

Who are Bosch?

"I have always acted according to the principle that it is better to lose money than trust. The integrity of my promises, the belief in the value of my products

and in my word of honour have always had a higher priority to me than a transitory profit."

Robert Bosch, 1921

For over 125 years, the Bosch name has been synonymous with engineering excellence. Our home appliances are renowned for their quality, reliability and performance which derives from our inherent, unflagging commitment and the painstaking thoroughness with which every unit is made. As you would expect from Bosch, there are no gimmicks or frills with our products - just pure, clean lines and beautiful, functional simplicity that will enhance any kitchen.

The values that shaped Robert Bosch's vision for his new company in 1886 are the same principles that guide the business today; never lose the trust of your customers, look after your staff and partners and change things for the better. It's what has kept Bosch at the forefront of the home appliance industry and what will keep it there in the future.

Looking for help? You'll find it here.

Arrange an engineer visit.

Our appliances are manufactured to the highest standards, but if you do need a visit from an engineer we are here to help. We have teams of locally based engineers around the country - employed and trained by Bosch*. This gives them unrivalled expertise and knowledge of our appliances. We repair appliances both in and out of guarantee. All repairs are analysed in advance by a technical team so that the parts likely to be needed to complete the repair are sent to the engineer's van the night before the visit.

To arrange an engineer visit to your home please call:

0344 892 8979

Calls are charged at the basic rate, please check with your telephone service provider for exact charges.

You can also arrange an engineer visit online: www.bosch-home.co.uk/ customer-service/book-a-repair-online

Product advice.

If you need help using programmes or features, or need assistance selecting a new Bosch appliance from our current range, our product advice team can help.

You can call us on

0344 892 8979

or visit: www.bosch-home.co.uk for frequently asked questions and helpful videos.

Register my appliance

We advise that you register your appliances so that we can contact you about any product updates. Visit www.registermyappliance.org.uk for more information.

You can also call Bosch directly to register your appliance on 0344 892 8979 (option 5). Please call us within 28 days of purchase to discuss the full range of options for extending your warranty.

Visit the Bosch online store.

Find a comprehensive selection of accessories to help you get the most out of your appliance, along with our full range of replacement spare parts and cleaning and care products at the Bosch online store.

You can also purchase Tassimo hot drinks machines, vacuum cleaners, irons, steam stations, kettles, toasters and food preparation appliances directly from us online.

You can call us on

0344 892 8979

or visit: www.bosch-home.co.uk/store

Accessories.

Many appliances can be enhanced with optional extras, such as telescopic rails for ovens or special cookware for hobs.

When buying a Bosch home appliance, you know you are purchasing a quality, reliable product. However many appliances are used daily, so need cleaning and maintaining to keep them looking great and operating at peak performance.

Our cleaning and care products have been thoroughly tested and approved for safe and effective use on your Bosch home appliance.

Replacement spare parts.

We keep in stock a comprehensive range of replacement spare parts for our appliances for up to ten years. All our parts are original spare parts, not copies.

High quality service.

Bosch appliances are renowned for their quality and we believe that our customers deserve exceptional customer service. You can contact us seven days a week for assistance.

Calls will be answered

Monday to Friday 8am to 8pm, Saturday 9am to 5pm and Sunday 9am to 4pm.

*In some areas we may use an approved service partner. The process may vary for repairs carried out by our service partners

Home connect

From controlling your Home Connect Serie 8 oven with your voice using Amazon Alexa, to never running out of dishwasher tablets again, thanks to the Amazon Dash Replenishment Service*. Smart appliances mean less things to think about, more time to spend on something else. Bosch Home Appliances with Home Connect ensure your home is ready for the future today.

How you can use your Home Connect App.

In partnership with:

amazon alexa

Voice control services based on Amazon Alexa will allow you to connect and control your appliances in your home simply by speaking to Alexa. Along with the ability to use Alexa with many other partners from Philips Hue, Spotify and IFTTT, the possibilities are endless. Once Home Connect skills are set up you can control your oven, dishwasher, coffee machine and washing machine. All you'll need to do, is simply ask: "Alexa, start Home Connect Oven" or "Alexa, tell Home Connect Oven to start". Alexa will then continue to guide you through. Perfect for those moments when you've got your hands full! Home Connect partnerships. amazon dash Never run out of dishwasher

Smart connectivity for an easier life.

The future has arrived and it's knocking on your front door. Home Connect brings smart technology to your appliances and lets you control them with your phone or tablet.

So, whether you want to turn the oven on to cook your dinner when you're on your way home, or check what's in your fridge while you're at the shops, you'll be in complete control.

Simple to set up, simple to use.

There's no need to worry if you're not a technical genius. We've made sure Home Connect is simple and straightforward to set up. We've even made videos that will take you through the process and get you up and running in just a couple of minutes.

You'll find the Home Connect app just as easy to use. There are lots of pre-set options to get you started quickly, and everything is set out logically and clearly.

Relax - we're invented for life.

Home Connect uses the same security protocol as online banking so you can enjoy extra peace of mind when you're using your Bosch appliances. Our app has TUV Trusted App certification, and all of our Home Connect appliances are Wi-Fi certified by the Wi-Fi Alliance.

Your very own barista.

When you take your coffee seriously, your coffee machine needs to be seriously impressive. With the Bosch Home Connect Coffee Machine, you get your very own virtual barista, skilled at producing delicious coffees from all over the world.

Using CoffeeWorld, built into the Home Connect app, you are able to create almost twenty superb drinks and international favourites at the touch of a button. Your kitchen becomes your new favourite coffee shop.

Playlist

Making drinks for lots of people? There's no need to memorise the list. Simply use the Home Connect app Coffee Playlist feature and get everyone to select their favourite drink. Your coffee machine will make them all, one by one, at your command. You can even add selections from the CoffeeWorld feature for added luxury.

How you can use your Home Connect App.

Let us choose the best wash for you.

To stay at their best, different clothes need to be washed in different ways. With the Bosch Home Connect app, simply tell your washing machine what's in the load and it'll work out the perfect program. It'll even tell you if there's an item that should come out and be washed a different way.

Recipes

Meal planning has never been easier. Browse the Home Connect Recipe Book from your favourite armchair. When you've made your choice, simply send all the settings from the app directly to your oven so it's ready to go when you are.

The range of recipes are all tried and tested by Bosch Home Economists around the world, so you'll find exciting new flavours alongside old family favourites. New and seasonal recipes are added on a regular basis, so you'll never be stuck for what to eat.

Tablet top up

Amazon Dash Replenishment will automatically reorder your dishwasher tablets when your supply is running low. Simply activate Dash Replenishment in the Home Connect app and regain time spent shopping for supplies, as tablets will be automatically delivered to your doorstep. Another thing crossed off you to-do list.

Remote Delayed start

Want your dinner ready when you arrive home? That's no problem with Home Connect. Simply put your food in the oven before you go out and set the oven to start later in the day so it's ready just as you come back through the front door.

But what if you're delayed while you're out? That's fine. You can simply adjust the start time from wherever you are and, if the food has already started cooking, you can simply press "pause". The oven will lower the temperature until you start it again so your meal isn't ruined.

Introducing the Bosch oven range.

Whatever kind of cook you are, we have a range of smart and stylish built-in single or double ovens for you to choose from. Serve up vitamin-packed meals using one of our innovative added steam ovens or, if limited on space, our easy to use microwaves and compact appliances will bring style and function to any kitchen.

With their impressive technology, elegant design and sensor-controlled programmes, our Serie 8

ovens meet every need and more in the kitchen. The innovative control wheel provides full control over your dishes at all times.

Serie 6

Simple elegance meets superior technology. Serie 6 ovens give you more than just convenient operation and energy efficiency. Modern functionality means your oven is easy to use with various programmes to suit different foods.

Serie 4

Modern design, quality engineering and practicality. Our Serie 4 oven range looks stunning inside and out. Easy to use functionality with a selection of cooking programmes to choose from

Cooking functions explained.

+++

Place your food on any of the four shelf levels to achieve consistently perfect results: thanks to the fan wheel that changes the direction of rotation during operation to distribute heat evenly on every level.

3D HotAir

By maintaining the right temperature across all three shelf levels, consistently even cooking results are achieved

Top and bottom heat Conventional baking and roasting on one level.

Top/Bottom heat gentle

Conventional baking and roasting on one level using residual heat, allowing you to gently cook meat, fish and baked items.

Hotair grilling

By operating alternatively, the grill and fan create a rotisserie effect, perfect for creating crisp meats and poultry.

Bottom heat

Only the bottom element is heated – ideal for pastry cases, bain-marie cooking and reheating.

Create authentic pizzas with crisp bases and moist toppings.

Also great for quiches, tarts and frozen foods.

Use the centre grill for smaller quantities and

Hotair Gentle For all those times you cook using just one shelf level,

Hotair Gentle gives perfect results.

