutes for models with the reduced ironing option, to keep them wrinkle-free and ready-to-go.

Dryer Programmes to suit every need.

Timed Programme Cold

Suitable for all types of fabrics. For freshening up or airing items of laundry that have been worn for long.

Duvet

Suitable for fabrics, pillows, bedspreads filled with synthetic fibres. Dry large items individually. Observe the care label.

Timed Programme Warm

Timed programme for all types of fabric except for wool and silk. Dry laundry that is still slightly damp or has already been pre-dried. It is also suitable for the subsequent drying of multi-layered, thick laundry that does not dry readily.

Down Wear

Suitable for fabrics, pillows, bedspreads or eiderdowns filled with down. Dry large items individually.

Shirt / Blouses

Suitable for non-iron shirts or blouses made of cotton, linen, synthetic fibres or blended fabrics.

Sportswear

Suitable for weather proof and outdoor clothing with a membrane coating and water-repellent fabrics.

^{*} Features vary depending on models
