

For those who want more from cooking World première at IFA: The new Bosch Cookit makes cooking easier than ever before

September 2019

PI 8869-0719

- ▶ The first food processor from Bosch with cooking function offers versatile cooking options: Guided Cooking, numerous automatic programmes and manual cooking mode
- ▶ Bosch Cookit is the only appliance on the market to support temperatures up to 200 degrees and therefore perfect roasting aromas
- ▶ The smart XL pot with three-litre capacity is also ideal for more lavish family meals
- ▶ Cooking inspirations can be sent with ultimate ease from the recipe pool to Cookit via the Home Connect App, with the app illustrating the next preparation steps required and the remaining cooking time

Berlin/Munich. Cooking for family is a source of pleasure for many – it is well known that the way to the heart is through the stomach. Old family recipes, children's favourite meals and especially everyday dishes are usually high up the menu. After all, homemade fare not only tastes delicious, it is also simply the best. Freshly cooked meals made from the best of carefully chosen ingredients and prepared lovingly are good for body and soul. With the demands of a challenging job, numerous commitments and activities with family and friends, there is often little time in people's hectic everyday lives for preparing tasty home-cooked meals.

Bosch is now launching its first connected multifunctional food processor with cooking function on the market with Cookit, which responds precisely to this challenge. Thanks to a host of time-saving features, it is really easy to cook fresh and tasty meals at home every day.

Three cooking modes with limitless creativity in the kitchen

Give creativity free rein, trust in the numerous automatic programmes or maybe

just use the step-by-step instructions today when cooking. All three cooking modes are possible with Cookit. Use the step-by-step instructions, or the Guided Cooking as it is known, to choose a favourite recipe from the many pre-installed options offered and then simply try it out at home. Or take advantage of the support offered by the automatic programmes. For ultimate fun experimenting, Cookit offers manual cooking too. So those who just want to cook their way can use all of Cookit's functions to prepare their dish. Cookit therefore allows a completely new type of personalised cooking.

It's hotting up: precise temperature control up to 200°C

Cookit impresses not just thanks to individuality, but of course also because of the technical precision that is typical of Bosch. A wide variety of dishes can be served up to perfection at precise temperatures above 37 degrees – from gently fermented yoghurt to salmon fillet cooked sous vide to juicy fillet steak. Things can really heat up in the kitchen with Cookit, with maximum temperatures of up to 200 degrees – also with manual cooking. Caramelising, crisp browning and real roasting aromas could not be easier.

Smart pot for ultimate enjoyment

With its XL pot with three-litre capacity, Cookit is ideal for more lavish family meals. Second helping? Not a problem – there's always plenty to go around with Cookit. But the pot can do even more. In terms of diameter, it corresponds to an average-sized pan and also allows steaks and vegetables to be sautéed on its extensive surface. Thanks to smart sensor technology inside the pot, two additional heat sensors continuously measure and align the temperature setting on the bottom and insides. This ensures absolute precision and perfect results.

Professional toolkits for the kitchen

Those who like variety when cooking need a wealth of utensils for the individual cooking steps to prepare the individual ingredients and thus ensure perfect results. Cookit provides this equipment automatically in the kitchen: fitted with multiple professional accessories, Cookit ensures the best results for every dish. Whether shredding, kneading or mixing – with universal blades, 3D mixing and twin beater whisks, preparations are quick, precise and uncomplicated. Even cutting fine vegetables strips is really convenient thanks to the special cutting and shredding discs. Small and large quantities or even three different food items can be prepared gently at the same time with the steam cooking accessories supplied.

Connectivity for even greater convenience and possibilities

The connected Cookit can be used even more conveniently with the Home Connect App. The constant stream of new recipes can be sent with ease from the

extensive recipe pool to Cookit, including multiple inspirations from the Kitchen Stories recipe platform. At the same time, the Home Connect App allows the current cooking progress to be tracked flexibly – on the smart phone or even via innovative voice control. For example, users can ask Amazon Alexa from the comfort of the couch when food will be ready and promptly receive the response “Your risotto will be ready in ten minutes”. The attractive Home Connect partner network already makes Cookit an integral part of tomorrow’s connected kitchen.

65 years’ experience combined in one appliance

Cookit combines more than 65 years of Bosch experience and know-how in producing food processors, ovens and cooktops with the latest digital technology and thus masters the balancing act between maximum versatility and perfect results. Thanks to absolute sensor precision, maximum achievable temperature, large cooking volume and digital support, Cookit is the ideal cooking partner for every day and every occasion. Home cooking is now incredibly simple and always perfect.

The Bosch Cookit will be presented for the first time at IFA 2019 and will be available from the beginning of 2020.