Full width variable grill Grill large quantities with ease thanks to the precise temperature control. For added efficiency the door can

be closed and the smells are kept in the oven.

Gently defrosts food evenly and guicker than it would take on

For those times when you need your food ready more quickly, select fast heat to warm the oven faster.

Single point probe

Perfect Roast Meat probe

The single point meat probe constantly measures the temperature at the core of the roast and as soon as the desired temperature is reached gives an acoustic and switches off automatically. (Available in selected Serie 6 models only

Three highly sensitive measuring points determine the core temperature of your food to the exact degree, guaranteeing perfect roasting results and taking away the guesswork.

Added Steam

Produces succulent roasts, with juicy meats and crispy skins, as well as breads with the perfect colour and crust.

Pyrolytic cleaning Heats the oven to around 480°C, which reduces dirt and

grease deposits to dust that can be easily wiped away.

Almost no cleaning is necessary thanks to a special coating of the rear wall that automatically absorbs grime.

Specifically to assist with certain religious requirements. Allows the oven to be set for up to 73 hours at a maximum 140°C to keep pre-prepared food warm. Oven door can be opened/closed without the display changing or causing changes to the heating and cooling fans.

Selecting the right oven for you and your kitchen.

Whether you're designing a new kitchen or you are simply updating one of your appliances, we have a wide variety of cooking products available to you to choose from. Depending on the space you have in your kitchen, you can choose from a single product or combination.

Single ovens.

HRG6769S6B

Double ovens.

Double built-under ovens.

NBA5350S0B

Compact ovens.

Coffee machine.

CTL63ES6

Serie 8 ovens

With their impressive technology, elegant design and crystal clear TFT-touch display, our **Serie 8** ovens meet every need and more in the kitchen. The innovative control wheel provides convenience and functionality with full control over your dishes at all times. Plus, thanks to sensor-controlled programmes, you'll achieve perfect results every time.

Home Connect.

Allows you to stay on top of your game by giving you easy access to a wide variety of innovative cooking and meal preparation techniques - all from the comfort of your mobile device.

Even heat. Maximum flexibility.

Thanks to **4D HotAir**, you can place your food on any of the four shelf levels and the results will be consistent. Our motor and fan wheel design makes it possible: it changes the direction of rotation during operation to distribute heat evenly on every level. And that's not all: with 4D HotAir, you can also bake and roast on up to four different levels simultaneously. So you'll enjoy reliable results from top to bottom.

Added steam.

By adding precisely the right amount of steam at precisely the right moment, baking results get even better. **Steam** prevents food drying out, giving bread a deliciously crispy crust and a light, fluffy inside. Steam is also great for bringing out flavours, when roasting or re-heating. Simply fill the water tank, integrated behind the liftable control panel in the Serie 8 ovens. The added steam function is controlled automatically. (selected models only)

Perfect results at your fingertips.

Discover our sensor-controlled functions with BoschAssist, PerfectBake and **PerfectRoast**. This feature automatically sets precise information on temperatures and cooking times for all kinds of dishes, plus you can simply scroll through to find our intuitive baking and roasting functions.

Scroll through for the PerfectRoast.

Scroll through for the Traditional British beef, Easter lamb or Sunday roast chicken – with the **PerfectRoast meat probe**, perfect results are guaranteed every time. With three temperature sensors for even more accuracy, the meat probe measures the core temperature of the food - removing the guesswork. Just like a professional chef, but with complete ease. Three highly sensitive measuring points determine the core temperature of your food to the exact degree, guaranteeing perfect roasting results and taking away the guesswork.

Scroll through for the PerfectBake.

Baking has never been easier. The PerfectBake sensor offers precise sensitivity and constantly measures the moisture level of dishes, as well as automatically regulating the baking process.

OOO Pyrolytic Cleaning.

Cleaning the oven by hand can be very exhausting and time-consuming. Thanks to our ovens with the integrated self-cleaning function Pyrolysis, you can now save yourself this task for good. Without getting your hands dirty or using any chemical cleaning products. Just remove the trays and rails, press Start and your oven will heat up to max. 480 °C and reduce away any grease/ food residues. All that's left for you is a bit of dust, which is easily wiped away.

Serie 6 ovens

Simple elegance meets superior technology. Serie 6 ovens give you more than just convenient operation and superb energy efficiency. Modern functionality means your oven is easy to use with various programmes to suit different foods, all available to view clearly on the large LED display.

3D HotAlr

3D HotAir allows cooking on up to 3 shelves at any one time. The fan at the back of the oven distributes the heat from the ring heating element behind the back panel evenly around the cooking cavity ensuring even temperatures.

 HotAir cooks at lower temperatures, so this cuts down soiling of grease and fat.

Single Point Meat Probe

The single point meat probe constantly measures the temperature at the core of the roast and as soon as the desired temperatures reached gives an acoustic and switches off automatically. No monitoring is needed to get the perfect roast. No over cooking or drying out.

- · Suitable for leaner meat
- · Connects to the oven internally via a plug-in jack
- Wide core temperature range: 30-99 °C
- User manual offers core temperature guidance for cooking results
- Suitable for using with **3D HotAir**, grilling and top bottom heat

Why not match up your **Serie 6** oven with a Compact Oven or built-in Microwave? Find out more on page 27.

Our Bosch Serie 6 ovens all come with a selection of AutoPilot programmes for you to choose from. This means every dish is a perfect success when you cook using these functions. The selection is made even easier with the electronic control.

Twice the cooking pleasure. Our Serie 6 double ovens.

If you need that extra bit of cooking capacity but don't have the space for two single ovens, you can choose from a selection of **Serie 6** built-in and built-under double ovens. With the latest **Serie 6** built-in double ovens you won't need to compromise on features either, with the double Pyrolytic oven – self-cleaning in both cavities.

Serie 4 ovens

Modern design, quality engineering and practicality. Our **Serie 4** oven range looks stunning inside and out. Easy to use functionality with a selection of cooking programmes to choose from.

2 Piece Slim Universal Pan

The Optimum solution for cooking smaller quantities, different foods, different combinations and different cooking durations all made easier with the two piece slimline pan concept.

- Each pan is the half-width of a universal baking
- · Transfers from fridge to oven and to dishwasher when finished.

Why not match up your **Serie 4** oven with a Compact Oven or built-in Microwave? Find out more on page 27.

3D HotAlr

The **3D HotAir** allows cooking on up to 3 shelves at any one time. The fan at the back of the oven distributes the heat from the ring heating element behind the back panel evenly around the cooking cavity ensuring even temperatures.

· No intermingling of flavours so you can cook sweet and savoury dishes at the same time with confidence.

Space and premium features with our Serie 4 double ovens.

If you need that extra bit of cooking space but don't have the space for two single ovens, you can choose from a selection of **Serie 4** Built-in and Built-under double ovens. This means not compromising on the performance features and functions found in the **Serie 4** single ovens.

Whichever model you choose from our Serie ranges, you'll find lots of reasons to love your Bosch oven.

 For Inverter models, the maximum setting offers a time limited boost option for heating liquids. To ensure optimal results and to protect the appliance, the microwave power output is reduced in stages over the first few minutes down to the next power level (600W). After a cooling period, the microwave boost option will be available once more.

³ For further models, the maximum setting offers a time limited boost option for heating liquids. To ensure optimal results and to protect the appliance, the microwave power output is reduced in stages over the first few minutes down to the next power level (600W).

After a cooling period, the microwave boost option will be available once more.

Ovens with integral microwave i—When teamed with a single oven, Bosch compact ovens with microwave offer a great alternative to a double oven if you require more space for traditional cooking, Designed first and foremost to function as an oven, with construction, features and functions identical to a traditional single oven, these models benefit from the addition of microwaves at low medium power (max 360W) to deliver oven-led combination cooking, which speeds up the cooking process while retaining traditional cooking results.

Microwave Combination Ovens'—These models are designed to provide more functionality than a solo microwave oven, focusing on combination cooking, with the microwave using higher power (max. 600W) to lead the cooking process, supported by Hotair or grill functions to deliver speedy crisp and browned results. Based around a more traditional microwave models offer the relating is the priority, but with the back-up of separate or combination Hotair cooking and grill functionality if required. ¹ These models are designed to operate best in combination mode, so when heating using microwave only, it may be necessary to adjust cooking times.

* For further models, the maximum setting offers a time limited boost option for heating liquids. To ensure optimal results and to protect the appliance, the microwave power output is reduced in stages over the first few minutes down to the next power level (600W).

After a cooling period, the microwave boost option will be available once more.

Inverter Technology delivers microwave power constantly while cooking – other, traditional microwaves, are only able to deliver maximum power and manage the differing settings by alternating between on and off for specific time periods. This can result in uneven heating or over-cooked food and can be especially damaging to more delicate foods or smaller portions. With Inverter technology, the microwave delivers power constantly, gradually managing the power levels down over time in order to control the food temperature. This gentle approach to cooking reduces uneven heating or overheated food and is especially beneficial for delicate foods. It may be necessful intense to ensure foods are thoroughly cooked before serving. Bosch recommends that the maximum power setting be used for heating liquids and the microwave is calibrated to provide a burst of high power initially, before managing the power down in stages to the next level over the first few minutes.

Smart Coffee Centre.

Your very own barista.

When you take your coffee seriously, your coffee machine needs to be seriously impressive. With the Bosch Home Connect Coffee Centre, you get your very own virtual barista, skilled at producing delicious coffees from all over the world.

Using CoffeeWorld, built into the Home Connect app, you are able to create almost twenty superb drinks and international favourites at the touch of a button. Your kitchen becomes your new favourite coffee shop.

Playlist. App Sto

Making drinks for lots of people? There's no need to memorise the list. Simply use the Home Connect app Coffee Playlist feature and get everyone to select their favourite drink.

Your coffee machine will make them all, one by one, at your command. You can even add selections from the CoffeeWorld feature for added luxury.

Your coffee, your way.

Replicating your perfect cup of coffee can sometimes feel impossible. Home Connect now makes getting the perfect coffee easier than ever. Simply save your favorite coffee creation in the Home Connect app. Then sit back and let the machine take over. Treat yourself to the cup of coffee you know and love.

Coffee connoisseur at the touch of a button.

If you've ever tried to find out what goes into making a cup of coffee, then you know how complex and artful it is. Home Connect's Coffee Know-how gives you easy access to everything you need to know about coffee – all from the comfort of your mobile device. At the touch of a button, you can learn great new recipes and discover everything from coffee growing to proven roasting methods you can try at home.

Making life easy through innovative technologies

Introducing the Bosch electric hob range.

As you would expect from Bosch, all our electric hobs are made using high quality materials, are easy to use and add contemporary elegance to any kitchen.

To help you choose the right electric hob for your home we have divided them into the three ranges below.

Whichever model you choose from our Serie ranges, you'll find lots of reasons to love your Bosch electric hob.

Twice as fast as gas.

Induction hobs can heat food and boil water nearly twice as fast as gas and three times faster than ceramic hobs*. And as they're also more energy efficient, you'll save money as well as time.

Express cooking.

Induction cooking with a turbo boost. The **Boost** function allows you to increase the power of the cooking zone by 50%' - perfect for large pots and pans orwhen you're in a hurry.

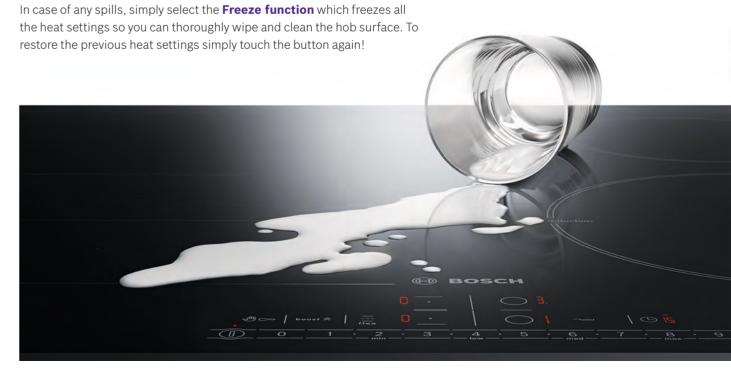

Easy to clean.

Automatic pan recognition only heats up the base of the pan and not the rest of the zone, which doesn't waste energy and leaves the rest of the hob cool to touch. Keeping the hob cooler makes it safer and also prevents spillages from burning on so it's easy to

*Based on time required to heat 2 litres of water at 15°C to 90°C using Bosch hobs. In accordance with EN 50304/ EN 60350: 2009

Clean up in an instant.

Model shown: PXV851FC1E

Serie 8

Our **Serie 8** range of electric hobs combines convenience and elegant design, allowing you to select individual cooking zones and power levels. All controlled at just the touch of a button with the modern touch control.

Serie 6

Expect excellent operation and timeless designs with our Serie 6 range of hobs. You'll get premium engineering and materials so that you can always cook something a little bit special. Get ultimate control with the easy to use DirectSelect touch control.

Serie 4

Featuring a range of **Serie 4** electric hobs that are convenient and simple to operate, our essential range maintains classic design with contemporary style.

Model shown: PXY875KW1E

Cooking that's designed around you.

Ultimate flexibility with FlexInduction. One, two or three pots, or even a large casserole: the Bosch FlexInduction hob leaves it up to you. At the flick of a switch, you can combine two induction zones into a large induction surface on which you can cook the way you want.

Even more flexibility.

Available on selected Serie 8 FlexInduction hobs, the Extended FlexInduction zone offers optimum flexibility. The amount of usable surface on the hob is maximised to accommodate even the largest of cookware. With CombiZone, two cooking zones can be linked, making the switch from small to large pans effortless. Plus, the MoveMode function automatically switches from boil to simmer with a simple slide of the saucepan.

TFT Display.

Clear text and pictures allow simple operation of the integrated touch display.

More control at your fingertips.

Set the correct temperature with a single touch thanks to **DirectSelect**.

No more scrolling up or down, just simply press one button to select the right heat level. Models with **DirectSelect Premium** touch controls feature an additional minimum temperature setting giving you added cooking control.

Cooking with induction is not just quick, safe and clean.

Cooking with induction is safer than all other alternatives. As only the base of the pan is heated and not the entire hob, this will be warm to touch but should not burn.

There is also a child safety feature: the built-in lock function means that you can lock the surface of your hob and prevent it from being used accidentally, giving you the highest level of safety.

FLEX INDUCTION

SERIE 8

FLEX INDUCTION

SERIE 6

PVS851F21F

Perfect results everytime.

✓ PerfectCook

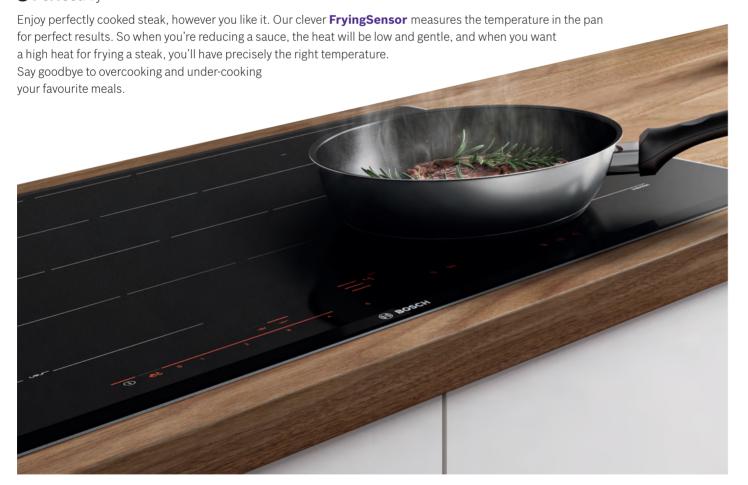

May your pasta never boil over again. Our hobs are designed with a sensor so you'll be able to control your cooking by the temperature in the pan rather than the power level. So whether you're defrosting, warming up, cooking or deep fat frying, you're in control with our smart **CookingSensor**. Because precise temperature control guarantees perfect cooking results.

This feature requires the additional purchase of a **CookingSensor** to operate.

Available from www.bosch-home.co.uk/store.

У PerfectFry

Venting hobs

The best of our hobs and cooker hoods. Combined perfectly in just a single appliance.

SERIE

MODEL NUMBER

Serie 8	+++
PXX875D34E	PVS851F21E

To allow you more freedom and flexibility in designing your kitchen, we've developed hobs with an integrated ventilation module. These hobs combine the latest technologies of our induction hobs and cooker hoods in a single appliance. The integrated ventilation module extracts steam and odours at their source.

The perfect combination.

The **PerfectAir** venting hob removes odours at source, leading to fewer cooking smells in the kitchen. It can be easily installed into the work surface to suit any kitchen design and has the added convenience of being easy to clean. Thanks to the **PerfectFry** sensor and **PerfectCook** sensor on the hob, you can achieve perfect results whether you're frying or boiling.

Induction hobs

Serie 8 PXX975KW1E **TFT-touchdisplay:** Clear text and pictures allow simple operation of the integrated touch display.

Assist: Automatic setting of the ideal power level recommendation of and cooking time for countless dishes.

FlexInduction Zone: Get more flexibility by combining the cooking zones into one big zone for placing small pots and large cookware.

Home Connect: Connected home appliances for an easier everyday life.

Cooktop-based hood control:

Convenient operation of the hood via your hob (with matching hood)

Introducing the Bosch gas hob range.

Welcome to intuitive cooking. The advanced technology built into our hobs makes cooking on gas simple and precise. Understanding how you cook means we've been able to design a FlameSelect featurethat lets you fry, stew, steam and boil with confidence - without constantly checking the flame.

Serie 8

Model shown: PPQ7A6B90

Our Serie 8 range of gas hobs combines convenience and truly elegant design with ultimate cooking control, meaning a truly professional performance in the kitchen

Explore more at www.bosch-home.co.uk

Serie 6

+++

Expect excellent operation and timeless designs with our **Serie 6** range of hobs. You'll get premium engineering and materials so that you can always cook something a little bit special.

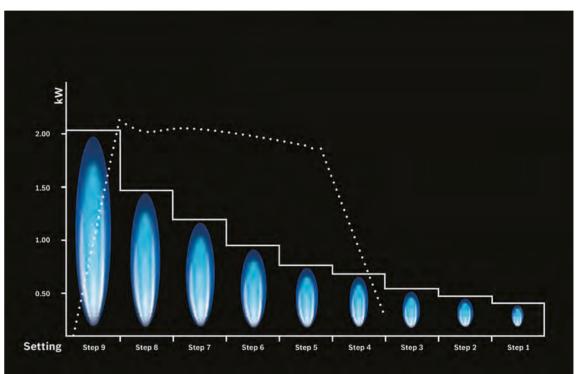

Serie 4

Featuring a range of gas hobs that are convenient and simple to operate, our **Serie 4** range maintains classic design and style.

(1) FlameSelect

Gas without the guesswork.

The gas cooktops with FlameSelect are equipped with nine precisely defined power levels which let you adjust the required heat easily and reliably. For simply perfect cooking results.

Standard gas hob valve power output.

FlameSelect valve power output.

.....

We're taking the guesswork out of using a gas hob. Our innovative StepValve technology regulates the gas output precisely, so you're able to choose the size of flame. With an easy-to-use setting, all you need to do is decide which of the 9 power settings you want. At last, FlameSelect gives you the confidence to cook on gas without leaning down to check it.

GAS

Design match

If you want a selection of cooking options within your kitchen, this can be realised with a combination of our worktop cooking appliances. You can select everything from our great range of Induction, Ceramic or Gas hobs and then combine with one our range of Induction, Ceramic or Gas Domino hobs.

Gas Domino Hobs.

Induction Domino Hob.

Ceramic Domino Hob.

PRA3A6D70 PRB3A6D70

PIE651BB1E

PKF375FP1E

Theses hob appliances can be arranged side by side to create a larger cooking surface area, or positioned on their own to create a separate cooking space. Ideal for smaller kitchens that do not have the space for large hobs.

TIP: Ensure your extractor hood is the same width as the worktop appliance you choose.

A touch of the Orient.

Powerful, dual ring wok burners are perfect for oriental cooking. They deliver a boost both in power and speed, but can also be used very effectively at lower settings when required.

Smart design

Square design pan supports don't just look good, but provide more stability for pots and pans. Cleverly designed to fit together, they are separate pieces, which make them easy to handle and clean. The elegant tempered glass base allows for a choice of surface mounting for quick and easy installation, or flush mounting.

Gas hobs

Serie 6

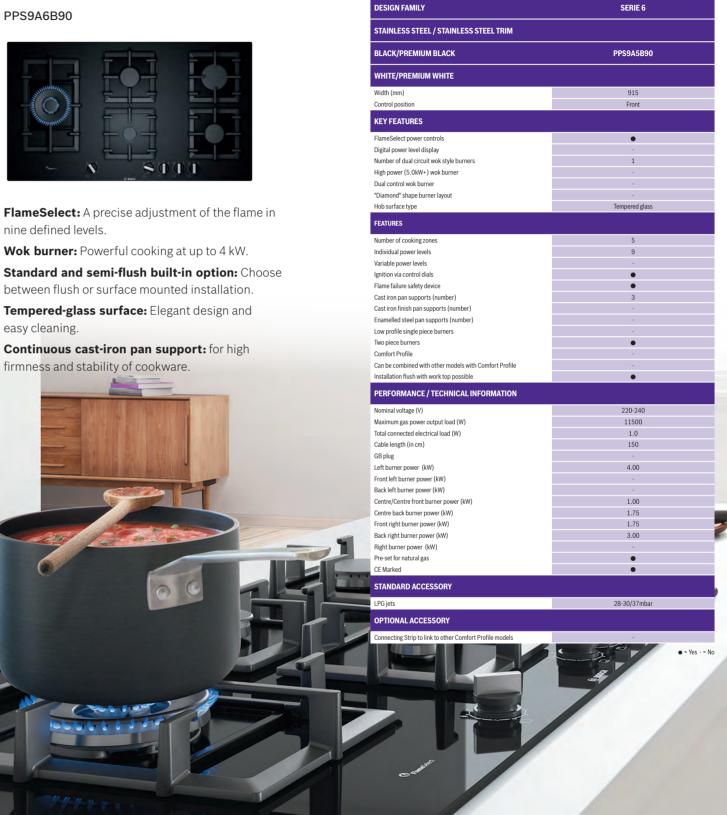

FlameSelect: A precise adjustment of the flame in nine defined levels.

Wok burner: Powerful cooking at up to 4 kW.

easy cleaning.

Continuous cast-iron pan support: for high

firmness and stability of cookware.

Introducing the Bosch hood range.

Offering a blend of function and form, Bosch hoods deliver quiet, effective extraction that makes the kitchen and home a more pleasant environment. Make a bold design statement, or complement a more minimalist look.

To help you choose the right hood, we have divided them into four ranges.

Serie 8

+++

With our Serie 8 range of hoods experience automatic extraction rate control with PerfectAir sensor technology. Our hoods offer high quality craftsmanship combined with cuttingedge technologies to make the kitchen a more nleasant environment

Serie 6

Ultimate convenience and tasteful design make cooker hoods within our Serie 6 range an asset to any stylish kitchen. Electronic controls give you ease of use. Experience maximum operating convenience with DirectSelect touch controls from Bosch.

Serie 4

As the centre of family life, the kitchen needs to have a comfortable atmosphere free of cooking steam and disruptive noise. Our Serie 4 range

of cooker hoods are extremely quiet, easy to operate and impressive with their modern design.

Serie 2

With our Serie 2 range of hoods, you can be assured of high quality design and features that make your life easier in the kitchen, such as easy-to-use controls and dishwasher proof metal grease filters for greater convenience.

Hood functions explained.

EcoSilence Drive
Our EcoSilence Drive & Our EcoSilence Drive brushless friction-free motor is durable and designed to last longer. The motor is highly efficient and offers exceptional performance while saving you energy.

TouchControl

Set the exact power level with a single touch thanks to TouchControl. It's easy to operate: simply select the right power level or turn on the lights and away you go.

CleanAir Module

For maximum air purity at minimum volume. Clean is good, even cleaner is better: With our CleanAir module for circulating systems, you can increase the odour absorption of the cooker hood by as much as 95%.

Silence

Your guests are not alone in appreciating a relaxed cook. So you can chat with your guests while cooking, we have made our cooker hoods so quiet you hardly notice them.

Easy mounting

Easy to install appliances give you another reason to choose a Bosch Hood.

A sensor constantly detects the levels of odours in the air and adjusts the power level - from light use to intensive - to ensure your kitchen air is always clean and fresh.

Hob Hood Control

Control your hood via your hob with Hob Hood Control and selected Bosch hobs.

Filter Saturation Indicators

Out of sight, out of mind: When it comes to the filters in our hoods we often forget to check if they need to be changed. With Home Connect you can now check the state of your hood's filters, and receive valuable maintenance information. Simply log onto the app to check the carbon and grease saturation of your filters and whether a replacement is necessary.

Whichever model you choose from our Serie ranges, you'll find lots of reasons to love your Bosch hood.

Why shout when you can whisper?

The motors in all of our hoods need to deliver powerful performance for maximum extraction, but that doesn't mean your home environment has to suffer. We have designed state-of-the-art motors in most hoods that generate noise levels of just 45 decibels*, which is about the same level of sound as a quiet conversation. And our quietest model delivers a library-quiet peacefulness of just 41 decibels**.

*Sound power measured according to EN60704-3 on largest pipe diameter. **Noise level (sound power) based on dB(A) re 1 pW

EcoSilence Drive™

Our **EcoSilence Drive™** brushless friction-free motor and energy saving LED lights reduce energy consumption by up to 80% compared to a similar five-year-old model, without compromising results.

In this light, even your electricity bill looks good.

Our hood ranges incorporate energy efficient lighting that can be adjusted for bright illumination to work under, or lower illumination for ambient mood lighting in the kitchen thanks to the dimmer function.

Hob Hood control.

Control your hood via your hob with Hob Hood Control and selected Bosch hobs. Both the hob and the hood are equipped with a Wi-Fi module, enabling them to directly connect to each other securely. As soon as your hob is turned on, your hood is also switched on and thanks to the PerfectAir sensor, it starts extracting as soon as you start cooking. When you're done cooking, the hood automatically switches off after a brief run-on time, so you can be sure that unpleasant kitchen odours really do disappear. If you want to control the hood directly, just activate manual mode on the hob controls with the touch of a finger. In addition to the extraction rate, you can also control the lights of the hood via the hob.

Model shown: DWK98PR60E

Making life easy through innovative technologies

Wall-mounted

Wall-mounted cooker hoods are generally mounted above the hob, on the wall between the wall units. This type of cooker hood fits beautifully into the line of your kitchen units whilst providing effective ventilation that you'll barely see – but you'll notice the amazing effect.

Box Chimney

Chimney hoods in a box design perfectly complement your hob installation.

Glass Chimney

Curved and flat chimney hoods are great for a contemporary stylish kitchen.

Pyramid Chimney

Impress with classic lines and gently inclined contours.

Flat Slimline

This slim design is perfect for keeping an eye on your pots and pans.

Angled Glass

The angled design doesn't restrict headroom so you can keep an eye on your cooking with ease.

Integrated

Canopy

Bosch canopy cooker hoods are powerful ventilation systems that can be integrated into the cabinets above your hob. The hood provides excellent extraction of steam and cooking smells, as well as providing additional lighting for your cooking surfaces.

Telescopic

Telescopic cooker hoods are installed into a wall unit. To operate them, the flat section is pulled out, enlarging the extraction surface. With many cooker hoods of this type, the flat front can even be matched to your kitchen units. So this cooker hood will be almost invisible in your kitchen.

Integrated

Integrated cooker hoods have to be pulled forward at an angle for use and are therefore only visible during use. This type of cooker hood can therefore only be seen during use and is integrated seamlessly into your

Built Under

Great performance in a tiny space. Our built-under extractors are housed underneath the kitchen unit and can always be seen.

Island

Our Island cooker hoods have been specially developed for use over your kitchen island and are freely suspended from the ceiling above it. Thanks to the wide choice of classic designs and different sizes, island cooker hoods offer the ideal solution for every kitchen and every requirement.

Chimney

Our chimney hoods use a box design to perfectly complement your island hob installation

Cube

This modern cube hood design is the perfect highlight for any kitchen that requires a suspended hood over an island hob.

Worktop

DownDraft

The DownDraft hood is concealed inside your worktop, next to your existing induction hob. It rises up smoothly when needed and includes powerful LED lights to illuminate your cooking.

Ceiling

A ceiling cooker hood is installed directly into a load-bearing kitchen ceiling. It not only ensures clean air, it also provides excellent lighting for your hob and all the headroom you need.

Ducted or recirculation mode?

Ducted extraction

Ducting out is the most effective method of extraction if the hood can be sited on an outside wall, or an outside wall can be reached via ducting. The main difference between ducted and recirculation cooker hoods is that ducted systems can extract steam and odours, as well as grease. All our extractors are now standardized to a 150mm diameter outlet for easier installation. Use of 120/125mm diameter ducting is also possible, but will result in reduced air flow and increased noise. Use of 100mm diameter ducting is not recommended

The following points should be observed for optimum ducted extraction results:

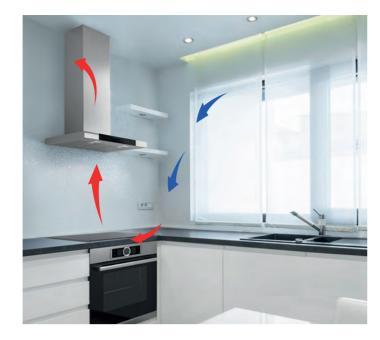

- 1. Ensure any pipe elbow bends are at least 30cm from the hood ducting opening.
- 2. Avoid reducing the diameter or area of the ducting.
- 3. Use wide-angled pipe elbows, but keep the number used to a
- 4. Only install pipes with smooth, even inner surfaces. If a flexible hose has to be used, ensure it is pulled tight to smooth out the ridges before fixing.
- 5. Avoid reducing the diameter or area of the ducting.
- 6. Use ducting pipes with a diameter of at least 120mm, but ideally 150mm
- 7. Keep piping to a minimum use the most direct route to external outlet.
- 8. Make sure that there is an adequate supply of fresh air to replace the air ducted out of the kitchen i.e. windows that can be opened, doors to adjacent rooms, air bricks.

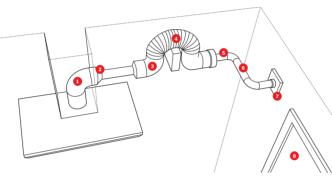

Recirculation kit

Cooker hoods with recirculation are energy-efficient and much easier to install. Air is passed through the metal filter to extract the grease and then through a special charcoal filter, which removes odours. The purified air is then returned to the room. As no ducting openings are necessary, this is an energy efficient method of extraction as no energy can escape (ie. cool air in the summer or warm air in the winter), making it a good choice for low energy houses. The kit contains all you need to set the hood up for recirculation and installation is relatively easy. Check each model for details on the appropriate recirculation kit accessory.

Explore more at www.bosch-home.co.uk

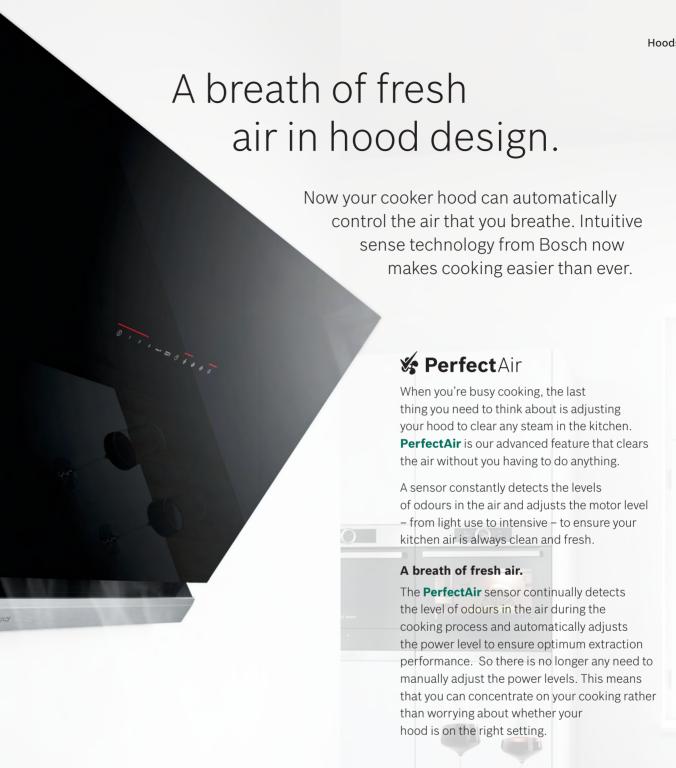

Problems with installation may occur if points 1 to 8 are not observed.

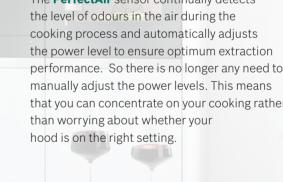

Tips and hints

- 1. Calculate the extraction capacity needed.
- 2. Choose a hood with at least the same width of your hob.
- 3. Ensure efficient pipe ducting installation.
- 4. As a guide the hood should be installed at a minimum of 65cm above a gas hob or 55cm above an electric hob.
- 5. To effectively remove cooking odours from your kitchen, switch the hood on 5-10 minutes prior to cooking.
- 6. Leave the hood to run at a low setting after cooking has finished for 5-10 minutes to remove any lingering odours. Or simply select the Automatic After Running function, which enables the hood to continue running at a low speed for 10 minutes before automatically turning itself off (available on selected models).
- 7. Regularly clean metal grease filters to ensure optimum extraction performance. All of our metal grease filters, brushed steel filters and rim ventilation filters are dishwasher-proof.
- 8. Choosing the correct extractor. As a guideline, the air in the room should be changed 6-12 times per hour. Calculate the floor area in square metres and multiply by the height of the room in metres. Then divide the maximum extraction rate of your chosen hood by the figure calculated above. The resulting figure should be at least 7, but preferably as close to 12 as possible.

Example

Kitchen (H x W x D) metres 2.1 x 4.5 x 4.2 = 39.7 m³. Assume a maximum of 12 air changes per hour – multiply 39.7 m³ by 12 = 476m³/h. Choose a hood capable of extracting at least this amount of air per hour - e.g. DWB96DM50B (max ducted extraction rate intensive 580m³ per hour).

58 | 59

Downdraft hood

Serie 8 +++

DDD97BM60B

Discover our Downdraft ventilation hood DDD97BM60B that blends seamlessly into our built-in induction hob appliances. Perfect for kitchen islands or minimalist designs. It can be neatly tucked away into your worktop when not in use.

The new Downdraft hood provides a flexible ventilation solution for your open plan and island kitchen. With a sleek modern glass design with Bosch Clip, LED light and TouchControls, our remote installation option ensures efficient but quiet odour and

The Bosch Remote Motor Installation Mounting Kit (DSZ9ID0M0) frees up space under the worktop and provides the option to mount the motor up to 3 metres away from the appliance. Image for illustrative purposes only. Ducting not supplied.

- Power automatically reverts back to normal setting after intensive.
 A type of recirculating kit is required if recirculating,
 Air Flow and noise declarations made in line with CECED Code of Conduct.

 Measured according to EN61591 on largest pipe diameter.
 Sound power measured according to EN60704-3 on largest pipe diameter.
 From top of pan supports. Depending on the model, a 'Recirculating odour filter kit' will consist of the following items: Charcoal filter, flexible hose, air duct, fixing components, installation instructions.

Pyramid chimney hoods

Chimney hoods in a pyramid box design perfectly complement your hob installation, with a classic feel.

<sup>Power automatically reverts back to normal setting after intensive.

A type of recirculating kit is required if recirculating.

Air Flow and noise declarations made in line with CECE Code of Conduct.

Measured according to EN61591 on largest pipe diameter.

Sound power measured according to EN60704-3 on largest pipe diameter.

From top of pan supports. Depending on the model, a 'Recirculating odour filter kit' will consist of the following items: Charcoal filter, flexible hose, air duct, fixing components, installation instructions.</sup>

Canopy hoods

Serie 6

DHL785CGB

Bosch canopy cooker hoods are powerful ventilation systems that can be integrated into the cabinets above your hob. The hood provides excellent extraction of steam and cooking smells, as well as providing additional lighting for your cooking surfaces. Enjoy cooking in a cooler, steam-free environment.

Introducing the Bosch laundry range.

Effortlessly efficient, load after load.

Our built-in laundry appliances are designed to perform perfectly, load after load. And our advanced technology means your clothes are cleaned effectively and efficiently.

Serie 8

Perfection in every detail, our **Serie 8** range of laundry appliances stand out from the crowd with superior quality, results and first-class design. Clever features such as the TimeLight take away the guesswork on the progress of the wash. Unique innovations combined with energy efficiency deliver outstanding performance.

Serie 6

Our **Serie 6** range of laundry appliances offer a broad choice of specialist programmes and deliver high performance and effortless convenience to enhance your lifestyle.

Serie 4

Models within our Serie 4 range combine practical features and Bosch build quality in a consistent, value for money package.

Laundry functions explained.

TimeLight

The time remaining on your cycle is projected onto the floor. You can also view the programme progress status.

Select the programme for your wash and the droplet-shaped drum structure and asymmetrical paddles adjust the drum movements to powerful or gentle.

EcoSilence Drive

Our washing machines with EcoSilence Drive generate a noise level of just 41 decibels.

Aqua Stop

This security gives you peace of mind that the water will stop in the unlikely event of a leak.

Simply pause the cycle and the machine will automatically adjust the water. This allows you to add or remove items of any size to your wash.

Time Delay

Have your laundry ready when you need it. Just delay the start of your programme with one simple button.

AntiVibration Design

A spiral design on the side of the washing machine that increases stability and reduces vibration. This makes for a quieter machine with improved sound dampening.

Our Built-in washing machines have a drum capacity of up to 8kg, perfect for those busy households.

Explore more at www.bosch-home.co.uk

²A type of recirculating kit is required if recirculating.

^{**}Part Flow and noise declarations indice in this with close 50 cm 50 cm

Washing machines

Never miss an item again. Reload by Bosch.

For dropped socks, mistaken items with your whites or forgotten clothes, Reload function on Bosch washing machines allows you to add or remove clothing of any size to your washes. Simply pause the cycle and the machine will automatically adjust the water level to allow you to open the door. Reload your items and restart the wash.

TimeLight.

Bosch washing machines are so quiet sometimes it's hard to tell whether they are on or off, especially on fully-integrated models where there is no visible control panel. The TimeLight indicates the programme status and time remaining onto any floor surface.

Bosch integrated technology for a peaceful washing experience.

Enjoy the quiet life.

Our latest washing machines with **EcoSilence Drive™** generate a noise level of just 41 decibels - that's quieter than the sound of the sea at 55 decibels. The modern world is noisy enough, so it's good to know that Bosch technology can help make the home environment a little oasis of calm.

Less rock and roll.

We've also created **AntiVibration** technology to cut down noise. The sidewalls of the washing machine feature a spiral design that increases stability and reduces vibrations. Improved sound insulation and low noise shock absorbers further dampen the noise to provide quieter machines.

Silent night.

The special **Night Wash** programme makes washing machines some of the quietest in their class. The function reduces the high spin speed during the spin cycle so you can do your washing while everyone is sleeping without disturbing your family.

Washing machines

Ideal for families.

OPTIONAL ACCESSORIES Height adjustable feet

Explore more at www.bosch-home.co.uk

Connecting piece Floor securing kit

Ideal for families and busy households, the large 8kg capacity means you can wash more laundry in one go. A typical 8kg load could be made of king size bed linen, including 4 pillow cases. So whether you have lots of laundry, or fewer loads but with larger amounts, large capacity will make your laundry life easier.

Introducing the Bosch dishwasher range.

All our built-in dishwashers offer a range of advanced technologies as standard and additional options across the range to suit your individual requirements.

To help you choose the right Bosch dishwasher, we have divided them into the four ranges below.

Serie 8

Our Serie 8 range combines cutting-edge design and advanced technology, including Home Connect. The A+++ energy efficiency rating of this range is complemented by our **PerfectDry** function where moisture is absorbed before being released as hot air for energy-efficient drying. Exceptionally quiet, offering additional storage and flexible

Serie 6

Our Serie 6 range comes packed with technology, from energy and water-saving modes to quick washes for when time is at a premium. They also feature our clever PerfectDry technology and VarioFlex baskets with coloured touchpoints for

flexible loading solutions

and accommodating the

most awkward shaped

Serie 4

loading solutions.

Our Serie 4 range of models offers great value for money but does not compromise on Bosch build quality. They combine advanced energy and resourcesaving features. In addition, they offer flexible Vario and VarioFlex baskets with foldable racks in the top

and bottom baskets.

+ Serie 2

dishes.

Our Serie 2 dishwashers offer you the classic design with easy operation. They are the optimal solution for anyone who wants a reliable appliance with good value for money.

A clever function that saves energy by using less electricity to dry everything to perfection. And we do mean everything - plates, pans, glasses and all plastic items. Your lunch boxes and containers will be completely clean and perfectly dry, so you'll never have to pick up a tea towel to finish the job again.

The technology behind PerfectDry, unique to Bosch, is called Zeolith®. It is a process applied to every cycle that uses naturally occurring minerals, that heat up when they come into contact with water. The warm air is then distributed evenly over the load.

The dish dryer among dishwashers.

The technology behind **PerfectDry** uses **Zeolith®** minerals to help dry the load economically and efficiently. The dishwasher absorbs humidity from the washed dishes and the clever Zeolith® beads then transform that humidity into warm air that speeds up the drying process. So when you need a wash with brilliant drying results, it's time to choose Bosch.

Model shown: SMV68TDO6G

Want your dishes extra dry? No problem. This function gives you even more drying power when you need it. Just choose the Extra Dry option and more heat will be created to extend your load's drying cycle.

A dishwasher for every kitchen.

Where every pot has its place.

VarioFlex basket options.

VarioFlex Pro.

Stainless steel fascia's. Colour touch points as standard. Top rack flexible areas: 6 Bottom basket flexible areas: 8

VarioFlex.

Brand coloured plastic fascia's. Options with and without colour touch points.

Top rack flexible areas: 2 Bottom basket flexible areas: 4

Grey plastic fascia's. Top rack flexible areas: 0 Bottom basket flexible areas: 2

Choose the right appliance for you, for the space in your kitchen.

When selecting your built-in dishwasher you can choose from the 3 sizes/designs below, depending on your preference and the space within your kitchen.

Fully Intergrated 60cm

Semi-Integrated 60cm

Fully Intergrated 45cm

Different types of control.

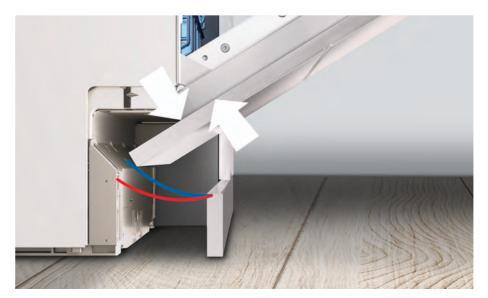

Black tap through control with LED indicators

VarioHinge.

VarioHinge.

The innovative Vario Hinge system is the optimal solution for challenging built-in dishwashers. In kitchens with a low plinth (<90mm) and extra long furniture fronts the door and appliances might collide into each other. With Vario Hinge, the furniture front slides up so the door opens perfectly without collision. This ensures perfect design of a fully integrated kitchen.

Dishwasher functions explained.

(Check model for available functions)

TimeLight

Bosch dishwashers are so quiet sometimes it's hard to tell whether they are on or off, especially on fully-integrated models where there is no visible control panel. The TimeLight indicates the programme status and time remaining onto any floor surface.

InfoLight

Coloured light beam projects onto the floor when the machine cycle is started, and turns off when finished.

EmotionLight

ights up the dishwasher cavity with 2 white LED lights.

VarioSpeed Plus

Our VarioSpeed Plus option reduces programme times without compromising on quality. So you still get hygienically clean and dry dishes but in about a third of the time of the standard programme - ideal for busy households and entertaining.

Place Settings

A selection of our dishwashers will hold up to 14 place settings in one load – perfect for larger households.

Home Connect

To stay at their best, different dishes and glassware need to be washed in different ways. With the Bosch Home Connect app, simply tell your dishwasher what's in the load and it'll work out the perfect program.

Door open assist

With OpenAssist you can open fully integrated dishwashers by simply touching the front of the unit. This partially opens the door, making it easy to load and unload the dishwasher. The handle-free dishwasher door is the optimal choice for modern designer kitchens with matching-style unit fronts. Activate the electronic child lock for the door to make this a double push to open.

Self-cleaning filters

Self cleaning filter system, with spray arms designed to direct water at the filters on every rotation.

Please note, self cleaning references are to reduce chances of filters being blocked during the cycle, regular maintenance of cleaning and cleaning filters is still recommended.

Dosage Assist

Get the most out of your detergent with Dosage Assist; a small area at the front of the top basket that catches the tablet when it's released during the cycle. It controls how the tablet is dissolved for optimum performance.

Machine care

Your dishwasher will help look after itself with this smart function. Optimising the water and energy consumption, it works on a short run time of 80-90 minutes at high temperatures. It eliminates limescale and grease deposits inside the dishwasher and works with a standard machine-care detergent. On selected Serie 8 and Serie 6 models, it will even remind you to run the programme every 30 cycles.

10 year anti-rust warranty

Our appliances are made from top quality materials and in addition to our standard appliance warranty, we provide a free of charge warranty against rusting-through of the dishwasher's inner cavity.

Helping to make your life quiet and more efficient.

Whisper quiet washing.

Bosch dishwashers are amongst the quietest. With revolutionary **EcoSilence Drive™** there are dishwashers in the range which operate at 39 decibels, that's even quieter than the sound of a bee buzzing!

With the Silence programme selected, the noise is reduced even further.

Energy efficiency.

The opportunity to save energy is now even better. Innovative technology in our dishwashers gets the most out of every single drop of water. Our most energy-efficient dishwashers in Serie 8 and Serie 6 ranges boast an A+++ energy rating.

Save water every load.

The ActiveWater™ technology in our dishwashers means it can take as little as 6.5 litres** of water to clean 13 place settings for a three-course meal***.

That's less water than it takes to fill a standard sized kitchen sink.

Bosch dishwasher programmes.

PROGRAMME NAME	ITEMS SUITABLE FOR PROGRAMME	TYPE OF SOILING	ADDITIONAL OPERATIONAL OPTIONS
Economy 50**	Mixed utensils & cutlery	Part dried, common household food remnants	All
Intensive 70	Pots, pans, non-sensitive utensils & cutlery	Very stubborn burned or dried-on food remains containing starch or protein	All

Home Connect is a service offered by Home Connect

For more information on

= yes, -= no
 *Based on 280 standard cleaning cycles using cold water fill, including consumption of the standby mode.
 *The Consumption per cleaning cycle of the "Eco 50" programme using cold water fill.
 *We would recommend our dishwashers are connected to the mains water supply where possible. However, they may also be connected to an external water softener as long as the water softener produces softened water less than mmo/litre (7.0"e) and the water softener in the appliance is turned off.
 Please contact product advise for further information. Water pressure required: 0.5-10 Bar. Flow rate: 10 litres per minute. Inlet valve connected directly to %" screwed joint.

Included accessories

• yes, - = no

Based on 280 standard cleaning cycles using cold water fill, including consumption of the standby mode.

The Consumption per cleaning cycle of the "Eco 50" programme using cold water fill.

We would recommend our dishwashers are connected to the mains water supply where possible. However, they may also be connected to an external water softener as long as the water softener produces softened water less than mmo/litre (7.0°e) and the water softener in the appliance is turned off.

Please contact product advise for further information. Water pressure required: 0.5-10 Bar. Flow rate: 10 litres per minute. Inlet valve connected directly to %" screwed joint.

60cm dishwashers

Introducing the Bosch refrigeration range.

Save more, waste less. Our range of built-in fridge freezers save you money thanks to their energy efficiency ratings. They are also packed with innovative technology to keep your food fresher for longer, so you'll throw out less and save on your weekly shopping bill.

To help you choose the right appliance, we have divided them into the four ranges below.

Serie 8

Cutting-edge design meets advanced technologies. All models in our **Serie 8** range are packed with energy efficient and labour saving features that save valuable time, effort and money - perfect for modern, busy households.

All models in our Serie 4 range combine practical features with Bosch build quality.

Serie 6

Our Serie 6 range of appliances combines energy efficient performance with convenient storage and superior food preservation.

Built to keep electricity costs down. With energy efficiency an increasing priority in homes, the Serie 2 refrigeration range is just as efficient as it is value for money.

Selecting the right Refrigeration for you

Built-in fridge freezer

Built-in fridge freezers blend seamlessly into your kitchen cabinets, making it easy to access your chilled food, and still providing plenty of storage for your frozen goods. Select from a variety of options to suit your needs for either larger fridge or freezer.

Built-in fridge

Built-in fridges built into your kitchen cabinets. Add to the expanded space you have for keeping your chilled food fresh.

Built-in freezer

Bosch has a wide range of built-in freezers to suit every size of kitchen. From tall upright freezers to compact under counter models, all Bosch freezers are built to maximise storage space and minimise energy consumption.

Built-under fridge and freezer

Our built-under fridges and freezers are ideal for those limited on space within the kitchen. Under-counter cooling solutions will allow you to have easy access to your chilled food whilst discreetly tucked behind the door.

American-style fridge freezer

American-style refrigerators are stylish and spacious, giving you copious amounts of room to store your chilled and frozen food. In addition to the premium design, some of these fridge freezers also contain great features such as ice and chilled water dispensers or, if you don't have a water connection select our model with a built-in water tank.

Hinges to fit in with your kitchen.

Fixed hinge

Fixed hinges allow heavier furniture doors to be fitted to the appliance, ideal for kitchen cabinets made from heavier hard wood. This also allows the door to be open at a wider angle, making the whole fridge cavity easily accessible.

Sliding hinge

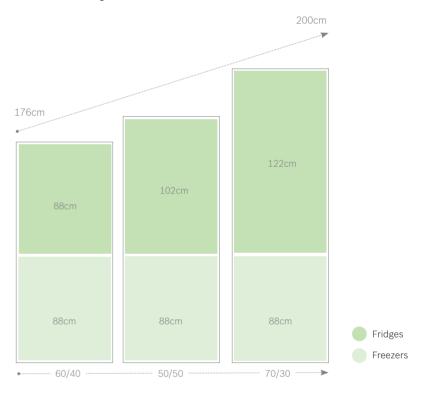

Sliding hinges are designed for integrated kitchens and are designed to sit between the appliance and the kitchen furniture, which is secured by a number of brackets. As you open the furniture door, the appliance door also opens thanks to the series of brackets.

Find the perfect combination for your kitchen.

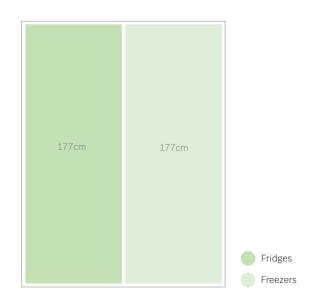

Over/under

Our over/under installation options are tailored to suit every family household need so you can conveniently 'stack' your fridge and freezer to ensure this. For those who shop little and often, try a smaller capacity fridge and freezer which doesn't impact on space. If you have a busy household and do a full weekly shop, a spacious 50/50 fridge freezer would be ideal.

Side by side

Single door fridges and freezers are designed to sit side by side to give you the double door effect. With hinges that can be fitted to either side of the appliances, you can choose which side you would like your fridge and freezer. Of course, if you want your appliances separate this is possible as well.

Whichever model you choose, you'll find a lot of reasons to love our Bosch cooling appliances.

NoFrost.

Never worry about having to defrost the freezer again. The NoFrost system prevents the build up of ice by automatically initiating the defrost operation as required. This also helps to maintain the appliance's energy efficiency.

LowFrost.

LowFrost cuts ice build up by half meaning you have to defrost your freezer less often, compared to approximately every 3 months for a static freezer, saving you energy and time.

SuperFreeze & SuperCool.

Activating the SuperFreeze function before you go shopping lowers the temperature for a short period, so anything new put into the freezer is frozen quickly. SuperCool on your fridge performs a similar task, keeping everything at the right storage temperature.

Save time with flexible storage.

Put away the weekly shop more easily, and get what you need faster too, thanks to height adjustable shelves and fully extendable drawers. The **EasyLift door shelf** can be raised to make space for taller items to be stored in the door. The **EasyAccess shelf** can be conveniently extended so you can more easily view the food in your fridge.

More space.

Our freezers are extra spacious meaning you will find it easy to fit everything in – perfect for busy households. The extra large **BigBox** is big enough for large bulky items.

♦ VitaFresh

With **VitaFresh**, you'll be able to store your fruit and vegetables safely to lock in the freshness. And with an adjustable humidity setting on the drawer, you'll be keeping your fresh food in a perfectly controlled environment.

You'll also find two drawers, one for fish and one for meat, with a temperature regulating slider which lets you lower the temperature up to 4°C lower than the rest of the fridge.

The **Series 6** fridge-freezers help you to live healthier. They not only offer you plenty of room for lots of fresh foods, drinks and even big pots and bowls, but as well the technology to store it optimally.

The **VitaFresh plus** freshness system guarantees ideal storage conditions at any time and ensures that fish, meat, fruit and vegetables stay fresher for longer. This makes our Series 6 fridge-freezer not only optimal for your food. But as well for yourself.

VitaFresh plus models have the added benefit of a convenient push button for humidity control.

♥ VitaFresh^{pro}

The **Series 8** fridges feature our best freshness system **VitaFresh pro**. It keeps food fresher for longer with temperatures from -1°C to +3°C while maintaining the perfect humidity level.

This combination of temperature and humidity helps you to protect all the aromas, essential nutrients and valuable vitamins in your fresh food. Hence, it is easier than ever to maintain a healthy diet with fresh fruit and vegetables every day.

Explanation of Refrigeration Icons.

(Check model for avalaible functions

NoFrost

Never defrost again, thanks to perfect protection from ice formation - that saves time and effort.

VitaFresh

LowFrost

Defrost less often thanks to lower ice formation - saves work and is energy-efficient.

BigBox

An extra-deep frozen food drawer for practical stacking of frozen foods containers or large frozen items like gateaux or pizzas.

MultiBox

Transparent drawer with wave bottom, ideal for the storage of fruits and vegetables.

SuperCool

Activating the SuperCooling function before you go shopping lowers the temperature for a short period, so your fresh shopping is kept at the right temperature.

Safety Glass

Strong glass shelves ensure heavier items can be stored safely.

EasyShelf Access

The shatterproof, frameless glass shelves are particularly easy to use, thanks to the smooth pull-out mechanism. And they also give you a clear view of your food at any time.

Finger Print Free

Your appliance will stay finger print free and looking clean and fresh

Energy efficient.

365 days a year, 24 hours a day, fridges and freezers are always on. In fact, they make up around 17% of the electricity used in the home, or even more if it's a particularly old model.* That's why we design our fridges and freezers to be as energy efficient as possible, and we're proud to be able to offer so many right across our ranges.

Quietly does it.

As there could be many small and larger hands opening and shutting the fridge door, it's nice to know that we've integrated **SoftClosing doors** in many models – so doors do not get accidentally left open.

Easy to Clean Magnetic Door Seals

The magnetic door seals on all of our refrigeration ranges are removable, making them easy to clean and/or replace when necessary.

Installation tips

Ovens, microwaves and hobs

Flexibility to choose the way you want to cook

Whether you're creating a feast for fifteen, steaming a healthy meal, cooking for one or popping on a frozen meal, Bosch appliances have the flexibility to do the job.

Built-in single and double ovens

The beauty of built-in ovens is that they can be housed in a variety of positions. For optimum convenience, install in standard tall cabinets at a level to suit the main users. Install single ovens alone, or together with a combination oven/microwave, built-in microwave, steam or combination steam oven. Hobs need to be bought separately.

Built-under single and double ovens

Single ovens can also be installed under the work surface, directly below the hob, or apart from it. Bosch also offers double ovens that are specifically designed for installation under the work surface. Hobs need to be bought separately.

Compact steam, combination ovens and combination microwave ovens

Compact appliances offer a range of combination or specialist functions – for example steam cooking is one of the healthiest methods of cooking available – and are ideal if space is at a premium. If you have more room, they're perfect for providing extra capacity and flexibility above or alongside a suitable built-in single oven. Build in to a standard tall or base cabinet with or without a warming drawer.

Standard built-in microwaves

Depending on the model, you can install into a tall housing, or in a wall cupboard. Wall cupboard models are available in 50cm or 60cm widths.

Hobs

Choose from gas, induction, ceramic or sealed plate. Available in 6 widths: 30, 60, 70, 75, 80 or 90cm.

Installation tips

Hoods

Keep air fresh and free of cooking smells

Extractor hoods are an integral part of a clean and fresh working kitchen environment. Not only do Bosch extractor hoods look good and add a professional touch to your kitchen, they also deal quietly and efficiently with the key tasks of eliminating unwanted odours and removing grease and moisture from the kitchen.

Chimney extractor hoods

Choose between wall-mounted models or an island version to create a striking focal point in the kitchen. Some models are further enhanced by glass canopies. Available 60, 75 and 90cm wide.

Chimney extractor easy mounting system

Installing your new cooker hood in the kitchen is quick and straightforward with the patented easy mounting system. The self-levelling fixing rings allow you to precision adjust the horizontal position of the hood by up to a 6mm radius.

Telescopic extractor

Ideal where an unobtrusive extractor is required. Built into a wall cabinet above the hob, it can be extended when in use, and retracted when not. Use the special handle profile accessory, or if you prefer, a matching pelmet from your kitchen supplier. 60 or 90cm wide.

Conventional extractor hoods

Ideal where space is at a premium, these 14cm tall extractors can be mounted directly to the wall or suspended beneath a reduced height wall cupboard. 60cm wide.

Integrated extractor hoods

Integrated extractor hoods are designed to be mounted between two cabinets with a matching furniture door affixed to the front.

Canopy extractor hoods

Designed to fit discreetly into the base of a wall cupboard, or specially designed furniture canopy with operation from below.

Choosing the correct extractor

As a guideline, the air in the room should be changed 6-12 times per hour. Calculate the floor area in square metres and multiply by the height of the room in metres. Then divide the maximum extraction rate of your chosen hood by the figure calculated above. The resulting figure should be at least 7, but preferably as close to 12 as possible.

Example

Kitchen (H x W x D) metres 2.1 x 4.5 x 4.2 = 39.7m³.

Assume a maximum of 12 air changes per hour – multiply 39.7m³ by 12 = 476m³/h. Choose a hood capable of extracting at least this amount of air per hour

- e.g. DWB96DM50B (max ducted extraction rate intensive 580m³ per hour).

To avoid excessive noise, try to select a model which meets the above requirements on an intermediate speed, rather than at the highest speed.

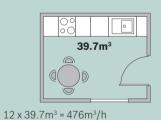

Quick checklist

Type of hood Chimney

- Telescopic
- Conventional
- Re-circulated Integrated
- Width of hood

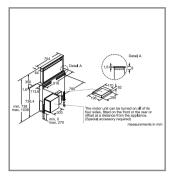

Downdraft

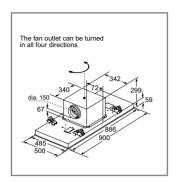

Ducted

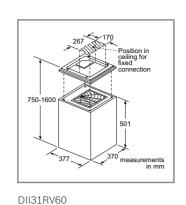

- Canopy
- Size of kitchen
- Ceiling
- Required extraction rate

Installation tips

Dishwashers

Integrated and semi-integrated dishwashers

Energy and water-efficient with outstanding performance, Bosch integrated dishwashers quietly do all the hard work for you behind closed doors.

Fully integrated dishwashers

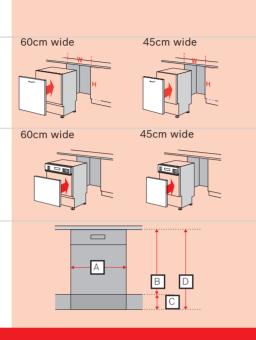

These models can be built under a worktop or sink drainer, between two units or at the end of a run of units. A furniture door is mounted on the appliance door so that the dishwasher is indistinguishable from other kitchen cabinets. Choose from full size 60cm wide, or slimline 45cm wide.

Semi-integrated dishwashers

A furniture door is mounted on the appliance door, so all that is seen of the dishwasher itself is the stylish control panel. Can be built under a worktop or sink drainer, between two units or at the end of a run of units. Available full size 60cm wide.

Built-in dimensions (60m wide)

If you have a recess height of 81.5 – 87.5cm, plan for an 81cm dishwasher. The appliance feet may be screwed out to a total height of 87.5cm. Or, if you have a recess height of 86.5 – 92.5cm plan for an 86cm dishwasher. The appliance feet screw out to a total height of 92.5cm.
